PREFACE.

THE chief object of the Handbook for New England is to supply the place of a guide in a land where professional guides cannot be found, and to assist the traveller in gaining the greatest possible amount of pleasure and information while passing through the most ancient and interesting district of Anglo-Saxon America. New England has hitherto been but casually treated in books which cover wider sections of country ; special localities within its borders have been described with more or less fidelity in local guide-books ; but the present volume is the first which has been devoted to its treatment according to the most approved principles of the European works of similar purpose and character. The Handbook is designed to enable travellers to visit all or any of the notable places in New England, with economy of money, time, and temper, by giving lists of the hotels with their prices, descriptions of the various routes by land and water, and maps and plans of the principal cities. The letter-press contains epitomes of the histories of the old coast and border towns, statements of the principal scenic attractions, descriptions of the art and architecture of the cities, biographical sketches in connection with the birthplaces of eminent men, and statistics of the chief industries of the included States. The half-forgotten but worthy and heroic records of the early colonial era and the French and Indian wars have received special attention in connection with the localities rendered classic in those remote days, while numerous Indian legends will be found in various places. The operations of the Wars of the Revolution and of 1812 (so far as they affected this section of the Republic) have been carefully studied and localized, and the rise of the great modern manufacturing cities has been traced

and recorded. The famous summer-resorts — among the mountains and by the sea — with which New England abounds, and which are thronged by visitors from all parts of the country, have been described at length in these pages.

The plan and structure of the book, its system of treatment and forms of abbreviation, have been derived from the European Handbooks of Karl Baedeker. The typography, binding, and system of city plans also resemble those of Baedeker, and hence the grand desiderata of compactness and portability, which have made his works the most popular in Europe, have also been attained in the present volume. Nearly all the facts concerning the routes, hotels, and scenic attractions have been framed or verified from the Editor's personal experience, after fifteen months of almost incessant travelling for this express purpose. But infallibility is impossible in a work of this nature, especially amid the rapid changes which are ever going on in America, and hence the Editor would be grateful for any *bonâ fide* corrections or suggestions with which either travellers or residents may favor him. He would also thankfully acknowledge his indebtedness to the gentlemen who have revised the book in advance of publication.

The maps and plans of cities have been prepared with the greatest care, and will doubtless prove of material service to all who may trust to their directions. They are based on the system of lettered and numbered squares, with figures corresponding to similar figures attached to lists of the chief public buildings, hotels, churches, and notable objects. The most trustworthy time-tables are found in "Snow's Pathfinder Railway Guide," with map, published weekly at Boston (price 15 c.). The hotels indicated by asterisks are those which are believed by the Editor to be the most comfortable and elegant.

PLANS OF CITIES, &c.

Boston, Hartford, Montreal, New Haven, New York, Newport, Portland, Providence, Quebec, Central Park, Mount Auburn Cemetery.

ABBREVIATIONS.

M. = mile ; hr. = hour ; min. = minute ; ft. = foot or feet ; r. = right ; l. = left ; N. = north ; S. = south ; E. = east ; W. = west.

ASTERISKS

denote objects deserving of special attention.

NEW ENGLAND.

"Nobis eternum reliquerunt monumentum,
Novanglorum mœnia."

"Nova Anglia": a Latin poem by Morrell, 1625.

NEW ENGLAND is the northeastern portion of the United States, and comprises the States of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, and Rhode Island. It is bounded on the S. by the Atlantic Ocean and Long Island Sound, on the W. by the State of New York, on the N. by the Province of Quebec, and on the E. by the province of New Brunswick and the Atlantic Ocean. It lies between the latitudes 41° and 48° N. and the longitudes 67° and 74° W. from Greenwich, and has an area of 65,000 square M., with a population of 3,487,924 (census of 1870). The principal religious sect is the Congregational, which has 190,473 members; the Episcopal Church has 38,098; and the Methodists have 70,000. The Catholics and the Baptists (114,000) are also strong in numbers, while Unitarianism has here its chief power. A high standard of education prevails among the people, and is supported by an extensive school-system and several renowned colleges. The New-Englanders have always been distinguished for a marked individuality of thought, by reason of which the most advanced and radical schools of philosophy, politics, and religion have arisen or have been developed here. The nature of the climate and of the soil has rendered agriculture less profitable than at the West, and the strength of the section has been found in the establishment and maintenance of vast manufacturing industries. The coast extends in a direct line for over 700 M., with many spacious harbors; and the maritime cities are celebrated for their skilful seamen and for their large fleets of merchant-ships. This district was granted by James I. to the Plymouth Company (in 1606) under the name of North Virginia; but Capt. John Smith, having surveyed and mapped the coast in 1614, gave it the name of New England.

Maine

is bounded on the S. by the Atlantic, on the W. by N. H., on the N. by Canada, and on the E. by New Brunswick. It is the most northeastern of the United States, and the largest of the States of New England. It has an area of 31,766 square M., with a population of 626,915, and a valuation of \$223,254,860. It is divided into 16 counties, and has 13 small cities,

the chief of which is Portland, while the capital is Augusta, at the head of ship-navigation on the Kennebec River. The coast of "hundred-harbored Maine" is remarkably picturesque, with deep fiords running up between bold peninsulas, and with archipelagos of beautiful islands resting in quiet and extensive bays. The direct line of the coast from Kittery Point to Quoddy Head is 278 M., but the deep curves of the bays and estuaries give an actual shore-line of nearly 2,500 M. Mt. Desert (60,000 acres) is the largest of the many islands which front the ocean, and Monhegan is the most distant from the mainland. The great rivers Penobscot, Kennebec, and St. Croix empty into the sea on this coast, and furnish wide and convenient harbors. Nearly $\frac{3}{4}$ of the area of Maine is still covered with primeval forests, and the lumber-trade is the chief industry of the State. The trees are felled and hauled to the water-courses during the winter, and in the spring they are united in vast rafts and floated down to the river cities. In the S. and E. of the great forest is a broken range of mountains, the loftiest of which is Mt. Katahdin (5,385 ft. high). $\frac{1}{10}$ of Maine is covered with water, the principal lakes being Moosehead, Chesuncook, and the Rangeley, Madawaska, and Schoodic groups.

The Maine coast was first visited by Gosnold in 1602, and in 1607 the short-lived Sagadahoc colony settled at the mouth of the Kennebec River. The French colonies at the St. Croix River and Mt. Desert were but ephemeral, and several other attempts proved equally unsuccessful, partly owing to the hostility between the claimants of the territory (the French and English), and the distrust of the Indians for both of them. The island of Monhegan was settled in 1622, and Saco was founded in 1623. When the Plymouth Company broke up, in 1635, Sir Ferdinando Gorges received by royal charter the province of Maine (then first so called). In 1642 his son founded the city of Gorgeana (York), but in 1651 Mass. absorbed Maine, being sustained by the exigencies of the times and by the Puritan Parliament of England. After some resistance on the part of the Maine proprietors, Mass. bought out their interest, and thenceforward ruled the northern province for nearly 170 years with a firm and beneficial sway. From 1675 until 1760 a disastrous succession of Indian wars ensued, in which every twentieth settler was killed or captured and many towns were destroyed. The bombardment of Portland (1775) and the naval battle at Castine (1779) were the chief events during the Revolution, but the coast was badly harried during the War of 1812. In 1820 Maine was admitted into the Union as the twenty-third State.

New Hampshire

is bounded on the S. by Mass., on the W. by Vt., on the N. by the province of Quebec, and on the E. by Maine and the Atlantic. It has an

area of 9,280 square M., with a population of 318,300, and a valuation of \$162,987,177. It is divided into 10 counties, with 234 towns and 5 cities, and the capital is Concord, on the Merrimac River. There is an ocean-front of 18 M., which is bordered by level plains stretching inland, while just off the coast are the remarkable Isles of Shoals, formerly famed for their fisheries and now a favorite summer-resort. Beyond the sea-shore plains the country assumes a more rugged and broken appearance, with numerous isolated summits and hill-ranges which culminate in the White Mts., covering over 40 square M. of a picturesque district which is called "the Switzerland of America." The lakes of N. H. cover 110,000 acres, and the most beautiful of their number is Winnepesaukee, which has 69 square M. of extent, and contains 300 islands. The soil of the State is not fertile, but it has much mineral wealth; and the climate, though severe, is very healthful. There are extensive primeval forests in the N. (Coo's County), in whose recesses wolves and bears still are found; and the remote lakes and streams afford fine fishing. The Connecticut, Saco, and Merrimac Rivers have their sources in N. H., and on the water-power afforded by the latter large manufacturing cities are located. There are 42 national banks, with a capital of \$5,135,000; and 54 savings-banks, with deposits amounting to \$25,303,235. The manufactures of cotton and woollen goods, iron and leather, are the chief mechanical industries, and centre at the cities of Manchester and Nashua. The press of the State consists of 8 daily papers, 36 weeklies, and 6 monthlies.

The N. H. coast was first visited by the Europeans in 1614, and settlements were founded at Dover and Portsmouth about 1623. The district was for many years under the government of Mass., and was afterwards ceded to N. Y., while the incessant inroads of the Indians devastated the frontiers for nearly 80 years. The chief incidents of these wars were the destruction of Dover (1689), and the battle of Pequawket. In 1741 N. H. became a royal province, and in 1776 it led the secession from the British Empire, giving freely of its men and money to the cause of independence.

Vermont

is bounded on the S. by Mass., on the W. by N. Y. and Lake Champlain, on the N. by Canada, and on the E. by N. H. It has an area of 9,056 M., with a population of 330,551, and a valuation of \$142,612,356. It is divided into 14 counties, and has but 2 small cities, the great majority of the people being engaged in farming. The centre of the State is traversed from N. to S. by the Green Mts., whose smooth and rounded summits form a marked contrast with the sharp peaks of the White Mts. The chief of the Green Mts. are Mt. Mansfield (4,359 ft.), Camel's Hump (4,188 ft.), Killington and Pico Peaks, and Mt. Ascutney. The E. slope is watered by several streams which flow into the Connecticut River,

while the W. slope sinks into the broad and fertile plains which border Lake Champlain and are traversed by Otter Creek and the Winooski, Lamoille, and Missisquoi Rivers. The Lakes Memphremagog, Willoughby, Dunmore, Bomaseen, and St. Catharine are pleasant summer-resorts, and the great Lake Champlain affords an avenue for an extensive international commerce, whose chief centre is the port of Burlington. The evergreen forests on the mountains alternate with broad pasture-plains, and the deciduous groves on the lowlands are interspersed with tillage-fields of rich loamy soil, so that Vt. has become the most agricultural of the Northern States, and exceeds all others (proportionally to her population) in the production of wool, live stock, maple sugar, butter and cheese, hay, hops, and potatoes. In 1871 there were made here 8,000 tons of butter, 2,400 tons of cheese, and 4,500 tons of maple-sugar. Extensive quarries of fine statuary and variegated marble and serpentine have been opened in the S. counties, and vast quantities of slate have been exported from the same region.

The first European who saw Vt. was Jacques Cartier, who, in 1535, looked upon its high ridges from Mount Royal (Montreal). Its coast was explored by Champlain and others in 1609, and prosperous French settlements were made (in Addison) later in the 17th century. In 1724 Mass. built Fort Dummer (near the present town of Brattleboro); but the numbers and ferocity of the Indians prevented colonization until after the conquest of Canada (1760). The territory was then partly occupied under grants from N. H., until it was ceded to N. Y.; and thereafter ensued a controversy in which the settlers successfully resisted the authorities of N. Y. until the outbreak of the Revolution, when they proclaimed Vermont (*Verts Monts*, or Green Mts.) an independent State. Congress twice refused to acknowledge the new State, although its soldiers ("the Green Mountain Boys") captured Ticonderoga and Crown Point, and annihilated the flower of Burgoyne's German auxiliaries at the battle of Bennington. In 1791, after paying New York \$30,000 in liquidation of all claims, Vt. was admitted into the Union (the 14th State), and since that time has prospered and steadily increased in wealth and population.

Massachusetts

is bounded on the S. by Conn. and R. I., on the W. by N. Y., on the N. by Vt. and N. H., and on the E. by the Atlantic. It has an area of 7,800 square M., with 1,457,351 inhabitants, and a valuation of \$2,132,148,741. The soil is not fertile, but considerable crops are gained by careful cultivation; and the best land is found in the valleys of the Connecticut and Housatonic Rivers. There is but little level land in the State, and in the W. counties the Taconic and Hoosac Ranges of mountains afford great diversity of scenery. The Connecticut River flows through a garden-like

valley, with several prosperous towns ; and the Merrimac (in the N. E.) affords a vast water-power to Lowell and Lawrence, and passes into the sea at Newburyport. The climate is severe in the hill-countries, and is very variable on the coast, — the mean temperature being between 44° and 51° . As far back as 1855 the annual farm products amounted to over \$ 21,000,000, and at that time the State had 2,250,000 apple-trees. Profitable beds of iron ore and glass sand have been developed, and the exportation of marble (from Berkshire County) and granite (from Quincy and Cape Ann) has become a lucrative business. The State has been celebrated for the number and excellence of its ships, and for the skill and enterprise of its seamen. Granite, ice, and fish are among the chief articles of export ; the latter being brought in by the large fishing-fleets of Cape Cod and Gloucester. The manufacturing interests of the State are of immense extent and wide variety, and their products for the year 1870 were valued at \$550,000,000. Boots and shoes, cotton goods, woollens, iron, and paper, are the chief manufactures (named in the order of their importance). There are 160 savings-banks, with deposits amounting to \$ 163,535,943. In 1871 the State debt was \$ 29,630,364, of which \$ 12,000,000 was for railroad loans, and \$ 16,500,000 represented the unpaid balance of the war loan.

The prevailing religious sect is the Congregational, the Baptist, Methodist, and Unitarian churches being also strong, while the Roman Catholics are rapidly attaining great power and influence. The educational institutions of the State are admirably arranged and have a high reputation, their efficiency being assured by the maintenance of four normal schools, five colleges, and Harvard University. The militia is kept in a state of high efficiency and discipline, and is mostly composed of veterans of the War of 1861-5.

The coast of Mass. was first visited by the Norwegian mariners Leif and Thorwald, about the year 1000. After several attempts at colonization, which were frustrated by the powerful native tribes, the Norsemen abandoned the country (which, from its fruitfulness, they had named Vinland). In 1497 John and Sebastian Cabot cruised along the coast, and were followed by Cortereal, Verrazzani, and Gomez. In 1602 Gosnold explored the S. E. islands, and planted an ephemeral colony on Cuttyhunk, near New Bedford. Pring, Champlain, and Weymouth soon after passed along the coast, while Capt. John Smith, following them in 1614, made a map of the coast and islands. Dec. 21, 1620, the ship "Mayflower" arrived at Plymouth with 102 Pilgrims, who had been driven from England by religious persecution, and who founded here the first permanent colony in Mass. Salem was settled in 1628, and Boston in 1630, by Puritan exiles, and the Atlantic coast and the Connecticut valley were soon dotted with villages of bold and hardy immigrants.

The Pequot War (1637) and King Philip's War (1675-6) caused a fearful loss of life and property, and several of the valley towns were utterly destroyed before the colonial forces could crush the insurgent tribes. In 1689 the province revolted against the royal authorities, and the country-people took Boston and its fortifications and guard-frigate, and imprisoned the governor (Sir Edmund Andros). In 1692 Plymouth was united to Massachusetts, and thereafter, until the conquest of Canada in 1760, the province was foremost in the wars with the French colonies in the N. Many of her towns were destroyed by Indian raids, and the W. frontier was nearly depopulated; but the general prosperity was unchecked, and when the British Parliament commenced its unjust oppressions, the province had 250,000 inhabitants, many of whom were trained veterans of the Canadian Wars. In face of the royal army which had been moved into Boston, the men of Massachusetts opened correspondences which brought about a colonial union for mutual defence, and enrolled themselves as minute-men, ready to march against the British troops at a minute's notice. The battles of Concord and Lexington were followed by a general appeal to arms; and the siege of Boston, the Battle of Bunker Hill, and the American occupation of the city came in rapid succession. After these events the scene of war was transferred to New York and the South, where the Massachusetts regiments won high honor, especially in the victorious campaign against Burgoyne's invading army. In 1780 the State Constitution was framed, and in 1786 a serious revolt occurred in the W. counties, caused by the pressure of enormous taxes. This rising (which was headed by Daniel Shays) was put down after a few skirmishes. In the War of 1812 the State theoretically confined her exertions to the defence of her own coast, though thousands of her seamen entered the national navy. Extensive manufacturing interests now rose rapidly into view, and a network of railroads was stretched across the State. During the War for the Union (1861-5) Massachusetts put forth her utmost strength, and gave 158,380 men to the armies of the Republic, besides incurring a war-debt of over \$ 50,000,000.

Connecticut

is bounded on the S. by Long Island Sound, on the W. by New York, on the N. by Mass., and on the E. by R. I. It has an area of 4,730 square M., with 537,454 inhabitants, and a valuation of \$ 532,951,061. There are 8 counties, 160 towns, and 7 cities. The soil is usually rugged and comparatively unproductive, although the river-valleys afford some rich lands, and considerable crops are raised by laborious cultivation. The tobacco-crop of 1870 amounted to 8,328,798 pounds, and in the same year were made 6,716,007 pounds of butter and 563,328 tons of hay. "The manufactures of the State are more general, multifarious, and productive than

those of any other people of similar means," — clocks and carriages, fire-arms, tin and brittania ware, sewing-machines, iron and rubber goods being the chief articles of production. There are 66 savings-banks, with deposits amounting to \$ 55,297,705, and many wealthy and powerful insurance companies. New Haven has a lucrative West India trade, while New London has a considerable number of vessels engaged in sealing and whaling. The Conn. River is famous for its valuable fisheries, which have been revived by stocking the stream (1867-70) with 154,000,000 young shad.

The chief religious sect is the Congregational, and the Episcopal Church has more strength here than in any other State (proportionally to the population). There are three colleges, Yale (Cong.), Trinity (Epis.), and Wesleyan (Meth.), with 4 schools of theology. The educational interests of the State are well and efficiently carried on, under the support of the great funds derived from the sale of the Western Reserve lands. The charitable and correctional institutions of the State are remarkable for their influence and efficiency. The ingenuity, enterprise, and individuality of the men of Conn. have given them an advanced place in the mercantile and political activities of the Republic; and "probably no country of similar extent has sent abroad so vast a horde of emigrants in proportion to its population."

The coast and rivers of Conn. were first explored by Adrian Block and other Dutch mariners (1614-33); the district was in the English Plymouth Patent of 1620, and was chartered in 1631. About that time the river Indians were subjugated by the Pequots, and Seguin, their chief, sent to New York, Plymouth, and Boston for help. In 1633 a small Dutch colony landed at Hartford; and in the same year a Plymouth vessel passed up to Windsor, where a settlement was planted. These were merely trading-posts, but Wethersfield was occupied in 1634, and in 1636 three nomadic churches were led by their pastors through the wilderness from Boston to the Conn. River, where they settled at Hartford, Windsor, and Wethersfield. Saybrook was founded and fortified in 1635, and in 1637 the first legislature declared war against the Pequot Indians, who were defeated and speedily crushed by the colonial train-bands, aided by the friendly tribes. In April, 1638, New Haven was settled, and soon after the other coast-towns were founded. In 1639 a remarkable constitution (which acknowledged no higher human power than the people of Conn.) was adopted, and in 1662 a royal charter was obtained. After the union of the independent colonies of Conn. (Hartford) and New Haven, in 1665, the two towns were made semi-capitals of the province (and State), and so remained until 1873, when Hartford was made the sole capital. The State stood honorably among the foremost during the Revolution, although the towns along the coast were pillaged and destroyed by raids from the Hessian and Tory garrison at New York.

Rhode Island

is bounded on the S. by the Atlantic, on the W. by Conn., and on the N. and E. by Mass. . It is the smallest State in the Union, and has an area of 1,046 square M., with 217,353 inhabitants, and a valuation of \$ 296,965,-646. There are 5 counties, with 32 towns, and 2 cities. The soil is unproductive, and but little farming is done save on the fertile plains of the Island of Aquidneck. The State is nearly cut in two by Narragansett Bay, which runs inland for 30 M. (with a width of 3-12 M.), and contains several islands, the chief of which is Aquidneck (or Rhode Island) on whose S. end is the famous summer-resort, Newport. 11 M. S. E. of Point Judith is Block Island, which pertains to this State. The climate is mild and equable, from its vicinity to the sea and exposure to the S.; and the greater part of the State is a region of low hills or sea-shore plains. The principal mechanical industries are at Providence, Pawtucket, Woonsocket, and Westerly; and as far back as 1860 the State reported 1,200 manufacturing establishments, with an aggregate capital of \$24,380,000, using annually \$24,410,000 worth of raw material, and producing over \$50,000,000 worth of goods. The 33 savings-banks of the State hold in deposit \$36,289,703. The charitable and correctional institutions are mostly about Providence, where is also the seat of Brown University, a flourishing school under the care of the Baptist Church, which is the prevailing sect in the State.

Rhode Island was probably colonized by the Norsemen in the 10th and 11th centuries, but was afterwards abandoned for centuries, until the coming of Verrazzani in 1524. He remained at Aquidneck (which was then thickly populated by Indians) for two weeks. In 1636 Roger Williams, having been banished from Mass., came down the Seekonk River with 5 companions, and founded a settlement which he named Providence, in acknowledgment of "God's merciful providence to him in his distress." In 1638 Wm. Coddington and another party of exiles founded Newport; in 1642 a third banished company settled at Warwick; and in 1643 and 1663 these colonies united under a royal charter. The powerful Narragansett Indians dwelt in Rhode Island, and when King Philip's War broke out they ravaged all the outlying settlements and killed many of the colonists. The New England colonies, ignoring the existence of heretical Rhode Island, and rejecting its advice, marched an army across to the Narragansett country, and, after a terrific assault, stormed the Indian stronghold and crushed the tribe. The little province gave freely of her men and money in the French wars, and sent some of the best troops to the American siege of Boston. In Dec., 1776, Newport was taken by the British, who held it for 3 years, but were prevented by the New England militia from passing farther into the country. In 1861 the men of Rhode Island were among the first to reach the imperilled national capital.

INTRODUCTION.

I. Language.

THE people of New England claim that they speak the English language more correctly than it is spoken elsewhere in the world. Be this as it may, it is certain that this one language is universally used throughout the six States, and the traveller is delivered from the trouble caused in Great Britain by its four languages and numerous dialects, or in France by its three languages and provincial *patois*. The European tongues are taught in the high-schools all over the country, but the instruction is purely theoretical, and the number who can talk French, German, or Italian is very small. Tourists, who wish to travel among the remoter districts of New England, should be well acquainted with the language, which is "the English of Elizabeth," with a few local idioms.

II. Money and Travelling Expenses.

Since the war for the Union (1861-65) gold and silver coin has disappeared from circulation, and been replaced by U. S. Treasury notes and National Bank bills for values upwards of one dollar, and by fractional currency issued by the Treasury, of the values of 10, 15, 25, and 50 cts. Nickel and mixed coins of 1, 2, 3, and 5 cts. value, abound. This paper currency is at a discount for gold of from 10 to 15 per ct. The currency of Canada is either coin or paper at a coin value.

It is more expensive to travel in New England than in any part of Western Europe. The usual charge per day at the best hotels is \$4 to \$4.50, with considerable reductions when a prolonged stay is made at one place. Tourists who travel slowly through the country and stop at the less pretentious hotels (which are usually comfortable, and always safe) may easily limit their expenses to \$25 or \$30 per week. Those who frequent hotels of the highest class, and indulge much in carriage-riding, will find \$45 to \$50 per week none too much. At most of the sea-beaches board can be secured at \$10 or \$15 per week; while in the quieter and less fashionable villages about the mountains, substantial fare may be found in broad old farm-houses, for \$6 to \$10 per week.

III. Railways and Steamboats.

Railway travelling in America is much more comfortable, yet more expensive and dangerous, than in the Old World. There is but one class of

tickets, the average fares being about three cts. a mile. On each train is a smoking-car, easily accessible from the other cars, and fitted with tables for card-playing. It is prudent to decline playing with strangers, as gamblers sometimes practice their arts here, in spite of the watchfulness of the officers of the train. To nearly every through train on the grand routes is attached one or more Pullman cars, which are richly carpeted and curtained, and profusely furnished with sofas, easy-chairs, tables, mirrors, and fronted with broad plate glass windows. These cars being well balanced and running on twelve wheels, glide over the rails with great ease. By night they are ingeniously changed into sleeping-rooms, with comfortable beds. The extra fares on the palace cars are collected by men attached to them; the price of a night's lodging (in which time one can go from Boston to New York) is \$2. The fares by steamboat are somewhat lower than by rail, and (in case of a night passage) include a sleeping-berth in the lower saloon, but generally do not include meals. A state-room in the upper cabin costs extra, but insures better air and greater comfort and privacy. State-rooms (in the summer season) should be secured in advance at the company's office in New York, Boston, or Portland. Great lines of stages still run among the mountains and in the remote rural districts. Persons travelling by this way, in pleasant weather, should try to get a seat on the outside.

The Check System. — The traveller, having bought a ticket for his destination, shows his heavy baggage (trunks, &c.) to the baggage-master, who attaches a small numbered brass plate to each piece with a leather thong, and gives to the traveller a check for each piece of baggage, similar in form and number to that appended to such piece. The railroad now becomes responsible (within certain limits of weight and value) for the baggage, which is to be given up only on the presentation of the duplicate check which is in the traveller's possession. Trunks may be thus despatched from Boston to Montreal, Boston to Chicago, &c., without trouble, and if their owner is delayed on the route, they are stored safely at their destined station until he calls. On presentation of the check at the baggage-room of the station to which the baggage has been sent, it is given up to the owner, or his hotel porter. The large hotels have coaches at the railroad stations, on the arrival of through trains, and their porters will take the duplicate checks, get the trunks and carry them to the hotel.

IV. Excursions on Foot.

It is remarkable that pedestrianism has never been popular in this country. The ease and perfect freedom of this mode of travelling, its highly beneficial physical effects, the leisure thus afforded in which to study the beautiful scenery in otherwise remote and inaccessible districts, all mark this as one of the most profitable and pleasant modes of

summer recreation. To walk two hundred miles in a fortnight is an easy thing, and it is infinitely more refreshing for a man of sedentary habits than the same length of time spent in lying on the sands of some beach, or idling in a farm-house among the hills. "For a tour of two or three weeks, a couple of flannel shirts, a pair of worsted stockings, slippers, and the articles of the toilet, carried in a pouch slung over the shoulder, will generally be found a sufficient equipment, to which a light overcoat and a stout umbrella may be added. Strong and well-trying boots are essential to comfort. Heavy and complicated knapsacks should be avoided; a light pouch, or game-bag, is far less irksome, and its position may be shifted at pleasure." — BAEDEKER. One or two books might be added to this list, and a reserve of clothing may be sent on in a light valise, at a trifling cost, to the town which is the pedestrian's objective point.

It would be well for inexperienced walkers to begin at eight to ten miles a day, and gradually increase to sixteen to eighteen miles, or six hours' walking. During the heats of summer the travelling should be done at early morning and late afternoon, thus spending the hottest part of the day in coolness and rest. The best time for a pedestrian tour is between late September and late October, when the sky is clear and the air bracing, — the season of the reaping of harvests, the ripening of fruits, and the splendor of the reddening forests.

Among the most interesting districts in New England for the pedestrian, the following may be mentioned: The picturesque valleys, lakes, and mountains of Berkshire County, Mass.; the valley of the Connecticut from Springfield to Greenfield; the ocean-surrounded arm of sand, Cape Cod, with its quaint and salty old villages (Thoreau's "Cape Cod" is the best guide there); the lake region of New Hampshire; the White and Franconia Mountains (frequently explored by walking parties from the colleges during the summer vacation); and in Maine, the romantic Island of Mount Desert. The east bank of the Hudson River, from New York to Albany, affords a walk of rare interest, and the west shore of Lake George presents a short walk through peerless scenery. But the most interesting ramble is from Quebec through the Côte de Montmorenci to Cape Tormente, there crossing the St. Lawrence, and passing down the south shore through the quaint old Norman Catholic villages of Montmagny, L'Islet, and Kamouraska. This route can be traversed only by an experienced traveller who is well posted in French. There are but very few hotels in this ancient and primitive district.

V. Hotels.

The hotels of the United States will certainly bear comparison with those of any other country. The European plan has been adopted in many of them (as Parker's, at Boston; the St. Julian, at Portland), while in many others it is used in combination with the American plan, — \$4 to

\$4.50 per day at the more fashionable houses, \$2.50 to \$4 per day at the comfortable hotels of the smaller cities, and \$1.50 to \$2.50 per day in the smaller houses in the rural districts, are the charges which cover all ordinary requirements. No costly array of sundries and extras is attached to the bill, and the practice of feeing the servants has never obtained to any extent, nor has it been found necessary.

. VI. Round-Trip Excursions.

During the summer and early fall the railroads prepare series of excursion tickets at greatly reduced rates. Information and lists of these routes may be obtained from the central offices in Boston. The office of the Hoosac Tunnel Route (to Saratoga, &c.) is at 69 Washington St., Boston; the Connecticut and Passumpsic River Railroad is at 87 Washington St.; the Boston, Concord, and Montreal is at 5 State St.; the Grand Trunk Railroad is at 134 Washington St.; where is also the passenger office of the Eastern Railroad (to Portland, the Eastern Provinces, and the White Mountains), conducted by Geo. F. Field, Esq. The Vermont Central Railroad (office 65 Washington St.) publishes a twenty-four page book of round excursions (with their prices) to every part of New Hampshire, Vermont, the Province of Quebec, Eastern New York, and also to Niagara Falls, Chicago, St. Paul, and Duluth.

VII. Climate and Dress.

The climate of New England is subject to the most sudden and severe changes, from heat to cold or from cold to heat. The summers are usually much hotter and the winters much colder than in England, and during the latter season great falls of snow are frequent. The summer sun is often fatal in its power, and long exposure to its vertical rays should be avoided. At the same time warm clothing should be kept at hand, and woollen, or at least heavy cotton, underclothing should be worn, in order to guard against the sudden changes which are so frequent.

VIII. Miscellaneous Notes.

Passports are of no use in the United States in time of peace.

The examination of luggage at the Canadian frontier and at the ocean-ports is usually very lenient, and conducted in a courteous manner.

Traffic is made easy from the fact that fixed charges exist in the shops, and the tiresome processes of chaffing and beating down are unnecessary.

There are no professional guides in New England, but the people are prompt and willing to answer all civilly put questions. Gentlemen from abroad will remember that there is here, especially in the country, no class of *self-recognized* peasantry, and that a haughty question or order will often provoke a reply couched in all "the native rudeness of the Saxon tongue."

NEW ENGLAND HANDBOOK.

1. Boston.

Hotels. Those in the heart of the city are most conveniently situated. Tremont House (Pl. 18), on Tremont St., corner of Beacon, and the * Revere House (Pl. 9), on Bowdoin Sq., are large, commodious hotels, near the State House, and carried on by the same company. The * American House (Pl. 10), on Hanover St., is a large and elegant brownstone structure, with 300 rooms. Board at \$4 to \$4.50 per day. * The Parker House (Pl. 19), a noble marble building on School St., opposite King's Chapel and the City Hall, is kept on the European plan, and is a famous resort of the young men of New England. Young's Hotel (Pl. 20), Court Ave., is on the European plan, and is much resorted to by city merchants.

The following hotels are less expensive: Adams House (Pl. 28), 371 Washington St., \$3; Marlboro' Hotel (Pl. 26), 227 and 229 Washington Street; Sherman House; Temple House, Bowdoin Sq.; Milliken's (Pl. 22), Washington St. Near the great Northern railroad stations are the Arlington House (European plan) and National House. Opposite the Albany Railroad Station is the extensive United States Hotel (Pl. 33). In Brattle St. are the City Hotel and the Quincy House.

At the South End. — * St. James Hotel, on Franklin Sq., a vast and elegant structure, 400 guests, \$4 a day, \$15 to \$25 a week. * Commonwealth Hotel, a new marble building on Washington St., stretching from Worcester to Springfield St., 200 to 250 guests, \$4 a day. Also on Washington St., the Erskine, Lancaster, Everett, Warwick, and St. Denis Houses; and on Tremont St., the Clarendon and the St. Cloud, — smaller and less expensive houses.

The French system of *Hôtels Garnis* in its various forms is very popular in Boston. The principal hotels of this class (with family suites) are the Evans House, 175 Tremont, and the Hotel Pelham, corner Tremont and Boylston Streets, both fronting on the Common. Opposite this, the superb Hotel Boylston, one of the noblest buildings in the city. The Hotels Berkeley and Kempton, and the Hotel Hamilton (on Commonwealth Ave.), at the West End, and the Hotels Florence, Bradford, &c., at the South End, are of this class. The Norfolk House (in Roxbury) and the Maverick House (in East Boston) are large, quiet, and inexpensive suburban hotels.

Restaurants. — * Parker House (with ladies' dining-room attached), famous for its excellent dinners. (Charles Dickens called Parker's the best hotel in America.) * Young's, near Old State House, with an elegant dining-hall, much patronized for society and festal dinners. * Charles Copeland's, 4 Tremont Row, — a dainty saloon, frescoed and fountained, much visited by ladies. The Copeland restaurants at 208 Washington St., and 128 Tremont St., opposite Park St., are frequented by ladies. Higgins's, 126 Court St., is famous for fine oysters. Wilson's Lane, Spring Lane, Brattle St., and the vicinity, abound in good eating-houses. **Lager Beer** may be had at many German saloons throughout the city. **Ice-creams and confections** at Copeland's, Fera's (343 Washington St.), Southmayd's, Webers, &c.

Billiard-Rooms. — The finest hall of the kind in New England is on Washington St., near the Boylston Market. The Revere billiard-rooms, near Bowdoin Sq., are large and brilliant. Artemus Ward's quaint saying is well known, — that Harvard College is located in the billiard-room of the Parker House. Other comfortable, though smaller rooms are scattered through the city.

Baths. — Turkish, sulphur-fume, and electro-chemical, rear of the Marlboro'

Hotel, 231 Washington St. Turkish baths, 1427 Washington St., 17 Beacon St. Bath-rooms in the hotels.

Reading-Rooms (open evenings also). In the Public Library are the principal European periodicals, and a large number of American papers, &c. — The Young Men's Christian Union (300 Washington St.) and the Young Men's Christian Association (corner Tremont and Eliot Sts.) have large and well-supplied reading-rooms, free to all. An introduction from a member is necessary for entrance to the Athenæum reading-rooms. Most of the hotels devote a room to numerous files of the newspapers of the day.

Theatres. — The Boston Theatre (Pl. 27), on Washington St., near West, is the largest in New England. The principal tragedians of (or visiting) America have played here, and the building is often engaged for Italian and German Operas. The elegant Globe Theatre, "the Parlor of Comedy," was destroyed in the great Memorial Day fire (May 30, 1873), but it is to be rebuilt immediately. The *Museum Theatre* (Pl. 15), on Tremont, near School St., is conducted by a stock company, and is called the "Orthodox" or "Ministers' Theatre," since no spectacular or questionable plays are allowed there. William Warren, the great comedian, is a member of the Museum company, with which he has played for 26 years, winning a wide and enviable reputation. On Howard St., near Court, is the Howard Athenæum (Pl. 11), devoted to varieties, and entertainments by negro minstrels.

Classic music in Music Hall by the Handel and Haydn Society, the Thomas Orchestra, and the Apollo Club. Also semi-weekly organ concerts.

Consulates. — Austrian, 80 State St. ; Belgian, 6 Central Whf. ; British, 127 State St. ; French, Italian, 17 Broad ; German, 80 State ; Russian, 49 India Whf. ; Swedish, 6 Central Whf.

Horse-cars traverse the city in all directions. Tremont St., between Temple Place, and the Tremont House, Lowdoin Sq., and Scollay Sq. (corner Court and Tremont Sts.), are the principal centres of horse-car traffic. Cars leave the Tremont House every few minutes for the Northern Depots, Chelsea Ferry, Mt. Pleasant (in Dorchester), Warren St. (Roxbury), Grove Hall, Dorchester, Norfolk House (Roxbury), Egleston Square, Forest Hills, Lenox St., Jamaica Plain, Brookline, Beacon St., and E. Boston. Also from Temple Place to Dudley St. (Roxbury), and Grove Hall, *via* Shawmut Ave. From Scollay Sq. cars run to So. Boston, City Point, Bay View, Charlestown Neck, Bunker Hill, Malden, Winter Hill, Medford, Union Square (Somerville), Chelsea, Revere Beach (*in summer*), Lynn, Swampscott. From foot of Summer St., cars to Dorchester and Milton. From Bowdoin Sq., cars on 20 routes to the western suburbs, Cambridgeport, Riverside Press, Brighton, Newton Corner, Harvard Sq. (University), Mount Auburn, Watertown, Arlington, Somerville (*via* Craigie's Bridge).

Omnibuses. — From Salem St., Charlestown, *via* Warren Bridge and Washington St., to Concord St.

Carriages. — 50 cts. each passenger for a course within the city proper ; from south of Dover St. to the North End, \$1. A tariff of fares is hung in each carriage.

Steamers leave Boston as follows (in the season of navigation) : — For Augusta and Bath, Me., semi-weekly, from Union Whf. ; for Baltimore, from India Whf. ; for Bangor, semi-weekly, from Foster's Whf. ; for Calais, Me., Saturdays, from Commercial Whf. ; for Dover, from Battery Whf. ; for Eastport and St. John, N. B., tri-weekly, from Commercial Whf. ; for Gloucester, daily, from 234 Broad St. ; for Halifax, N. S., Pictou, and Prince Edward's Island, every Saturday, from T Whf. ; for Hull, Hingham, and Nantasket, semi-daily in summer, from Liverpool Whf. and 234 Broad St. ; for Long Island, Quincey Point, and North Weymouth, daily in summer, from Rowe's Whf. ; for Nahant, daily in summer, from India Whf. ; for Philadelphia, semi-weekly, from Long Whf. ; for Portland, daily, from India Whf. ; for Provincetown, from Central Whf. ; for Savannah, every ten days, from T Whf. ; for Liverpool (Cunard Line), every Tuesday, from Cunard Whf., East Boston (cabin, \$80 and \$100 in gold ; steerage, \$30 in currency). Sailing packet-lines connect Boston with nearly every port of New England.

Churches. — There are in the city 18 Baptist churches, 22 Congregationalist, 27 Unitarian, 15 Episcopal, 22 Methodist, 7 Presbyterian, 17 Roman Catholic, 6 Universalist, and 14 other religious societies. There is a German Lutheran church, corner of Shawmut Ave. and Waltham St. ; a German Reformed church, 8 Shaw-

mut St.; a German Methodist church, 541 Shawmut Ave., and a Synagogue of German Jews, on Pleasant St.

Newspapers.—8 daily papers are published in the city; also 3 semi-weeklies; 72 weeklies; 8 bi-monthlies; 70 monthlies (mostly magazines); and 14 quarterlies.

Boston (Shawmut, or "*Sweet Waters*"), the Puritan City, was first settled by a recluse Anglican clergyman, William Blackstone, about the year 1623. The adventurous colonists who landed at Salem, in 1630, soon moved a large party to Charlestown; but, finding no water there, they crossed to the peninsula of Shawmut, under the leadership of Isaac Johnson, landing on the present site of Boston, September 7 (O. S.), 1630. The name Boston was given to the place by order of the Court, in honor of that English city from which came Johnson and John Cotton, two of the early church fathers of the new settlement.*

In 1634 Blackstone, declaring "I came from England because I did not like the lord bishops, but I can't join with you, because I would not be under the lords brethren," sold the peninsula to the colonists for £30, and went into the wilderness. Governor Winthrop had previously constituted Boston the capital of the colony, and a strong tide of immigration set in. In 1631 the barque "*Blessing of the Bay*" was launched; in 1632 the first church was built; and in 1636–38 Harvard College was founded. In 1663 Josselyn writes: "The buildings are handsome, joining one to the other as in London, with many large streets, most of them paved with pebble-stones. In the high street towards the Common there are faire houses, some of stone," &c.,—a great change since 1630, when one declared it to be "a hideous wilderness, possessed by barbarous Indians, very cold, sickly, rocky, barren, unfit for culture, and like to keep the people miserable." In the Pequot War of 1637, and King Philip's War (1675–76), Boston bore a large share, and hundreds of prisoners were guarded there. "Philadelphia was a forest, and New York was an insignificant village, long after its rival (Boston) had become a great commercial town."

The town gave men and money freely in defence of the frontiers against the Franco-Indian attacks, and fleet after fleet left its harbor to do battle on the eastern coasts. In 1704 the first American newspaper (the "*Boston News-Letter*") appeared here; in 1710 a massive wall of brick and stone foundation, with cannon on its parapets, and with two strong gates, was built across the isthmus, or neck, on the south, near the present Dover St. This, with the walls on the water-front, 2,200 feet long, 15 feet high, and 20 feet thick, and the forts on Castle Island and Fort Hill, effectually guarded against attacks by the Dutch or French. In 1711, 5,000 of Marlborough's veterans, and a large Provincial force, encamped at East Boston, and thence sailed on Admiral Walker's disastrous expedition against Quebec. In 1739 sailed the fleet destined to attack Cuba, and of 500 men sent from the Massachusetts colony but 50 ever returned. Meantime France had erected a powerful fortress at Louisbourg, far in the north, and 4,100 soldiers, in 13 vessels, mounting 204 guns, sailed from Boston in 1745. They were joined at Canseau by 10 royal frigates; the "*Massachusetts*," 24, captured the French frigate "*Vigilant*," 64; and after firing 9,600 cannon-shot into Louisbourg it surrendered, with 2,000 men and 76 heavy guns. Restored to France by London treaty-makers, the work had to be done over again, and in 1758 Amherst and Boscawen gathered a royal and provincial army and fleet at Boston, attacked Louisbourg with 7,000 men and 57 sail, lost 400 men, and took the fortress, with 5,600 soldiers, 39 heavy guns, 6 line-of-battle ships, and several frigates. In 1745 the Duke d'Anville, with 16 ships of the line, 95 frigates, and a large army, was sent to retake Louisbourg and demolish Boston. A frightful storm shattered this armada, but belanded a strong force at Halifax, which annihilated a Massachusetts army in a battle at Grand Pré, and filled Boston with mourners. The feeling of discontent which had been growing since the forfeiture of the colonial charters in 1688, and which had been increased by arbitrary acts of royal governors and of the London cabinet, arose rapidly in 1762–65, on the passage of the "*Writs of Assistance*" and the Stamp Act. In 1768 two royal regi-

* Boston, in Lincolnshire, Eng., was founded in 650 by St. Botolph (boat-help), a pious Saxon and the patron-saint of English sailors. It is on the Witham River, 20 miles south-east of Lincoln, and has 15,000 inhabitants. The Church of St. Botolph is its pride. It was founded in 1307, is 245 by 98 feet, and can accommodate 5,000 people. It has noble stained windows, and a famous tower 280 feet high (modelled after one at Antwerp), which is visible for leagues at sea.

ments from Halifax moved into the town, and riots and outrages began to be frequent. Reinforcements were sent again and again to the garrison, and Lieutenant-General Gage, the commander of the British forces, was appointed (1774) Governor of Massachusetts. Then ensued the gathering of the patriot armies at Cambridge, the blockade of the city, and consequent distress among its people, and the bombardments from the American lines. When Lord Howe was forced to evacuate the city, March 17, 1776, 3,000 loyalists chose to go with him, and on the same day the Americans took possession of battered and hungry and depopulated Boston.

Since the close of the Revolution the city has been engaged in great internal improvements, the construction of a network of railroads to all parts of New England, and the preservation and extension of its commerce. Great manufacturing interests centred here, and the city boundaries were again and again enlarged. In June, 1872, the Universal Peace Jubilee was held here (as projected and managed by P. S. Gilmore) in an immense wooden building on the Back Bay. This edifice (called the Coliseum) was 550 feet long, 350 feet wide, and 115 feet high, thus having an area greater than that of the Milan and Cologne Cathedrals united, or of St. Paul's (London) and St. Sophia (Constantinople) united. The Roman Coliseum held 87,000 spectators, but the Boston Coliseum could accommodate only 40,000 to 50,000. Great galleries ran around the hall, parlors, &c., were plentiful, and a forest of flags and national symbols was draped within and floated outside. Strong forces of police, firemen, and artillerymen were constantly on duty at the Coliseum. Some of the music was emphasized by the booming of cannon near the building and the ringing of the city bells, while a large company of uniformed firemen accompanied the oft-repeated Anvil Chorus with ringing blows on anvils. Strauss, the Austrian composer of waltzes, and violinist, Mesdames Peschka-Leutner, Rudersdorff, and Goddard were there; also the bands of the English Grenadier Guards, the French Garde Républicaine, and the Prussian Kaiser Franz Grenadier Regiment. These were aided by a grand orchestra of 2,000 musicians, and a chorus of 165 well-drilled societies, comprising 20,000 voices. The Jubilee lasted for 3 weeks (without accident or mischance), and was varied by a great Presidential Ball. Early in the next year the Coliseum was taken down.

The rapid extension of commerce, and the concentration of great manufacturing agencies in the city, produced a corresponding flow of wealth and growth of stately architecture. The streets between the Common and the Harbor, between Summer and State Sts., were lined with lofty and ornate commercial houses, unsurpassed elsewhere in the world, and crowded with valuable goods. There were tiers of streets lined with massive granite structures, which seemed as un-inflammable as ravines in the solid rock. About 7 o'clock on the warm, moonlit evening of November 9, 1872, a fire broke out in a building on the corner of Kingston and Summer Sts. It speedily crept up from the lower story and turned the Mansard roof into a sea of flame. The fire started thence in three directions, and, fanned by the gale which it had formed, it swept up and down Summer St., and through the lateral avenues into Franklin St. and Winthrop Sq. The firemen, although heroically active, were driven before it, until early Sunday morning, when several buildings were blown up. About this time the fire was checked in its southward progress, and the whole Fire Department (reinforced from many towns within 100 miles) faced the destroyer on the north. From 2 to 3 o'clock Sunday morning the firemen fought the flames on Washington St., and after incredible efforts kept it on the lower side of the street, and saved the Old South Church, which was scorched and strewn with sparks. During the day the force at hand was directed on two points, the new U. S. Post Office on Devonshire Street, and the Merchant's Exchange, and in the narrow streets between Broad and Kilby Sts. Repulsed from the first two points, and after a time checked in its advance toward Kilby St., the fire sank rapidly under the cataracts of water which were being poured upon it from the steam-engines massed along State St. By mid-afternoon the danger was over, and many of the out-of-town engines were sent home. In less than 24 hours the richest quarter of Boston, covering about 50 acres, had been swept away, and nothing remained of those massive piles of granite and brick save a few ragged and tottering fragments of wall. The loss was not far from \$70,000,000. To keep out the swarms of thieves, and to prevent the citizens and the scores of thousands of visitors from imperilling themselves, three regiments of State troops

were called out, who formed a line of guards around the burnt district, which was thus picketed and held under martial law for many days. Less than thirty lives were lost during the fire. The rapid and resistless spread of the conflagration (which would have been impossible in a European city) has been attributed to the narrow streets, the thin partition walls, and the universal use of lofty Mansard roofs built of light timber and planking, and too high from the street to be reached by the water from the engines. "The best treasure of Boston cannot be burnt up. Her grand capital of culture and character, science and skill, humanity and religion, is beyond the reach of flame. Sweep away every store and house, every school and church, and let the people, with their history and habits, remain, and they still have one of the richest and strongest cities on earth."

Boston, the capital of the State of Massachusetts, and the metropolis of New England, is one of the most ancient and famous of the American cities. Its colonial and Revolutionary epochs were filled with incidents of rare heroism and surpassing interest, while the later and more peaceful years have been rich in the triumphs of commerce and industry. Although it has lost its former commercial supremacy, it still ranks as the second American city in this regard, and is carrying through vast railroad projects in order to keep its position. It is built on a deep inlet at the head of Massachusetts Bay, and favorably situated either for foreign traffic or for its vast trade with the manufacturing towns of New England. So the city has grown rapidly, its population of 30,049 in the year 1800, and 70,713 in 1830, having increased by 1870 to 250,526, with a valuation of \$584,000,000. The cramped limits of the peninsula being too narrow, large tracts of land have been added by filling up the tide-water flats and coves, and by the annexation and settlement of neighboring towns. In spite of its frequent fires and rapid changes, Boston has more of a European appearance than any other American city, and it has also a calm, cold, and reserved aristocracy of old families. The intellectual and musical culture of its citizens is renowned, and the most radical and advanced schools of politics, philosophy, and religion find their home here. As for the numerous charitable houses of the city, they have generally won the highest praise, even the censorious Dickens saying: "I sincerely believe that the public institutions and charities of this capital of Massachusetts are as nearly perfect as the most considerate wisdom, humanity, and benevolence can make them." The district lying between State, Court, and Cambridge Sts., and the waters of Charles River and the Harbor, was, in the olden time, the most important part of the city, although it is now given to the purposes of trade and the dwellings of the lower classes. Commercial St., forming 3 sides of a square, bounds a great part of it, and opens on a continuous line of wharves. The great Northern depots of the Lowell Railroad (for Vermont and Montreal), the Eastern Railroad, the Fitchburg, and the Boston and Maine Railroad, are situated near each other, on and near Causeway St.

Copp's Hill, in the northeast part, was the site of a British fort, which took an active part in the Bunker Hill battle, in 1775, and burned

Charlestown with a shower of hot shot. The ancient burying-ground first used in 1660 occupies the brow of the hill, and has been sacredly preserved. Here are buried three fathers of the Puritan Church, Drs. Increase, Cotton, and Samuel Mather. The cemetery is open to the public.

Near Copp's Hill, on Salem St., is **Christ Church** (Episcopal), the oldest church edifice in the city (consecrated in 1723). A fine chime of bells is in the tower, and its music is almost coeval with the church. Near the West Boston Bridge is the large granite building of the Massachusetts General Hospital (Pl. 4), a noble charitable institution with rich endowments. Near it is the Medical College of Harvard University. * **Faneuil Hall** (Pl. 16), "The Cradle of American Liberty," was built and given to the city in 1742, by Peter Faneuil, a *Huguenot* merchant. It was burnt in 1761, and rebuilt in time to serve the British 14th Regiment for barracks (1768). During the later popular excitements many stirring orations were made here, until, during the siege of 1775 - 76, the royal officers turned it into a theatre. The Hall, 76 feet square and 28 feet high, has no seats, and will accommodate a great audience. In time of great military or political emergencies, the men of Boston flock to Faneuil Hall by thousands. On the walls are some good portraits: Peter Faneuil, *Sargent*; George Washington, *Stuart*; Commodore Preble, General Warren, John Q. Adams, * Webster replying to Hayne, *Healy*; Edward Everett, Abraham Lincoln, John A. Andrew, * Samuel Adams, *Copley* (his masterpiece); and others. Fronting Faneuil Hall is the (586 ft.) long granite building of the Quincy Market, where all kinds of meat, fish, fruit, and vegetables are exposed in tempting profusion. Not far from the Market is the * **U. S. Custom House** (Pl. 24), perhaps the most massive and imposing building in Boston. It was built 1837 - 49, at a cost of nearly \$1,100,000, and its walls, roof, and dome are of granite. The building is in the form of a Greek cross, and is surrounded by 32 immense columns, 5 ft. thick and 32 ft. high. The great granite warehouses (State St. Block, &c.) in the vicinity are worthy of attention; also the ever-busy wharves near State St. The old Post Office (Pl. 21), or Merchants' Exchange, with 6 long granite columns in front, is famous as the point where the flames advancing on State Street were checked, in the Great Fire of 1872, by a platoon of husky, dingy, and quivering steam fire-engines drawn up before it. The Wall Street of Boston, the haunt of its bankers and brokers, is the part of State St. between the old Post Office and the **Old State House**. This ancient edifice was built in 1748, and long used by the legislature of the colony. On March 5, 1770, a collision occurred between the townspeople and the British main-guard stationed here, and a volley was fired, killing four and wounding many of the crowd. This affair was called the

"Boston Massacre," and the soldiers were tried before the Colonial Court on the charge of murder, and exonerated. Opposite the Old State House is a magnificent marble building in Venetian Gothic architecture, with a 149 ft. front on Court St. and 55 ft. on Washington St., which cost about \$750,000, and is used for bank, railroad, and insurance offices. Just above, on Court Sq., is the heavy front of the Suffolk County Court House, back of which, and fronting on School St., is the * **City Hall**, built in 1862-65. \$160,000 were appropriated to build it, and it cost really more than \$500,000. It is of white Concord granite, in the Italian Renaissance architecture, with 138 ft. front and 95 ft. height, the Louvre dome which is the headquarters of the fire-alarm being 109 ft. high. The Council Chambers are very fine, as is the whole interior arrangement. In front of the City Hall is a bronze statue of *Benjamin Franklin*, 8 ft. high, on a base of *verde antique* and granite, with historic bronze medallions on the sides. The artist was R. S. Greenough, and the means of its erection (\$20,000) were raised by the people.

Benjamin Franklin was born in Boston in 1706. He was apprenticed to his brother, a printer, but ran away to Philadelphia in 1723. There he rose steadily until in 1764 he was sent to England as colonial agent, when, in 1766, he spoke before the House of Commons, and the Stamp Act was repealed. Elected to Congress, he was on the committee on the Declaration of Independence, and signed that document. From 1773 to 1785 he was Minister to France, with which he procured the treaty of alliance of 1778 which saved the Republic. His later works were of diplomacy and philanthropy, and he founded the Abolition Society. He invented the harmonica, and the Franklin stove; and in 1752 found the identity of lightning and the electric fluid by means of a kite. His scientific labors won him high honor in Europe.

Opposite the City Hall is the Parker House (Pl. 19), and to the right is King's Chapel.

On Washington St., near the foot of School St., is the **Old South Church**, the shrine of Boston. It was built in 1729, on the site of a cedar-wood church which had been built in 1669. The exciting meetings of the people in the late colonial days were held here, and thence marched the disguised men to the attack on the tea ships (Dec. 13th, 1773.) In 1775 the pews were removed, and a riding-school for the British cavalry was here formed, the interior being well packed with gravel, and a liquor saloon being placed in one of the galleries. The church was restored in 1782, and contained (until 1873) two galleries, many square "pues on ye lower flore," and a pulpit overarched by a sounding-board. Externally it is plain, with a high spire, and a clock. "More eyes are upturned to its clock daily than to any other timekeeper in New England." Franklin was baptized here (in the older church); Whitefield has preached here; for one hundred and sixty years the election sermons (before the legislature, council, and governor) have been delivered here; it was saved, by deathless heroism, from the Great Fire; and yet before 1875 this ancient shrine will probably be torn down and replaced by a line of shops with

a Mansard roof. It was leased to the Government for a Post Office in December, 1872.

Near the Old South, on Milk and Devonshire Sts., is the structure to be occupied by the **U. S. Post Office** and Sub-Treasury (Pl. 44). It is built of granite, in the prevalent French style of architecture, with a immense roof, and groups of statuary on the front. Its great size, and the fineness of its materials, render it an imposing building. The massive granite front on Milk St. was so much cracked and injured in the Great Fire (by intense heat from across the street) that much of it had to be rebuilt. The building fronts 200 ft. on Devonshire St., and will cost from \$ 2,000,000 to \$ 3,000,000. From this building (which was held desperately and successfully against the fire) the burnt district lies on the south, east, and west. From the Old South Church, Washington St., the main retail thoroughfare of the city, runs southwest, and is always filled with a busy throng. On the corner of School St. is the Old Corner Bookstore, in a building dating from 1712. Farther along are the two principal theatres, and some large bookstores. The corner of Washington and Winter Sts. is the liveliest point in the city, and Winter St. is full of ladies' shops.

From Boylston Market Boylston St. runs out past the Common. At the corner of Tremont St., and facing the Common, is the **Masonic Temple** (Pl. 45), built 1864-67. The first Masonic Lodge in America met in Boston in 1733, since when the order has steadily grown, save during the days of the Anti-Masonic party. The Temple is a lofty edifice of granite, built in such forms of mediæval architecture as "to suggest the most effective poetical and historical associations connected with the Masonic institution." The interior contains Corinthian, Egyptian, and Gothic Halls, besides banqueting-rooms, &c. Opposite the Temple is the large and elegant Hotel Boylston (suites of rooms for permanent dwellers), in the Italian-Gothic style. The lofty brownstone building of the Hotel Pelham is on the opposite corner, next door to which is the ***Boston Public Library**, in a so-called fire-proof building of brick and sandstone. This Library contains 193,000 volumes, and 100,000 pamphlets, and is the largest in America, except the Library of Congress. The Lower Hall is devoted to popular books and a reading-room, while the noble Bates Hall, above, is reserved for more substantial works. All these rooms are open to the public, and any one can take books and read there, though only residents of the city can take books from the building. The walls of the rooms are covered with pictures, which form part of the collection of engravings formerly owned by Cardinal Tosti, of Rome. This collection, embracing from 6,000 to 7,000 pictures (many being fine old works of Marc Antonio and Albert Dürer), was presented to the Library by Mr. T. G. Appleton, and fills many volumes.

The **U. S. Court House**, corner Tremont St. and Temple Pl., was built and long used as a Masonic Temple. It has a churchly look, and the main walls are built of triangular blocks of granite. Next to the Court House is St. Paul's Episcopal Church, of gray granite, with 6 columns of Potomac sandstone upholding a classic pediment. Near this, at the corner of Park St. (formerly called Brimstone Corner), is **Park Street Church**, an old Puritan meeting-house, where the able and brilliant Murray is now settled. Adjoining the Church is the *Old Granary Burying Ground*, where are buried Governor Bellingham (died 1672), and 8 other colonial and state governors, 2 signers of the Declaration of Independence, 6 famous divines, Peter Faneuil, who gave the Hall to Boston, Paul Revere, the Revolutionary hero, Chief Justice Samuel Sewall, John Hancock (see Quincy), and Samuel Adams.

Samuel Adams, born at Boston in 1722, was one of the leaders of the people in the agitations of 1764-75, and was proscribed by the royal government. In 1769 he advocated the independence of America, and during the Revolution directed the measures of Congress in the Northern war. "Though poor, Samuel Adams possessed a lofty and incorruptible spirit, was pure in morals, and grave and austere in manner, though warm in his feelings. As a speaker, he was pure, concise, logical, and impressive; and the energy of his diction was not inferior to the strength of his mind." The State is to place his statue in the Capitol at Washington. A granite pyramid is over the remains of Franklin's parents. From the sidewalk before the cemetery rises a row of tall elms, which were transplanted from England, and placed here in 1762.

Opposite the Church is the extensive publishing house of James R. Osgood & Co., and beyond it, down Hamilton Pl., is seen the plain wall of **Music Hall** (Pl. 25). Entrance from Central Pl., 15 Winter St., or at 116 Tremont St. This is one of the most elegant and well-arranged halls in America, and is of rare acoustic properties. Within this hall is the largest organ in the New World, containing 5474 pipes, and 84 complete registers, and encased in an elegant frame, with a colossal statue of Beethoven in the foreground. The organ was built by Herr Walcker, of Ludwigsburg, 1857-63, at a cost of \$60,000 dollars, and is often played by competent professionals. Farther along Tremont St., on the right, is the elegant white granite building of the **Horticultural Hall**, with a many-columned front, — Doric in the first story, Ionic in the second, and Corinthian in the third. The rich cornice is surmounted by a colossal Ceres, a copy from the ancient statue in the Vatican; while on piers, at the corners of the second story, are statues of Flora and Pomona. Fairs, floral shows, and lectures are held in the spacious halls above. Alongside the Hall is the Studio Building, the home of many local artists.

Tremont Temple comes next, with a plain Palladian front, and a great hall, which is used on Sunday by a Baptist church, and during the week for lectures, readings, etc. On the same side of the street is **King's Chapel**, built in 1754, by the Episcopalians, on the site of the first church of that sect in Boston (built 1689). King's Chapel was deserted by its

people when Gage and the Loyalists left the town, and was occupied by the Old South Society. At a later day, influenced by their rector, Rev. James Freeman, the few remaining churchmen revised their liturgy, striking out all Trinitarianism, and formed themselves into the first Unitarian church in Boston. Next to this Church is the burying-ground used by the Puritans from 1630 onward. Isaac Johnson, "The Father of Boston," was buried here ere the first year of the settlement was ended. About him his people were buried for many years. In one tomb is Governor John Winthrop, and his two sons, who were governors of Connecticut.

John Winthrop, a pious lawyer of Suffolk, led a colony to Salem in 1630. He moved his people to Boston and built up that place, where he ruled as Governor of Massachusetts, 1630-34, 1637-40, 1642-44, 1646-49. He was an amiable gentleman, a firm ruler, and a believer in moderate aristocratic principles, stating in his letter to the people of Connecticut, that "the best part of a community is always the least, and of that part the wiser are still less."

Other noted Puritans are buried here, and in the church are monuments to the families of Apthorpe, Shirley, and Vassall.

Beyond the cemetery is a granite building, partly occupied by the **Massachusetts Historical Society**, which has a library of 16,000 books, and 800 volumes of MSS. Many ancient portraits (Increase Mather, Sebastian Cabot, &c.) adorn the walls, while relics of Washington and the Puritan governors, and of King Philip, the chair of Winslow, the swords of Church and of Governor Carver, are carefully preserved here. The New England Historic-Genealogical Society (18 Somerset St.) has a fine library, and a small collection of curiosities.

At 40 Winter St. are the rooms of the American and Foreign Christian Union, the Sunday School Union, the Peace Society, and the Congregational Association. Churchmen of the various sects will find their respective headquarters as follows: Baptist Mission Society, 12 Bedford St.; Congregational Club, corner Somerset and Beacon Sts.; Publishing Society, 13 Cornhill; Episcopal Church Association, corner West and Tremont; Methodist Educational and Historical Societies, 38 Bromfield; New Church Union, 2 Hamilton Place (library and reading-room); Universalist Publishing House, 37 Cornhill; American Unitarian Association, 42 Chauncy St.; Christian Unity, 375 Harrison Ave.; Parker Fraternity, 554 Washington St. The General Theological Library (22 West St.) and the Mercantile Library are much used, and the reading-rooms of the Young Men's Christian Association (corner Tremont and Eliot) and the Young Men's Christian Union (300 Washington St.) are pleasant, and freely open. The British, Irish, Scotch, Germans, and Italians have benevolent societies. In Boston there are 27 lodges, 8 chapters, and 6 commanderies of Masons, 18 lodges and 5 encampments of Odd Fellows, 22 divisions of Sons of Temperance, 13 Temples of Honor, 7 lodges of Good Templars, 9 posts of the Grand Army of the

Republic, 15 lodges of the Knights of Pythias, and 4 lodges of the Harugari (Germans).

On Tremont, near School St., is the **Boston Museum** (entrance fee, 30 cts.) where, in a lofty hall, a great number of rare things are shown, embracing curiosities from all parts of the world, casts, wax-figures, scores of portraits of eminent Americans (by West, Copley, Stuart, etc.), and Sully's great picture of Washington crossing the Delaware.

Boston Common. When the peninsula of Shawmut (now Boston) was bought from Blackstone for £30, in the year 1634, this tract was reserved by the colonists for a training-ground (parade) and pasture. Every attempt since made to occupy portions of it has been repulsed, except in the early days, when the ground between Park, Beacon, and Tremont Sts. was taken. Special care was taken, in 1822, when the city was formed, to withhold from the municipal government the power of alienating any part of the Common. Between 1656 and 1660 several persons were executed here on the charge of witchcraft, and for one hundred and fifty years after executions took place on the Common. During the summer of 1676 many scores of Indians caught red-handed were put to death here, among whom was the insurgent chief Matoonus. Thirty were executed in one day, and their heads were fastened on stakes and left in public places. About this time (1675) the traveller Josselyn speaks of it as "a small but pleasant Common, where the Gallants, a little before sunset, walk with their Marmalade-Madams, till the bell at 9 o'clock rings them home. In 1728 occurred a fatal duel, under the Old Elm, whereupon a law was passed, that persons killed in duels should be denied Christian burial, and should be buried transfix'd with a stake. If the duel was not fatal, both parties should stand on the gallows one hour with a rope about their necks, and then be imprisoned for one year. So the so-called code of honor passed from the social system of Massachusetts. In 1749 George Whitefield preached to 20,000 persons in one body on the Common. During the American siege of Boston a British fort was built on the hill near the Elm Tree, which drew some of Washington's heavy shot. Races, parades, and military executions were meanwhile held here. The garrison of the town in 1812 encamped here, and so late as 1830 it was a cow-pasture enclosed by a two-railed fence. In 1836 the present iron-fence (1½ M. long) was built, and cattle were excluded. In the days of the Rebellion the assembling troops paraded here, and in the Great Fire of 1872 vast mounds of saved goods were piled along the malls and on the lawns.

Boston Common contains about 48 acres, and is rich in lawns and noble trees. No carriages are allowed to enter, and the walks are filled with people on pleasant summer evenings and Sundays. Under the stately elms of the Beacon and Tremont St. Malls are favorite promenades. Near Park St. is the Brewer fountain, made in Paris, and embellished with bronze statues of Neptune and Amphitrite, Acis and Galatea. Copies of this fountain have been made for the cities of Lyons, Bordeaux, and Alexandria (Egypt). The **Frog Pond** has a large fountain, supplied from Cochituate Lake, and near it is the Old Elm, — a great and ancient tree which is peculiarly revered by the Bostonians, and has been bolted and bandaged with iron and canvas, and fenced in, and so preserves its hale and verdant strength. On Flagstaff Hill, near the Old Elm, a soldiers' monument is to be built, to be 90 ft. high, with historical reliefs, &c.; at the four corners heroic statues of Peace, History, the Army, and the Navy. Above will be allegorical figures, — the North, South, East,

and West, — and above all a colossal America, resting on a hemisphere, guarded by four eagles, with the flag in her left hand, and wreaths and a sheathed sword in her right. In the south part, near the old cemetery, is a deer-park. The west part of the Common is smooth and bare, and is reserved for a parade-ground and a ball-ground for the boys.

The **Public Gardens** lie west of the Common, and contain 22 acres. In 1794, 6 ropewalks were built here, on tide-water flats, and most of the improvements have been made during the past 15 years. In its centre is a beautiful artificial serpentine pond of 4 acres, crossed by a fine bridge. Near Beacon St. is a bronze statue of *Everett*, by Story, modelled in Rome and cast in Munich. The monument to the discovery of anæsthetics (1868) is a rich and beautiful composition. **Venus rising from the Sea* is a lovely work, from above which, when the waters play, a fine spray falls about the figure, which is sometimes called “the Maid of the Mist.” But the finest work of the kind in New England is the colossal equestrian **Statue of Washington*, by Ball, which fronts on Commonwealth Ave. The statue is 22 ft. high, on a pedestal 16 ft. high. The bronze work was done at Chicopee, in this State.

Commonwealth Ave. — which is to be $1\frac{1}{2}$ miles long and is 240 ft. wide with a park in the middle — runs W. from the Public Gardens, and is lined with fine mansions. A statue of Alexander Hamilton is in the park. Nearly all the land north of Tremont and west of Arlington St. has been reclaimed from the water, and is now the finest part of the city. The new streets are alphabetically named, yet they avoid the weak sound of the upper New York and Washington city streets, having sonorous old English titles, — Arlington, Berkeley, Clarendon, Dartmouth, Exeter, Fairfield, Gloucester, &c. At the corner of Marlborough and Berkeley Streets is the *rich and elegant building (with English glass, a German organ, and an exquisite little cloister) of the **First Church** in Boston (Unitarian). This society dates from 1630. Near by, on the corner of Berkeley and Newbury Sts., is the miniature cathedral of the Central Congregational Society. It is of Roxbury stone, in cruciform shape, has a stone spire 240 ft. high, and is rich in lofty, pointed windows, pinnacles, flying buttresses, &c. It cost \$325,000. In this vicinity is the Emanuel Church (Episcopal) on Newbury St., and the fine brownstone Arlington St. Church (Unitarian) with its melodious chime of bells. Alongside the Central Church is the fine building of the Society of Natural History, where courses of lectures are given. The extensive collections embrace birds, shells, reptiles, fishes, insects, fossils, with sections devoted to ethnology, geology, palæontology, mineralogy, and microscopy. The finest collection of mounted skeletons in America is kept here. The classic building of the **Institute of Technology** is close to the Museum. This is a richly-endowed popular school of high order, whose object is to teach the appli-

cation of science to the useful arts, for which purpose it is provided with fine cabinets and apparatus.

The * **State House** (Pl. 13) is on the summit of Beacon Hill, fronting the Common. Its corner-stone was drawn to the place July 4, 1795, by fifteen white horses, amid great ceremonies. The most prominent objects on the exterior are the fine Corinthian colonnade and the high round dome. When the Legislature (or General Court) is in session, national flags are displayed from the building. The * **Doric Hall**, at the entrance, is a neat, marble-paved room, supported by columns, and surrounded by high niches, fronted with plate-glass, in which are gathered the banners of the Massachusetts regiments borne in the War for the Union. On the right are busts of Charles Sumner and Samuel Adams, and on the left a bust of Abraham Lincoln and a statue of Gov. John A. Andrew, by *Ball*. In a marble-paved and banner-hung rotunda, opening on the Doric Hall, is Chantrey's * **Statue of Washington**, in front of which are copies of the monuments of the old Washington family, at Brington, in Northamptonshire. The House of Representatives (up stairs to the left from the Doric Hall) is a plain and somewhat crowded hall, with a codfish hanging from the roof, as emblematic of a prolific source of the wealth of the State. The Senate Chamber is on the other side, and is adorned by some old portraits and trophies. The extensive State Library is in the west wing. From the dome of the State House (open when the Legislature is not in session) is obtained a fine * view. Boston Harbor, with its islands, and peninsulas, and the distant blue ocean, fill the east; in the north are Charlestown, its Navy Yard and Monument, with Lynn, Chelsea, Malden, and Medford; to the west, Charles River and Back Bay, Cambridge, Brighton, Brookline, and Newton; and in the south, Roxbury and Dorchester, with the blue hills of Milton far away. On the terraces in front of the building are bronze statues of Daniel Webster and Horace Mann, the great educationist. The house opposite (corner Park and Beacon Sts.) was for 40 years the home of George Ticknor, author of the "History of Spanish Literature," in 3 volumes (translated into German and Spanish), who bequeathed 4,000-5,000 Spanish books to the Public Library. The Union Club (600 members), a patriotic organization formed in 1863, occupies the next house below (on Park St.). On Beacon St., near the State House, is the * **Boston Athenæum**, a neat, brownstone building, in the Palladian style. On the lower floor is the library of the American Academy of Arts and Sciences, and a large reading-room adorned with statuary. In the vestibule are casts of Houdon's Washington and of Sophocles, also a marble statue—The First Inspiration of Columbus—by *Montaverde*, and a bronze group—the Boy and the Eagle—by *Greenough*. Among the statuary in the reading-room is Orpheus in Hades, *Crawford*; Hebe and Ganymede, *Crawford*; Children, *Greenough*; and

fine casts of Thorwaldsen's Venus, Angelo's Night and Morning, the Laocoön, Apollo Belvedere, Minerva, Menander, Barberini Faun, &c. On the second floor is a noble library of nearly 100,000 volumes, including the library of Washington, and 400-500 volumes of engravings. The building and its contents being owned by the Athenæum, an introduction from one of its members will give strangers the benefits of the library. The stairways are lined with large paintings, and on the third floor is the **Picture Gallery** (fee, 25 cts.). 300-350 pictures are on exhibition here, mostly copies from the old masters.

The original works (numbers often changed) are, *Sortie from Gibraltar, *Trumbull* (his masterpiece); Arch of Octavius, *Bierstadt*; Belshazzar's Feast, *Allston* ("The American Titian"); Mount Washington, *Gay*; *Isaac of York, *Allston*; Indian Captive, *Weir*; Angels appearing to Shepherds, *Cole*; Priam and dead Hector, *Trumbull*; portraits of *Washington and his Wife, *Stuart*; Benjamin West, *Allston*; Daniel Webster. Chief Justice Marshall, *Harding*; William Tudor, *Sully*; the Rajah Rammohun Roy, *R. Peale*; William Wirt, *Inman*; *Count of Wurtemberg mourning over his Dead Son, *Ary Schaeffer*; Storm at Sea, *Hué*; Garden of Love, *Watteau*; two fruit-pieces, *Peter Boel*; Landscape, *Ruysdael*; Dante and Beatrice, *Schaeffer*; The Flaying of Marsyas, and the Golden Age, *Luca Giordano*. There are a great number of copies (in oil) of famous European pictures, and in one room 50 of the chromo-lithographs of the Arundel Society (London), being copies of famous religious paintings in the noontide of art. In these rooms are casts of the antique works, — the Quoit-Players, Piping Faun, Silenus and Bacchus, Boy with a thorn in his foot, the Venus de Milo, and the Dying Gladiator, with busts of Julius Cæsar, Augustus, Tiberius, Caligula, Claudius Nero, Galba, Otho, Vitellius, Vespasian, Titus, Domitian, Nerva, Trajan, Hadrian, the Antonines, &c. A beautiful marble copy of the Venus de Medici is in one room, also (in marble) Greek Girl, by *Wolf*; *Maid of Carthage, *Greenough*; Will o' the Wisp, *Harriet Hosmer*; *Venus Victrix, *Greenough*.

One room is occupied by a large collection of Egyptian antiquities, embracing hundreds of figures of the gods Osiris, Amun, Horus, Isis, &c., in bronze, marble, wood, porcelain, and terra-cotta; also a large number of scarabæi, amulets, vases, and curious jewels. There are also seven human mummies, with a great number of funereal trappings, and mummies of monkeys, lambs, ibises, cats, hawks, mice, crocodiles, tortoises, snakes, &c. There are 1,100 pieces in this collection (catalogue, at the door, 25 cts.).

In the next room are several hundred lamps, amphoræ, cups, statuettes, heads, weapons, &c., from Idalium, on the Island of Cyprus, of great interest to the student of early Phœnician and Greek history. The Appleton collection is on the same floor, containing many Græco-Italian fictile painted vases from Etruscan and Campanian tombs. Some elaborate old cabinets contain fine Venetian glassware, and a large number of rich majolica plates are exhibited. A large piece of Gobelins tapestry (France crowned by Victory and attended by Minerva) occupies one end of the room; at the other end is a group of plaster casts from famous Italian bas-reliefs, near which is a Madonna and Child, by *Luca della Robbia*, and the Virgin adoring the infant Jesus, by *Andrea della Robbia*. Two large pictures by *Boucher*, two by *Allston*, a large collection of ancient coins (a gold Alexander), and the rich oaken panels, carved and gilded, from the Château Montmorency, are worthy of note. The positions of the pictures and curiosities are so often changed that a more careful list would be of no permanent use.

Near the Athenæum is *Pemberton Square*, the site of an old Indian necropolis, where 300 skulls were dug up in Cotton Mather's time. Governor Endicott and Sir Henry Vane lived near this spot, and in later days it was an aristocratic centre. Now its houses are occupied by offices, and in the Mission Rooms (number 35) is kept a small museum of curiosities from "lands of heathenness." *Louisburg Square* is a stately and silent place

on the farther slope of Beacon Hill, embellished with statues of Aristides and Columbus. Near the State House is a vast and massive granite structure, 200 feet square and 66 feet high, on Derne St., which is called the Beacon Hill Reservoir, and holds, at this high level, about 2,700,000 gallons of water.

The *Perkins Institution for the Blind* was founded in 1831, by Dr. S. G. Howe. It was favored by liberal popular contributions, and now occupies large buildings on Mt. Washington, S. Boston. Charles Dickens visited and highly praised this institution, as also the charitable and corrective establishments in a secluded position near Independence Square. S. Boston (Insane Hospital and House of Correction).

"Such are the institutions at South Boston. In all of them the unfortunate or degenerate citizens of the State are carefully instructed in their duties both to God and man; are surrounded by all reasonable means of comfort or happiness that their condition will admit of; and are ruled by the strong Heart, and not by the strong (though immeasurably weaker) Hand." — DICKENS.

The extensive Carney Hospital (managed by Sisters of Charity) is near by on the hill, and above it is a reservoir and small park near the site of the old fort. On the bright, moonlit night of March 3, 1776, General Thomas and 2,000 Americans advanced quietly to this point (Dorchester Heights), and, when morning dawned, two strong forts were completed within point-blank range of Boston. Lord Percy and 2,400 royal troops were ordered to attack them, and Washington himself, with 4,000 men, awaited the onset. But a storm, "propitious to the real interests of the British army," prevented Percy from crossing the harbor. A few days later the city was heavily bombarded, and a new fort having been built still nearer, the royal forces were forced to evacuate Boston. March 18, sailing away in 150 transports, and carrying with them 3,000 New-Englanders who remained loyal to King George. From this little park a fine view is obtained of Boston and its harbor, and of Dorchester and the southern suburbs.

The South End.

The district south of Boylston and Essex Sts. is mainly occupied by dwelling-houses, and Washington St., with its retail stores and hotels, runs through its centre. The greater part of this district has been reclaimed from the water. Near the line of Dover St. a wall garnished with cannon formerly crossed the Neck and defended the town. Union Park and Worcester and Chester Squares are embellished with trees and fountains and surrounded with fine residences. Columbus Ave., on the north, is a broad thoroughfare of aristocratic pretensions and forming an admirable drive-way. On Tremont St. is the imposing white granite edifice of **Odd Fellows' Hall** (built 1871-73), and beyond it some fine churches, the best of which is the quaint and rambling Methodist Church. On Harrison Ave., near Concord St., is the **City Hospital** (Pl. 10.) with a fine building (surmounted by a dome) in the centre, joined to the spacious wings by curving colonnades. Near the Hospital is the Roman Catholic Home for Orphans, and the Jesuit Church of the Immaculate Conception (with a fine interior, and famed for its music), connected with which is Boston College.

The Roman Catholic * **Cathedral of the Holy Cross** is on the corner of Washington and Malden Sts. This stately structure was commenced in 1867, and is yet far from completion. The mediæval Gothic architecture has been closely adhered to in its construction, though in its phase of severest simplicity. Its external length (including the Chapel of the Holy Cross) is 365 ft.; the nave is 320 ft. long and 120 ft. high. The Cathedral is 188 ft. wide at the transepts, and in the nave and aisles its width is 90 ft. The external length is greater than that of the Cathedrals at Vienna, Ratisbon, Munich, Orvieto, Messina, Monreale, Pisa, Venice, Freiburg, Treves, or St. Denis. It is higher (in the nave) than the Cathedrals at Vienna, Munich, Paris, Spire, Strasburg, Freiburg, Rheims, Chartres, Antwerp, or St. Ouen at Rouen. The main spire is to reach a height of 320 ft., and to be provided with a fine chime of bells. St. Patrick's Cathedral, at New York, and the Montreal Cathedral (just commenced) are the only rivals in America of the Cathedral of the Holy Cross.

2. Environs of Boston.

"It is not only in the Harvard precincts that the oldness of New England is to be remarked. Although her people are everywhere in the vanguard of all progress, their country has a look of gable-ends and steeple-hats, while their laws seem fresh from the hands of Alfred. In all England there is no city which has suburbs so gray and venerable as the elm-shaded towns around Boston, — Dorchester, Chelsea, Nahant, and Salem; the people speak the English of Elizabeth, and joke about us — 'he speaks good English for an Englishman.'" — SIR CHARLES DILKE.

Boston Harbor.

The Route to Nahant. Soon after leaving India Wharf, with East Boston on the left, Governor's Island is passed on the r. This island was granted to Governor Winthrop in 1632, and was long called Governor's Garden, and here, according to Josselyn, in 1638, were the only apple and pear trees in New England. A powerful fortress of the United States, called Fort Winthrop, now occupies the island. Soon after passing the Fort the steamer enters a narrow strait, between Point Shirley on the l. and Deer Island on the r. The point was named in honor of William Shirley, Governor of Massachusetts 1741 to 1756, sometime commander of the British armies in America, and Governor of the Bahama Islands. It now forms the S. end of the town of Winthrop, and is occupied by Taft's Hotel, widely renowned for its excellent fish and game dinners. Opposite Point Shirley is Deer Island ($4\frac{1}{2}$ M. from Boston), "so-called because of the deare, who often swim thither from the maine when they are chased by the wolves" (17th century). During the war of King Philip (1675-76) this place presented a pitiful sight, for hundreds of Indian prisoners were landed and guarded here, and scores of them died of hunger and from exposure to the winter frosts. At present the island is occupied by the immense buildings (in the form of a

Latin Cross) of the Boston Almshouse, and of the House of Industry and the House of Reformation.

In May, 1776, the Boston privateers "Franklin" and "Lady Washington" grounded on Point Shirley, and were attacked by thirteen British man-of-war boats. The action lasted for several hours, until the tide rose, when the privateers escaped. In the war of 1812 the frigate "Constitution" was once blockaded in Boston Harbor, and got away by creeping through Shirley Gate by night. Beyond Point Shirley the lofty bluffs of Winthrop are passed on the l., succeeded by Chelsea Beach with its hotels, and the City and Harbor of Lynn, in full view of which the wharf at Nahant is gained.

Nahant.

By steamer direct from India Wharf, Boston, or by Eastern Railroad to Lynn, and thence by omnibus 6 times daily.

Hotels. — The immense hotel at East Point, built 1824, and long the pride of the coast, was burned in 1861; there remain but small hotels, — Whitney's Village Hotel, Bay View Cottage, Hood Cottage.

Nahant is a peninsula composed of ocean-swept rocks, with pleasant beaches interspersed, and villas scattered over its heights, where many of the cultured and literary people of Boston and Cambridge spend their summers. It is 12 M. from Boston by water and 4 M. from Lynn by land. Crossing the long and narrow sandy isthmus called Lynn Beach, with the roar of surf continuous on the ocean-front, the rocky ridge of Little Nahant is passed, and Nahant Beach extends to the peninsula proper. Mr. Tudor, who for years supplied Massachusetts ice to the four quarters of the world, and hence is called the "Ice-King," has fitted up a pleasant resort for visitors on the north side of Nahant. About 20 acres of picturesque grounds along the sea, adorned with fountains and shell-work, and commanding a fine view of Lynn and Swampscott, compose this Garden of Maolis (Siloam). Entrance fee, 25 cts. A good fish or clam dinner may be had in the Maolis pavilions. Among the jagged and savage-browed cliffs of Nahant are numberless curious formations of the rock, named as follows: John's Peril, a deep chasm in the cliffs, on the north, and near Nahant Beach; the Spouting Horn, where the surf dashes through a long, rocky tunnel into a cavern, and there is spouted forth with great force; Castle Rock, a massive and regular pile of rock, faintly resembling some ancient castle-keep; Caldron Cliff and Roaring Cavern are grandly resonant in time of storms; Natural Bridge, an arch of rock spanning a narrow, tide-swept fissure; Pulpit Rock; and Sappho's Rock. The three last-named are on East Point, the site of the vast hotel, of which a relic remains, in the shape of a pretty little classic building on the outermost promontory, which looks like an ancient Greek shrine on some cliff of the Ægean, and which really was a billiard-saloon.

On the S. shore is Swallows' Cave, a cavern 72 ft. deep, increasing from 10 ft. wide and 5 ft. high to 14 ft. wide and 20 ft. high. Near the tall rock arch called Irene's Grotto is the steamboat landing. N. E. of the peninsula, and well out in Nahant Bay, Egg Rock rises sharply from the sea to the height of 86 ft., and is crowned by a lighthouse. Many old traditions cluster around Nahant, which is said to mean "Lovers' Walk."

"The temperature of Nahant, being moderated by sea breezes, so as to be cooler in summer and milder in winter than the mainland, is regarded as being highly conducive to health. It is delightful in summer to ramble round this romantic peninsula, and to examine at leisure its interesting curiosities; to hear the waves rippling the colored pebbles of the beaches, and see them gliding over the projecting ledges in fanciful cascades; to behold the plovers and sandpipers running along the beaches, the seal slumbering upon the outer rocks, the white gulls soaring overhead, the porpoises pursuing their rude gambols along the shore, and the curlew, the loon, the black duck, and the coot, the brant, with his dappled neck, and the oldwife, with her strange, wild, vocal melody, swimming gracefully in the coves and rising and sinking with the swell of the tide. The moonlight evenings here are exceedingly lovely; and the phosphoric radiance of the billows, on favorable nights (making the waters look like a sea of fire) exhibits a scene of wonderful beauty." — LEWIS.

The Route to Hull, Hingham, etc. So many are the routes by water to the South Shore that the islands in that part of the harbor will be spolen of without regard to any special course.

S. Boston is first passed on the right, and then Fort Winthrop, near which, due E. of S. Boston, is **Castle Island**. Fortifications were built here in 1634, "to make many shots at such ships as shall offer to enter the harbor without their good leave and liking; it is of very good use to awe any insolent persons, that, putting confidence in their ships and sails, shall offer any injury to the people, or condemn their government; and they have certain signals of alarms (cannon and lights on Beacon Hill) which suddenly spread through the whole country." At the coronation of King William, the battery was called Castle William, and was much strengthened by the British, until at the evacuation of Boston they destroyed it. It was repaired by the Americans in time to fire a 13-gun salute for the surrender of Burgoyne (1777). In 1798, President John Adams being present, it was named Fort Independence, and ceded to the United States. The present fort was but lately completed.

In 240 years the little mud fort, passing through the gradations of a wooden palisade and a brick "castle," has developed into a granite fortress of great power and destructive force. S. E. of Castle Island is Spectacle Island, where are carried the dead horses from Boston, and farther S. is Thompson's Island, which bears the State Farm School, — a noble institution, where the neglected street arabs and poor orphans of the State are cared for. Well-fed and clothed, they are employed in farming in the warmer months, and schooling in the winter, and at the age of twenty-one receive a suit of clothes and one hundred dollars. Eastward of

Thompson's is Long Island (where the steamer stops), the site of a large hotel once very popular. On the high bluffs of this island is an iron lighthouse which can be seen from 15 M. off at sea. A powerful battery is being built by the General Government at the head of Long Island. E. of the battery is the reef of Nix's Mate, with a massive pyramid of stone and iron 32 ft. high, warning seamen of a dangerous shoal. In 1636 "Nixes ilande" covered 12 acres, and it long served as a place to execute pirates and murderers. The legend reports that Captain Nix was killed by his mate, and that the latter was executed on this spot, declaring his innocence, and prophesying that the island would wash away in proof of it. The fact that but one acre of shoal, and a low, narrow ledge of rocks remain, is thought to help the legend very much.

S. E. of Long Island, and 7 M. from Boston, is Rainsford's Island, where a hospital was located in 1738, which is still in operation. Galloup's Island, to the N., is one of the Quarantine Stations. Still farther E., on George's Island, stands Fort Warren, a powerful fortress of the first class, called the key of Boston Harbor. It was built between 1833 and 1850, of hammered Quincy granite with powerful water-batteries. During the Rebellion many Confederate chiefs were imprisoned in its casemates, the most noted of whom were Mason and Slidell, taken from the British mail-steamer "Trent," Nov. 8, 1861, by Capt. Wilkes, of the U. S. frigate "San Jacinto." The British government made a peremptory demand, and President Lincoln finally surrendered these rebel commissioners, who went to Europe in January, 1862. 2 miles E. of Fort Warren, on a small islet at the entrance of the harbor, stands the massive stone shaft of Boston Light. This structure occupies the site of the lighthouse established in 1715, and is furnished with a powerful revolving light nearly 100 ft. above the sea. To the N. is a cluster of rocky islets, and to the E. is the Bug Light, over Harding's Ledge, where 6 well-braced, slender iron pillars uphold a small house, over which is a fixed red light.

Hull (*several good hotels*),

a small village under the lee of a high hill, crowned by a marine observatory, is much visited during the summer. The town of Hull occupies the great natural breakwater which runs N. and W. from the South Shore, and guards the harbor. Its population is small, and its alertness in political campaigns, joined with its practical insignificance therein, do not fail to draw forth much good-humored jesting from the Bostonians. The road to the outer beach leads near Point Allerton (from Isaac Allerton, an adventurous Pilgrim, who cruised the coast of Maine in the barque "White Angel" for several years, early in the 17th century). The road now leads out on Nantasket Beach, a line of liard and surf-beaten white sand, 4 M. long. The bathing here is very fine, and driving is easy and

pleasant at low tide. At the south end of the beach are several hotels. (* Rockland House, — \$4.50 per day, \$25.00 per week, — a palatial edifice, $\frac{1}{2}$ M. from the landing; Atlantic House, 50 to 60 guests, — \$3.00 a day, \$15.00 to \$18.00 a week, — finely situated on a bluff near the water.)

This part of the beach is distant $\frac{3}{4}$ M. from the steamboat landing (12 to 13 M. from Boston), and 2 M. from the South Shore Railroad (18 M. from Boston). Fine views are obtained from the bluffs; the harbor islands in the W., a broad expanse of ocean to the E., and at night 11 coast-lights may be seen, extending from Minot's Ledge to Cape Ann. Parts of Boston, Lynn, Nahant, and Quincy may be seen on a clear day.

Steamers for Hull, Nantasket, and Hingham leave Liverpool Wharf, Boston, twice daily in summer.

Hingham is a curious old village, near Nantasket, and S. of the harbor, which was settled in 1635, and was often ravaged during the Indian wars. Its first pastor came from Hingham, in England, and gave its name to the struggling colony. Situated amid fine coast-scenery, but 12 M. (by water) from Boston, this "Marine Old Hadley" drew many visitors, and its large hotel, the Old Colony House (burned in October, 1872) was well patronized. A quaint edifice on the main st. near the Railroad Station, built nearly square, with the roof sloping steeply up on 4 sides to a balustraded platform, surmounted by a narrow-pointed belfry, is "the oldest church in Yankeedom." It was built in 1681, for the Congregational Society of Hingham, who still use it.

Behind the church is the * old graveyard, covering a finely terraced hill, and containing hundreds of ancient stones. In the southern part is a plain and graceful obelisk of granite, on which are inscribed the names of 76 soldiers of Hingham who died in the war for the Union. On the highest hill, on a mound surrounded by a circular earthwork, is a tall obelisk of granite "To the early settlers of Hingham." Elsewhere rests, in an unmarked grave, John Albion Andrew, the great war-governor of Massachusetts, who, during the battle-years 1861 - 65, did more than any other man to raise, equip, and forward to the field the immense levies of troops from this State. He was distinguished for fervid eloquence, great executive ability, and tender provision for the disabled soldiers. He died in 1867. Near the entrance to the cemetery is the tomb of Benjamin Lincoln, a major-general in the Continental Army, second in command of the Army of the North which captured Burgoyne, commander of the Army of the South, 1778 - 80, repulsed from Savannah and Stono Ferry. After enduring a siege of 6 weeks at Charleston (spring of 1780), he was forced to surrender to Sir Henry Clinton. Having been exchanged, he commanded the centre at Yorktown, and was Secretary of War, 1781 - 84. He died at Hingham, his birthplace (1733), in 1810.

Ebenezer Gay, pastor of Hingham, 1718 - 87, delivered the famous sermon called the "Old Man's Calendar" on his eighty-fifth birthday. W. A. Gay, the artist, born at Hingham in 1821, was long a disciple of Troyon, of Paris, and is now celebrated for his fine paintings of coast-scenery and marine life.

Charlestown (*Prescott House*) is a city of Middlesex County, N. of Boston, and united with it by 2 bridges over the Charles River. Its population is 28,330. Soon after crossing the river a small square is reached,

where extensive domed buildings on the left were formerly occupied as the Waverley Hotel. Near this is the City Hall, in which is a fine library and reading-room. Main St., to the right, leads to the United States **Navy Yard**, covering over 100 acres, and separated from the city by a heavy stone-wall, 16 ft. high. A sea-wall extends along the water-front, broken only by a few wharves and a great dry-dock, built of hammered granite, 341 ft. long and 80 ft. wide, and costing nearly \$700,000. Various construction-depots, magazines of naval stores, barracks, and work-shops are in the yard; also 4 large ship-houses, and a granite-built rope-walk, $\frac{1}{4}$ M. long. In one of the ship-houses is the old line-of-battle-ship "Virginia" (designed for 120 guns), which has been on the stocks for nearly half a century.

Charlestown has a handsome soldiers' monument,—on a tall pedestal, a figure of America crowning representatives of the Army and Navy, who stand below her. In the house near Bunker Hill Monument is a fine statue of Gen. Joseph Warren, who was killed on the Hill.

On Prison Point are the extensive buildings of the Massachusetts State Prison, of solid granite and iron, finely ventilated and warmed, and supplied with chapels, school-rooms, hospitals, &c., in such manner as to make it a model prison. The convicts are kept busily employed in making furniture, upholstery, shoes, whips, stone and iron work, and are under perfect discipline.

Not far from the prison is an ancient cemetery, where a simple and massive granite shaft has been erected by Harvard *alumni*, to the memory of John Harvard, the early benefactor of the University.

The principal attraction of Charlestown is * **Bunker Hill Monument**, a lofty obelisk on the site of the battle of Breed's Hill (1775). It is built of 90 courses of Quincy granite, is 221 ft. in height, and 30 ft. square at the base. A spiral flight of 295 steps, ranged around a hollow cone, leads to a chamber 11 ft. in diameter, with windows on each side. Above is the apex-stone, weighing $2\frac{1}{2}$ tons. (A small fee, 20 cts., is charged for admission. Books about the monument, &c., sold in the porter's lodge).

The *view from the top is glorious. From the S. E. window the Navy Yard is seen, with all its manifold activities,—its ship-houses, dry-dock, rope-walk, and frigates. Beyond this is the confluence of the Charles and Mystic Rivers, and East Boston; above which is Fort Warren at George's Island at the mouth of the harbor. Forts Winthrop and Independence, and the archipelago of variously utilized islands which dot the harbor, all are visible from this point. From the S. W. window is seen the city of Boston, with Copp's Hill nearest on the l. and the spires and domes of its church and state buildings rising on all sides. The great network of the northern railroads and highways crosses Charles River below, while, beyond the city, the southern and western

roads emerge. Farther still, on the r., is S. Boston, and over it, Quincy, Dorchester, and the blue hills of Milton. Over Boston are Roxbury and Brookline, and directly below are the houses of Charlestown. From the N. W. window, the State Prison, Cambridge, and Brighton, the McLean Asylum, the Harvard Observatory, the city of Somerville, Arlington, and Medford. It is said that, in very clear weather, with a strong glass, may be seen Mt. Wachusett (over Cambridge), and successively to the r., Mt. Monadnock, Kearsarge, and the White Mts. in New Hampshire. From the N. E., Everett, and Revere with its beach, the city of Chelsea, with the U. S. Marine Hospital, and, over it, the city of Lynn. Nahant runs into the sea to the r.

The corner-stone of this stately monument was laid in 1825 by General La Fayette, on the fiftieth anniversary of the battle. It was completed in 1842, and dedicated on the sixty-eighth anniversary of the battle, in the presence of President Tyler and his cabinet, and with an oration by Daniel Webster. In the upper chamber are two cannon, named "Hancock" and "Adams," each inscribed, "This is one of four cannons which constituted the whole train of field-artillery possessed by the British colonies of North America at the commencement of the war, on the 19th of April, 1775. This cannon and its fellow, belonging to a number of citizens of Boston, were used in many engagements during the war. The other two, the property of the Government of Massachusetts, were taken by the enemy."

Battle of Bunker Hill

"In their ragged regimentals
 Stood the old Continentals,
 Yielding not.
 When the grenadiers were lunging,
 And like hail fell the plunging
 Cannon-shot;
 Where the files
 Of the isles

From the smoky night-encampment bore the banner of the rampant unicorn,
 And grummer, grummer, grummer, rolled the roll of the drummer through the morn."

After an impressive prayer by President Langdon, of Harvard College, on a starry night of June, 1775, Colonel Prescott led a thousand men to Bunker Hill. His force was composed of troops from Essex, Middlesex, and Connecticut, with Gridley's artillery. His orders were to fortify the hill, but a council of officers of the detachment changed the plan, and they occupied Breed's Hill, as much nearer Boston and more surely commanding the roads to the north. The work was commenced at midnight, under the supervision of General Gridley, an old veteran of the Louisbourg and Canadian wars, and by dawn they had completed a redoubt 132 ft. square and 6 ft. high. The frigates in Charles River first saw it, and opened a tremendous fire, which awoke all Boston. The batteries on Copp's Hill then opened fire, and at noon 2,000 picked men from the British garrison crossed the river. The New England flag (blue, with St. George's Cross on the pine-tree emblem) was hoisted over the redoubt, and the 1st and 2d New Hampshire reinforced the weary provincials. At 2 o'clock 2,000 more soldiers crossed from Boston, and soon after, after a furious cannonade from Copp's Hill and the fleet, the British column advanced. Gen. Putnam ordered the Americans to hold their fire until they could see the whites of the assailants' eyes; and 1500 silent and determined men waited till that appointed time, and then fired. "Whole platoons of the British regulars were laid upon the earth, like grass by the mower's scythe. Other deadly volleys followed, and the enemy, disconcerted, broke, and fled toward the water." While they rallied, the Copp's Hill guns showered hot shot and carcasses on Charlestown. 200 houses soon were burning, and under cover of dense masses of smoke the royal forces advanced again. The volley at short range, the carnage, and the flight of the British, was repeated. The American ammunition was now exhausted, the presence of floating batteries raking Charles-

town Neck prevented either reinforcements or fresh supplies from reaching them ; and the British, heavily reinforced, and maddened by their losses, advanced a third time. The outworks, swept by the shot from the fleet, were abandoned, and when the grenadiers rose upon the parapet of the redoubt, they were received by a shower of stones, and confronted by men with clubbed muskets. Soon Putnam ordered a retreat, which was covered admirably by the troops of New Hampshire and Connecticut. But the reserves on Bunker Hill, the rear-guard, and the shattered garrison from Breed's Hill, were unequal to further effort, and there ensued a general *debandade* across the cannon-swept Charlestown Neck. The day was ended ; and although Howe soon moved the bulk of his army on these hills, which he strongly fortified, no further combats were seen here. In the battle of the 17th of June, the Americans lost 115 killed, 305 wounded, and 30 prisoners ; the British lost 226 killed, 828 wounded (Gage's report). 400 houses were burnt in Charlestown, and 5 cannon were taken on Bunker Hill. During the retreat from the redoubt, Putnam swore frightfully at his men, and after the war, sincerely confessing it to the church of which he was a member, he added, " It was almost enough to make an angel swear, to see the cowards refuse to secure a victory so nearly won." Among the last to leave the hill was Warren, and ere he had gone far he was killed by a shot in the head. Joseph Warren, born Roxbury, 1740, was the head of the medical profession in Boston, and a wise and patriotic leader of the people. He was the President of the Provincial Congress, a major-general of the army, and Grand Master of the Masonic Order in America. " He fell with a numerous band of kindred spirits — the gray-haired veteran, the stripping in the flower of youth — who had stood side by side on that dreadful day, and fell together, like the beauty of Israel in their high places." — EVERETT.

Chelsea (Winnisimmet), (City Hotel), a city of 18,547 inhabitants, is connected with Boston by a steam ferry ($1\frac{3}{4}$ M.), and with Charlestown by a long bridge over the Mystic River. The Naval Hospital and the U. S. Marine Hospital, the latter a large and stately building, are here. Near the Railroad Station is a Soldiers' Monument, — a shaft of granite with a statue of a soldier standing at ease upon its summit. Woodlawn Cemetery is about 2 M. from the city, and is approached by a graceful avenue, leading through a lofty Gothic gateway. The Rock Tower, to the right, is a rude pile of boulders, 78 ft. in diameter and 30 ft. high, from which a pretty view is obtained. Netherwood and Woodside Aves. form beautiful vistas, with the quiet grace of American cemeteries on every hand. Netherwood Pond, the views from Chapel and Elm Hills, and the curious Ginko trees, are worthy of attention.

Chelsea (Revere) Beach.

Horse-cars from Boston hourly in summer. The Eastern Railroad runs near the shore, with stations at Revere ($1\frac{3}{4}$ M. off) and Oak Grove ($\frac{1}{4}$ M.). **Hotels.** Atlantic House and several smaller, near the horse-car station ; Revere House, $\frac{1}{4}$ M. north ; Ocean House, on Pine Point, 2 M. north of horse-car station.

Revere Beach is about 5 M. from Boston, and is much visited by the citizens on Sundays and holidays. It is a wide, smooth, hard, sandy shore, 3 M. long, well adapted for driving or walking. Being sheltered by Nahant, which lies about 5 M. off shore, and by Winthrop Bluffs on the south, it has but a moderate surf. Pine Point, its northern extremity, faces the city of Lynn and the openings of Saugus River into Lynn Harbor.

Lexington and Concord.

The former village is reached by trains on the Lexington Branch Railroad, from the Boston and Lowell Depot, in 40 to 50 minutes. By the fall of 1873 the railroad will probably be extended to Concord. At present, Concord is reached by the trains of the Fitchburg Railroad in 1 hr.

Lexington (*Monument House*), a quiet and pretty village 12 to 15 M. N. W. of Boston, is built on one long street, terminating on the west in a broad green, on which is a plain monument, more solid than graceful, in memory of 8 men killed here during the battle.

Concord (*Middlesex Hotel*), near the tranquil Concord River, and the junction of the Assabet and Sudbury Rivers (so-called), is a handsome village of about 2,500 inhabitants, and about 20 M. from Boston. In 1635 Peter Bulkley, of St. John's College, Cambridge, and 21 years rector of Odell, was silenced by Archbishop Laud, and fled to America. In 1636 he purchased of the Indians a tract of land at Musketaquid, and founded the town and church of Concord, so-named from the peaceful manner of its acquisition. Bulkley wrote some Latin poems and Puritan theological theses, and "was as remarkable for benevolence and kind dealing as for strict virtue."

But it is during the present century that the lives of three of the foremost literary men of America have made Concord famous. Henry D. Thoreau (H. U., 1827), an eccentric yet profound scholar and naturalist, in 1845 built himself a hut on the shores of the sequestered Walden Pond (1 M. S. E. of the village), where he led a recluse life, raising a few vegetables, and occasionally surveying or carpentering to get money for his slight expenses. He never voted, never entered a church, never paid a tax. Profoundly skilled in classic and Oriental literature, and an ardent naturalist, his chief delight was to make long pedestrian excursions to the forests and lakes and ocean-shores of New England. Of himself he said, "I am as unfit for any practical purpose as gossamer is for ship-timber." "Thoreau dedicated his genius, with such entire love, to the fields, hills, and waters of his native town, that he made them known and interesting to all. He grew to be revered and admired by his townsmen, who had at first known him only as an oddity." — EMERSON. He died in 1860, leaving his great work unfinished, and his only remains are several quaint and charming books of travel.

Ralph Waldo Emerson (H. U., 1821), "the sage of Concord," or, as Fredrika Bremer calls him, "the Sphinx in Concord," is the head of the school of transcendental philosophy in America and in the world. Descended from seven generations of ministers, and himself sometime a minister, in early life he joined, and since has led, the most advanced and refined school of modern transcendental philosophy. His writings are "distinguished for a singular union of poetic imagination with practical acuteness," and also by a remarkable pungency and compressed force. During his visits to Europe much honor has been shown him, and many of the greatest minds of the century have visited "the pretty little idyllian city of Concord" (BREMER) to hold interviews with him. Thoreau, G. W. Curtis, in his residence at Concord in 1844-45, and Hawthorne have been his friends at home. (The old Emerson homestead was burnt, July 24, 1872, shortly after which the philosopher went to Europe for a long absence.)

Nathaniel Hawthorne (Bowdoin College, 1825), whose exquisite prose composition is world-renowned, lived at Concord in 1843-46, and here wrote the "Mosses from an Old Manse." (See Salem, Mass.)

The Battle of Concord and Lexington.

At midnight, April 18, 1775, General Gage sent 800 grenadiers and light infantry

to destroy the military stores collected by the Americans at Concord. "At first the whole country appeared buried in a general sleep, . . . till the deep tones of a distant church-bell came sweeping down the valley in which they marched, ringing peal on peal, in the quick, spirit-stirring sounds of an alarm. . . . Bell began to answer bell in every direction, . . . fires blazed along the heights, the bellowing of the conchs and horns mingled with the rattling of the muskets and the various tones of the bells" (COOPER), and when the troops deployed on Lexington Green, at dawn, 100 militia men confronted them. "Disperse, ye rebels, throw down your arms, and disperse!" cried the British commander, Pitcairn. A volley from the light infantry broke the line which refused to obey Pitcairn's order, and under the smoke of the first shots of the War of Independence eight Americans lay dead on the green. Now by a rapid march the invaders occupied Concord, 6 M. distant, and destroyed such of the military stores as had not been removed. Meanwhile, 400 minute-men had gathered near the north bridge, 1 M. from the Common, and soon they attacked and drove away 3 companies of light infantry detailed to guard it, upon which the retreat to Boston was ordered. All military order among the provincials was at an end; minute-men were collecting from all points; from every house, barn, and stone-wall guns were fired with sure aim; and the red uniforms of dead and wounded regulars strewed the long road. $\frac{1}{2}$ M. E. of Lexington church, the remnant of the detachment was reinforced by Lord Percy, with 3 regiments, 2 divisions of marines, and a battery. The pitiless provincials worried them until they reached Prospect Hill, in Cambridge, where 700 men of Essex, with the militia of Dorchester and Roxbury, stopped, and held the flower of the British army until Percy's artillery drove them from the field, and the noble Northumbrian led his shattered columns on Bunker Hill, under protection of the fleet. On this memorable day, the royal forces lost 65 killed, 180 wounded, and 28 prisoners; while the Americans lost 59 killed, 39 wounded, and 5 missing.

Cambridge.

W. of Boston (horse-cars from Bowdoin Sq.) is the ancient academic city of Cambridge, on the Charles River. About $3\frac{1}{2}$ M. from Boston are the spacious grounds and buildings of Harvard University.

Cambridge was settled shortly after Boston, under the name of Newtown. In 1636, the legislature of Massachusetts (then, and occasionally now, called the General Court) voted £400 for the establishment of a school here. In 1638 John Harvard, the young pastor of Charlestown (from Emanuel College, in Old Cambridge), died, leaving to the young school his library and about £800 in money. Then the General Court advanced the school into a college, and named it Harvard, changing also the name Newtown into Cambridge, in memory of the old university town where, and especially at Emanuel College, so many of the founders of the new State had studied. In 1640 Charlestown Ferry was made an appanage of the College; in 1642 its first class graduated; and in 1650 the "President and Fellows of Harvard College" were incorporated. Endowments and gifts now flowed in from the province and its citizens, and the young college became the pride of New England. In 1696, of 121 clergymen in the eleven counties nearest to Cambridge, 104 were graduates of Harvard. Many of the political leaders of the War of Independence were educated here, — Samuel Adams (class of 1740), James Otis (1743), Artemas Ward, first commander of the army (1748), John Hancock (1754), Joseph Warren (1759). In May, 1769, on the occupation of Boston by royal troops, the legislature refused to sit "with British cannon pointing at their doors," so they adjourned to the college buildings. In 1775 the students were sent home, and the classic halls were turned into barracks for the Continental soldiers. The library and apparatus were sent to Andover and Concord. The headquarters of the American army of investment was near the College, and the army numbered 16,000 men in June, 1775. Of these, 11,500 were from Massachusetts, 2,300 from Connecticut, 1,200 from New Hampshire, and 1,000 from Rhode Island. The left wing, under Ward, consisting of 15 Massachusetts regiments and Gridley's artillery, lay at Cambridge. Later, Knox brought 55 cannon from the Lake Forts, and the New York volunteers and Morgan's Virginia riflemen joined

the camp. The 10,000 royal troops in Boston were environed by 20 miles of cantonments, stretching from the Mystic River to Roxbury. Thomas, with 4,000 Massachusetts troops, and 4 companies of artillery, held the Roxbury lines; the Rhode Island men were at Jamaica Plain with Spencer's Connecticut regiment. The New Hampshire brigade was at Medford, and Putnam, with a Connecticut brigade, held Charlestown Neck and picketted Bunker Hill. The siege was hardly over, and the College in order once more, when the great captive army of Burgoyne was led to Cambridge (Nov. 19, 1777). The government ordered the college to be vacated, for the accommodation of the British and Hessian officers. But the collegiate authorities, feeling that enough had already been sacrificed by them in the cause of freedom, sent in such a spirited protest that the order was reconsidered, and the prisoners encamped on Winter and Prospect Hills until 1779, when they were sent to Charlottesville, Virginia.

In 1639 the first New England printing-press was set up here, and for its first works printed the "Freeman's Oath," "The New England Almanac," and the "Bay Psalm Book." At present the vast University and Riverside Presses turn out hundreds of thousands of volumes yearly.

Margaret Fuller, Countess D'Ossoli, was born at Cambridge, 1810. A fine linguist and conversationalist, she became an enthusiastic transcendentalist, and, after writing several books, and spending some time in Europe, she married Count d'Ossoli, but was wrecked and lost on the New Jersey coast, returning, in 1850.

Oliver Wendell Holmes was born at Cambridge, 1809. A skilful physician, lecturer, and microscopist, he has been Professor of Anatomy and Physiology in Harvard University since 1847, and has found time to write many pleasant essays and humorous poems, besides two or three novels and numerous medical lectures and dissertations.

James Russell Lowell was born at Cambridge, in 1819. After writing several volumes of poetry, and spending some years in Europe, he returned, and succeeded Mr. Longfellow as Professor of Modern Languages, &c., in Harvard University. He has published "The Biglow Papers" (two series), — a political satire in the New England vernacular; "The Cathedral," and "Under the Willows," his later poems; and several volumes of prose.

F. H. Hedge, the Unitarian theologian, Alfred Lee, Bishop of Delaware, and Rear-Admiral Charles H. Poor, were born in Cambridge.

"Harvard College was founded at Cambridge only ninety years later than the greatest and wealthiest college of our Cambridge in Old England. Puritan Harvard is the sister rather than the daughter of our own Puritan Emanuel. Harvard himself, and Dunster, the first President of Harvard, were among the earliest of the scholars of Emanuel. . . . Our English universities have not about them the classic repose, the air of study, which belongs to Cambridge, Massachusetts; our Cambridge comes nearest to her daughter town, but even the English Cambridge has a breathing street or two, and a weekly market-day, while Cambridge in New England is one great academic grove, buried in a philosophic calm, which our universities cannot rival as long as men resort to them for other purposes than work." — SIR CHARLES DILKE.

Among the most distinguished of the New-England-born *alumni* of Harvard may be named, Increase Mather (class of 1656), Cotton Mather (1678), John Adams, second President of the United States (1755), John Quincy Adams, his son, sixth President of the United States (1787), Fisher Ames (1774), W. E. Channing (1798), Edward Everett (1811), W. H. Prescott (1814), Jared Sparks and J. G. Palfrey (1815), Caleb Cushing and George Bancroft (1817), Ralph Waldo Emerson (1821), C. F. Adams (1825), O. W. Holmes (1829), Charles Sumner (1830), Wendell Phillips and J. L. Motley (1831), H. W. Bellows (1832), R. H. Dana, Jr., and H. D. Thoreau (1837), J. R. Lowell (1838), E. E. Hale (1839).

The buildings of the University are named generally in honor of its benefactors. The small brick building on the corner near the horse-car station contains the Law Library (13,000 volumes) embracing the standard works on this subject by American, English, French, and German

writers. The law-hall and the professorship were founded by Nathan Dane, an eminent Essex County jurist. The large and ornate edifice next to Dane Hall is known as Matthews Hall. Beyond this, and at right angles with it, is Massachusetts Hall, an ancient building which has been changed into two large rooms, the lower of which is occupied as a reading-room, and is surrounded by 60 to 70 portraits of notable New Englanders of the last century, among which are Samuel Dexter, *Frothingham*; John Quincy Adams, Fisher Ames, *Stuart*; Michael Boylston, Thomas Boylston, President Holyoke, and John Adams, *Copley*.

John Singleton Copley, the best of American portrait-painters, was born at Boston, 1737, studied at Rome, resided at London 1775-1813. His historical paintings, of which "The Death of the Earl of Chatham" was the most famous, made him a Royal Academician in 1783. His son was made Lord Lyndhurst.

It is singular that none of Washington Allston's pictures are here. This artist, who was called "the American Titian," and was famous for richly colored pictures on religious subjects, after spending 15 years in Europe, established his studio in Cambridge in 1825, and here remained until his death in 1843. He was a South Carolinian.

Beyond Massachusetts Hall is Harvard Hall, with its sober ornaments and belfry, and then Hollis and Stoughton Halls, between which, and nearer the street is the quaint little edifice (said to have been built by Lady Holden's bounty) which was long used as a chapel, and was built early in the 18th century. Across the upper end of the quadrangle stretches the plain old Holworthy Hall, back of which is the Lawrence Scientific School. Turning now on the other side, the first building is the new, lofty, and ornate Thayer Hall, behind which is the romanesque Appleton Chapel. Beyond Thayer is the simple and substantial University Hall, built of granite, and next comes the modern and Mansard-roofed Weld Hall. University Hall is the seat of the University government, which consists of the President and six Fellows, with a second branch (Board of Overseers) elected by the *alumni*. The system of elective studies and of special series of lectures is superseding the old rigid course and text-book plan, and Harvard is accepting the style, as well as gaining the power, of the German universities. There are about 1,200 men in the various departments of study, with 45 professors and many tutors, &c. Four years' study procures the degree of B. A.; three years covers the courses in the Divinity and Medical Schools, and two years in the Law School. Beyond Weld Hall the fourth side of the quadrangle is occupied by the noble Boylston Hall (of granite, with several collections inside), and the modern Gray Hall. Opposite the wooden Wadsworth Hall is the Holyoke House (pertaining to the college) and nearly opposite Massachusetts Hall is the First Church, with its venerable graveyard. Gore Hall, beyond the quadrangle, contains the University Library. It is a neat building of Quincy granite, in the form of a Latin Cross, and in the 14th-century Gothic style, said also to be a sober copy of King's College Chapel, at Old Cambridge.

Inside there are 10 columns on each side of a nave 112 ft. long, with a groined roof 35 ft. high. About 130,000 volumes are kept in this hall, besides which the University has about 70,000 volumes in 8 other libraries. In glass cases, throughout the hall, are kept many literary curiosities: a MS. Ovid of the 14th century; letters of Washington; Aristotle, in black-letter Latin MS.; ancient Greek MSS. of Hippocrates, Gregory Nazianzen, &c., with Evangelistries, Psalters, &c.; old Hebrew MS. of Esther (in roll); the Gospels in Latin, 8th century (oldest MS. in America); illuminated Latin missals; MS. Koran; Sanscrit and Siamese books in leaves; 3 beautiful Persian MSS. on silk paper; book printed in Mexico City, 1566; Râle's Dictionary of the Abenaki language, in his own writing; Eliot's Indian Bible; Bay Psalm-Book (1640), first book printed in America, north of Mexico; medals, relics, autographs, &c. Busts of distinguished men surround the hall.

Nearly in line with Gore Hall is Appleton Chapel, recently injured by fire. The most conspicuous object about the square is the immense tower of the *Memorial Hall, a stately edifice now building, whose simple and massive architecture contrasts strongly with the Renaissance style of the other new buildings. A beautiful little cloister, at one end of the Memorial Hall, seems like a token from Old Cambridge. Within this noble building are to be held the Commencement exercises and *alumni* dinners. The Hall is being erected by the *alumni* as a memorial to those of their number who fell in the War for the Union. Near by, on a so-called Delta, is the gymnasium, an octagonal structure, while the Lawrence Scientific School is opposite Holworthy Hall. Beyond Memorial Hall are the buildings occupied by the Zoölogical and other museums, in the vicinity of Divinity Hall, the seat of the Unitarian Theological School and Library. The Episcopal Divinity School is near the beautiful little church of St. John. The Observatory and Botanical Gardens are out on Garden St., beyond the State Arsenal. In front of the colleges, on the Green, is a monument, erected by the City, in memory of 339 officers and men of Cambridge who died in the War for the Union. Farther on is the new and elegant Shepard Memorial Church, erected by the Congregationalists in honor of Thomas Shepard, an Emanuel College divine, who was pastor at Cambridge from 1635 to 1649, and was one of the founders and patrons of the college. "Its location at Cambridge was due to him." In front of the church is the Washington Elm, probably 300 years old. Near it the old Indian councils took place, and, at a later day, the town-meetings, and under its foliage, July 3, 1775, Washington assumed command of the armies of America.

A large, old-style house, back from the street, and nearly opposite Gore Hall, is called the "Bishop's Palace." It was built in 1761-65 by East Apthorp, an Anglican Bostonian, educated at Old Cambridge, who was sent here as a missionary, and hoped to be appointed Bishop of New England. But the hostility of the Puritan divines and people was so marked, that he returned to England, and was given a stall in St. Paul's. In 1777, Burgoyne occupied the house as headquarters of the captive Anglo-Hessian army. Near Brattle St. is the house where Baron Riedesel, commander of the division of Brunswickers, was quartered. The Baroness, with a diamond, cut her autograph here on a window-pane, which is still preserved. Near Brattle St., on the right, is a stately old colonial mansion,

THE PRINCIPAL PORTIONS OF THE CEMETERY.

above two terraces, surrounded by broad lawns and fine elms. Built about the middle of the last century, the house was deserted by its Loyalist owner at the outbreak of 1775, and then occupied by Washington as headquarters. Here, through the long winter of the siege, Lady Washington often held receptions. This noble estate is now owned by the poet Longfellow.

Henry Wadsworth Longfellow, born in Portland, 1807 (Bowdoin College, 1825), spent four years (1826-30) in Europe, and then was Professor of Modern Languages at Harvard University (1835-54). Besides several prose romances and many short poems of great power, he has published "Evangeline" (1847,) "The Golden Legend" (1851), "Hiawatha" (1855), a translation of Dante's "Divina Commedia," 3 vols. (1867-70), "The Divine Tragedy" (1871), and "Tales of a Wayside Inn," first (1863) and second series. Mr. Longfellow is perhaps the most popular of American poets, and is distinguished as a faithful translator, an original and profoundly perceptive poet, and an admirer of the picturesque features in mediæval European history.

Mount Auburn.

(Horse-cars from Harvard Square in $\frac{1}{2}$ M. 4 M. distant from Boston.)

A large tract of forest-covered and romantic hills on the banks of the Charles had long formed a favorite ramble for the students of Harvard, until, in 1831, it was purchased by the Horticultural Society, and a portion of it consecrated for a cemetery, with imposing ceremonies. This was the pioneer of the large rural cemeteries of America, and is but a few years younger than Père la Chaise, at Paris. The whole tract of land was soon bought in from the Horticultural Society, and large additions have since been made, until now it covers 125 acres. The name "Sweet Auburn," which the Harvard men had bestowed upon it, was changed to Mount Auburn. "This tract is beautifully undulating in its surface, containing a number of bold eminences, steep acclivities, and deep, shadowy valleys," and is laid out with broad, curving avenues intersected by foot-paths. The emblematic iron fence which bounds the front is provided with a massive granite entrance-gate of Egyptian architecture, 60 ft. long and 25 ft. high, on whose outside is carved, "Then shall the dust return to the earth as it was, and the spirit shall return to God who gave it." From the gate Central Ave. runs to Pine Hill, which overhangs Consecration Dell. The chapel, not far from the gate, on a hill to the r., is a handsome Gothic edifice, abounding in pinnacles, and furnished with stained glass windows from Edinburgh. Inside the chapel are four noble *statues: Judge Story, by *W. W. Story*; John Winthrop, the first colonial governor, by *R. S. Greenough*; James Otis, the leader of the first aggressions against British misrule, by *Crawford*; and John Adams, representing the revolutionary and subsequent constitutional era, by *Randolph Rogers*. On Central Ave. is a fine statue of Hosea Ballou, an eminent Universalist divine, of Boston, not far from the statue (in a sitting posture) of Dr. Bowditch, the mathematician and nautical writer. Fronting the chapel is a majestic *memorial work (by *Milmore*) representing a colossal lion couchant with a calm and heroic female head. The design is taken from a work executed in the highest perfection of Egyptian art,

and is a fine personification of the ancient idea of the mystic "one who outlooks stars and dreams o'er graves." Hannah Adams, the historian of the Jews, was the first person buried in the cemetery, and her humble monument is still pointed out. Near the end of Central Ave. is the monument to John Murray, the founder of Universalism in America. Spurzheim is buried near the Bowditch monument. Near the Ballou statue on Central Ave. is the monument erected to W. F. Harnden, founder of the express-business, by the express-companies of the United States. Under a canopy of granite is a large stone safe with bas-reliefs, supported on bronze claws, alongside of which a marble watch-dog lies. On Mount Auburn, the highest point of the cemetery, stands a massive and graceful granite tower, from whose top an extensive * view is enjoyed. The rich valley of the Charles is in full sight, from the villa-covered heights of Watertown to the widenings which are lined by the palaces on the Back Bay at Boston. The rural roads of Brookline are in the S., and over and beyond them rise the high hills of Milton. In the E. is Cambridge and the ancient walls of Harvard University, while a succession of bright villages stud the country to the N. and W.

For the rest, the tranquil and shaded walks of the cemetery are lined with thousands of monuments, of every form and style, from simple tablets to costly and beautiful statues. Pretty lakelets diversify the surface of the dells, and platoons of obelisks rise along the hills. The gateway, the chapel, sphinx, and tower, are the principal objects to be seen. Hours may be spent in pleasant rambling through the other avenues, passing the graves of scores of local celebrities and magnates of Massachusetts. If the visitor wishes to know how to do Mount Auburn minutely, "Dearborn's Guide" may be bought at the gate.

N. of Mount Auburn about $\frac{3}{4}$ M., is Fresh Pond, a pretty sheet of blue water, winding under the shadow of wooded hills, with villages on its banks. The Fresh Pond Hotel is favorably situated on its shore. 2 to 3 M. N. is Spy Pond (pleasant hotel), the ice from whose clear and sparkling waters is much used in Boston during the summer heats. S. W. of Mount Auburn, on the banks of the Charles, is the United States Arsenal, covering 40 acres, where great amounts of munitions of war are stored. About 1 M. beyond, also on the river, is the village of Watertown, 8 M. from Boston, on the Fitchburg Railroad. Early in the 17th century a nomadic church from this place founded Wethersfield, Conn. In 1643 Massachusetts sent four Puritan missionaries to convert Anglican Virginia. The Cavaliers drove them off, and Knowles, the Watertown pastor, went to England, and preached in Bristol Cathedral several years. John Sherman, pastor here 1647-85, bears on his tombstone,

"In Sherman's lowly grave are lain
The heart of Paul, and Euclid's brain."

Harriet G. Hosmer, the foremost of female sculptors, was born at Watertown in 1830. After long anatomical studies, she went to Rome in 1852, and has since lived there. Most of her works are retained in Italy and England. Her most remarkable pieces are "Zenobia in Chains," "The Sleeping Faun," "Puck," and "Beatrice Cenci."

S. of Watertown is the town of Newton, with several villages, inhabited mostly by men doing business in Boston. Brighton (*Cattle-Fair Hotel, Brighton Hotel, Riverside, &c.*), E. of Newton, has the largest cattle-market in New England. The day of market is Wednesday, when Brighton presents a lively sight.

S. E. of Brighton is the town of Brookline, famous for the suburban residences of Boston merchants. Near the station of the New York and New England Railroad is the principal village, with the ornate and attractive stone town-house, near which is a neat public-library building. Within this town is Brookline Reservoir, with a capacity of 120,000,000 gallons of water. Here terminates the long and sinuous brick culvert, running from Lake Cochituate, in Natick, which is here supplemented by iron mains, which carry the water into Boston. 1 M. distant is the great **Chestnut Hill Reservoir** (5 M. from Boston City Hall), with a capacity of 800,000,000 gallons. The most popular drive about Boston is that to and around Chestnut Hill Reservoir. Jamaica Pond, near the village of Jamaica Plain, and E. of Brookline, gave the first water-supply to Boston. From 1795 to 1840 it was carried through the city in hollow pine logs. In 1851 this was stopped, and now villas and immense ice-houses line the shores. In Jamaica Plain (where encamped the Rhode Island forces, the best equipped and disciplined in the army, in 1775-76), is a fine monument to the soldiers of West Roxbury who were killed in the War for the Union. $\frac{2}{3}$ M. from this village is the large cemetery of **Forest Hills**. (Horse-cars to and from Boston, also Providence Railroad.) It is entered by a large and elegant turreted Gothic gateway of stone, bearing the inscriptions, "I am the Resurrection and the Life," and, "He that keepeth thee will not slumber." Near the gateway to the l. is the finest receiving-tomb in New England, with a Gothic portico of granite, of imposing size and form. On Mount Warren Gen. Joseph Warren is buried; on Mount Dearborn, Gen. H. A. S. Dearborn. This cemetery is larger and plainer than Mount Auburn, and is mainly notable for its air of rustic naturalness. Consecration Hill commands a fine view of the hills of Milton and the fair Lake Hibiscus. In the S. part is a monument "Erected by the City of Roxbury in honor of her soldiers who died for their country in the Rebellion of 1861 to '65." A bronze soldier, of heroic size, stands at ease on a granite pedestal, and on the inner granite tablets of the wall, about the lot, are the names of many soldiers in letters of gold. 1 M. from Forest Hills, and a like distance from Mattapan, on the New York & New England Railroad, is the cemetery

of Mount Hope. This is in Dorchester, an ancient town which was united with Boston in 1870. Over its extensive area (which is bounded on one side by the Bay) are scattered several villages and hundreds of country residences. The natural scenery is picturesque, and is diversified by hills and forests. At Meeting-House Hill is the old church, with a soldier's monument on the green before it. At Grove Hall (horse-cars from the Tremont House or Temple Pl.), amid ample grounds, are the handsome buildings of the Consumptives' Home, an institution founded by Dr. Cullis in 1862, to receive and relieve persons afflicted with the scourge of New England. It is supported (like the Bristol Orphanage), by unsolicited donations in answer to prayer to the Divine Guardian, and the invalids are "freely received in the name of the Lord."

Roxbury (*Norfolk House*, a large and comfortable old hotel, on Eliot Square). Horse-cars from Park-St. Church to Eliot Sq., &c.

Roxbury, an ancient city, almost coeval with Boston, was united with that city in 1868. In 1775 the Rhode Island forces built here that powerful fort which Washington pronounced the best in the siege-lines, and which seriously galled the Royalists in Boston. Upon the hill occupied by this fort is now the stand-pipe of the water-works, where the Cochituate water is forced up through a boiler-iron tube to a height of 240 ft. above tide-marsh level, and hence supplies the highest floors in the city. The tower is a lofty and very graceful structure, with a fine view from the summit, which, however, is usually closed. Eliot Sq. is the central point in Roxbury, and here is the building of the first (Unitarian) church, the society to which Eliot preached in the Puritan era. For the rest, the hilly streets of Roxbury are made beautiful by the villas of the city merchants and by several pretty churches, of which the venerable St. James' Church, with its massive Saxon tower, is most attractive.

Besides General Warren, who died on Bunker Hill, there were also born at Roxbury Major-General Heath, of the Continental Army, and Joseph Dudley, governor of Massachusetts, 1702-15, while Thomas Dudley, long time governor, and major-general between 1630-53, had his estates and mansion here.

John Eliot, "the Apostle to the Indians," was pastor of the church in "Roxbury" from 1632 to 1690. Firmly believing that the Indians were descended from the ten lost tribes of Israel, he made every effort for their conversion. Acquiring their language, he translated into it the Bible (1663), catechism, Baxter's Call, &c., and preached frequently to those villages of "praying Indians which he established and protected through the war of 1675-76. Utterly improvident in his charities, he would sometimes give away his whole salary on the day of its receipt, and it was only by Mrs. Eliot's care and economy that his four sons were educated at Harvard, and were ranked afterwards 'with the best preachers of their generation.'" When the old hero had become helpless, the church continued his salary several years, until his death.

3. Boston to New York.

Via Old Colony Railroad and Fall River steamers in 10 to 12 hrs., leaving Boston at 4.30 or 5.30 P. M. Fare, \$5. The railroad station is on the corner of Kneeland and South Sts. (Pl. 36).

The train soon crosses Fort Point Channel, and runs through S. Boston and Dorchester.

Until Neponset (5 M. out) is passed, the road runs through the southern villages of the Dorchester district of Boston. The Neponset River is crossed, and then comes **Quincy** (*Hancock House*, \$2), a large agricultural town, much of whose land is in the estates of the illustrious families of Adams and Quincy. In the Adams Temple, a plain granite church opposite the fine town-hall, are monuments to the Adamsses, while beneath the church the two Presidents of that name are buried. A handsome granite shaft, with appropriate symbols, was raised in 1868 in memory of 113 soldiers of Quincy who died in the War for the Union. About $\frac{1}{4}$ M. from the Hancock House is the plain old mansion of the Adams family, the Quincy House being 1 M. beyond. Squantum Point (Old Squantum House), between Quincy and Dorchester Bays, was the home of Chickatabut, Sachem of Massachusetts, and of Squantum, the firm friend of the Pilgrims, who, when dying, desired Governor Bradford to pray for him "that he might go to the Englishman's God in heaven." Squantum Point is connected with Boston by steamers (in summer), and is famous for its chowders, reviving the memory of the olden time when, for scores of years, the Bostonians met here annually for a "Pilgrim Feast." Hough's Neck (*Great Hill House*), not far from Quincy, projects into Boston Harbor, between Quincy and Weymouth Bays. W. of the village are the high hills of Quincy and Milton, whence is obtained that excellent sienitic granite which is used for permanent works in nearly every American city. This range is several miles long and, in places, 600 ft. high, and is nearly a solid mass of pure granite. The first American railway was operated here in 1826, when horses drew the stone on cars over wide wooden tram-ways, from the quarry to the river (3 M.). Each horse drew 20 tons of granite besides the car.

In 1844, 100,000 tons were quarried here by 800 men, under 20 companies. At present the works are carried on on a much larger scale.

John Adams, born Quincy, 1756, was a firm opponent of the Stamp Act, defender of Captain Preston and his soldiers in the so-called "Boston Massacre" trial, and Congressman, 1774-77. In 1776, as leader of the committee on the Declaration of Independence, he fought the Declaration through Congress in a three days' debate. In 1778, 1779, and 1782, he visited Paris on a special mission, and in 1782 was chosen ambassador to Holland. In 1785-88 he was minister to England. He was the first Vice-President, and in 1796 was elected President by the Federalists, defeating Jefferson, the Republican candidate, and succeeding Washington. From 1801 to 1826 he lived on his estate in Quincy, and died on the same day as Jefferson, — July 4, 1826, the 50th anniversary of the Declaration of Independence.

John Quincy Adams, son of John Adams, born Quincy, 1767. He remained in Europe most of the time between 1778 and 1785, then graduated at Harvard, and became a lawyer and publicist. He was successively minister to Holland, England, and Prussia, 1794-1801. A United States senator 1803-8; in 1809 he became minister to Russia, and later was appointed minister to England. Secretary of State, 1817-23, in the latter year he was elected President of the United States

(the 6th). From 1831 to 1848 he was in Congress, and died suddenly in the Capitol (1848), his last words being, "This is the last of earth; I am content." Under his influence (as Secretary of State or President) great national works were carried on; Florida was added to the Union; and the South American republics were recognized. An opponent of the extension of slavery, and a powerful advocate of the right of petition, his powers continued until the last, and won for him the title of "the Old Man Eloquent."

Charles Francis Adams, his son, was born in Boston in 1807, and long lived in Europe. He was one of the founders of the present Republican party, was sometime a Congressman, and in 1861 received the hereditary office of minister to England. He held this position until 1863, — an arduous duty, since, during this time, the (unofficial but efficient) English sympathy with the Rebel States required sleepless vigilance on his part. In 1872 he was one of the commissioners to Geneva (for the settlement of the "Alabama" trouble), and conducted his part of the work with great skill.

John Hancock, born Quincy, 1737, became a wealthy Boston merchant, and early opposed the aggressions of Parliament, so that he and Samuel Adams alone were excepted from the general pardon which General Gage offered to the Americans. Sometime President of the Provincial Congress, in 1775 he was President of the Continental Congress, and was the first to sign the Declaration of Independence. Later he became an officer in the militia, and was governor of Massachusetts 1780–85, and 1787–93.

This district was first settled by Weston's company (1622), and Wollaston's (1625), at a place called **Merry Mount**, where their conduct was so opposed to the principles of the Pilgrims that Miles Standish marched from Plymouth against these jovial Episcopalians, and sent their chiefs captive to England. In 1630 the Plymouth forces made another damaging attack on Merry Mount. Thomas Morton, of this colony, who was twice banished to England, and once imprisoned for one year by the Plymouth government, wrote the "New English Canaan," in which he gives the following account of the aborigines: "The Indians may be rather accounted as living richly, wanting nothing that is needful; and to be commended for leading a contented life, the younger being ruled by the elder, and the elder ruled by the Powahs, and the Powahs are ruled by the Devill, and then you may imagine what good rule is like to be amongst them." This curiously agrees with Cotton Mather's theory that "the Indians are under the special protection of the Devill."

The next station is *Braintree* (village not near railroad), an ancient farming town. This is the junction of the South Shore Railroad (see Route 4). At *S. Braintree*, 2 M. farther on, the Plymouth Branch Railroad diverges to the E.

Stations, *Randolph*, *Stoughton*, *Ponkapaug* (Briggs' Hotel), shoe-manufacturing towns. Stations, *N. Easton*, *Easton*, *Raynham*, where the Leonard brothers set up the first forge in America, in 1652.

Taunton (*City Hotel*, \$3 a day, on the Green) was founded by Miss Elizabeth Pool, a pious Puritan lady, of Taunton, in Somersetshire. The settlement was on the territory of Cohannet, and King Philip was friendly to the Tauntonians until midsummer of 1676, when he attacked the place, and was driven off and followed sharply until he was killed. In 1810 there were but 50 houses here, but the water-power of the river soon induced the location of factories, until at the present time it is a large manufacturing city, with 18,630 inhabitants. Mason's Locomotive Works cover 10 acres and employ 800 men, and the works of the Taunton Car Co. are also extensive. The Tack Companies make 700 varieties, from a heavy boat-nail down to microscopic tacks weighing 4,000 to the ounce. In

1871, 18,000,000 bricks were made here. The Taunton Copper Co. covers 15 acres with their buildings, and works up 3,000,000 or 4,000,000 pounds of copper yearly. There are also 11 foundries, and manufactories of screws, stove-linings, and lead-works, large cotton-mills, and a famous manufactory of Britannia ware. With all this, the city is clean and orderly, and clusters around the central square called Taunton Green. There are 19 churches, of which St. Mary's (Catholic) on Broadway, St. Thomas (Episcopal), and the First Unitarian, on Church Green, are fine stone structures. The latter is a large, rambling, Saxon-towered church, which looks like some secluded parish-church of Merrie England which was built before the Conquest. The City Hall fronts on Church Green, and the Public Library is next to the rude stone church (Congregational) on Broadway. The extensive buildings of the State Lunatic Asylum are near Taunton Green, surrounded by pleasant grounds. The Green is about $1\frac{1}{2}$ M. from the Old Colony Station.

Stations, *Weir Junction*, *Weir*, *N. Dighton*, *Dighton*. Near the latter place, on the opposite shore, is the famous Dighton Rock, — a long mass of granite with rude sculptures and inscriptions upon it (copied and published in the *Antiquitates Americaneæ*, Copenhagen), which some scholars refer to the Norsemen in the 11th century, while President Stiles speaks of "the Phœnicians, who charged the Dighton Rock, and other rocks in Narragansett Bay, with Punic inscriptions which remain to this day." It is said that near this place a skeleton was found (in 1834) with a brazen belt and breastplate, which is probably the same which inspired Longfellow's fine poem, "The Skeleton in Armor." Station *Somerset*, then

Fall River (*City Hotel*, *Mount Hope Hotel*, *Union House*), an energetic and growing city, which enjoys a rare combination of great water-power on the margin of navigable waters. The river rises in the Watuppa Ponds on the highlands 2 M. E. of the city, and falls 136 ft. in less than half a mile. Along this incline immense factories are drawn up like platoons in a marching regiment, built across the stream and resting on the granitic banks on either side. Over \$10,000,000 are invested in these works, and 10,000 persons are employed in them. The great article of manufacture is cotton cloth, and more spindles are here engaged upon that work than in any other city in America. Most of the mills are now run by steam-power. Large quarries of granite are worked in the vicinity of the city, and many of its edifices, including some of the factories, two or three churches, and the City Hall, are built of that material. The city is compactly built, and fronts on Mount Hope Bay, across which Mount Hope looms into view. On South and North Main Sts. are the principal churches, the City Hall, Post Office, and hotels, and from the City Hall a group of parallel factories stretches westward and downward to the Bay. Fall River was formerly divided by the Rhode Island line,

but a change of boundary, ceding to that State lands about Pawtucket, &c., secured to Massachusetts all of Fall River, which is still called the "Border City." Its population in 1870 was 26,768.

The eastern and western divisions of the Old Colony Railroad unite near Fall River, run down through the town of Tiverton, and cross a narrow strait at Bristol Ferry to Rhode Island. The track runs down the western shore, and ends at Newport, in 19 M. from Fall River. The Fall River, Warren, and Providence Railroad runs N. W. from Fall River to Providence.

The palatial steamers, leaving Fall River in the early evening, make their first stop at

Newport.

Hotels. — Ocean House, Atlantic House, Perry House, Aquidneck House, \$3.50 a day; \$21 a week; United States, Park, Touro. The Cliff House and Cottages are near the First Beach; the foreign ministers and some European visitors dwell in seclusion at Perrier's. Boarding-houses and cottages are numerous, and frequently offer far more quiet and restfulness than the hotels, together with less expense.

Reading-rooms. — At the Redwood Library; at the Free Library, on Thames Street; also at the Club-House (private), corner Bellevue Avenue and Church Street.

Churches. — Baptist, on Spring, Farewell, and Clark Streets; Catholic, St. Mary's, Spring St.; Congregationalist, Spring St.; Methodist Episcopal, Marlboro St., Thames St.; Episcopal, Trinity, Church St.; Zion, Emmanuel, All Saints (Dr. Potter), Beach St.; Unitarian, Mill St.

Carriages and saddle-horses may be obtained at the Atlantic House stables, Downing St. L. D. Davis, No. 13 Church St., attends to the rental of the Cliff Cottages and others.

Bathing, on First Beach. During the hours when the white flag floats bathing in costume is obligatory. While the red flag is displayed, the beach is reserved for gentlemen.

Stages run to First Beach and other points at regular hours.

Steamboats run to Rocky Point and Providence four times daily (in summer), excursion tickets, 75c.; to Wickford (connecting with Shore Line R. R. for New York), 3 times daily; to Narragansett Pier, 3 times daily. The magnificent steamers of the Fall River Line to New York touch at Newport every evening on their way to New York (fare \$4).

Railroads. — The Old Colony, to Boston, 67 miles, fare, \$2. *Via* Wickford (by steam-ferry) and Shore Line to New York, 180 miles.

The harbor of Newport was first visited (during the historic epoch) by Verrazani, a noble Florentine, who was sent with the frigate Dauphin, by King Francis I. of France, to explore the American coast. He remained two weeks here, refitting his ship, resting his men, and preparing reports for his royal master. The Dutch and English explorers visited the place occasionally, until in 1639 the settlement was made by exiled dissenters from the State church of Puritan land. These embraced Baptists, Antinomians, and many Quakers, and Rhode Island had such a consequent air of heterodoxy and irregularity about it that it was excluded from the league of the United Colonies, although it had received a royal charter in 1665. So late as the beginning of the present century, President Dwight attributed the laxity of morals in Stonington to "its nearness to Rhode Island." So the little colony drew in its outlying settlements, fortified Providence, and maintained armed vessels cruising about Rhode Island throughout King Philip's War, so that no hostile Indian landed on the shores of the "Isle of Peace."

Anawan, the chief captain of King Philip, and 60 of his bravest warriors, surrendered to Captain Church after the death of Philip, being promised amnesty. The broken-hearted chief delivered up his sovereign's rude regalia, and all accompanied Church to Newport, where, shortly after, in Church's absence, he was per-

fidiously beheaded. The chief Tispaquin and his men also surrendered to Church under solemn pledges of pardon and amnesty, but the murder of this patriotic leader was reserved for the people of Plymouth.

In 1629-31 Dean Berkeley gave a high literary tone to the colony, and organized a philosophic society and scientific discussions. The harbor of Newport was fortified in 1733. The royal census of 1730 reported 4,640 inhabitants in the town. In 1769-70 Newport stood second only to Boston in the extent of its commerce, being far ahead of New York. Its population in 1774 was 12,000, and in 1870 it was 12,518. In Dec., 1776, the town was captured by a British expedition from New York, and was held until Nov., 1779. Lord Percy commanded here until he was summoned to England to assume the Dukedom of Northumberland. The Hessian Waldeck regiment (1,500 men) formed part of the garrison, and Admiral Howe's fleet wintered here, 1777-78, and returned here after its battle with D'Estaing's fleet off Point Judith. Later in the year D'Estaing made a daring demonstration, which caused the British to burn six frigates before the town. Sullivan and Green advanced down the island in Aug., 1778, but were forced to retire, after an indecisive action. In Nov., 1779, the Anglo-Hessian army evacuated the place, having destroyed the wharves, fortifications, &c. In 1779 D'Estaing worsted Admiral Arbuthnot in a petty action off Gardiner's Island, and then returned to Newport. In July, 1780, a large fleet, commanded by the Chevalier de Ternay, "Knight of St. John of Jerusalem, Governor of the Islands of France and Bourbon," &c., appeared in the harbor, bringing the Count de Rochambeau and 6,000 French soldiers (the regiments Bourbonnais, Arnois, Royal Auvergne, de Saintonge, Royal Deux-Ponts, Touraine, Soissonais, &c.). Among his officers were Aubert Dubayet, who afterwards was gen. commanding Mayence and in La Vendée, and in 1796 was Minister of War; Count d'Autichamp, afterwards an *émigré* who served in all Condé's campaigns; Viscount Beauharnais, afterwards President of the French Assembly and Minister of War, who was guillotined in 1794. His son Eugene became Viceroy of Italy, and his widow, Josephine, became Empress of France; Berthier, afterwards Marshal of France and Prince of Neufchatel and Wagram, created by Louis XVIII. a Peer of France, and assassinated at Bamberg in 1815; Viscount de Bethisy, afterwards lieut.-gen. in the army of Condé; Christian, Count of Forbach, and William, his successor, fought in the Royal Deux Ponts regiment; Count Axel Fersen, later Grand Marshal of Sweden; Viscount de Fleury, later Marshal of France; the Duke de Lauzun, who commanded the Army of the Rhine and of La Rochelle, defeated the royalist La Vendée, and was guillotined in 1794; Viscount de Noailles; Marquis de Chastellux; Viscount Laval, and his son, afterwards the Duke de Laval; Viscount de Mirabeau, colonel of the regiment La Touraine, brother of the great Mirabeau; Count du Muy; Chevalier de Mauduit-Plessis; Marquis de Viomenil; Viscount de Fleury; Count de Dumas; Chevalier Dupertail; Duke de Damas; Viscount Desandrouins; Arthur Count de Dillon, who defeated the Prussians at Argonne and Verdun, and was guillotined in 1794; Marquis de Dubouchet; Baron Turreau; Baron Viomenil; Victor de Broglie; Count de Custine, a veteran of the Great Frederick's Seven Year's War, afterwards governor of Toulon, commander of the Army of the North, and of the Lower Rhine, and guillotined in 1793.

In 1781 the Chevalier de Tilly broke up Arnold's raiding fleet in the Chesapeake, and brought the "Romulus," 44, and six other prizes into Newport. Throughout the war, Newport was rudely handled and gradually demolished, until Brissot de Warville, visiting the place in 1788, said that it resembled Liège after the great siege. "The reign of solitude is only interrupted by groups of idle men standing with folded arms at the corners of the streets; houses falling to ruin; miserable shops which present nothing but a few coarse stuffs, or baskets of apples, and other things of little value; grass growing in the public square in front of the court of justice; rags stuffed in the windows, or hung upon hideous women and lean, unquiet children." At the close of the Revolution, the French government made strenuous efforts to have Rhode Island ceded to the domain of France. President Adams made a naval station here, fortified with six batteries. Dr. Samuel Hopkins, the founder of the Hopkinsian school of theology ("System of Theology"), and hero of Mrs. Stowe's novel, "The Minister's Wooing," preached at Newport, 1770-1803. Dr. Stiles, afterwards President of Yale College, preached here for many years. The population, which in 1782 was reduced to 5,530, rose slowly until the war of 1812 stopped its growth, and since then the progress of

Newport has been slow and uneven. But this unprogressive and tranquil spirit constitutes one of the charms of Newport, and makes of this quiet little marine city the Ostend, the Nice of America.

William Ellery Channing was born at Newport in 1780 (died 1842). "The influences of the climate and scenery of the island where his boyhood was passed, had no slight influence upon the social and moral attributes of his mind." He won the highest honors at Harvard University, and afterwards was pastor of a Unitarian Church in Boston for 37 years. He was an abolitionist, an anti-annexationist, and an advocate of peace, and his principles were sustained with fearless independence, plain-spoken fidelity, and a solemn and impressive manner. As the leader of the liberal party in the Unitarian controversy, his power was derived as much from the symmetrical beauty of his life as from the remarkable strength of his writings. "He has the love of wisdom, and the wisdom of love." — COLERIDGE, of Channing.

Newport, "the Queen of American watering-places," and a semi-capital of the State of Rhode Island, is on the S. W. shore of the island from which the State is named, and fronts, across its harbor, on Narragansett Bay. Its older portion, lying near the wharves, has many narrow streets, bordered with the houses of the year-round residents, many of which are mansions of the old time. New Newport almost surrounds the old town, and stretches away to the S. with a great number of handsome villas and cottages. The bathing and boating at Newport are fine, the drives over the "Isle of Peace" are varied and pleasant, but the chief charm of the place is its balmy and equable climate, due, according to most opinions, to a divergence in this direction of the waters of the Gulf Stream. Dean Berkeley likened the atmosphere of Newport to that of Italy, while another writer speaks of the damp sea-air and equable climate as resembling those of England. Fogs are of frequent occurrence, but of short duration. There are many summer visitors from the South and the West Indies, while the array of literary talent which gathers here yearly is quite attractive. Several of the ambassadors from Europe, with the nobles connected with the embassies, spend their summers here. The feature of private cottages is largely developed here, and hotel life is quite subordinate to it. Wealthy New York and Boston merchants move into their palatial villas early in the summer, and have their horses and carriages sent on, so that by Aug. 1 the broad, firm avenues, and the hard and level beaches are filled with cheerful life.

The central point in Old Newport is Washington Square, with its mall and fountain. The **State House** fronts on this Square,—a plain but solid old building erected in 1742, which served as a hospital from 1776 to 1781. From its steps the Declaration of Independence was read, July 20, 1776, and in its Senate Chamber is a fine portrait of George Washington, by Stuart. The City Hall, the Perry Hotel, and the mansion taken by Com. Perry after his victory at Lake Erie, all front on this Square. Gen. Washington passed through this Square on his way to Rochambeau's headquarters in his first visit to Newport. In the evening the town was illuminated, and Washington, Rochambeau, and the French nobles

paraded through the streets. **Trinity Church** (on Church St.) was built in the early part of the last century, and was often preached in by Dean Berkeley (1729 to 1731). He presented an organ (still in use) to this church, and left a dearer token, one of his children, in the old church-yard. On Farewell St. is an ancient cemetery, where are buried many of the earliest colonists and their governors. The Jewish cemetery on Touro St. is a beautiful garden-spot kept in perfect order. Near it is the Synagogue, the first in the Union (built in 1762), and not now used, though kept in order by permanent endowments. The * **Redwood Library** is south of the cemetery, in a handsome Doric building, dating from 1750. An elegant though small library is kept here, and some good paintings, together with some fine pieces of statuary. The King of England gave 84 volumes to this library, and Dean Berkeley gave also a large number; but when the evacuating British army carried even the church-bells with them, they spared not the Redwood Library. Touro Park is a favorite resort, and was the gift of Judah Touro, born at Newport in 1775, the son of Isaac Touro, the pastor of the Jewish Synagogue. From 1802 to 1854 he lived in New Orleans, where he amassed a large fortune which he left to various charities, mostly those of the Christian Church, though he himself was a Jew. "He gave \$10,000 towards the Bunker Hill Monument." On this Park, surrounded by an iron fence, stands the * **Round Tower**, otherwise called the **Old Stone Mill**, an ivy-clad, circular stone tower supported on round arches. More battles of the antiquarians have been fought over this ancient tower than could well be numbered, the radical theories of its origin being, on the one side, that it was built by the Norsemen in the 11th century, and on the other that a colonial governor (over perhaps 500 people), built it for a windmill in the 17th century. Verrazzani spent 15 days in the harbor and exploring the land (1524), but makes no mention of this tower; while, on the other hand, it is certain that the early colonists never built in such architecture or materials as are here seen. The only thing in favor of the mill theory is the fact that Gov. Benedict Arnold (died in 1678) bequeathes it in his will as "my stone-built windmill." The opening scenes of Cooper's "Spy" are laid in this vicinity; and Longfellow's poem, "The Skeleton in Armor," has told its story. But "its history has already, in Young America, passed into the region of myth." Near the round tower stands the statue of Commodore M. C. Perry, who opened Japan to the world (1854).

The Vernon House (corner Mary and Clarke Sts.) was Rochambeau's headquarters in 1780. Also on Clarke St. is the Central Baptist Church, built in 1733, and next to it is the armory of the Newport Artillery Company, an *élite* corps, formed in 1741. The first Methodist steeple in the world is on the church on Marlboro St. The Penrose House, on Church

St., a famous old colonial mansion, where Gen. Washington was once a guest, is now a tenement house, and the Channing Mansion (built 1720) is near Thames St. The First Baptist Church, on Spring St., dates from 1638. In the office of the *Mercury*, a weekly paper started in 1758, is Ben. Franklin's printing-press, imported in 1720. The *News* is a bright daily newspaper.

12 M. N. E. of Newport is the **Stone Bridge** which unites Rhode Island with the mainland at Tiverton. About 7 M. out is the **Glen**, a romantic spot, tree-shaded and quiet, where an old mill stands near a small pond. This is a favorite drive for the Newport visitors, forming an easy afternoon's ride. A small hotel is situated 1-2 M. from the Glen, and a church in the vicinity was frequently preached in by Dr. Channing, "the Apostle of Unitarianism."

6-7 M. from Newport, on a road running to the W. of the Stone Bridge highway, is **Lawton's Valley**, a beautiful rural resort, rich in verdure and in trees which are kept green by a bright stream flowing seaward. The Pond and Old Mill are the principal objects in the scenery. Over the valley is Butt's Hill, where Sir Robert Pigott attacked the Americans under Sullivan and Green on their retreat from the siege. Pigott impulsively attacked the halting army, and was beaten back by them until nightfall, when the Americans continued their retreat to the mainland, saving both their artillery and their stores. The British loss was 260, while the New England militia lost 206 men. $3\frac{1}{2}$ M. from Newport, on this road, is the pretty little church of the Holy Cross, and near it is the farmhouse used by the British Gen. Prescott as headquarters. On the night of July 10, 1777, Lieut.-Col. Barton and a small party crossed Narraganset Bay in a boat, and took Prescott from his bed, carrying him into captivity. He was exchanged for Gen. Lee.

The grand drive is on * **Bellevue Ave.**, a clean, broad road, lined with villas, and running two miles to the S. Here, at the fashionable hour, passes a procession of elegant equipages only equalled in Central Park, Hyde Park, or the Bois de Boulogne. Many of the homes along this avenue are of palatial splendor, and they form a handsome panorama of architecture. Bailey's Beach is at the end of Bellevue Ave.; and among the rocky cliffs on the shore near by is the **Spouting Cave**, a deep cavern running back from the sea, into which great waves crowd after a storm from the S. E. Unable to go farther, they break with a heavy boom, and dash upward through an opening in the roof, sometimes to a height of 40-50 ft. From the cliffs in the vicinity (near the Boat-House Landing) a noble sea-view is gained, stretching as far as Block Island, 30 miles S. W. The picturesque Gooseberry Island is nearer, in the foreground. "A finer sea-view--lit up, as it is, moreover,

by the ever truly fairy-like spectacle of ships gliding under sail over the waters—the eye can rarely witness.” Narragansett Ave. runs at right angles with Bellevue Ave., and terminates on the E. at the **Forty Steps** (leading down the rocks). It is lined with fine houses.

The ***First Beach** (about $\frac{1}{2}$ M. from the Ocean House) is a strip of white sand, hard and smooth, extending for 1 M. in length and lined with bath-houses. The slope of the shore is very gradual, and the surf is light rather than heavy, so that this is one of the safest beaches on the coast. It is a lively and brilliant scene here during the hours of the white flag in warm days, and the beach is fringed with carriages. The **Cliff Cottages** are in this vicinity. 1 M. E. is the **Second**, or **Sachuest Beach**, whose “hard black beach is the most perfect race-course, and the heaving of the sea sympathizes with the rider, and inspires him.” The hours of low tide are the favorite times to ride here. ***Purgatory** is at the W. end of Sachuest Beach. It is a wonderful chasm, 160 ft. long, 40–50 ft. deep, and 8–14 ft. wide at the top, torn out by upheaval or eaten by the waves, in the graywacke rock. Several feet of water remain in the chasm at low tide, and in stormy high tides heavy masses of water boom through it. The familiar story of the **Lover’s Leap** of course attaches to this place, but is antedated by the legend that the Devil once threw into it a sinful Indian squaw, and his hoof-marks can be seen by all unbelievers. Other stories, of later date, attach to the Purgatory, but the origin of its name does not transpire. **Paradise** is a verdant valley adorned with cottages, opening off Sachuest Beach, and near it is a mass of rocks and upheaved boulders called **Paradise Lost**. The **Third Beach** is a long, quiet, and sequestered line of sand, above which are the **Hanging Rocks**, where, in a sheltered natural alcove, **Dean Berkeley** loved to sit, and look out over the wide sea, and write down his meditations.

Here he composed “**Aleiphron ; or the Minute Philosopher**,” a series of Platonic dialogues defending the Christian system. Here probably he wrote the noble lyric ending with the prophecy :—

“ Westward the course of empire takes its way,
The four first acts already past,
A fifth shall end the drama with the day.
Time’s noblest offspring is the last.”

George Berkeley, **Dean of Derry**, a famous philosopher and idealist, conceived a plan for converting the American Indians by a university, and came to **Newport**, under royal charter, in 1729. He built the mansion “**Whitehall**” (now a farmhouse), 3 M. from the town, but soon found that his scheme was impracticable, and returned to England in 1731, giving his **Newport estate** and a fine library to **Yale and Harvard Colleges**. From 1733 until his death (in 1753) he was **Bishop of Cloyne**.

Washington Allston was fond of roaming on these beaches, and **Dr. Channing** once remarked (of **First Beach**), “No spot on earth has helped to form me so much as that beach.”

Sachuest Point is on the S. E. of the island, and is much visited by fishermen.

To *Miantonomi Hill*, $1\frac{1}{2}$ M. from the city, with its old British earth-works and noble view of Newport and its environs, is a pleasant excursion for a clear day. *Honeyman's Hill*, near Miantonomi, is another far-viewing point. The old Malbone Estate (see "Malbone; a Romance of Oldport," by T. W. Higginson) was at the foot of Miantonomi Hill.

The *Pirates' Cave* and Bateman's Point are often visited, being about $4\frac{1}{2}$ M. from the city, and a favorite drive is around the Neck, past Fort Adams, and along Ocean and Bellevue Aves. to the city again, the distance being little more than 10 M.

Fort Adams, distant $3\frac{1}{4}$ –4 M. from the city (by Thames St. and Wellington Ave.). This is the strongest (save two, Fortress Monroe and Fort Richmond) of the coast defences of the U. S., and mounts 468 cannon, requiring a garrison of 3,000 men. Its systems of covered ways, casemates, and other protective works, is complete. The "fort days," (twice weekly), when the garrison band plays its best music, attract great numbers of visitors, and many carriages pass the imposing granite walls, and wait on the parade.

This fortress is on Brenton's Point, named for the noble family of that name. William Brenton was governor of the colony 1666–69; his son, Jahleel, was a customs officer under William III.; his grandson, Jahleel, resided on the great family estates in the island; his great-grandson, Jahleel, refused very tempting offers from the Americans, left his estates, which were afterwards confiscated, and commanded the British frigate, the "Queen"; his great-great-grandson, Jahleel, an English knight and rear-admiral of the Blue, died at London in 1844.

Opposite Fort Adams, on Conanicut Island, is an old stone fort, circular in form, called the *Dumplings*. A fine marine view is enjoyed from this loftily placed ruin.

Goat Island, opposite the city-wharves, is the headquarters of the torpedo division of the U. S. Naval Service. Here is the school in which the young officers of the navy are instructed in the torpedo service. *Lime Rock* is beyond Goat Island, and is famed for being the home of Ida Lewis, the American Grace Darling, who has saved many lives in this harbor. *Rose Island* is farther out in the Bay, and has the remains of an old fort upon it. Fort Green was built in 1798, near the Blue Rocks and the line of Washington St. On *Coaster's Harbor Island* is a fine Asylum for the poor, on land left by Wm. Coddington, the founder of R. I., and for nine years its governor.

Rhode Island was bought from the Indians in 1638. Its name was Aquidneck, "The Isle of Peace." The earliest discoverers named it Claudia, and a later exploring expedition from Holland, coming upon it in the autumn, when its forests were in bright colors, called it Rood Eylandt, the Red Island. Roger Williams tried to fasten the name "Patmos" upon it, but Rhode Island prevailed, derived, according to some, from its similarity to the Isle of Rhodes, a Moslem fortress in the E. Mediterranean. In that early day Neale called it "the garden of New England," and even now the Rhode Island farms are the most valuable in the six States. Off its shores are caught 112 kinds of fish, ranging from whales to smelts. The island is 15 M. long by 3–4 M. wide, and is "pleasantly laid

out in hills and vales and rising grounds, with plenty of excellent springs and fine rivulets, and many delightful landscapes of rock, and promontories, and adjacent lands."

Malbone, the celebrated portrait-painter, was born at Newport in 1777, and Capt. Decatur, of the navy, was born here in 1751, whose son was Stephen Decatur, "the Bayard of the seas."

After leaving Fall River, and touching at Newport, the steamer moves on steadily through the night, passing Point Judith, Block Island, and Fisher's Island, after which she enters the tranquil waters of Long Island Sound. At a very early hour the narrowing W. end of the Sound is entered, and the shores of Westchester County are passed on the N. Throgg's Point, on the r., bears Fort Schuyler (318 guns), out on the Sound, which is mated by a strong fortress on Willet's Point (opposite). After passing several villages, Flushing Bay opens to the l., with the beautiful village of Flushing at its head. Richly cultivated islands and shores follow, up to Randall's Island, with the House of Refuge, and Ward's Island, with the Emigrant-Refuge and Hospital, and the Potter's Field, where 3,000 of the poor of New York are buried yearly. The steamer now enters **Hell Gate**, a wild and turbulent succession of strong currents and whirlpools, caused by the action of immense bodies of water, in the changes of the tide, being poured through this narrow and sinuous strait, which abounds in rocky islets and sunken ledges. The passage of this point was formerly difficult and dangerous, and two or three British frigates were wrecked here during our wars. But immense ledges have been removed by submarine blasting, and now but little danger remains. Astoria and Ravenswood are beautiful villages soon passed on the Long-Island shore, after which **Blackwell's Island** comes into view, with its long lines of charitable and correctional establishments. The N. point of this island is occupied by a neat little model of a fort, with a formidable array of wooden cannon, called Fort Maxey or the Crazy-Man's Fort. It was built by an Irish lunatic named Maxey, who has lived many years here, and claims a great sum from the government for his defense of New York. The octagonal building, with two long wings, is the Lunatic Asylum. One wing is reserved for each sex, while the more noisy maniacs are kept in a separate building on the E. The Work-Houses come next, where willing hands which can find no work, and vagrants, who will not do honest labor, are furnished with appropriate work. The extensive Alms-Houses, with the handsome house of the Superintendent, come next, being divided into male and female departments. Then the extensive Penitentiary and Charity-Hospital are passed, and, on the lower end of the island, the ornate building of the Small-Pox Hospital. These structures are all of granite, quarried here by the convicts, and probably there is no cluster of such institutions, in the same space, in the world, which combine so much of safety, comfort, and practical influence for correction and restraint. Deep ship-channels run on each side of the

island, and on the Manhattan shore, opposite its centre, is the great German Festival-Garden, called Jones' Wood. Hunter's Point and Greenpoint are now passed on the left, and a long line, on both sides of the East River, of foundries and factories. Then comes Williamsburg with its shipyards. On the l., and beyond it, fronting on Wallabout Bay, is the Brooklyn Navy-Yard, the principal naval-station of the Union, where several U. S. frigates may usually be seen. Crowded wharves now stretch into the stream on each side, with forests of masts, while fleet and powerful tug-boats dart to and fro in the river, and the crowded and ever busy ferry-boats cross and recross it. The works of the great East-River Bridge are seen near Fulton Ferry in Brooklyn. Where Brooklyn bends off to the S. W., the steamer turns to the W., and passes Governor's Island on the l. This island belongs to the government, and its centre is occupied by Fort Columbus, a low-lying but powerful star-fort, mounting 120 guns. A water-battery on the S. W. commands the channel toward Brooklyn, and a tall, semi-circular fort with three tiers of guns, called Castle William, looks toward the Battery. The steamer now rounds the **Battery**, the tree-shaded lower extremity of Manhattan Island. This was once a favorite park, but is now neglected. The curious round building at the water's edge was built in 1807 by the government, as a fortress, under the name of Castle Clinton. At a later day great fairs and concerts were held here, and it is now used as an emigrant depot. On the l., Ellis, Bedloes, and Staten Islands are seen, and Jersey City and Bergen. Passing up the North River the boat soon enters its dock at the foot of Chambers St. (see New York).

4. Boston to S. Duxbury.

Via Old Colony and South Shore Railroads. Distance, 39 M. Time, $1\frac{3}{4}$ – $2\frac{1}{2}$ hrs.

Boston to Braintree, see Route 3. Stations, *E. Braintree*, **Weymouth**, **Wessagusset** (Weymouth Hotel), 12 M. from Boston, a town of 9,000 inhabitants, was settled at an early date by 60 Episcopalians. Here, in 1623, occurred the terrible attack of Miles Standish on the assembled Indian chiefs, whose justifiableness has not yet been proven clearly. The scene is well described in the 7th part of "The Courtship of Miles Standish," by Longfellow. After this affair, the Episcopalian colonists left, and in 1624 a company moved in from Weymouth, in Dorsetshire, Eng. who gave its name to the town.

Stations *N. Weymouth*, *E. Weymouth*, *W. Hingham*, *Hingham* (see Route 2), *Nantasket*, and **Cohasset**. The latter is a small town with a quaint old church on its green. The rocky shores and resounding inlets along the ocean front are very picturesque, and are adorned with fine villas.

No district in America yields such quantities of Irish moss as do the shores of Cohasset and Scituate. On these same "hard sienitic rocks, which the waves have laid bare but have not been able to crumble," in Oct., 1849, the emigrant vessel "St. John" was wrecked, and many scores of passengers were lost. "The sea-bathing at Cohasset Rocks was perfect. The water was purer and more transparent than any I had ever seen. The smooth and fantastically worn rocks, and the perfectly clean and tress-like rock-weeds falling over you, and attached so firmly to the rocks that you could pull yourself up by them, greatly enhanced the luxury of the bath."—THOREAU. Capt. John Smith, when passing by one of these rocky promontories, in 1614, was attacked by the Indians with arrows, whereupon he says, "We found the people in those parts verie kinde; but in their furie no lesse valiant."

At N. Cohasset are the Black Rock and Rockville Houses, while the Pleasant Beach House is south of these, and on a point near Minot's Ledge is the extensive Glades House. Minot's Ledge is a dangerous reef far out from the shore. In 1849, a lighthouse on iron piles was built here, but this was swept away in the great storm of April, 1851, and its keepers were lost. The present lighthouse (8 M. from Boston Light) is 88 ft. high, of which the lower 40 ft. are of solid masonry. Stations *N. Scituate*, *Egypt*, **Scituate** (South Shore House), a quiet old marine village looking out on the ocean through a wide harbor-mouth scarce a mile away. Cliff St. leads up on an eminence whence a fine view is gained of the sea, and the singular and desolate bluffs in the S. Near by is Peggotty Beach, with good bathing, but no hotel.

Station, *South Scituate* (far-viewing hotel on the bluffs near the R. R.), *E. Marshfield*, *Littletown*, *Marshfield Centre*.

Marshfield station is about 4 M. from the seaside resort of Brant Rock (several small hotels). Carriages are usually in waiting at the station to carry travellers to Brant Rock, or to the Webster Estate (2 M.). The Webster Mansion is a large, antique, and pleasant house, approached from the road by a long, curving avenue lined with trees. By the courtesy of the present possessors of the estate, travellers are permitted to go through the house (gratuity to servants, 50 cts.). The various apartments of the house, low, broad, and wainscotted, are filled with old paintings and relics. The library, a high and graceful room on the N. wing, contains the books and many interesting mementos of the statesman, together with an interpolated bust of Pope Pius IX. $\frac{1}{2}$ M. S. of the Webster Mansion (passing, on the l., a French-roofed house, where lives Adelaide Phillips, the celebrated contralto), at the end of the road, is the old Winslow House, built and inhabited by the Pilgrim Gov. Winslow in the 17th century.

A road turning to the l. from the main road just N. of the Webster farm, and running toward the sea, leads in a few minutes to an ancient burying-ground on an ocean-viewing hill. The first graves reached are those of the Webster family: Daniel, and his sons, — Major Edward, died in the Mexican War, and Col. Fletcher Webster (12th Mass. Infantry), killed at the battle of Bull Run, 1862.

Daniel Webster, born at Salisbury, N. H., Jan. 18, 1872, was in the class of 1891 at Dartmouth College, and afterwards became a lawyer. His matchless eloquence and vast ability carried him rapidly forward, and he became a Congress-

man (1813-17, and 1823-27), a Senator (1827-39, and 1845-50), and Secretary of State (1840-43, and 1850-52.) "The famous Dartmouth College case, carried by appeal to Washington in 1817, placed him in the front rank of the American bar. Among the great cases argued by him before the U. S. Supreme Court were those of Gibbons and Ogden (steamboat monopoly case), that of Ogden and Saunders (State insolvent laws), the Charles River Bridge case, the Alabama Bank case, the Girard Will case, and the Rhode Island Charter case. . . . Dec. 22, 1820, he delivered his celebrated discourse at Plymouth on the anniversary of the landing of the Pilgrims. Others of this class of efforts were that on the laying of the corner-stone of the Bunker Hill Monument (June 17, 1825), and at its completion (June 17, 1843), and the eulogy on Adams and Jefferson, July 4, 1826. He again entered Congress in Dec., 1823; made his famous speech on the Greek Revolution; and, as chairman of the judiciary committee, reported and carried through the House a complete revision of the criminal code of the U. S. In the 19th Congress he made a masterly speech on the proposed diplomatic Congress at Panama. . . . His great speech in reply to Hayne, delivered in the Senate Jan. 26 and 27, 1830, on Foote's resolution, has been deared, next to the Constitution itself, the most correct and complete exposition of the true powers and functions of the Federal Government." As Secretary of State under Tyler and Fillmore, he settled the Northeastern Boundary question (Ashburton Treaty). "Mr. Webster's person was imposing, of commanding height, and well-proportioned, the head of great size, the eye deep-seated, large, and lustrous, his voice deep and sonorous, his action appropriate and impressive." His eloquence on great occasions has been called "the lightning of passion running along the iron links of argument." He was very fond of rural life, of farming, and of fishing and hunting. On the 24th of Oct., 1852, at his home in Marshfield, died Daniel Webster, the foremost man in New England's history.

Near the Webster Monument is an iron-railed lot, containing the tombs of "The Honble. Josiah Winslow, Gov. of New Plymouth. Dyed December ye 18, 1680, ætatis, 62." "Penelope, ye widow of Gov. Winslow," and others.

Edward Winslow came in the "Mayflower," and was governor of Plymouth in 1633, '36, and '44. He was a warm friend of the Sachem Massasoit. In 1635, while Plymouth's agent, Archbishop Laud imprisoned him 17 weeks in the Fleet Prison for heretical acts. He died in 1655, while in partial superintendence of a fleet sent by Cromwell against the Spaniards. From Edward's brother was descended John A. Winslow, rear-admiral U. S. navy, who fought in the Mexican War, and in the Western river squadrons, 1861-63. June 19, 1864, commanding the "Kearsage," he was attacked off Cherbourg by the Confederate war steamer, the "Alabama." The vessels were of about the same strength, but so skilfully was the "Kearsage" protected and manœuvred that her opponent was sunk within sight of the crowded French coast.

Josiah Winslow, son of Edward, was born at Marshfield in 1629, commanded the colonial armies through King Philip's War, and was the first native-born governor (1673-1680). His grandson, John Winslow, born at Marshfield, 1702, a brave and able officer, "was the principal actor in the tragedy of the expulsion of the hapless Acadians from Nova Scotia in 1755; and it is a singular fact that, 20 years after, nearly every person of Winslow's lineage was, for political reasons, by the force of events, transplanted to the very soil from which the Acadians were expelled."

After Marshfield are the stations *Webster Place*, *Duxbury* (Hollis House), and *S. Duxbury*.

Duxbury was allotted to John Alden (youngest of the Pilgrims, whose great grandson commanded the 7th Mass. Continental Regt., and was killed in battle at Cherry Valley), and to Miles Standish. The Bradfords also settled here, and Alden Bradford, the author, and Gamaliel Bradford, colonel of the 14th Mass. Regt. through the war for independence, were born here. Duxbury was so named from its being the home of the military chief (dux) of the colony. Standish lived on Captain's Hill, in S. Duxbury, a far-viewing eminence 180 ft. high, and surrounded on 3 sides by the waters of the Bay. In Oct., 1872, imposing ceremonies were held on this hill, and a costly monument (to be finished late in 1873) was dedicated to the Pilgrim soldier. A fine view of Plymouth and the

ocean (and of Cape Cod in clear weather) is enjoyed from Captain's Hill. Miles Standish, a veteran of the Flanders campaigns, came over with the Pilgrims, and was made the head of their armies (consisting of 12 men), although he did not belong to their church. He was a short man, very brave, but impetuous and choleric, and his name soon became a terror to all hostile Indians. He is the hero of a beautiful poem in nine parts, by Longfellow, called "The Courtship of Miles Standish."

Ralph Partridge, the first pastor of Duxbury, "had the innocence of a dove and the loftiness of an eagle. His epitaph is 'Avolavit.'"—MATHER.

The Standish House is on the harbor some distance from the S. Duxbury Station. Its still-water bathing is good. From Duxbury Post Office to Plymouth, by the main road, is 9 M. At Duxbury is the American end of the French Atlantic Telegraph.

5. Boston to Plymouth.

Via Old Colony Railroad, $37\frac{1}{2}$ M., in $1\frac{3}{4}$ hrs.

Boston to *S. Braintree*, see Route 3. Stations, *S. Weymouth*, *N. Abington* (Culver House), *Abington*, *S. Abington* (Wheeler House), the last three stations being in a town of about 10,000 inhabitants, who are mostly engaged in the manufacture of shoes. The line now approaches the great lake-strewn forest of the Old Colony, passing the stations of *N. Hanson*, *Hanson*, *Halifax*, *Plympton*, and *Kings-ton* (Patuxet House, with daily stage to N. Carver). The train now passes along the W. shore of Plymouth Harbor, with Captain's Hill (Duxbury) prominent on the l. across the water.

Plymouth, Umpame, or Patuxet. (Samoset House, a large and comfortable hotel, near the R. R. station. \$1.50 to \$2 a day).

Elizabeth, Queen of England, in 1558-62, put into operation the Acts of Supremacy and Uniformity, and the Articles of Religion, sternly forbidding all forms of religious worship within her realm, save those prescribed by the Church of England, of which she was the head. Almost simultaneously a sect sprang up, claiming that the Anglican Church still retained many of the errors of Roman Catholicism; while, in opposition to the Queen's primacy and ecclesiastical laws, they maintained that the church was spiritual, governed by the laws of Christ given in the New Testament, and *separate* from temporal affairs and independent of earthly sovereigns. Hence they were called Separatists (sometimes Brownists). They were imprisoned and martyred by the government, and in 1598 many fled to Holland. Churches existed at Southwark and elsewhere, but the true birthplace of the Pilgrim Church (if not at Jerusalem) was at the deserted "Manor of the Bishops" (of York) at Scrooby. Bancroft, the new primate, redoubled the persecutions, in 1602, and in 1608 the church at Scrooby ran the blockade of the English coast, and went to Amsterdam. In 1609 the Pilgrims moved to Leyden, and in 1620 sailed from Delfthaven, *via* Southampton, for America. On Sept. 6, the "Mayflower," previously driven back by adverse circumstances, left Plymouth in England, intending to reach land and settle near the Hudson River. By treachery or otherwise they struck the continent far north of this point, and on the 21st Dec., 1620, the Pilgrims landed at New Plymouth. Capt. Smith was severely attacked here by the Indians in 1614, and Standish's rude forays on Cape Cod had enraged the aborigines, but the Wampanoag tribe, which in 1616 numbered 30,000 souls, had been reduced by a great war, followed by a pestilence, to a remnant of 300. By the latter part of March, 44 Pilgrims had died, and then the Sachem Massasoit made an alliance with the dwindling colony. In 1622 a massive structure was erected for a church, with a battlemented roof and ordinance, which made it the castle of the village. In 1621 and 1623 other companies

of Pilgrims crossed the sea, after which the colony thrived and occupied the neighboring lands. In March, 1621, Samoset and Tisquantum came in and told them of the land (the latter having been stolen by Hunt, in 1614, from the coast, and sold at Malaga as a slave). In 1624, the first cattle ever in New England were landed here, and in the same year Plymouth was found to consist of 32 houses, surrounded by a high palisade with fortified gates. Canonieus, chief of the Narragansetts, sent a sheaf of arrows bound with a rattlesnake's skin, to Gov. Bradford, as a token of hostility. The skin was filled with powder and shot, and sent back to Canonieus, who understood this grim answer, and as long as he lived restrained his tribe from attacking the colony. As one of the United Colonies, Plymouth bore her part in the Indian wars, until it finally joined the colony of Massachusetts Bay, in 1692.

"Methinks I see it now, that one, solitary, adventurous vessel, the 'Mayflower,' of a forelorn hope, freighted with the prospects of a future state, and bound across the unknown sea. I behold it pursuing, with a thousand misgivings, the uncertain, the tedious voyage. Suns rise and set, and weeks and months pass, and winter surprises them on the deep, but brings them not the sight of the wished-for shore. I see them now scantily supplied with provisions, crowded almost to suffocation in their ill-stored prison, delayed by calms, pursuing a circuitous route; and now driven in fury before the raging tempest on the high and giddy waves. . . . The awful voice of the storm howls through the rigging. The laboring masts seem straining from their base; the dismal sound of the pumps is heard; the ship leaps, as it were, madly, from billow to billow; the ocean breaks and settles with engulfing floods over the floating deck, and beats with deadening, shivering weight against the staggered vessel. I see them, escaped from these perils, pursuing their all but desperate undertaking, and landed at last, after a five months' passage, on the ice-clad rocks of Plymouth, weak and weary from the voyage, poorly armed, . . . without shelter, without means, surrounded by hostile tribes. . . . Tell me, man of military science, in how many months were they all swept away by the 30 savage tribes of New England? Tell me, politician, how long did this shadow of a colony, on which your conventions and treaties had not smiled, languish on the distant coast? . . . Is it possible, that, from a beginning so feeble, so frail, so worthy not so much of admiration as of pity, there has gone forth a progress so steady, a growth so wonderful, an expansion so ample, a reality so important, a promise, yet to be fulfilled, so glorious?"—EDWARD EVERETT.

See also Mrs. Hemans' inimitable hymn, beginning,

"The breaking waves dashed high
On a stern and rock-bound coast,

When a band of exiles moored their bark
By the wild New England shore."

On Court St. is the classic ***Pilgrim Hall**, in front of which is a rock of gray sienitic granite, surrounded by an iron fence. This is "the corner-stone of the Republic," a portion of the rock on which the Pilgrims first stepped from their boats, and which was drawn from the water-side in 1775.

The Pilgrim Hall (open daily) contains "The Landing of the Pilgrims," a large painting of much interest (13 x 16 ft.), and nine portraits; busts of Daniel Webster and John Adams; Governor Carver's chair; sword, &c., of Miles Standish; the gun-barrel with which King Philip was killed, and a letter from King Philip; embroidery by Lorea Standish; and a great number of relics of the early colonists, with an elegant model of the monument which is to be.

The principal ledge of ***Forefathers' Rock** is on Water St., and is covered by a singular edifice (canopy) of granite, in whose attic has been placed the bones of several men who died in the winter of 1620-1.

Town Green is at the end of Main Street. On the site of the present Gothic Unitarian Church older churches were built in the first days. The remarkably homely Church of the Pilgrimage (Cong.) stands near by. Opposite this church is the Town Hall, built in 1749. To the r. of the Unitarian Church is the path to the ***Burying Hill**, where many of the Pilgrims were interred. Ancient and moss-covered tombstones cover the green slopes, with here and there more pretentious monuments, as those to Gov. Bradford, Elder Cushman, and others. In 1622, the embattled church was built on this hill, with six cannon on its sheltered flat roof. Every man brought his gun and ammunition to church, and sentinels, on a tower, watched incessantly. The *view from Burying Hill is fine, embracing the harbors of Plymouth and Duxbury, Captain's Hill, Cape Cod, Manomet Hills, &c. Leyden St., the first street in New England, runs E. from Town Square to the water. Near the foot of Middle St. and W. of the canopy-covered rock, is a small green space called Cole's Hill, where were buried 50 of the Mayflower company (including Gov. Carver), in 1620-21. Near the Pilgrim Hall are the handsome County buildings; and on Training Green, near the High School, is a monument to the town's soldiers who died in the War for the Union. Behind the High School is Watson's Hill, where Massasoit appeared in March, 1621, with 60 warriors, and concluded a league with the handful of Pilgrims which was sacredly kept for 50 years. Billington Sea, one of the two hundred ponds which are in the vast Plymouth Forest ("the Adirondacks of Massachusetts"), is about 2 M. from the village, and is $4\frac{1}{2}$ M. around. About 3 M. S. of Plymouth is the Clifford House, a favorite summer resort. S. W. of Plymouth is the lofty promontory of Manomet, near which is the village (hotel) of Manomet Ponds. A strip of sand 3 M. long forms a natural breakwater before the town, on which, in Dec., 1779, the war-ship "Gen. Arnold" was wrecked, and 70 men frozen to death on her decks. In the N. part of the harbor is Clark's Island, where the Pilgrims remained Dec. 9th and 10th, 1620. Beyond are the prominent points of Saquish and the Gurnet, on the latter of which is a lighthouse.

On a high hill near the Samoset House 9 acres of land have been bought, and 1,500 tons of granite laid as foundation for a National Monument to the Forefathers. On an octagonal pedestal of granite 40 ft. high, will stand a statue of Faith, also 40 ft. high (the "Bavaria" at Munich is 42 ft. high). Her right hand is uplifted, and her left holds a Bible. On pedestals about the base will be four sitting statues representing the cardinal principles of the Pilgrim commonwealth, — Morality, Law, Education, and Freedom. Each of these is to be 20 ft. high, with 8 statues in niched panels by their thrones, each of which will be 9 ft. high. Historical records and bas-reliefs will adorn the sides of the pedestal, and an internal stairway will lead to the feet of Faith. Statues, pedestal, and all, are to be of granite.

6. Boston to Cape Cod.

Via Old Colony R. R., Boston to Wellfleet, 106 miles, in $4\frac{1}{2}$ –5 hours. Fare, \$3.05. Two trains daily. Boston to S. Braintree, see Route 3.

Station, *Holbrook*, with a pretty little Victoria Gothic Town Hall. Station, *E. Stoughton*, after which the line passes through a district which illustrates the poverty of the American mind in the matter of naming towns. Four towns, each containing many square miles, are named respectively, *N. Bridgewater*, *W. Bridgewater*, *E. Bridgewater*, and *Bridgewater*. Stations, *N. Bridgewater* (Standish House), *Campello*, *Keith's*, *E. and W. Bridgewater*.

Bridgewater, *Sawtucket* (Hyland House), was bought of the Indians by Miles Standish in 1645. In 1740, Hugh Orr, a Scotchman, erected a trip-hammer here, and in 1748 made 500 muskets for the Province of Massachusetts, the same being the first made in this country. During the Revolution, he made great numbers of iron and brass cannon, and cannon-balls for the continental army.

A branch railroad, 7 miles long, runs from Bridgewater to *S. Abington*, on the Plymouth Branch R. R. Stations, *Titicut* and **Middleboro** (Ne-masket House), a prosperous town (of about 5,000 inhabitants), where several railways unite.

Between S. Braintree and Fall River the Old Colony R. R. has two divisions, eastern and western, several miles apart. On the western division (the shorter of the two) the steamboat trains run, while the eastern division, running E. of S. from Boston to Middleboro, here turns sharply to the S. W. to Fall River and Newport. From Middleboro to Fall River by the main (eastern) line is 14 M., passing stations *Lakeville*, *Myrick's*, and *Assonet*. At Myrick's, the New Bedford and Taunton R. R. crosses the Old Colony R. R. (Myrick's to New Bedford in $\frac{1}{2}$ hr.). A railroad runs from Middleboro to Taunton direct, a distance of $10\frac{1}{2}$ M. (fare 40 c.), passing the stations *Lakeville*, *Chace's*, *E. Taunton*, and *Weir*. 3–4 M. S. of Middleboro is a cluster of great ponds, abounding in fish. Asowamssett Pond (Lakeville House) is the largest sheet of fresh water in the State, and contains 6–8 square miles. On its shores Capt. Dermer was received by the Wampanoag sachems in 1619, and here the anti-English chief, Corbitant, revolted against Massasoit, in 1621, and seized the Plymouth envoys. Standish promptly marched forth, fell upon Corbitant's camp by night, and achieved success in the first warlike expedition made from Plymouth.

The Cape Cod Division of the O. C. R. R. begins at Middleboro. Stations, *Rock*, *S. Middleboro*, and *Tremont*, or *W. Wareham*.

From Tremont the Fairhaven Branch runs to New Bedford (16 M.), passing the stations *Marion*, *Mattapoisett*, and *Fairhaven*. 3 M. S. of Marion station (Old Landing), passing Sippican village, is White House Beach, fronting on Sippican Harbor. 3–4 M. from Marion station is a high promontory, surrounded on three sides by Buzzards Bay and Wing's Cove, on which is a favorite summer hotel, the Great Hill House. Mattapoisett (Mattapoisett House) is a small village near Buzzards Bay, with fine water-views and large inland forests. The fishing in the inlets is fine.

After passing Tremont station, on the Cape Cod R. R., the line passes through the town of Wareham, the northern inlets of Buzzards Bay being often seen on the r. Stations, *S. Wareham*, *Wareham* (Ken-

drick's Hotel), *E. Wareham*, and *Cohasset Narrows*, where is the junction of the R. R. for Falmouth, Martha's Vineyard, &c. (See Route 7.) Soon after, the Straits between Buzzards and Buttermilk Bays are crossed, and then follow the stations, *Monument*, *N. Sandwich*, *W. Sandwich*, and *Sandwich*. "The Cape extends E. from Sandwich 35 M., and thence N. and N. W. 30 more, in all 65, and has an average breadth of 5 M." It is nearly all sand, with boulders dropped on it here and there. Hitchcock thinks that the ocean has eaten out Boston Harbor, and other bays, and built Cape Cod of the minute fragments. A thin layer of soil reaches as far as Truro; "but there are many holes and rents in this weather-beaten garment not likely to be stitched in time, which reveal the naked flesh of the Cape, and its extremity is completely bare."

It is believed that the shores of Cape Cod are the *Furdustrandas* (Wonder-Strands) discovered by Thorhall, the Norseman, in the year 1007. ("When they were ready, and their sail hoisted, Thorhall sang: Let us return where our people are. Let us make a bird (vessel), skilful to fly through the heaven of sand, to explore the broad track of ships; while warriors who impel to the tempest of swords, who praise the land, inhabit Wonder-Strands, and cook whales.") In 1524, Verrazzani, in the frigate "Dauphin," coasted about Cape Cod, which is probably his "Cape Arenas," and in 1525, the Portuguese mariner Gomez, explored and mapped much of southern New England. The first Anglo-Saxon in New England was Capt. Gosnold, who coasted and named Cape Cod in the year 1602, having caught many codfish thereabouts, and landed at different points.

In 1604, Champlain visited this locality, and named it *Cap Blanc* (White Cape), because the sand contrasted so with the dark rocks of the northern coasts. A harbor on the S. E. he named *Mallebarre*, which name still clings to the S. E. Cape. In 1609, Hendrick Hudson, with a vessel of the Dutch E. I. Company, rediscovered Cape Cod, naming it *New Holland*, and found a mermaid near by, concerning which (or whom) he gives a curious account. In 1614, Capt. John Smith visited the Cape, and describes it as "a headland of high hills of sand, overgrown with shrubby pines, hurts, and such trash, but an excellent harbor for all weather." Prince Charles, his patron, named it *Cape James*, but the name did not take. About this time the infamous Capt. Hunt kidnapped a ship-load of Indians from the coast, so when Harlow landed at the Cape late in 1614, he was attacked, and only escaped (with loss) by cannonading the attacking flotilla of canoes. In 1616, a French ship grounded or anchored near the Cape, was carried by boarding, and the Indians killed all on board save four, whom they sent far and wide through the country as curious trophies. The horrible pestilence which immediately after passed over Massachusetts, was attributed by the Indian doctors to this fact. In 1620, the vanguard of the Pilgrims appeared in one of the Cape harbors, and ere long many villages sprang up here. In 1623, the blameless chiefs, *Cawnacone*, *Sachem of Manomet* (Sandwich), *Aspinet of Nauset* (Chatham), and *Iyanough of Cummaquid* (Barnstable), were with the council at Weymouth when Standish made his attack. They escaped and hid in the swamps of the Cape, where they soon died of sorrow and privation, and too late it was proven that they were perfectly innocent. Notwithstanding their unfavorable experiences of Christian civilization, the Cape Indians passed under its influence, and soon 6 Indian churches and 18 assemblies, with 24 native pastors, were numbered there. Consequently, at the outbreak of the war of 1675, they repudiated their ancient allegiance to King Philip, and remained faithful to the colonists.

Sandwich (Central House) is a village near the S. edge of the Plymouth Forest, and distant 12 M. from Plymouth. The extensive glass-works are near the station.

From *W. Barnstable* station stages run to Cotuit Port, "the home of genial sportsmen," 6-7 M. distant, on the S. shore of the Cape. The

highlands about the little harbor on which the village is situated are partly clothed with pine woods and interspersed with many fresh ponds. The Santuit House, near the beaches on the S. shore, is much visited in summer. Barnstable is a quiet village with the county buildings.

On Great Neck, in **Marshpee** (**Massapee**), a few M. W. of Cotuit Port, was the chief village of the Cape Indians who dwelt on this reservation. In 1658, Richard Bourne went there as a missionary, and formed a church of which he was pastor until his death in 1685. Before King Philip's War there were 10,000 Christian Indians in New England. Many of these, including scores of the Massapees, were killed fighting for their white brethren, or else, remaining neutral, were treated pitilessly by the colonists. Nearly every man of the Massapees joined the 1st Mass. Reg. in 1775, and but few returned. Gideon Hawley (Yale College, 1749) preached here 1758-1807. In 1802, the last pure-blooded Indian died. So many of the men died in the War for Independence, that negroes joined the tribe, and it is now a collection of Indo-African half-breeds. In 1834, in response to their "Bill of Complaints" signed by 287 persons, the State granted them limited powers of autonomy. In 1850, about 200 persons were left on the reservation.

Yarmouth is coeval with Barnstable. Near it is a favorite Methodist camp-ground. A branch R. R. runs from Yarmouth to *Hyannis* (Iyanough House), the point of departure for the steamers to Nantucket (30 miles). Extensive beaches bordered by bluffs covered with groves are near Hyannis.

Stations, *S. Yarmouth*, *S. Dennis*, not far from Scargo Hill, the highest land on the Cape, from which a noble ocean view is afforded. Stations, *N. Harwich*, *Harwich* (Central House, Atlantic), the ancient home of the Satucket Indians.

Brewster (Ocean House, Union House), was named in honor of Elder Brewster, of the Mayflower Pilgrims. Large and singular boulders are found here. Many sailors and captains belong in this town, and *Orleans* (Higgins House) and *Eastham*, which was settled by the Pilgrims in 1644, under the lead of Thomas Prince, who was for sixteen years governor of Plymouth. A fortified church, twenty ft. square, was built, and a part of every stranded whale was by law reserved for the ministry.

At Millennium Grove in this town were long held extensive camp-meetings. The line now passes, on the E., the broad, sandy plains of Nauset. Stations, *N. Eastham* (Nauset House), *S. Wellfleet*, *Wellfleet* (Holbrook's Hotel). Wellfleet Bay opens on Cape Cod Bay (the *Baye Blanche* of Champlain), and is distant from Boston 106 M. by R. R. and 70 M. by water. This village has 100 vessels and nearly 1,000 men in the mackerel fishery. The railroad ends at Wellfleet, and stages connect with it for Provincetown, although it is said that late in 1873 a through track will be laid. North of Wellfleet is **Truro**, a large, desolate district, on one of whose beaches the British frigate "Somerset" was wrecked in 1778, and 480 men made prisoners. Near Wellfleet, in 1718, the "Whidah," a pirate-ship mounting 23 guns, was wrecked, and 130 buccancers were drowned. Truro was settled in 1700, under the name of Danger-

field, as it has perhaps the most fatal coast in New England. Scores of vessels have been dashed in pieces on its shore, and hundreds of lives have been lost. There is scarcely a family in Truro, or indeed on the whole Cape E. of Barnstable, but has lost some member by the disasters of the sea. Truro lost 57 men and 7 vessels, and Dennis lost 28 men in one day of 1841. The lofty Fresnel burners of the famous **Highland Light** (at Clay Pounds on the outer shore of Truro) shed a vivid radiance over leagues of rude coast and deep sea.

Thoreau walked from Orleans to Provincetown (several days) on the ocean side of this "sand-bar in the midst of the sea," and says:—

"The nearest beach to us on the east was on the coast of Galicia, in Spain whose capital is Santiago, though by old poets' reckoning it should have been Atlantis or the Hesperides; but heaven is found to be farther west now. At first we were abreast of that part of Portugal entre Douro e Mino, and then Galicia and the port of Pontevedro opened to us as we walked along; but we did not enter, the breakers ran so high. The bold headland of Cape Finisterre, a little north of east, jutted toward us next, with its vain brag, for we flung back, — 'Here Cape Cod, Cape Land's Beginning.' A little indentation toward the north — the land loomed to our imaginations like a common mirage — we knew was the Bay of Biscay, and we sang:

'There we lay till next day,
In the Bay of Biscay, O!'"

"A little south of east was Palos, where Columbus weighed anchor, and farther yet the pillars which Hercules set up."

Truro is "a village where its able-bodied men are all ploughing the ocean together as a common field. In N. Truro the women and girls may sit at their doors and see where their husbands and brothers are harvesting their mackerel 15–20 M. off, on the sea, with hundreds of white harvest-wagons."

The 2nd Mass. Continental Reg. marched from this E. end of the Cape, and fought through the Revolution.

In Nov., 1620, Standish and 16 men, "with musket, sword, and corslet," landed at Long Point, Provincetown, chased the unresisting Indians into Truro, pillaged many graves, and carried off everything portable. They were attacked in Eastham, by Indians, but the arrows fell harmlessly from their corslets, while the musket-shot told on the half-clad red men.

Provincetown (Allstrum House, Central House) is a curious marine village, distant from Boston 118 M. by land and 55 M. by water (steamer leaves Central Wharf, Boston, Wednesday and Saturday mornings, returning on Monday and Thursday mornings. Fare \$1.50).

The Harbor is a noble one, broad and clear, and is the favorite refuge of the fishing fleets. The energies of the townsmen are devoted to the fisheries — of mackerel, cod, and sperm-whales, in whose pursuit they search the wildest and most distant banks and bays of the N. Atlantic. The village lies along the beach between the sea and the desert, — an inhabited beach, where fishermen cure and store their fish, without any back country.

This is the last town in that strange region where the people "are said to be more purely the descendants of the Puritans than the inhabitants of any other part of the State." From these shores come the most daring and skilful of American seamen. "Wherever over the world you see the stars and stripes floating, you may have good hope that beneath them some one will be found who can tell you the soundings of Barnstable, or Wellfleet, or Chatham Harbor." "Cape

Cod is the bare and bended arm of Massachusetts ; the shoulder is at Buzzards Bay ; the elbow, or crazy-bone, at Cape Malebarre ; the wrist at Truro, and the sandy fist at Provincetown, behind which the State stands on her guard, with her back to the Green Mts., and her feet planted on the floor of the Ocean, like an athlete, -- protecting her Bay, boxing with N. E. storms, and, ever and anon, heaving up her Atlantic adversary from the lap of earth, ready to thrust forward her other fist, which keeps guard the while upon her breast at Cape Ann."

The era of constitutional government dawned upon the world, when, on Nov. 11, 1620, the storm-tossed Mayflower anchored in Provincetown Harbor. Here, "on the bleak shores of a barren wilderness, in the midst of desolation, with the blast of winter howling around them, and surrounded with dangers in their most awful and appalling forms, the Pilgrims of Leyden laid the foundations of American liberty." While the Mayflower lay in this harbor, that celebrated compact was drawn up and signed, which long governed Plymouth and her dependencies, and of which J. Q. Adams says : "This is, perhaps, the only instance in human history of that positive original social compact which speculative philosophers have imagined as the only legitimate source of government." This solemn compact (given below) was signed by 41 men (of whom 21 died in the next four months), 17 of whom had their wives with them, the remaining 43 persons being young people and children.

"In the name of God, Amen. We, whose names are underwritten, the loyal subjects of our dread sovereign lord, King James, by the grace of God, of Great Britain, France, and Ireland, King, defender of the faith, &c., having undertaken, for the glory of God, and advancement of the Christian faith, and honor of our king and country, a voyage to plant the first colony in the northern parts of Virginia, do, by these presents, solemnly and mutually, in the presence of God and of one another, covenant and combine ourselves together into a civil body politic, for our better ordering and preservation, and furtherance of the ends aforesaid ; and by virtue hereof to enact, constitute, and frame such just and equal laws, ordinances, acts, constitutions, and offices, from time to time, as shall be thought most meet and expedient for the general good of the colony ; unto which we promise all due submission and obedience. In witness whereof we have hereunder inscribed our names, at Cape Cod, the 11th of November, in the year of the reign of our sovereign lord, King James, of England, France, and Ireland, the 18th, and of Scotland the 54th, Anno Domini, 1620."

7. Boston to Martha's Vineyard and Nantucket.

Via Old Colony R. R. and Steamers. To Martha's Vineyard 80 M., in $3\frac{1}{2}$ -4 hours.

New York to Martha's Vineyard and Nantucket. To Fall River by steamboat (Route 3), thence to Myrick's (not by the steamboat train, but later). Thence to New Bedford, and from there by steamboat to Martha's Vineyard (in all, 225 M.).

Boston to Cohasset Narrows see Route 6. After *Cohasset Narrows*, the line runs due S. for 18 M., on the E. shore of Buzzards Bay, passing stations, *N. Falmouth* (near which is Pocasset, abounding in shell-fish, with the Red-Brook House and Bay View Cottage,) *W. Falmouth*, and *Falmouth*, a quiet old port, which had "kept on the back side of the Cape, and let the centuries go by" until 1872, when the railroad aroused it. Near the village on the S. E. are Falmouth Heights, where a company of Worcester men, in 1870, bought 120 acres of land (with two small lakes, several groves, and a mile of beach), to be cut up into lots for a summer village. Tower's Hotel, 100 ft. long (opened 1871), fronts on Vineyard Sound, with a view of Martha's Vineyard from its lofty position. Still-water bathing on the beach. A R. R. Station will probably be made near

the Heights. The last station is *Wood's Hole*, whence the steamer carries passengers across the Sound (7 M.) to Martha's Vineyard.

Martha's Vineyard.

*Sea-Foam House, a new and sumptuous hotel, gas-lighted, steam-heated, with elevator, billiard-room, &c., accommodates 250 guests. \$4.50 per day. *Highland House. On Circuit Avenue, in Oak Bluffs Village, are several good hotels, on the European plan; Baxter House, Pawnee House, Central, Island, &c.

Restaurants at the Baxter and Pawnee Houses, &c.

Pleasure-Boats at the Sea-Foam Hotel.

Sea-baths at the bathing-houses, on Circuit Avenue beyond Ocean Park (30 c.).

In May, 1602, Capt. Gosnold coasted the island on the S., and landed on a barren islet (No Man's Land) to the S. W. which he named Martha's Vineyard. He then landed on this island (then called Nope), and found, in S. E. Chilmark, deer and all kind of game, springs and a lake of pure fresh water, four kinds of berries in profusion, and trees loaded with fruitful vines. Probably then, or during his stay at Cuttyhunk (over three weeks) the name was transferred from No Man's Land to its present possessor. The name is thought to have been given in honor of some friend of the Captain's, or else for the lady of some one of his patrons. (A newspaper correspondent states that the oldest inhabitant, who owned these isles, gave them to his daughters ere he died. Rhoda took Rhode Island, Elizabeth took the island since named for her, Martha took and named Martha's Vineyard, and as for the remaining island, Nan-took-it. The legend is interesting, but cannot be traced back farther than the year 1870.) From this island and the neighboring main, Gosnold and Pring (1603) got large cargoes of sassafras, then esteemed a sovereign specific in Europe. In 1614, Capt. Hunt stole 27 Indians at Eastham, on Cape Cod, and sold them as slaves at Malaga, for \$190 each. One of them, Epenow, was carried to England, where the sly fellow told of vast gold-mines on this island. A ship was sent over, at great expense, with Epenow to show the place, but as soon as he saw the shore, he leaped over, swam to land, and was not seen again until Capt. Dermer landed here in 1619. In a dashing attack conducted by Epenow, the Captain and many of his men were killed and wounded. In 1647, Thomas Mayhew, Governor of the Islands by grant from the Earl of Stirling, settled at Edgartown. The lordship of the isles remained in the Mayhew family from 1641 to 1710, during which time the kindness of these men won the hearts of the natives. The Mayhews were all missionaries, and, learning the Indian language, preached with such success that Christian villages arose all over the island. During King Philip's War, the converts remained true, and guarded the shores. About 1660, some Quakers landed here calling the Puritan pastors "priests of Baal," but the Indians soon drove them off. Gookin visited the island in 1674, and found six towns of Christian Indians, "a very fruitful Vineyard unto the Lord of Hosts." For a century the Indians slowly dwindled, and the coasting vessels began to frequent Holmes' Hole in yearly increasing numbers. In 1778, Lord Gray (who defeated Wayne at Paoli) with a British force, destroyed a large number of vessels in the Hole. In 1835, 9 tents were pitched at the present Camp-Grounds, and the first camp-meeting on the island was held.

The Wesleyan Grove, or Camp-Meeting Ground, is near the Sea View House and is laid out in gracefully curved streets, grass-paved and crowded with small but vigorous trees. Near Trinity Park, a wide lawn, is the great tabernacle tent 160 by 120 ft. which can shelter 5,000 persons. This is the centre of intense excitement during the meetings in late August, when from 20,000 to 25,000 people are gathered here, and eminent Methodist preachers address them. Lake Anthony borders the N. and W. of the ground, and beyond it, on the high bluffs toward East Chop Light, the "Highlands" have been laid out under the influence of

the Methodists. On the E. and S. of the Camp-Ground is the village of Oak Bluffs, laid out in 1868, on bluffs 30 ft. high fronting Vineyard Sound.

Among the oak groves here are hundreds of Swiss and Gothic cottages, resembling large bird-houses, bright and clean and cheerful. On a hill near the centre is a curious, many-sided Muscovite chapel, which is used often but floats no denominational flag. It is said that some come to Oak Bluffs "who know and care nothing for Jerusalem or its former inhabitants," wherefore strict police rules are here enforced.

The steamer runs to **Edgartown** daily, and a fine road, 6 - 8 M. long, leads there. The village of Edgartown (Ocean House, Vineyard House) was founded in 1647 by Gov. Mayhew, and is at present the capital of Dukes County. It has a fine harbor, sheltered by Chappaquiddick Island, and possesses a small marine museum.

10 M. from Oak Bluffs is South Beach, where the Atlantic rolls in grandly after a storm.

By walking to the East Chop Light, a view is gained of Holmes' Hole, or **Vineyard Haven**, one of the most famous harbors on the coast, where, in seasons of storm, hundreds of vessels take shelter under the lofty bluffs. Through Vineyard Sound passes the vast and unceasing procession of commerce from New York and Southern New England to Boston and the East.

20-25 M. S. W. of Oak Bluffs is **Gayhead**, near which is the Devil's Den, a wild spot where the old Indian traditions say that the giant Moshup lived, who caught whales and roasted them on trees which he tore up by the roots. He metamorphosed his children into fish, and, on his wife's lamenting, he threw her to Seconnet, where she dwelt and levied contributions on all who passed the rocks, until she herself became a rock. Then Moshup disappeared from human sight and knowledge. Gay Head is "the most remarkable natural curiosity in New England." The sea-view from the lighthouse is grand. "Never since I stood on Table Rock have I seen a sight so grand as this." — GENERAL TWIGGS. About this promontory several score of half-breed Indians live a strange unsettled life. The remarkable cliffs by the shore have been closely studied by Prof. Hitchcock and Sir Charles Lyell, the latter describing them as "the lofty cliffs of Gayhead, more than 200 ft. high, where the highly inclined tertiary strata are gayly colored, some consisting of light red clays, others of white, yellow, and green, and some of black lignite."

Nantucket

is 28-30 M. from Martha's Vineyard, and connected with it by a daily steamer. After leaving the Vineyard astern, the islands of Muskeget and Tuckernuck are seen in the S., and near them the low shores of W. Nantucket. The town of Nantucket presents a fine appearance from the water, being built on hills. Hotels — Ocean House, \$2.50-3.00 (occupying the old mansion of one of the marine aristocracy), a comfortable hotel, famous for its chowders; and the Adams House.

The Indian tradition is that the Great Spirit was once smoking, when he partly filled his pipe with sand. When the mixed remains were emptied from the pipe into the sea, they formed the Island of Nantucket. Its name is said to be an

Indian modification of Nautikon, a name left by the Norsemen who visited it in the 11th century. The best authority pronounces it a corruption of an Indian word meaning "far away." It is called Natocko on the map of 1630. It was visited by Gosnold in 1602, at which time about 1,500 Indians were here, and the island was covered with oaks. In 1604, Champlain and Poutrincourt landed here and remained several days, for the relief of those men of their command who had been wounded in a battle with the Indians at Chatham. Weary and dispirited, they ceased their explorations here, and returned to Port Royal, naming these sad shores "Isle Douteuse." In 1641, Mayhew was made Governor of the Islands, his sway extending here. In 1659, he deeded $\frac{3}{10}$ of the island to ten men for £30 and two beaver hats, and one family moved there, there being then 700 friendly Indians on Nantucket.

In 1665 King Philip visited his people here, and in 1671 the town was incorporated (at Maddequet, 5-6 M. W. from the present town), and in 1672 moved to its present place. In 1672 the first whale was taken. In 1673 the town was called Sherburne by the New York Governor, in whose domain it was until 1693 (the name was retained till 1795). The 700 English had no church or pastor, though the Indians had four churches. A white church was formed in 1711. In 1755-6 9 whaling-sloops were sunk or captured, and but few men of their crews ever returned. In 1764, there were 3,220 whites on the island; and a plague, the same year, swept off $\frac{2}{3}$ of the Indians, leaving but 136. 1,600 Nantucket men died in the Continental Army. In 1784 the population was larger than it is now. In 1821, 78 ships and 81 smaller vessels were owned here, and mostly engaged in whaling. The last Indian died in 1822. Notwithstanding devastating fires in the town, Nantucket in 1840 had 9,712 inhabitants.

The town (400 buildings) was burned down in 1846, and the same year the whaling business began to decline, until now there is but one small vessel engaged in it, and in the town which has houses for 10,000 people there are but about 4,200. The houses are of a quaint old style, with platforms on the roofs (whence to watch the ships coming in). The North Church was the first on the island, and was built in 1711. It is still used by the same society as a vestry, and its oaken timbers are hard as iron. $\frac{1}{2}$ M. from the Ocean House, on Centre St., is a small house which was built in 1682. The hospitality of the old families of Nantucket is famous, and its churches and schools are numerous. Many houses have been taken down and shipped away, but of late real estate is rising, as city men are securing summer homes here. Main St., at the head of which is the old Pacific Bank, has the shops of the town (shells and marine curiosities may be bought here), and is a wide, deserted, grassy street leading to the heads of silent and decaying wharves. The low, sandy beach which shelters the harbor stretches N. W. 8-9 M. to Great Point, leaving a wide and quiet lagoon between it and the island. At the Athenæum is a public library and a museum of marine curiosities and relics of the older days of Nantucket. The Squantum is a peculiar institution of the island, being an informal picnic on the beach-sands, where the dinner is made of fish or other spoils of the sea. Excursions to the fishing grounds are managed by veteran skippers, who let themselves and their boats cheaply. There are rides to the ancient districts on the W. shore, to the beaches on the S. shore, and to Siasconset. **Siasconset** (Atlantic House) is 8 M. S. of E. from the town, and consists of a cluster of cottages on a high bank fronting the ocean. Surf-bathing here is safe only when the

bathers use ropes, as the shore descends rapidly. 1 M. N. of Siasconset is Sankoty Head, where a powerful Fresnel light is elevated on a far-viewing bluff 90 ft. high. 1 M. N. of Sankoty Head is the beautiful Sesacacha Pond, of pure, sweet water and abounding in fish (small inn on the shore). In 1676 a village was built on this pond and remained for 140 years; but its last house was torn down in 1820. Most of the island, over which rambles may be made, consists of high, breezy, sea-viewing plains, where but few fences or houses are seen, and which "the traveller will call downs, prairies, or pampas, as he happens to come from England, the West, or Buenos Ayres."

8. Boston to New York.

Via Boston and Providence R. R., and Shore Line to New York (in 8 hrs.), or by steamer from Providence, or by steamer from Stonington (in 12-13 hrs.)

The train leaves the station in Boston (Pl. 29), (on Pleasant St., at the foot of the Common), and passes the suburban stations, *Roxbury*, *Jamaica Plain*, and *Hyde Park*, by *Readville* (where during the war for the Union the State had a vast camp), to *Canton*, (Massapoag House, Ponkapaug House), a large manufacturing town. Canton was the seat of a large Indian village, where the Apostle Eliot was wont to preach, and in 1845 several pure-blooded Indians remained. From **Blue Hill** (635 ft. high), E. of the village, is gained a fine * view of Boston and its harbor, the ocean, and many busy villages.

Commodore Downes, who commanded the Essex, Jr., when Porter swept the Pacific, was engaged in the Tripolitan War, and in 1815 captured the Algerian frigate "Nashouda," was born at Canton. His son commanded the gunboat "Heron" and the monitor "Nahant," in the War for the Union.

Near a massive granite viaduct (600 ft. long, 63 ft. high), in this town, the Stoughton Branch R. R. leaves the main line, running 4 M. to Stoughton, on the Old Colony R. R.

Sharon (Cobb's Tavern) is in a hilly and picturesque manufacturing town. *E. Foxboro'*, *Mansfield* (Eagle Hotel), whence a railroad runs through *Norton* and *Taunton* to New Bedford (Route 9). *W. Mansfield*, *Attleborough*, a considerable manufacturing town (jewelry, &c.), *Dodgeville*, *Hebronville*, and *Pawtucket*, where the line enters the State of Rhode Island.

Pawtucket (Pawtucket Hotel, Park House) was the scene of a bloody action in 1676. Capt. Pierce, with 70 men, was driven back to the river by the Indians, and his party was fairly showered with arrows. When help came, not one man was living. At present, Pawtucket is the principal thread manufactory in America, and steam fire-engines, rope, braid, &c., are made here. The Dunnell Manufacturing Co. has 36 buildings, and prints 22,500,000 yards of calico yearly. The Pawtucket Tack Co. makes 360,000,000 tacks yearly, and 35,000,000 spools are made here every year.

Providence.

Providence (City Hotel, \$4-4.50 a day, Aldrich House; Central Hotel, 6-10 Canal St., European plan), is the second city, in wealth and population, of New England, and a semi-capital of Rhode Island. It is beautifully situated on hills at the head of Narragansett Bay, a cove of which lies far in the city and is surrounded by promenades. The view of the city from the Bay, or from the heights E. of the river, is very pleasing. The China trade was once largely enjoyed by Providence, but since its loss the energies of the citizens have turned to manufactures, and now large jewelry, iron, stove, and locomotive works are kept going. The Corliess engines, the Peabody rifles, the Gorham silver-ware, Perry Davis's Pain-Killer, and millions of cigars are made here. 44 banks take care of the money.

Providence was founded and named by Roger Williams, who was banished from Massachusetts in 1636, for his advanced ideas relative to Church and State. He was born in Wales, 1599, educated at Pembroke College, Cambridge, and preached for some time at Salem, Mass. After his exile he settled at Seekonk, whence he was soon warned away by the Governor of Plymouth. In a canoe, with five companions, he dropped down the river, until, in passing a cove (near the present India St. Bridge), he was hailed by some Indians with the words, "What cheer, Netop?" (friend). He landed in this cove on the celebrated What Cheer Rock, and then coasted around to the mouth of Providence River, where he landed and remained. This was in June, 1636. Soon after he visited the Sachem Canonieus (on Canonicut Island) and received a grant of the land hereabouts. In 1639 Williams became a Baptist, and in 1643-4 went to England, and got a charter for the new colony. In King Philip's War, every house between Stonington and Bridgewater (save Providence) was destroyed, and the little colony was once fiercely attacked, and lost 30 houses. In the royal census of 1730, Providence had 3,916 inhabitants. De Warville visited it in 1788, and reported it "decayed, and in the silence of death." In 1800, it had 7,614 inhabitants, and in 1870, 68,904.

The R. R. station, fronting on Exchange Place, is a large, handsome building, near which is a costly *monument, erected by the State in honor of her dead soldiers. The base of this work is of blue Westerly granite, bearing the arms of the U. S., and of R. I. Surrounding this are four 7-ft. bronze statues representing the Infantry, Cavalry, Artillery, and the Navy; above which is a statue of militant America (10 ft. high), bearing a sword and laurel wreath in one hand, and a wreath of immortelles in the other. The names of 1,680 R. I. soldiers who died in the War for the Union are inscribed on the monument, which was designed by Randolph Rogers, of Rome. Near Exchange Place, and parallel to it, is Westminster St., the main thoroughfare of the city. From this street to Weybosset St. runs the **Arcade**, a fine granite building (built 1828), on the plan of the European "galleries," containing a great number of shops ranged along a glass-roofed promenade. In the vicinity is the massive granite building of the Custom House and Post Office. The most notable churches are St. Joseph and St. Mary (Roman Catholic), the Union Congregational, the Roger Williams Baptist, the ancient First Baptist (society founded 1639), Grace Church, and St. Stephen's (Episcopal), a

massive edifice of rugged brown stone, with a deeply recessed chancel, an ornate roof, and richly stained windows. There are 59 churches in the city. In the S. part, and fronting on the harbor, is the stately building of the ***R. I. Hospital**, surrounded by pleasant grounds. Some distance S. of this, the city is preparing a park on the bold shores of the Narragansett Bay.

On the E. side of Providence River are two long business streets and a line of heights covered with residences. On N. Main St., near President, is the quaint old church of the First Baptist Society, and beyond it, on the corner of S. Court St., is the small brick building used for the State House. Fine views of the "seven hills of Providence" are gained from Benefit St. above the State House. On the corner of College and Benefit Sts., is the ***Athenæum**, a sturdy little granite building, containing a library of 32,000 volumes. Several busts are preserved here, and some fine paintings, among which are a copy of Stuart's Washington, by *Allston*; portrait of Channing, *Allston*; Charles II., long thought to be by Van Dyk, now held to be by *Caspar*; portraits of Gen. Greene, J. G. Percival, and Phillips Brooks; *portrait of a young lady, (his niece?) reading, by *Sir Joshua Reynolds*, one of his finest works. But the gem of this collection is Malbone's masterpiece, * "The Hours," painted in water-colors on a sheet of ivory 6 inches by 7, and presented to the Athenæum in 1853, by 130 subscribers. The picture represents Eunomia, Dice, and Irene, the Past, Present, and Future. The President of the Royal Academy said of it to Monroe, "I have seen a picture, painted by a young man by the name of Malbone, which no man in England could excel." On the heights near the Athenæum is the line of buildings (R. I. College, Hope, Manning, and University Halls, &c.), pertaining to **Brown University**. There is here a fine library of about 40,000 volumes, a museum of Natural History containing 10,000 specimens; and in the portrait gallery 38 portraits, some of which are of value.

Rhode Island College was founded at Warren in 1764, and removed to Providence in 1770. Its buildings served as a hospital for the Franco-American army during great part of the Revolution. Nicholas Brown, and others of that distinguished R. I. family, having greatly aided the college, in 1804 its name was changed to Brown University. Two thirds of the Boards of Fellows and Trustees are required by the charter to be Baptists.

The hall of the R. I. Historical Society is near the University, and contains many relics of the Indians and early settlers, together with 6,000 books, 30,000 pamphlets, and 7,000 MSS. On Hope St., N. W. of the University, are the extensive buildings, surrounded by fine grounds, of the Dexter Asylum (for the poor), near which are the ornate buildings of the Friends' Boarding School. The Butler Hospital for the Insane has large and stately edifices, surrounded by 115 acres of ornamental grounds, on the heights which look down on the widenings of the Seekonk River

PROVIDENCE.

(which is the boundary of Massachusetts). N. of the Butler Hospital is Swan Point Cemetery, a beautiful rural necropolis on undulating ground near the river. The Reform School and the Home for Aged Women are in the S. E. part of the city. Near the E. end of Power St., on the banks of the river, is the What Cheer Rock, on which Roger Williams first landed. N. of the Cove (near the R. R. Station), is the Rhode Island State Prison.

Environs of Providence.

On the N. ($4\frac{1}{2}$ M.) is the great manufacturing town of Pawtucket. Cranston (4 M. to the W.) is a busy working place, which has the Narragansett Trotting Park, famous in R. I. races. The mile elliptical track is entered through a fine towered gateway, and the grand stand contains 5,000 seats. Hunt's Mill, $\frac{3}{4}$ M. distant, is a favorite drive. Steamers leave Providence almost hourly in summer for the popular resorts on the Bay, and four times daily for Newport. Sassafras Point, Robin Hill, with its old fort, and Field's Point, are passed soon after leaving the city, and then Ocean Cottage (hotel) is reached, on the E. shore. The sturdy lighthouse, in the Bay beyond, is on Pomham Rock, named after a brave sachem of the Narragansetts who was killed in battle with the English, in July, 1676. The steamer now stops at Vue de l'Eau, a large hotel on the E. shore, commanding a fine view of the Bay. Smith's Palace is on the W., after which comes the favorite Silver Spring House (on the E.). Pawtuxet village (5 M. from Providence, on the W. shore) has sandy shores which afford good bathing. After rounding Sabin's Point on the E., the Cedar Grove House (30 rooms, 4 bowling alleys), with its cottage village, is seen on a high bluff. At Gaspee Point, below Pawtuxet, the British sloop-of-war "Gaspee" grounded while chasing a small American vessel. On the following night (June 17, 1772,) a band of Providence men surprised the "Gaspee," captured and landed her crew, and then burnt the vessel. Bullock's Point (on the E.) and Mark Rock (on the W.), "the Natchez of Rhode Island," the sandy Canimicut Point with its lighthouse, and Nayatt Point, on the opposite shore, are rapidly passed, and then the steamer passes out into the Bay proper. **Rocky Point** (Rocky Point Hotel, on the European plan, accommodating 700 guests) is soon reached. This Point is midway between Providence and Newport, and is one of the most joyous and attractive resorts in New England. A lofty tower near the hotel affords a noble * view, including Providence and Newport, Fall River, Bristol, and Warren, and many other towns, with the whole sweep of the Bay. The wild and cavernous rock-formations, the free menagerie, and the elevated railway, are some of the attractions. 250 persons are employed here through the summer; from the hotel telegrams may be sent all over the Union. But the chief excellency of "the crown of

Narragansett Bay " is the dining-room (seating 1,500 persons), where fish and clams are served up in every shape. The clam-bakes of Rocky Point are unrivalled in the world. Soon after, the steamer passes Warwick and its lighthouse, and along Prudence Island (6 M. long), near which are the islets of Patience, Hope, and Despair. S. of Prudence Island is the widest part of the Bay, and Warwick village is visible on the W. shore. The course now lies between Rhode and Canonicut Islands, passing several smaller islets, and running under the frowning walls of Fort Adams into the Harbor of Newport.

The Providence, Warren, and Bristol R. R. leaves its station at Fox Point, crosses the Seekonk River, and passes the popular resorts on the E. shore. Stations, India Point, Boston Switch, Vue de l'Eau, Drownville, Nayatt, Barrington and **Warren**. The latter town (Cole's Hotel, established in 1762) is a busy manufacturing place on the E. shore of Narragansett Bay. It is a nursery of sailors, and has a well-protected harbor. The Sachem Massasoit had his favorite dwelling here on his territory of Sowamset, near a spring which is still called after his name. The Warren Veteran Artillery has two cannon which were made at Strasbourg in 1760, taken from the French at Montreal, surrendered with Burgoyne at Saratoga, and used in the Dorr Rebellion (1842). A railroad runs from Warren to Fall River.

The next station, 4 M. S. of Warren, is **Bristol** (a small hotel). This town is a pleasant summer-resort, and is built on a high peninsula sloping to a deep, safe harbor. Three wide, grassy streets run down the peninsula, — Water St., near the harbor; Main St., with St. Michael's (Epis.) Church, and two or three old colonial mansions; and High St., with the common, the poor county buildings, and a fine Cong. church, in rambling mediæval architecture. From this broad and quiet street may be seen Mount Hope, where was "King Philip's seat" (Arnold), or "Philip's sty at Mount Hope" (Palfrey).

King Philip, or Metacomet, was the son of Massasoit, and chief of the Wampanoags. After enduring various aggressions from his white neighbors, in 1671, the Plymouth people demanded that all the Indians should give up their arms, and Philip demurred at this. Then, travelling throughout New England, he formed a powerful anti-English league, and attacked the colonies in 1675. After a long war conducted with unexampled ferocity by both combatants, his power was broken by the Narragansett Fort Fight, and the repulse from Taunton. Having decimated the colonists and destroyed many of their fairest towns, he was hunted down and shot near the foot of Mount Hope, in midsummer, 1676. During the war 600 colonists were killed, and 12 towns were destroyed.

In 1680 the peninsula was bought from the Government by a company of Boston capitalists, who divided it into lots, and sold the land to actual settlers. In Oct., 1775, three British frigates bombarded Bristol, and in 1778 a raiding party of British soldiers plundered this town and Warren.

Fine yachts are made at Bristol, also cotton goods and refined sugars, while an immense rubber manufactory does a business of \$2,000,000 a year.

The Providence and Worcester R. R. runs from Providence to Worcester (Route 10); and the Hartford, Providence, and Fishkill R. R. runs W. to Hartford and

Waterbury (Route 11). A daily line of steamers runs between Providence and New York, carrying passengers and freight.

After leaving Providence, the Shore Line route to New York (Route 8, continued) runs S., passing the stations *Elmville*, *Hill's Grove*, *Apponaug*, and *Greenwich* (Updike House, Greenwich Hotel). Greenwich is a neat village on Cowesit Bay, and is the seat of a large Methodist Seminary. In 1641, a trading-post and inn were erected here on the great Southern road, or "Pequot Path." Its site is now occupied by the Updike House, into which many of its timbers are built. At this post the Mass. and Plymouth forces met before the Narragansett Fort Fight (1675), and hither they retreated with their wounded.

Old Warwick is a few miles distant, across Cowesit Bay. Samuel Gorton, a layman who intruded into the arena of the theological polemics, was banished from Plymouth in 1637, from Newport in 1641, from Providence in 1642, from Cranston later in the same year, and then settled on Shawomet. In 1643, 40 soldiers from Boston came here, and took Gorton and 10 colonists to Boston, where they were tried and sentenced as "damnable heretics," and banished from America. The Earl of Warwick sent him back to Shawomet (which he named Warwick), and under that nobleman's protection he spent the remainder of his life in launching anathematic treatises at Massachusetts and R. I., among which were "Simplicities Defence against Seven-Headed Policy," "Antidote against Pharasaic Teachers," &c. In 1652, the clerk of this unfortunate settlement was disfranchised on seven charges: first, for calling the officers of the town rogues and thieves; second, for calling all the town rogues and thieves; third, for threatening to kill all the mares in town. In 1676, the place was attacked and burnt.

Nathaniel Greene was born at Warwick, in 1742. He led the R. I. brigade to Cambridge in 1775, commanded the left wing, and took the guns at Trenton, saved the army at the Battle of the Brandywine, and led a brigade at Germantown, Monmouth, and Newport. In 1780, he commanded the shattered Army of the South in its celebrated retreat across South and North Carolina into Virginia, and fought the drawn battle at Guilford C. H. In April, 1781, he was badly defeated by Lord Rawdon, at Hobkirk's Hill, and was repulsed from Fort 96, but in September he won the sanguinary and decisive battle of Eutaw Springs, which ruined the British hopes in the South. Congress presented him with a medal, a British standard, and two captured cannon, and the State of Georgia gave him a fine plantation near Savannah, where he resided until his death.

George S. Greene, born at Warwick in 1801, commanded a division at Antietam, Chancellorsville, and Gettysburg; and in N. and S. Carolina during the rest of the war.

Silas Casey, born at E. Greenwich in 1807, commanded a division of the Army of the Potomac, and was greatly distinguished in the sanguinary battle of Fair Oaks, May 31, 1862.

The celebrated summer resort at Rocky Point is not far from Old Warwick.

Station Wickford. The village (*Washington Hotel*), a quaint and quiet old place, is on a broad bay, and is reached by a branch railroad in 2½ M. (connecting with a steamer to Newport daily). In the edge of the village is a curious square Episcopal church, which was built in 1706, and has been long deserted.

Station Kingston. The village (*Kingston House*) is on the heights, 2 M. E. of the station, and contains the county buildings of Washington Co. 9 M. from the station (carriages in waiting) is the fashionable sea-side resort at **Narragansett Pier**.

Hotels. *Tower Hill House, a noble building on Narragansett Heights, which overlook the whole Bay, is 3 M. from the shore (horse-cars); Delavan House; Continental House; Maxson, Hazard, Ocean, Metatoxet, Sea-View, Elmwood, Narragansett, Matthewson, Atlantic, Atwood, Revere, Mount Hope, and others. Most of these hotels accommodate 60-80 guests, and charge \$12-\$18.00 a week. The Tower Hill, Atwood, and two or three others, are larger and more expensive.

Music, Lectures, &c., in Canochet Hall. A handsome Episcopal church, of stone, has recently been built. Narragansett Pier P. O. receives two mails daily. **Steamers** leave daily for Newport and Providence.

In 1856, a family from Philadelphia came here, and boarded at a farmhouse near the beach. The next year they returned with some friends, and the farm was called the Narragansett Boarding-House. Summer visitors increased, until in 1867, the Atlantic (80 guests), the Atwood (175 guests), and the Revere (50 guests) Houses were built. Other hotels were rapidly built, and in 1871, the Continental, Maxson, Mt. Hope, and Tower Hill Houses were finished.

The Beach affords fine riding and bathing (light surf), and many fish are caught from the rocks. Narragansett is said to be more quiet and unassuming than Newport, and its usual routine is bathing in the morning (when 3-400 persons may be seen in the surf), and croquet in the afternoon. Below the Pier is a mass of rocks, beyond which stretches the long line of Wolcott's Beach. The noble and richly decorated mansion of the Sprague family is near the cluster of hotels. Every visitor should go to Narragansett Heights (3 M.), where the palatial Tower Hill Hotel stands on its 800-acre plateau, near Silver Lake, 400 ft. above the Bay. The * view is fine, extending over Newport and 10-12 villages, and covering a horizon-line of 100 M. The Ocean, the Bay, Point Judith, and the lakes of S. Kingstown, are all visible. 4-6 M. W. of the Pier is Peacedale, with a fine stone church, and a large manufactory of woollen shawls.

The road running S. W. from Peacedale, through Wakefield, passes the remains of the old Potter Palace, and the birthplace of Commodore Perry.

John Potter was a magnate of the middle of the 18th century, who built here in Narragansett a fine mansion, richly frescoed throughout, surrounded by gardens, and kept by 100 slaves, where he used to receive company in baronial style.

At and before this time large Quaker settlements were scattered through the district, and three of their deserted churches still remain in this town.

Oliver Hazard Perry was born in 1785, of an old aristocratic family of Narragansett. He served as a midshipman in the Tripolitan War, and was put in command of the squadron on Lake Erie, at whose head, Sept. 10, 1813, he won a brilliant victory, and captured the entire British fleet. He died of yellow fever, at Trinidad, in 1819. His brother, Commodore M. C. Perry, born at Newport, 1794, was an active naval officer, chiefly distinguished for leading the Japan expedition in 1852-4, when he concluded an important treaty with that empire.

Commodore Perry's cousin, Stephen Champlin, Commodore in the U. S. Navy, was born here in 1789. He fired the first and last shots at the battle of Lake Erie, where he commanded the "Scorpion," in Perry's squadron. His services in the War of 1812 were important.

G. C. Stuart, the celebrated portrait-painter, was born in this town in 1754. Most of the time from 1772 to 1793 he spent in London and Paris, and kept his studio at Boston, 1806-28. His portraits of Washington and other founders of

the Republic are the best in existence, and show skill of the highest order in portrait-painting.

1½ M. from the Perry farm is the Potter Place, E. of which is the long, island-studded lagoon known as Point Judith Pond, abounding in fish. **Point Judith** is the site of an important lighthouse.

The legend runs, that far back in the colonial days, a storm-tossed vessel was driven in towards the Narragansett shore. The captain, an ancient mariner, was at the wheel, watchful amid the perils of an unknown coast, when his bright-eyed daughter, Judith, called out to him, "Land, father! I see the land!" His dim eyes could not discern the distant shore, and he shouted, "Where away? Point, Judith, point!" She did point, and he changed his course, and left the surf-whitened cape far away under lee; and when he reached port, the story of the fearless girl pointing out the danger from the storm-swept deck was told often and again among the sailors, so that the old sea-captains, when they passed this cape thereafter, repeated the story, and gave her name to the place.

During much of the year 1778, the Count D'Estaing's fleet of 16 vessels, with 933 ca non, was stretched across the Bay from Point Judith, and maintained an efficient blockade of the British forces at Newport. Admiral Lord Howe attacked D'Estaing with a large squadron, and after an indecisive battle and a severe storm, both fleets were forced to leave the Bay and refit.

This town of S. Kingstown is the largest in the State, covering over 76 square M. N. W. of Kingston, near the Exeter line, on a high, rocky hill, are the ruins of the Indian "Queen's Fort." Part of the stone-wall remains, also a rock-chamber called the Queen's Bedroom, where many arrows have been found.

On a hill in the great pine and cedar swamp near Worden's Pond (S. W. of Kingston) are the scanty remains of the **Narragansett Fort** (guide necessary, who can sometimes be obtained at the farm-houses on the edge of the swamp).

At the time of the landing of the Pilgrims, the Narragansett Indians, unwasted by pestilence, ruled the E. There were 30,000 souls in this nation (Brinley), or according to Roger Williams, "12 towns within 20 M., with 5,000 warriors." Gookin (1674) calls them an "active, laborious, and ingenious people," and they were extensively engaged in trade and manufacture, supplying nearly all the New England tribes with pipes, pots, and wampum jewelry and coin. Their territory stretched from Wickford nearly to Westerly, with its largest villages in the vicinity (favorable for fishing or agriculture) of the great ponds in S. Kingstown. In their simple theology they looked forward to some mystic realm in the far S. W., where the gods and pure spirits dwelt, while the souls of murderers, thieves, and liars are doomed to wander abroad. They fought frequently with the Mohegans and Pequots, but lived more peaceably with the Massachusetts, which was the name they (living in a flat country) applied to the dwellers at Neponset, Milton, and Canton. It is from Massa (many) and Waschoe (mountains), and means the people of the many mountains (the high blue hills of Milton). Canonius and Miantonomoh ruled from about 1600 to 1643; the former being "a wise and peaceable prince" (Roger Williams), and the latter a "brave and magnanimous chief," who gave lands freely to the R. I. colonists. But the unvarying friendship between the settlers and this great tribe was ended in 1675, when the fiery eloquence and crafty subtlety of King Philip of the Wampanoags induced them to enter the anti-English confederation of the New England tribes. The United Colonies took prompt action, and assembled 1,000 men under Gen. Winslow, on the verge of the tribal territory. Many of the Indians were campaigning with King Philip; many fled to the N. W.; and the rest abandoned their villages and took refuge in the ancient fortress of the tribe in the swamp near Worden's Pond. After a long march through the snow in Dec., 1675, the colonial troops came in sight of the hill, covered with a system of embankments, palisades, and *abatis*, and defended by the flower of the Narragansetts. The Massachusetts men, in the van, dashed into the Fort through an enfiladed entrance, and after a furious struggle, being

unsupported, they were driven out with heavy loss. The whole force now having arrived, a double attack was made; the troops of Connecticut stormed the gate, and, while the attention of the whole Indian garrison was centred on that point, the Plymouth companies broke through the *abatis* and palisades on the other side, and attacked them in the rear. A bitter combat ensued, the Indians retiring to their wigwams and repulsing every attack of the colonials, who now held the walls. Fire was now applied to the wigwams, and spread rapidly, amid a scene of unutterable confusion and carnage. A band of chosen warriors dashed forth and cleared a way and covered the retreat of full 3,000 people, after which the colonials were left in full possession, having lost 80 men killed and 150 wounded. 300 warriors were killed, and 600 prisoners taken, of whom most of the fighting men were either shot on Boston Common, died on Deer Island, or were sold into slavery. The tribe was annihilated. Nearly all the colonial captains were shot, and a considerable proportion of the wounded, borne through a roadless country in midwinter, scores of miles to the settlements, died on the way home.

"The bitter cold, the tarled swamp, the tedious march, the strong fort, the numerous and stubborn enemy they contended with for their God, King, and country, be their trophies over death."—Conn. Legislature on "those dead in the Fort Fight in Narragansett."

In 10–12 min. after leaving Kingston Station, the train passes through the swamp where the battle took place. The next station is *Carolina*, with large woollen mills, 3–4 M. S. of which is a reservation, with church and school-house, where lives the scanty remnant of the Narragansett tribe. Stations, *Richmond Switch*, *Charlestown*, **Westerly** (Dixon House, \$3.00 a day). In 1665, a division of the Newport church moved to Westerly, and, in 1671, embraced the tenets of the Seventh Day Baptists, so if the traveller chances to be here on Saturday, he will find but little business going on, and the church bells ringing. Westerly is noted for its extensive manufactures, and, among other things, turns out every year 442 miles of flannel and 1031 miles of cotton and woollen cloths. Many summer visitors stop at the elegant Dixon House, and avail themselves of the steamer which runs semi-daily down the Pawcatuck River to

Watch Hill Point.

Hotels.—*Ocean House, on a far-viewing hill; Watch Hill House, 30–40 years old, the first hotel here; Larkin House, near the lighthouse; Atlantic House, Dickens, Bay View, and Plimpton Houses. There is but little difference in these hotels, and the prices are somewhat less than those at Narragansett Pier.

Steamers in summer run from Westerly to Watch Hill twice daily; from Stonington 4–5 times daily; from New London, daily; and from Norwich, touching at New London and Mystic, daily.

Watch Hill Point, the S. W. extremity of R. I., is a high, bold promontory, from which the sandy Narragansett Beach runs E., while to the W. Napatree Beach, a narrow strip of sand, runs out to Sandy Point. From the top of the hill a good sea view is obtained, with Block Island to the S. E., Fisher's Island to the S. W., and the town of Stonington close at hand in the W. From its fine views, excellent bathing beaches, and quiet and unpretentious hotels, this has become a favorite summer resort.

In August, 1872, the passenger steamer "Metis," bound from New

York to Providence, was run into by another vessel off this point. She sank in deep water, in the storm and night, and 25 or more of her passengers were lost. Most of the corpses, together with the deck of the vessel, were thrown up on Watch Hill Beach.

After Westerly comes **Stonington** (the * Wadawanuck House is a large summer hotel, commanding a fine water-view. It accommodates 140 guests, and charges \$4.50 a day; large reduction for board by the season. There are one or two smaller houses here).

This district (Pawcatuck) was claimed by Mass. as hers in right of "joint conquest," after the defeat of the Pequods, but was settled in 1649 from Connecticut. In 1801 it became a borough, about which time President Dwight wrote that "Stonington and all its vicinity suffers in religion from the nearness of R. I." Aug. 9, 1814, the borough was attacked by the *Ramilies*, 74; the *Pactolus*, 38; and several other British vessels, which bombarded it for three days, throwing 60 tons of iron into it. Four attempts to land were repulsed with grapeshot, with heavy loss, and the *Dispatch*, 22, was seriously injured and driven off by a 3-gun battery on the point. The town was deserted by its people, and 50 soldiers were scattered through it to put out the fires.

Stonington is built on a narrow, rocky point, with quiet streets, embellished here and there by iron relics of 1814.

Steamers from Stonington to Watch Hill 6 times daily in summer (25c.).

The **Stonington Line** of steamers (to New York) has fine boats which leave this port on the arrival of the steamboat train from Boston (9-10 P. M.), and arrive at New York early in the morning. This is one of the four great routes to New York, the others being the Fall River Steamboat Line, the Shore Line R. R., and the R. R. route via Springfield and Hartford. A new line, via Willimantic and New Haven, is nearly ready for travel.

A line of packets has heretofore run from Stonington to Block Island, and a daily steamer is promised for the summer of 1873.

Block Island (Mitchell House, Spring House) was named for Adrian Block, the Dutch discoverer, and was called by the Indians Manisees (the isle of the little god). The natives made most of the wampum (money) for the interior tribes. In 1636, they captured a Boston vessel near the island, and killed the crew, shortly after which a Conn. coaster ran down on her, raking the decks with musketry. 11 Indians jumped overboard and were drowned, but the rest took refuge in the hold. The coaster then towed her many leagues to sea, and, having removed her sails, let her go, in a fearful storm. To avenge the murder of the Boston sailors, Gov. Endicott (who had cut out the cross from the British flag with his rapier as "savoring of Popery") campaigned on Block Island under the crossless flag and destroyed 2 large villages. The island sent 60 ft. of wampum to Boston for tribute, in 1638, and in 1661 an English settlement was made here, which was incorporated in 1672 as New Shoreham, and nearly destroyed by a raid from French vessels in 1690.

Block Island is 8 M. long by from 2-4 M. wide, and is nearly cut in two by a great salt-water pond, S. of which is the thin village of New Shoreham, with 2 Baptist churches. There are many abrupt and uncovered hills, used for grazing. The men are mostly employed in fishing, and are of a simple, sturdy, and primitive race. The island belongs to R. I., and has about 1300 inhabitants, whose number is slowly decreasing.

After Stonington comes the busy, ship-building village of *Mystic* (Hoxie House).

Near Mystic, on the N., is Pequot Hill, which was attacked May 26th, 1637, by Mason, who had marched from Narragansett with 90 Englishmen, and 460 Mohegans and Narragansetts, under the Sachems Uncas and Miantonomoh. On arriving before the Fort, the Indian allies were afraid to attack, and drew off, whereupon the colonial soldiers prepared to do the work alone, and knelt down in prayer. (The Sachem Wequash, the guide of the forces, was amazed at this sight, and when he understood it, he became impressed and converted, and preached throughout New England until he sealed his faith by a glorious martyrdom.) The English now moved steadily to the assault, and, favored by the darkness, succeeded in getting inside the palisades, but they were soon overwhelmed by vastly superior numbers, and fell back, after setting fire to the wigwams. "The greatness and violence of the fire, the flashing and roaring of the arms, the shrieks and yells of men, women, and children within the Fort, and the shoutings of Indians without, just at the dawning of the morning, exhibited a grand and awful scene. The Narragansetts, Mohegans, and colonials surrounded the hill and shot down the fugitives. 600 Pequots were shot or burnt on this dreadful morning, which was a death-blow to the tribe. "It was a fearful sight to see them frying in the fire, and the streams of blood quenching the same, and horrible was the stink and scent thereof; but the victory seemed a sweet sacrifice, and they gave the praise thereof to God." COTTON MATHER.

4 M. from Pequot Hill (half-way to New London) is **Fort Hill**, where Sassacus, sachem of the Pequots, had his royal fortress. On hearing of the attack of Mason, the chief sent 300 of his best warriors, who caused the Indo-colonial forces great loss in their retreat. But meanwhile those who had remained in the fort revolted, and Sassacus, with his court and chiefs, was forced to flee to the Hudson River, whence they never returned, and the tribal organization was blotted out by the colonies, who gave for slaves to the friendly tribes those remaining of the dreaded Pequots or "Destroyers." * There is a noble view from Fort Hill (4 M. E. of New London) which embraces parts of 15 towns, 4 counties, 3 States, 20 islands, 7 lighthouses, with New London, Stonington, Fort Griswold, and Fisher's Island Sound.

Groton is a very hilly township, and has but little good soil (in the river valley). In 1832, 40 Pequots were living here on a reservation, and still heartily hating the Narragansetts. Silas Deane, an early American diplomatist, who died in poverty and sorrow in a strange land, after having made successful negotiations with France, &c., was a native of Groton. Between 1812 and 1819, 500,000 yards of cotton cloth were woven at home by women with hand-loom.

Mystic Island, a quiet summer resort, is off the mouth of the river.

After passing the station of *Groton*, the cars are ferried across the Thames River to **New London** (Metropolitan House, \$2.50. A new and elegant hotel is to be opened here in the summer of 1873).

New London is a city of 9,576 inhabitants, on a granite-strewn declivity facing S. E., on a fine harbor, 3 M. long and 30 ft. deep.

This was formerly known as Pequot Harbor, and was raided successively by Mason, Endicott, and Underhill, and was settled by John Winthrop, Jr., in 1645. In 1658 the Connecticut Assembly resolved, "Whereas, this court considering

* One authority says that Pequots means "Gray Foxes."

that there hath yet no place in any of the colonies been named in honor of the city of London, there being a new place, within this jurisdiction of Connecticut settled upon that fair river Mohegan in the Pequot country, being an excellent harbor, and a fit and convenient place for future trade, it being also the only place in these parts which the English possessed by conquest, and that upon a very just war, upon that great and warlike people, the Pequots, we, therefore, that we might thereby leave to posterity that we memory of that renowned city of London, from whence we had our transportation, have thought fit, in honor to that famous city, to call the said plantation, New London." In 1698, the pirate Capt. Kidd cruised along these shores, and buried on Gardiner's Island 75 ounces of gold, 633 ounces of silver, and a large lot of precious stones, which were recovered by the Earl of Bellmont, governor at Boston, in 1699. During the Revolution, the navy of Conn., consisting of 26 vessels, made New London its chief port; and here, in 1776, were landed the governor, officers, and plunder from New Providence (of the Bahamas), which had been captured by an American fleet. Sept. 5, 1781, the renegade raider Benedict Arnold appeared off the town with a fleet and a large force of British troops, and having taken Fort Trumbull he plundered and burnt New London. At the same time a strong detachment made an attack on Fort Griswold (across the river), which was defended by Col. Ledyard with 150 militia-men. The sharp fire of the Americans repulsed the first attack, but a bayonet-charge ensued, which carried the enemy into the fort. The British commander was killed on the rampart, and the Tory Capt. Bloomfield (from New Jersey) took his place. As he shouted, "Who commands this Fort?" Col. Ledyard gave him his sword, saying, "I did command, sir; but you do now." The infamous renegade ran Ledyard through with his own sword, whereupon a general massacre ensued, and 70 Americans were killed and 30 wounded after the surrender. In storming the Fort the British lost 191 men.

An excursion should be made to Groton heights, where are the remains of old Fort Griswold, near which is a business-like 20-gun battery, in admirable order, which protects the channel. Within stone's-throw of the fading ramparts of the old Fort is a **Monument** to the massacred militia, — a noble granite shaft, 127 ft. high, and 26 ft. square at the base, on which is inscribed, "Zebulon and Naphthali were a people that jeopardized their lives till death in the high places of the Lord." A marble tablet at the base contains the names of the slain, which will be seen to run in families; out of 84 names, 9 are Averys, 6 Perkinses, 4 Allyns, 4 Lesters, &c. The ascent of the inside of the monument should be made (key, 10 c. at small house close to the monument). From the top a * view is gained which is "charming for the student of nature and yet more charming for the student of the romance of American history." — LOSSING. To the W. is New London, with its spires and terraced streets, its shipping, Fort Trumbull's massive walls, and up the river the widenings of the Thames where the U. S. is preparing a Navy Yard. On the E. are the stony hills of Groton, with Fort Hill 4 M. away; and on the S. the mouth of the Thames with its lighthouses, hotels, and summer-cottages. The long, irregular line of Fisher's Island (9 M. long), belonging to New York and occupied by three farms, is in the S. E. over which the ocean is seen, and, if the day is clear, Block Island may be made out with a strong glass. Many leagues to the S. E. over the W. end of Fisher's Island, may be seen the white cliffs of Montauk Point.

A steam-ferry (4 c.) leaves the foot of State St. every 15 min. for Gro-

ton. $\frac{1}{4}$ M. E. of the old Fort, Col. Ledyard is buried under a monument erected by the State.

New London is built on a declivity, which is ascended by State St. from the R. R. Station to the County Court House, passing on the r. the brown-stone City Hall and Post Office, and a fine Cong. Church of granite with a spire of the same material. Near the Court House is St. James' Episcopal Church, a large brown-stone edifice in whose chancel is buried Samuel Seabury, the first Anglican bishop in the Republic. The English bishops (in 1784) would not consecrate him, but the office was performed by 3 bishops of the Scottish Episcopal Church, after which he preached at New London for 12 years. On Federal St. in a lofty situation is a massive and extensive Cong. Church, near which is an ancient cemetery which overlooks the harbor. The lofty towered new school-house on the hill, and the spacious (but unfinished) Catholic Church on Huntington St. are fine buildings. 1 M. N. is Cedar Grove Cemetery. Bank St. is the main business avenue of the city. Fort Trumbull is a massive and powerful granite fortress with a heavy armament, but built too near the city to keep it unscathed.

"New London is a stagnant old town, where nothing moves except the fish and the boats in the harbor. The natives, who loiter around corner groceries and fish-stalls, live so somnolently that, when anything happens, they pinch themselves to determine if they are awake. Catching fish and eating them comprehend the whole of existence; and sitting in the shade and smoking, the highest luxuries they long for." Such is Junius Browne's slightly exaggerated description.

Cod and whale fishing is extensively carried on from this port, and in the summer of 1872, 6 vessels sailed thence to hunt seals about the S. Shetland Isles.

The Harbor road leads by Fort Trumbull, and through a line of cottages, in 3-4 M. to the mouth of the Thames, near which is the * Pequot House, a costly and exclusive aristocratic resort, which accommodates about 500 guests, at \$5 a day each. A village of pretty cottages has grown up in this vicinity. On the opposite side of the Thames is the Ocean House (quieter and much less expensive) and Thompson's Hotel.

Steamers run twice daily (in summer) to Watch Hill Point. A line runs also to Sag Harbor, Long Island. Two steamers leave daily for New York (distance 126 M.) by the Norwich Line.

The New London Northern Division of the Vermont Central R. R. runs N. W. from this city to Palmer, Amherst, and the State of Vermont.

After leaving New London the Shore Line R. R. passes *Waterford* (Niantic Hotel,) and *E. Lyme*, where at the village of Niantic (Howard House), on the bay of the same name, are found fishing and boating advantages. This territory, from the Thames to the Connecticut, was formerly held by the Niantic Indians, a clan of the Narragansetts, who under their sachem, Ninigret (brother of Canonicus, and uncle of Mian-

tonomoh) conquered the Long Island Indians. The colonies declared war against Ninigret twice, on absurd pretexts, but he escaped without fighting, though his territories were ravaged, and in King Philip's War he kept his people from attacking the English. His great-grandson was sachem of the clan in 1746, and, selling the reservation in Lyme, moved his people to the Oneida country in New York. Lyme was settled in 1664, and long disputed about its boundaries with New London, until two champions were chosen by each plantation, who met on the debatable ground, and in a pugilistic contest, in which the Lyme men were victorious, their town secured the boundary which it claimed. Shortly after passing the venerable hamlet of Old Lyme (on the r.) the railroad crosses the Connecticut River on a long bridge, and stops at Saybrook, whence trains on the Conn. Valley R. R. run S. to Saybrook Point and the shore.

On Saybrook Point a fort was built by Plymouth in 1635, and well armed, several of the cannon remaining here in 1800. In 1636 Col. Fenwick came here to rule the plantation, which was named in honor of Lord Say and Sele, and Lord Brook. In 1637 the Pequots ambushed and destroyed a detachment near the fort, and attempted to carry the works by assault, but were received with such discharges of grapeshot that they gave it up, and, capturing several vessels above the Point, put their crews to death with horrible tortures. Lady Fenwick died in 1648, and her husband sold the territory to Conn., returned to England, and was one of the regicide judges. The fort effectually prevented Dutch vessels from ascending to reinforce Hartford, and in 1675 forced Andros's fleet to lie outside of the river. Springfield vessels refused to pay the toll demanded at the Fort, and appealed to Mass., which put a toll on all Conn. vessels entering Boston Harbor, and soon enforced a colonial reciprocity. In 1701 Yale College was chartered and located at Saybrook, and remained there 1707-17, where it held its first 15 commencements. It then occupied a one-story building 80 ft. long on the peninsula near the Fort. The celebrated Saybrook Platform was drawn up here in 1708, because "the churches must have a public profession of faith agreeable to which the instruction of the college shall be conducted." On Good Friday, 1814, 400 British sailors, in the boats of the "La Hogue," 74, took the Fort and ascended the river 20 M. destroying 27 vessels. The commander of this raid was Sir William E. Parry, afterwards famous for his Arctic voyages. "The steep, solitary hill near the river," on which still stood the remains of the Fort, was cut away by the railroad in 1871-2, to make embankments with. It is fortunate that the Acropolis and the temples of Baalbec are not in America.

In the cemetery at Saybrook Point is the transplanted monument of Lady Fenwick, and $1\frac{1}{2}$ - 2 M. beyond is the quiet, elm-shaded, and wealthy village of Old Saybrook.

The railroad now runs across a wide cove, and stops close to * Fenwick Hall, an elegant new hotel, accommodating 300 guests.

A stony strand leads to Lynde's Point on the E. at the mouth of the river, with its lighthouse. On the W., near Cornfield Point, is a small bathing-beach. Several fine cottages are near Fenwick Hall, from which the Long Island shore is seen. In seasons of long adverse winds, a fleet of 150-200 sail sometimes collects in the mouth of the river.

Steamers running between Hartford and the river villages and New York, New London, and Sag Harbor touch at Saybrook Point.

The Connecticut Valley R. R. runs from Saybrook Point to Hartford (Route 14).

After Saybrook, the Shore Line R. R. passes *Westbrook* (Westbrook Hotel) and *Clinton* (Clinton House, Bacon House), near which, on the N., is the pretty and secluded village of Killingworth (*Redfield's Hotel*) where Asahel Nettleton, the evangelist, was born in 1783. The Indian name of this place was Hammonasset, but the settlers changed it to Kenilworth, which was registered, by accident, Killingworth. The pastor of this parish was chosen first President of Yale College, but as he refused to go to Saybrook, the students were obliged to come to him, and so the college was practically here, 1701-7, though holding its commencements at Saybrook. Longfellow's poem, "The Birds of Killingworth," will be remembered here. Stations, *Madison* (Hammonasset House), *E. River*, and *Guilford*. Guilford (Guilford House) was settled by 4 immigrants from Kent and Surrey in 1639, on the Indian tract called Menuncatuck. They were led by their pastor, Henry Whitefield, "a man of marvellous majesty and sanctity." The regicides were hidden here for some time, and in 1781 3 frigates landed a force near the village, but the rapidly gathering militia drove them off. During the extermination of the Pequots, in 1637, the Mohegan Sachem Uncas pursued a Pequot chief to this point, and having shot him on the shore, put his head in the fork of an oak-tree, where it stayed many years, and the point is still called Sachem's Head.

Fitz Green Halleck, the versatile poet, was born at Guilford in 1790, and in his later years retired here and lived on a handsome pension allowed him by the Astors, of New York. He died in 1867.

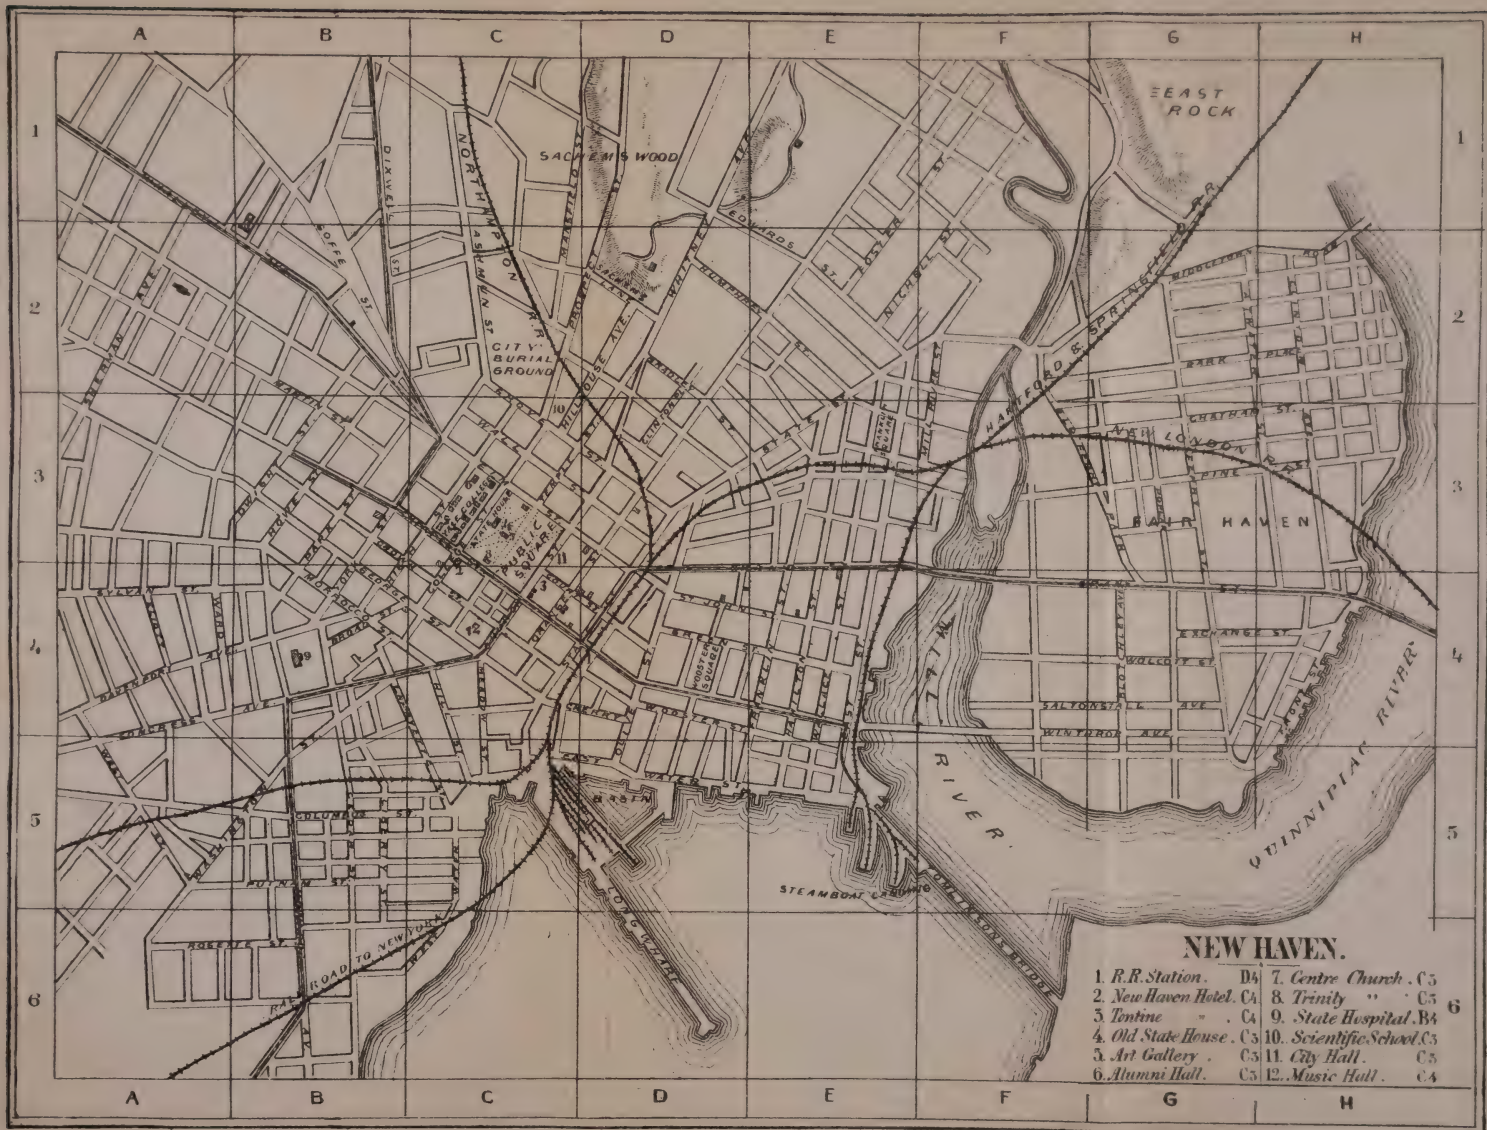

W. H. H. Murray, the popular pulpit orator, and pastor of Park St. Church, Boston, since 1868, was born at Guilford in 1840.

The village is a very pretty one, built around an extensive tree-studded and enclosed green, on which 5 churches front.

Near the village on the S. is Guilford Point (Pavilion, Guilford Point House, &c.), and across the harbor is the bold and picturesque promontory of Sachem's Head, where formerly stood a large hotel.

Station, *Stony Creek* (Stony Creek, Brainerd, Thimble Island, and Indian Point Houses, all small and inexpensive), famed for its large and delicious oysters. The romantic group of the Thimble Islands lies off shore here, and may be reached by boat from the Indian Point Hotel (25-50 c.). On Money and Pot Islands are small and primitive hotels, with cabins and cottages, while around and between these rocky and wooded islets rowing and sailing is full of pleasant surprises. Money Island was one of the rover Capt. Kidd's resorts, and it has been dug all over by treasure-seekers.

Station, *Branford*, (Branford House, on land sold by the Sachem of Quinnipiac to the English in 1638, he being glad to get an ally against the dreaded Mohawks. It was named from Brentford, where Edmund Ironside fought the Danes. The shore hereabouts is lined with sum-

mer hotels, — the Montana, Sea View, Totocket, Pine Orchard, &c. On Indian Neck are the Indian Neck and Montowese (200 guests) Houses, both about 2 M. from Branford station. At the head of "the rocky-shored and island-sprinkled bay of Branford" is the large *Branford Point House (160–200 guests), distant 8 M. from New Haven, and near by is the favorite Double Beach House (100 guests, \$3–3.50 a day).

In 1665, the colonies of Hartford and New Haven were united by royal order and the common consent. The people of Branford had steadily opposed this union, and when it was consummated, they moved in a solid body, headed by their pastor, and bearing all their household goods, to Newark, N. J., and the site of Branford was silent and deserted for years.

Station, *E. Haven*, an ancient resort of the Indians (for oysters, &c.), and the seat of iron-works in 1655, now has large copper-smelting works. The train now passes Saltonstall Lake, crosses the Quinnipiac River, runs through *Fairhaven*, and enters

New Haven.

Hotels. *New Haven House, corner College and Chapel Sts., opposite the College, \$4–4.50 a day; *Tontine Hotel, corner Church and Court Sts., a quiet old house fronting the Green, \$3 a day; Tremont House; Park House; Madison House, &c.

Restaurants. Lockwood's Dining-Rooms near the Park; the Florence House, Union St., and for a lunch, Hoadley's, near the college and a famous resort of the students. The best oysters may be had in Fairhaven.

Carriages. The regular tariff is 50 c. for one passenger for one course in the city, or for two passengers 35 c. each.

Horse-Cars (head-quarters at the foot of the Green) run to Fairhaven and E. Haven, to W. Chapel St., to Westville and W. Rock, to Centreville, to E. Rock, and in summer to W. Haven and Savin Rock.

Telegraph Offices. Western Union, on Chapel St., near R. R. Station; Franklin Co., on State, near Chapel St. Post Office on Church St. near Chapel St.

Reading-Rooms. In the hotels, and at the Young Men's Institute, Phoenix Building, Chapel St. Also at the Young Men's Christian Association rooms, over the City Bank, corner of Chapel and Orange Sts.

Amusements. Popular lectures, theatrical entertainments, concerts, &c. are frequently held in Music Hall (accommodating 2,500 persons) on Crown St. between Temple and Church Sts.

Railroads. At this point converge the New Haven, New London, and Stonington R. R. (see preceding pages); the New Haven, Middletown, and Willimantic (Air Line route, Boston to New York); the New Haven, Hartford, and Springfield R. R. (grand route from Boston to New York, *via* Springfield); the New Haven and Northampton (Canal) R. R.; the New Haven and Derby R. R.; and the New York and New Haven R. R., which is the last division of all three of the land routes from Boston (see succeeding pages).

Steamboats. Steamers leave for New York twice daily (morning and evening) making the voyage in 5 hours. Fare \$1, dinner and state-rooms extra. The Citizens' Line runs boats to New York every morning. Steamers run (in summer, 4 times daily) to the beaches at the mouth of the harbor.

Stages run from New Haven to Hartford *via* Durham, to North Branford and Deep River, &c.

John Davenport (of Magdalen College), a powerful parish pastor of London, joined the Puritan wing of the Anglican Church, and in 1637 was forced to leave England, with many of his people. After nearly a year's sojourn at Boston, he set sail with his people, and landed at Quinnipiac, the present site of New Haven,

in April, 1638. His was "the most opulent colony which came into New England," and they laid out a city with 9 squares for buildings enclosing a large central square (the Green), though their houses only occupied then a small space on the present George St., between Church and College Sts. The colony was governed for many years by its 7 most prominent church-members, after a curious and impressive sermon by Davenport from the text, "Wisdom hath builded her house; she hath hewn out her 7 pillars." One of the chief of these was the pure and learned Davenport, who was revered by the Indians as "so big sturdy man," and for whom Cotton Mather composed

"Epitaphium Johannes Davenportus, in Portum delatus.
Vivus, Nov-Angliæ ac Ecclesiæ Ornamentum,
Mortuus, utriusque triste Desiderium."

In 1638 the 7 pillars bought of the Indians 130 square M. of land for 13 coats, and in 1639 the truculent Nepaupuck was tried for murder and beheaded on the Green, where his head was long exposed. The trading-posts of New Haven on the Delaware River were broken up by the Swedes, and other losses combined to discourage the settlers, who resolved to go to Jamaica, and then completed negotiations to buy Galloway, in Ireland. The ship which bore their "commercial estates," sailed under Capt. Lamberton for Galloway, in Jan., 1647, but never was heard from afterwards, save when, as the legend says, the spectre of the ship sailed into the harbor in the teeth of a head-wind, and when in full view of the anxious people, it slowly melted into thin air, and vanished. The colonists remained at New Haven, and in 1665 this plantation was united with that of Connecticut (Hartford) on condition that each town should retain the dignity of capital; so to this day the State has two semi-capitals. In 1755, the "Conn. Gazette" was established here, and became the pioneer of the 8 weekly and semi-weekly, and the 3 daily papers of New Haven. In Jan., 1761, 7 companies of militia and the council convened, and proclaimed George III. King, drinking to him, the royal family, and the King of Prussia. In 1775, Benedict Arnold (afterwards so famous and infamous) led to Cambridge the Governor's Guards, the best company in the army. At sunrise, July 5th, 1779, 1,500-2,000 Hessians and Tories were landed at W. Haven Point, from 48 British vessels. They took the fort and town, which they plundered and partially burnt. They were much galled by the militia who hovered on their flanks and fought them in the streets. Rev. Dr. Napthali Daggett, President of Yale College, was captured by them with fowling-piece in hand, and forced to guide their columns. When wellnigh dead from mortification, and sore from repeated bayonet-wounds, he was asked, "Will you fight again?" The militant divine answered, "I rather believe I shall, if I have an opportunity." He or another pastor of the town was forced to pray for the King, which he did as follows: "O Lord, bless thy servant King George, and grant him wisdom, for thou knowest, O Lord, he needs it." Yale College was transferred to New Haven in 1717. In 1820 the town had 8,326 inhabitants; in 1870 50,840.

New Haven, "The City of Elms," a semi-capital of Conn., is built on a flat, alluvial plain, at the head of a bay which sets in from Long Island Sound. It is a handsome city, of modern appearance, rich in stately elm-trees, and surrounded by picturesque hills. The city has a large West India trade, and has about \$10,000,000 invested in manufactures, which in 1869 turned out 6,000 hay-cutters, 50,000 scales, 200,000 corsets, 1,200 Eureka organs, 600 Colibri pianos, and about 20 carriages daily. Fish-lines, saws, Baumgarten church-organs, and cars are also made in great numbers, while Sargent & Co. employ 800 men in vast hardware works. Chapel, State, and Church are the principal streets, the two former intersecting near the cavernous railroad station. There are several handsome churches here, and a very interesting old cemetery (on Grove St., at the head of High).

Among those buried here are Jehudi Ashmun, agent, fortifier, and defender of Liberia; Arthur Tappan, the philanthropist; Harry Crosswell, D. D., dashing political editor, 1802-14, and rector of Trinity Church, New Haven, 1815-58; N. W. Taylor, D. D., a disciple of Edwards and professor of didactic theology in Yale, 1823-58; Lyman Beecher, D. D., "the most widely known and influential preacher in the country, between 1815 and 1851"; Timothy Dwight, D. D., grandson of Jonathan Edwards, a distinguished theologian and poet, and President of Yale, 1795-1817, who rode horseback through New England and N. Y. and published an account of it in 4 volumes, also a system of theology in 5 volumes; Denison Olmsted, LL. D., professor of natural philosophy and astronomy at Yale, 1825-59, and a profound astronomer; C. A. Goodrich, D. D., theologian and lexicographer, professor of rhetoric at Yale, 1817-39; Noah Webster, LL. D., author and publicist, whose "Elementary Spelling-Book" had a sale of 50,000,000 copies, and who prepared (1807-28) and published a Dictionary of the English language which has since been the standard; Benjamin Silliman, professor of chemistry at Yale, 1802-55, one of the foremost scientists of his time; Jedediah Morse, D. D., "the father of American geography"; S. F. B. Morse (born 1791, died 1872), who, in 1844, put in operation the first electric telegraph in the U. S., who was covered with honors by European sovereigns and societies, and in 1857, was presented with 400,000 francs by a continental assembly at Paris; Elbridge Gerry, Vice-President of the U. S., 1812-16; R. S. Skinner, Gov. of Conn., 1844-6, and U. S. Senator, 1847-51; David Daggett, some time Chief Justice, and U. S. Senator, 1813-19; S. W. S. Dutton, D. D., and Gov. Henry Dutton; Prof. Murdoch and Sidney E. Morse; James Hillhouse, U. S. Senator, 1794-1810, and James A. Hillhouse, the poet of Sachem's Wood; Andrew H. Foote, Rear-admiral U. S. Navy, born in New Haven, 1806, died 1863. He fought the West India and Sumatra pirates, and in 1856 attacked the 4 Barrier-Forts at Canton, China, with the "Portsmouth" and "Levant." After a bombardment, at the head of 280 men, he landed and stormed the forts in succession, though they were heavy granite works, mounting 176 cannon, and defended by 5,000 men. In 1862 (Feb. - April) in a short, sharp campaign at the head of the iron-clad squadron on the Tennessee and Mississippi Rivers, he assisted in the reduction of Forts Henry, Donelson, and Island No. 10. He was a very religious man, and was accustomed to preach to his sailors every Sunday.

Jonathan Knight, professor of surgery at Yale, 1838-64; James L. Kingsley, professor of Hebrew, Greek, and Latin, at Yale, 1805-51; David Humphreys, the aid-de-camp and friend of Washington, and minister to Portugal and Spain, 1790-1802; Theophilus Eaton, Gov. of the New Haven colony, 1638-57; Roger Sherman, from 1774 to 1793 a member of the Continental Congress, and a signer of the Declaration of Independence, who "never said a foolish thing in his life" (Jefferson); Theodore Winthrop, the knightly soldier (author of "Cecil Dreeme," "Canoe and Saddle," &c.), who was killed at the battle of Great Bethel, June 10, 1861; Ezra Stiles, long President of Yale; and Eli Whitney, the inventor of the cotton-gin.

Among the broad streets lined with noble elms which extend on the N. and W. of the Green, the most beautiful is Hillhouse Ave., a broad, park-like drive, flanked by fine mansions, at the head of which is the mansion and domain, "Sachem's Wood," belonging to the Hillhouses. In the W. part of the city is the Orphan Asylum, Alms House, and County Prison. But the chief interest of New Haven centres in and about the Public Green. Here, on Church St. is the **City Hall**, one of the most elegant municipal buildings in New England, and the Third Cong. Church. On Chapel St. is the lofty and pretentious new mercantile building of Hoadley. The **Public Green** itself is a great lawn, studded with fine trees, and often used for parades. The North, Centre, and Trinity churches stand in line near the middle of the Green (the first two are Cong., and the last is Episcopal), and preserve a curiously ancient appear-

ance. Back of the Centre Church is the monument to the regicide, John Dixwell, a member of a prominent Kentish family, a colonel in the Parliamentary army, and a member of the British State Council, who fled to New Haven at the Restoration. Near him is buried a fellow-judge, Edward Whalley. On the Public Green, near Temple St., is the **State House**, a building in the simple and imposing Grecian Doric architecture, but constructed of brick and stucco, and presenting a very dingy appearance. The legislature meets here on the even-numbered years (1872, 1874, &c.) and the alternate years the sessions are held at Hartford. Temple St., with a glorious * Gothic arch of elm-trees, separates the Green from the grounds of

Yale College.

In the year 1700 ten clergymen planned to erect a college in the colony of Conn., and to further that end, contributed as many books as they could spare, for its library. In 1701, it was chartered, and its classes recited at Killingworth until 1707, when it removed to Saybrook Point, and in 1717 a final remove (it is hoped) was made to New Haven. At an early date the college was named in honor of Elihu Yale (born at New Haven in 1648), Gov. of Madras, and afterwards Gov. of the East India Company, who gave £400 towards its support. The Presidents of Yale: Timothy Dwight, Ezra Stiles, Theodore D. Woolsey (1846-71), and others, will compare favorably with the corresponding officers of Harvard. After the secularization of Harvard University, the Orthodox churchmen rallied on Yale. This college has done a noble work of education, and especially in shaping and strengthening those minds of Conn. which have been so busy and honored throughout the Republic.

Said De Tocqueville in a Fourth of July dinner at Paris: "Von day I was in the gallery of the House of Representatives. I held in my hand a map of the Confederation. Dere was one leetle yellow spot called Connect-de-coot. I found by de Constitution he was entitled to six of his boys to represent him on dat floor. But when I make the acquaintance personelle with the member, I find dat more than tirty (30) of the Representative on dat floor was born in Connect-de-coot. And den ven I was in de gallery of the House of the Senate, I find de Constitution permit dis State to send two of his boys to represent him in dat legislature. But once more, ven I make de acquaintance personelle of the Senator, I find nine of the Senator was born in Connect-de-Coot."

"And now for my grand sentiment — Connect-de-Coot, the leetle yellow spot dat make de clock-pedler, the schoolmaster, and the Senator; de first give you time, the second tell you what to do with him, and de third make your law and civilization."

The line of ancient buildings fronting on Temple St. comprises S. College (built 1793), Athenæum (built for a chapel, 1761), S. Middle College (1750), Lyceum and N. Middle College (1803), Chapel (1824), N. College (1822), and Division College (1835). These are used for dormitories and recitation-rooms, as is also Durfee Hall (1871,) and Farnum Hall (1872), two handsome new buildings on the N. end. Three fine buildings are aligned on High St., on the N. the Alumni Hall, a neat red-sandstone building with a large hall in which are hung portraits of many distinguished graduates. In this Hall are conducted the examinations of new men, the Commencement exercises, and the meetings of the *alumni*. The Linonian Society and the Brothers in Unity have halls in this building. Next S. is the ornate turreted building of the

College Library, with numerous ivy-vines (planted with great ceremony by each graduating class) climbing up its sandstone walls. The Library contains 90,000 volumes. Next S. is the Old Commons' Hall, now used for lecture-rooms, and for the display of the great geological cabinets, &c., prepared by Silliman, in which is the Gibbs collection of 25,000 specimens, including several European collections. Next comes the costly modern building of the Art Gallery (see below). Among the smaller houses on the square are the old Trumbull Gallery, and the little laboratory formerly used by the elder Silliman, and preserved as a relic of that eminent scientist. The Gynnasium (said to be the best in the U. S.) is on Library St., and the boat-house of the Yale Navy is near Tomlinson's Bridge. Curious buildings near the square are occupied by the college societies: the Psi Upsilon, on High, near College St.; the Delta Kappa Epsilon, on York, near Library St.; the Scroll and Keys, corner Wall and College Sts., &c. Yale is properly a University, having, besides its large academic department, the Sheffield Scientific School, in a fine building on Grove St., with 140-150 students; the Law School, on Church St., near the City Hall; the Medical College, on York, near Chapel St.; the School of the Fine Arts, and the Theological School in a large new building, corner of Elm and College Sts., with the neat Marquand Chapel attached. In 1871 there were 644 men in the academic department, with 68 instructors; and 215 in the professional schools, with 20-25 instructors. The Annual Commencement (last Thursday in July) is a great day in New Haven, the exercises being conducted in the Centre Church and the Alumni Hall.

A large reading-room is in S. Middle College. George Peabody left \$150,000 to Yale, which is to be used in building a fine Museum on Chapel St., and a Memorial Chapel is also in projection.

The lower part of the **Art Building** is occupied by studios, &c., and the second floor contains some valuable pictures. The works of art in the first room, to a large extent, belong to gentlemen of New Haven, and are often withdrawn and new ones are added.

Among those on exhibition here in 1872, were View in the Catskills, *Gifford*; Portrait of George Peabody, *Huntington*; * Interior of Westminster Abbey, and * Interior of St. Mark's, Venice, *Duril Neul*; large copies of the Madonnadi Foligno, the Transfiguration, and the Last Communion of St. Jerome; * Autumnal Scene, *Gifford*; Ammonoosuc Valley, *Weir*; Taking the Veil, *Weir*; and a large number of portraits, sketches, &c. by Col. Trumbull. In the second room are many casts from antique sculptures; 130, east of Jupiter, *after Phidias*; 131, Ilioneus, *after Praxiteles*; 132, Ruth, *Lombardi*; 133, Jephthah, *Augur*; 135, Edwin Booth; 136, Col. Trumbull, *Ball Hughes*; 137-8, busts by *Powers*; 139, statuette of Apollo; 1, head of Apollo; 2, Æsculapius; 3, the River-God of the Cephissus; 4, Theseus, *after Phidias*; 5, Victory, *after Phidias*; 6, Kanephora; 7-28, Panathenaic procession, from the outer frieze of the cella of the Parthenon; 29-33 Combat of the Greeks and Amazons, from the frieze of the Mausoleum at Caria. In the corridor are works of the same class: 1, east from Eleusis; 3, 4, 11, Metopes of the Theseum; 12, 13, Combat with Centaurs. In the third room is the famous * Jarvis collection of early Italian pictures (fine catalogue and "Manual of the

Study of early Christian Art," for sale by the janitor). The pictures from 1 to 10 are Byzantine Italian, of the eleventh and twelfth centuries : 1, an altar-piece, the Crucifixion, Deposition, and Entombment ; 2, the Nativity ; 3, a triptych, Madonna and Child and Saints ; 4, 19 small pictures from the history of Christ, in a triptych ; 5, * a large altar-piece, Christ and the Madonna, with Angels ; 6, St. George killing the Dragon ; 7, an altar-piece in 5 sections, Christ in Hades, &c ; 8, The Annunciation ; 9, Miraculous Appearance of SS. Mercurius and Catherine (13th century) ; 10, Madonna and Child ; 11, Crucifixion, *Giunta da Pisa* ; 12, altar-piece in 7 sections, *Margaritone da Arezzo* ; 13, Madonna and Child, *Cimabue* ; 14, Crucifixion, and Madonna and Child, *Duccio da Siena* ; 17, * Entombment, *Giotto* ; 18, Crucifixion, *Giotto* ; 19, Annunciation, *Cavallini* ; 20, Vision of S. Dominic, attributed to *Taddeo Gaddi* ; 21, SS. James, Julian, and the Archangel Michael ; 22, the Madonna and Child, &c. ; 23, SS. Augustine and Lucia, *Orcagna* ; 24, SS. Dominic and Agnes, *Orcagna* ; 25, S. John the Baptist, *Orcagna* ; 26, * S. Peter, *Orcagna* ; 27, The Trinity and Adoring Saints, *Capana* ; 28, St. Francis receiving the Stigmata, *Agnolo Gaddi* ; 29, The Agony in the Garden ; 30, Legend of S. Giovanni Gualberto, *Casentino* ; 31, Madonna and Child, &c., *Giotto* ; 32, The Adoration of the Shepherds, *Giotto* ; 33, Crucifixion, *Aretino* ; 34, Vision of Constantine, and Fall of Satan, *Aretino* ; 35, The Assumption of the Virgin ; 36, SS. Cosmo and Damian, *Bicci* ; 37, the Deposition from the Cross, *Veneziano* ; 38, The * Triumph of Love (on wood), *Gentile da Fabriano* ; 39, Madonna and Child, *Gentile da Fabriano* ; 40, SS. Zenobio, Francis of Assisi, Anthony of Padua, *Fra Angelico da Fiesole* ; 41, The Madonna adoring the Infant Saviour, *Panicale* ; 42, Infancy of S. John the Baptist, *Masaccio* ; 43, 44, Scenes from the Æneid, painted on wood, *Uccelli* ; 45, Tournament at Florence, *Dello Delli* ; 46, St. Martin and the Beggar, *Dello Delli* ; 47, St. Jerome in Penance, *Castagno* ; 48, The Temptation of S. Anthony, *Sassetta* ; 49, Adoration of the Magi, and 50, Coronation of the Virgin, *Sano di Pietro* ; 51, S. Catherine of Siena pleading the Cause of the Florentines before Gregory VII., *Giovanni di Paolo* ; 52, Martyrdom of a Bishop ; 53, St. Anthony tormented by Demons ; 54, Hermits exorcising Demons ; 55, Nativity, *Squarcione* ; 56, Crucifixion, *Mantegna* ; 57, Madonna and Child, *Matteo da Siena* ; 60, Penitence of S. Jerome, *Fra Filippo Lippi* ; 61, Madonna, *Diamante* ; 63, Annunciation, *Gozzoli* ; * 67, Adoration of the Magi, *Luca Signorelli* ; 68, The Princess Vitelli, *Francia* ; 70, The Baptism of Christ, *Perugino* ; 73, Portrait of a Lady, *Ghirlandajo* ; 74, Madonna and Child, *Botticelli* ; 75, S. Peter, *Giovanni Bellini* ; 77, The Circumcision of Christ, and, 78, Portraits of noble Venetians, *Giorgione* ; 80, St. Sebastian, and 81, The Dead Christ, *Filippino Lippi* ; 82, Diana and Actæon, and 83, the Three Archangels, *Piero di Cosimo* ; 84, Crucifixion, *Lorenzo di Credi* ; 86, The Dead Christ held by the Virgin, *Fra Bartolomeo* ; 89, The Madonna supporting the Dead Christ, *Raphael* (his earliest known work) ; 90, Madonna, *Lo Spagno* ; 92, Madonna and Child, *Andrea del Sarto* (badly injured) ; 94, Christ bearing the Cross, *Sodoma* ; 95, Madonna and Saints, *Sodoma* ; 97, Madonna and Saints, *Ghirlandajo* ; 99, Martyrdom of the Theban Legion, and, 100, Portrait of Cosmo dei Medici, *Pontorno* ; 104, Portrait of the Princess Vittoria Colonna, *Sebastiano del Piombo* ; 106, The Death of Lucretia, *Vasari* ; 107, Portrait of Bianca Capello, *Bordone* ; 109, The Crucifixion, *Paolo Veronese* ; 110, Christ in Glory, with SS. Peter and Paul, attributed to *Veronese* ; 111, Venal Love, *Agostino Caracci* ; 112, Joseph and the Infant Jesus, *Guido Reni* ; 113, Venus, Minerva, and Juno disarming Cupid, *Guido Reni* ; 114, Artemisia, Queen of Caria, *Domenichino* ; 115, * Madonna holding the Crown of Thorns, *unknown* ; 116, Spanish Noble, *Velasquez* ; 117, Head of the Dead Christ, *Albert Dürer* ; 118, Portrait of the Emperor Charles V., *Holbein* ; 119, The Procession to Calvary, *Breughel*.

Environs of New Haven.

Besides the beaches at Branford and Guilford (before spoken of), there is a fine drive down the E. side of the harbor, by the old Forts, Hale and Wooster. The Grove (steamer from New Haven 4 times daily) and the Cove Houses are near the lighthouse, 5 M. from the city, the latter (\$10-\$15.00 a week) being on a long, smooth, curving beach of white

sand. (The suburb of Fairhaven, on this side, is famous for its large and delicious oysters.) **Fort Wooster**, $1\frac{1}{2}$ M. from the city, was built in 1814, and is now in ruins; a noble view is gained from the hill on which it stands. About 200 yards N. of this Fort was the cemetery of the Quinipiac Indians. $1\frac{1}{2}$ –2 M. from this point is Fort Hale, which was greatly strengthened during the war of 1861–65, but is now dismantled.

The East and West Rocks are bold and lofty masses of trap-rock, on the plain near the city, which geologists think were driven up through other strata by some great throe of the central forces. They form the southern limit of the great system of mountains which extends from Hereford, in Canada, forming the valley of the Connecticut River, which many believe once flowed between these cliffs to the Sound. **East Rock** (carriage-road to the top, horse-cars to the base from the Green) is $1\frac{1}{2}$ –2 M. from the centre of the city, by way of State St. A small stone hotel is on its summit. An extensive *view is afforded hence, embracing the broad valleys and bright waters of Mill and Quinipiac Rivers, the rural districts of North Haven and Hamden, the high hills toward Mount Carmel, the frowning cliffs of West Rock, the city of New Haven, its harbor, and a long sweep of Long Island Sound.

* **West Rock** (horse-cars from Chapel St.) is 2– $2\frac{1}{2}$ M. N. W. of the Green, and rises sharply from the plain to an elevation of nearly 400 ft. The ascent (difficult for ladies) is over a rugged and rocky path beyond the quarries. The view from the summit is nearly the same as that from the East Rock, except that a great portion of the Quinipiac valley is hidden, the northern mountains are differently grouped, and the western towns are unfolded to the view. A hard walk of 15–20 min. to the N. over the rugged plateau leads to the *Judge's Cave*, a small cleft in a group of boulders, where the regicides Goffe and Whalley were hidden for some time in 1661. A citizen who lived about 1 M. off brought them food, until one night a catamount looked in on them and "blazed his eyes in such a frightful manner as greatly to terrify them." *Wintergreen Fall* is near the upper base of the rock, and above it is a dam of rock and earth 3,500 ft. long, which forms a lake of 75 acres for the water supply of the city. Near West Rock is *Maltby Park*, covering 800 acres, with 3 M. of driveways, and the city water-works. At the foot of the rock is Westville, near which is "Edgewood," the rural home of Donald G. Mitchell (Ik Marvel), the author of "Dream Life," "Reveries of a Bachelor," and other charming books.

Savin Rock, 4 M. S. W. of New Haven (horse-cars from the Green half-hourly) is the favorite resort of the citizens. The road passes through West Haven, a quiet old village, with a tall church on an elm-shaded green. Savin Rock is a bluff promontory pushing a rocky front against the waves, and stands at the end of a long, sandy beach which has

a very light surf. A pretty view of the Sound is gained from the top of the bluff, near which once stood a fine hotel, which was recently burned down. The Sea-View House can now accommodate 75-100 guests.

Several busy manufacturing villages are in the vicinity of New Haven. Newhallville, where the Winchester rifles are made; Centreville, the home of large car, carriage, and saw factories; Whitneyville; Westville, where 360,000 gross of match-splints and \$50,000 worth of berry-baskets are made yearly, &c.

On leaving the dark and crowded, but centrally located, station at New Haven, the Shore Line train passes on to the rails of the New York and New Haven R. R., on which the cars of the Springfield route run, and which will also be used by the Air Line route. The first station is *West Haven*, 1 M. from Savin Rock. Next comes *Milford*, (Milford Hotel, \$2.00), a pretty village, with wide streets lined with arching elms, and with an enclosed green $\frac{1}{2}$ M. long.

The aborigines of Wapowage having been crowded off, this district was settled and named, in 1639, by a company from Milford, in England. The occupation seems to have been in accordance with a series of resolutions at an early meeting of the Milford church. "Voted, That the earth is the Lord's, and the fulness thereof. Voted, That the earth is given to the saints. Voted, That we are the saints." The settlement being menaced in the Indo-Dutch War of 1643-6, it was surrounded by a wall and palisade 1 M. around; and the dreaded Mohawks having been repulsed by Connecticut Indians near Milford, the saints possessed the earth in peace. On New Year's Day, 1777, 200 American soldiers, captives from the prison-ships at New York, were cast ashore here from British cartel-ships, and despite the truly saintly ministrations of the Milfordites, 46 of them died in one month. They were buried in the old cemetery (near the station), and a monument 30 ft. high raised over them, which states the facts, and the names of the victims, and asks, "Who shall say that Republics are ungrateful?"

St. Peter's (Episcopal) Church is a venerable and ivy-clad stone edifice on the green and terraced banks of the tranquil Posquag. Two large white churches (of wood) stand on the hill beyond. A large amount of straw-goods is made in the village. Charles Island (small hotel) is in the Sound near Milford, and is much visited in summer.

Soon after leaving Milford, the line crosses the broad Housatonic River, and stops at *Stratford*, a quiet village with neither hotel nor factory, and rich in two or three elm-lined, tranquil streets, where one can stroll on dreamy autumn afternoons and feel as if in a second era of the Truce of God. Such streets are found only in these old towns on Long Island Sound. Stratford was settled by Massachusetts men, in 1639, and its pastor was Adam Blackman, whom Cotton Mather (who is fond of playing upon words) calls "a Nazarite purer than snow, and whiter than milk." The society which he organized now meets in a new Swiss Gothic church near the station. Dr. Samuel Johnson, first President of King's (Columbia) College, and "Father of Episcopalianism in Connecticut," is buried near the venerable Christ Church (founded 1723).

The next station is **Bridgeport**.

(* Sterling House, Main St.; Atlantic House, opposite station, each \$3.00 a day; City Hotel, &c.) *Carriages*, 50c. a course within the city for each person, or \$1.00 for 3 persons. *Post Office* on State, near Main St. *Opera House* on State, near Main. *Library*, corner Main and Beaver, with 9,000 volumes; magazines and papers in the reading-room.

This district was owned by the Paugusset Indians, and was occupied soon after Mason's victory in 1637, when he pursued the Pequots in this direction. The innocent Paugussets (with their hundred wigwams) were soon crowded on to a reservation of 80 acres at Golden Hill (so named from its glittering mica), and the poor half-dozen who remained in 1765 sold out and left. From the contiguous towns of Stratford and Fairfield a new parish was formed, called Stratfield, and from this Bridgeport was afterwards organized. Charles Chauncey, the famous Puritan Father, was pastor here for 20 years, and while he looked after the adults the church "Voted that Nathaniel Wackle should be the man to look after y^e boyes a Sabbath dayes in time of exercise that they play not." In 1715, Pastor Cooke of New Haven accepted a call here on a salary of "200 l. a year, or provisions at the following rates, viz: Indian at 2s., ry at 2s. 8d., wheat at 4s. per bush., pork at 20s. per cwt., and firewood for the yous of the family." People were seated in the church "by dignity, Adge, and a state." In 1707, an Episcopalian missionary was sent here from England, who, by 1748, had organized a church (the present St. John's Society). In 1771, during Sunday morning service at the Congregational Church, a storm arose, the darkness was broken by a broad sheet of lightning, accompanied by a terrific crash, and when it had passed the two chief men were found dead in their pews, and many in the congregation were stunned, bruised, and wounded. In 1836, Bridgeport was incorporated as a city, and since then has grown larger and richer yearly.

The principal manufactories of the city are the great Sewing-Machine works of Wheeler and Wilson (employing 800 hands), and of Elias Howe, Jr. (the latter made 30,000 machines in 1869), the Pacific and the New Haven Arms Co., the Union Metallic Cartridge Co., the American and the Simpson Water-Proof Co., the Bridgeport Brass Co., &c., &c. Immense quantities of steel-pointed cannon-shot were made here in 1861-5.

Mountain Grove Cemetery is gained by Fairfield Ave. (horse-cars), and is in a picturesque situation. The Harral family has a fine Gothic monument on one of the hills. Iranistan, Barnum's large mansion, stood on Fairfield Ave. St. Augustine's Church (Catholic) is a large granite edifice on Golden Hill, opposite which is the Cluny-like Wheeler mansion in its extensive grounds. Beyond this the aristocratic streets of Golden Hill extend. North Ave. was the centre of the ancient settlement, of which some gray houses remain. It was then called the King's Highway. Broad St., parallel to Main, has a line of neat churches. Washington Park is a plain, grassy lawn in E. Bridgeport, on which is the pretty Church of St. Paul, and beyond it is Pembroke Lake. On the S. of the city (horse-cars on Main St.) is * **Sea-Side Park**, a fine resort looking out on the harbor and the Sound. The beach is backed by a long sea-wall, beyond which is a broad esplanade, with carriage-road and foot-path, in full view of the water, and of Long Island. Beyond the Park is Black Rock Village, where was born Capt. Chauncey, of the U. S. Navy, a distinguished officer of the War of 1812. During much of the Revolutionary era, the 4th Conn. encamped at the Park. The stately mansion

which overlooks the Park was built by P. T. Barnum, the great showman.

Barnum was born in Conn., 1810, and began his great career as showman in 1835 (with Joice Heth). In 1849, he paid Jenny Lind \$150,000 for singing 150 nights in America. In 1865, his great museum at New York was destroyed. Charles S. Stratton, or Gen. Tom Thumb, was born at Bridgeport in 1832. His size and growth were as usual until his seventh month, when he ceased to grow. In 1844 Barnum took him to Europe; and since that time his travels have been incessant and his revenues large. In 1863 he married Miss Lavinia Warren, of Middleboro', Mass., a young lady of about the same stature as himself, — to wit, 28 inches.

Steamers leave Bridgeport for New York twice daily, also for Port Jefferson, L. I., twice daily (fare \$1.00). Stages for Black Rock, Easton, &c.

Railroads. The Naugatuck R. R., from Bridgeport to Winsted (62 M.), runs N. in the valleys of the Housatonic and Naugatuck Rivers. (Route 16.) The Housatonic R. R. runs from Bridgeport to Pittsfield, Mass., 110 M. (Route 17.)

The next station is *Fairfield* (Fairfield House, or Marine Pavilion, \$10—\$12.00 a week; open in summer only). Fairfield is an ancient village, with a beautiful street lined with villas and careful landscape gardening. On the Green are the Episcopal and Congregational Churches, and the Court House, "Built A. D. 1720, destroyed by the British A. D. 1779, rebuilt A. D. 1794, remodelled 1870."

July 7, 1779, Tryon with his Hessian Yagers, returning from the pillage of New Haven, landed here, sacked the village, and burned 200 houses. The scene inspired Col. Humphrey's *Elegy* beginning, —

"Ye smoking ruins, marks of hostile ire,
Ye ashes warm which drink the tears that flow,
Ye desolated plains, my voice inspire,
And give soft music to my song of woe.
How pleasant, Fairfield, on th' enraptured sight,
Rose thy tall spires, and ope'd thy social halls."

Another poet of that day was more pointed in his remarks: —

<p>"Tryon achieved the deeds malign, Tryon, the name for every sin. Hell's blackest fiends the flame surveyed</p>	<p>And smiled to see destruction spread; While Satan, blushing deep, looked on, And Infamy disowned her son."</p>
---	---

10 min. walk S. of the Green leads to the beach, the best on the Sound, protected by a bar from S. winds, with a gradually-sloping, sandy shore, and no surf. To the S. is the lighthouse on Penfield Reef, and Black Rock light is to the E., in which direction is a high, grassy bluff on which it is contemplated to build a mammoth hotel. 15 min. walk N. of the Green is Round Hill, commanding a wide view of Bridgeport and the Sound. Some miles N. are Samp Mortar Rock (a precipice 70 ft. high, on whose top is a deep hole where the Indians pounded corn), and Greenfield Hill, where President Dwight was once settled, and where he wrote the poem (popular 70 years ago) of "Greenfield Hill." From this point a fine view is gained, embracing, according to the poet,

"Norwalk's white ascending spires, sky-encircled Easton's churches,
Stratford's turrets, Fairfield giving lustre to the day.

Prince of the waves, and ocean's favorite child,
There Longa's Sound all gloriously expands."

Southport station and village is 2 M. from Fairfield. N. of the railroad

and near the station is a cultivated field, which occupies the site of the Sasco Swamp, where, in 1637, the Unquowa (Fairfield) Indians and a strong band of Pequots took refuge. Mason, with troops of Mass. and Conn. surrounded the swamp, and after a parley the Unquowas were allowed to come out (being blameless). The Pequots refused all terms, and, after an obstinate attack, 70 of them broke the English line and escaped. 180 were made prisoners and sold to the West Indies as slaves. Soon after these "fair fields" were occupied by a company from Concord, Mass. The next station is *Westport*. The village is $1\frac{1}{2}$ –2 M. N. of the railroad, on the widenings of the Saugatuck, and is a lively little place. The Memorial Church of the Holy Trinity is a fine Gothic edifice of sandstone, alongside of which, and in strong contrast, is a heavy Egyptian tomb.

Station, *S. Norwalk* (Lucas Hotel, Allin House), near which is the village of *Norwalk* (horse-cars to station). The legend says that this land, in the purchase (1640) from the Indians, was to extend one day's "north walk" from the Sound. In 1653, the town was incorporated, having then 20 families. July 11, 1779, Tryon's Hessians plundered and burnt the village, meeting with such resistance from 50 Continental soldiers and the militia that they lost 148 men. S. Norwalk is now an incorporated city, and Norwalk (*Conn. Hotel*) is a pretty village on the heights. Midway between them is the palace of Le Grand Lockwood (costing about \$1,000,000). The fine picture-gallery was moved to New York soon after Mr. Lockwood's death, in 1872. The Norwalk Lock Co. makes 900,000 locks yearly, in 300 forms; the Union Knob Works turn out 1,500,000 knobs (of New Jersey clay) yearly. Hats and shoes are largely manufactured here. The oyster business is extensively engaged in by Norwalk men. At the draw-bridge, near Norwalk (on the E.), a frightful accident once took place, when an express train dashed into the open draw and was precipitated into the channel.

Stations, *Darien* (village $\frac{1}{2}$ M. S. of the station), *Noroton*. Noroton is $1-1\frac{1}{2}$ M. from Darien, and is the seat of Fitch's Home for Soldiers, a beneficent institution founded by Benjamin Fitch, Esq., a wealthy gentleman of Darien. Many of the children of the fallen soldiers are educated and cared for here, and prepared for lives of industry and honor.

A fine gallery of paintings (mostly modern French) is attached to the Home, and is open to visitors.

1, Portrait of Benjamin Fitch; 2, The Wandering Jew, *Della Monica*; 3, The Charitable Priest, *Murillo* (?); 4, Arabs, *Adolphe Aze*; 5, Gaming, *Cassana*; 6, Young Christ; 10, Fruit, *Matthieu*; 11, *Greek Girls invoking Eros, *Mansfeld-Beaumont*; 12, The Old Lover, *Zamacois*; 13, Scene on the Campagna, *Fay*; 20, The Coming Storm, *Verheyden*; 22, Europa and the Bull, *Cortone*; 23, Amsterdam, *Hofbauer*; 24, The Judgment of Solomon, *Zurbaran*; 25, Scene at a Mosque, *Adolphe Aze*; 27, Holy Family, *School of Murillo*; 28, Lamplight Study, *Rosierze*; 29, Arches near Marseilles, *Loubon*; 32, Adoration of the Magi, *Franck*; 47, *Algerian Princess at the Bath, *Adolphe Aze*; 36, Marine, *Hofbauer*; 38, Landscape, *Van Huysum*; 40, Genre, *Van Ostade*; 42, *Tambourine Girl, Ro-

driguez; 44, 46, *Swiss Scenes, Hauzer*; 48, *Mother and Child, Coseman*; 50, *The Foot-Bridge, Billow*; 52, *The Madonna adoring the Infant Christ, Garofalo*; 53, *Assumption, Prudhon*; 54, *The Marriage, Greuze*; 55, *Roman Flower-Girl, Oudet*; 56, *Portrait by Ribeira (?)*; 57, *The Return of Columbus, Deveria*; 58, *Knife-Grinder, Teniers (?)*; 59, *Holy Family, Rubens* (very doubtful); 60, *Game-Piece, A. Aze*; 61, *Wounded on the Battle-Field, H. Vernet*; 62, *Jonah and the Whale, Eckhout*; 65-9, *Genre pictures, by Schopin*; 66, *Aurora, after Guido*; 67, *Alpine Landscape, Hofbauer*; 71, *Roman Girl, Riedel*; 72, *The Toilet, Delechaux*; 77, *Lady pouring Tea, Senecourt*; 78, *Cavalier, Patrois*; 83, *Last Supper, Tintoretto (?)*; 84, *Milking, Berghem*; 86, *Fruit-Girl, Tourny*; 88, *Alpine Landscape, Hofbauer*; 89, *Lady at Window, Costi*; 91, *Fruit, De Heem*; 93, 100, *Dogs, Blanchard*; 94, *Sheep, Verboeckhoven*; 95, *Alchemist, Pichot*; 97, *Soldier, Couture*; 98, *Female Head, Aita*; 99, *Farm-Yard Scene, A. Aze*; 102, *Dead Deer, Gerard*; 105, *Bashful Suitor, Tolmouche*; 106, *The First Snow*; 109, *Elijah fed by the Ravens, Boucher*; 111, *Holy Family, with SS. The picture numbered 150 (in the upper hall) is by *Bouguereau*, and was long known as "the gem of Paris." Some call this the best picture in the gallery, while others prefer *Verboeckhoven's Sheep* (133), a small work, yet of microscopic finish. The works of *Adolphe Aze* are said to be "ex-empt from criticism," as he has gained every medal and honor where his paintings have appeared. In the lower room is a choice and well-used library, including 800 volumes of Bohn's works presented by English friends. This room also contains several large pictures. In the room on the r. is a fine piece of statuary emblematic of the purpose of the institution. The view from the observatory above the building is very pretty.

3 M. beyond Noroton, the train stops at **Stamford**, (*Stamford House, Union House*), which was founded in 1641, and thereafter sometimes harried by the Dutch from New York. In 1838 it was a dull hamlet of 700 inhabitants; but soon after the Empire City looked with favor upon it, and during the last 25 years its hills have been occupied by the villas and parks of New York gentlemen. Hence fine churches have been built, broad avenues are laid out, and a cluster of admirable schools has arisen. St. Andrew's (Epis.) Church is a little gem of Gothic architecture, guarding a wide sweep of graves. The Univ. Church, near by, is a handsome stone building, while the Catholics are raising a large church,

on the road from the station. A fine new Town Hall, of brick and Ohio stone, 150 ft. front and with a tower 100 ft. high, rises in the centre of the village ($\frac{1}{2}$ M. from the station). Near it is a small, triangular park with a fountain. A pleasant drive is that on the New Haven road, passing many fine villas, among which is Quintard's stone château. 1000-1500 New-Yorkers come here during the summer, many of whom stop at *Shippan Point* ($1\frac{1}{2}$ -2 M. from the station), where is the large Ocean House, from whose beach a pretty still-water view is afforded. Pound Rock is a ledge running into the Sound not far from the Point.

Col. Abraham Davenport, "a man of stern integrity and generous benevolence," was born at Stamford in 1715, and was for 25 years in the State legislature. On the memorable Dark Day, May 19th, 1780, great fear fell on the legislature, then in session; and in anticipation of the approach of the Day of universal Judgment, an adjournment was moved. The brave old man arose, and thus spoke, calming the fears of the legislators, and continuing the session: "I am against an adjournment. The Day of Judgment is either approaching, or it is not. If it is not, there is no cause for an adjournment. If it is, I choose to be found doing my duty. I wish, therefore, that candles may be brought." This scene has been made the theme of a fine poem by Whittier. Col. Davenport's sons, James and John, were officers in the Revolution, and afterwards members of Congress (1796-9; 1799-1817).

Steamers leave Stamford for New York daily. A *Railroad* runs from this point to New Canaan, a quiet country town 8 M. to the N.

Stations, *Cos Cob* (village N. of the railroad, on the Miantus River), and *Greenwich* (City Hotel, open in summer). Greenwich was settled in 1640, and in 1650 was appointed by the Anglo-Dutch frontier commission in session at Hartford as the W. limit of Conn. Somewhere in this early age, a desperate battle lasting all day was fought on Strickland's Plain, between the Dutch and Indians. The village stands on rolling hills, $\frac{1}{2}$ M. N. of the station. 15 min. walk to the E. is a stately Cong. Church, built of gray rubble, with deep transepts, a wide and picturesquely irregular front, a high pointed roof, and a fine stone spire in open-work. This fine edifice is on a high hill, and may be seen for leagues along the Sound, resembling some pilgrimage church on the Seine or Danube. Near this is the exquisite Christ Church (Epis.) in a sheltered grove on the ridge, built of gray stone trimmed with Caen stone. It has a handsome stone spire, and its interior is said to be very elegant.

A few rods beyond (to the E.), on the r. of the road, is an old cemetery, where stood the church in 1779, near which Gen. Putnam, with 60 militia-men, fought an advancing force of dragoons until the last moment possible. Then, since to go down by the curving road (the present road is modern and more direct) would expose him to a close fire from many of the enemy, he galloped his horse down the steps built in the steep hillside for the church-goers. The British cavalry sent a volley after him (one shot piercing his hat), but dared not follow, although two or three dragoons of Lafayette's escort to the place (in 1824) performed the feat safely. Putnam lost 2 cannon here, but his men mostly escaped to the adjacent swamps, and the next day Old Put attacked Tryon's rear-guard with a force from Stamford, and captured 38 men.

S. E. of the Greenwich station is *Indian Harbor*, on a point near which

are the great buildings and parks prepared by the wealthy Americus Club, of New York.

Soon after leaving Greenwich, the train crosses the Byram River, and leaves Yankee-land, which is said to stretch "from Quoddy Head" (in Maine) "to Byram River." Stations, *Port Chester*, in Westchester County, New York (De Soto House), a busy village with 5 churches, *Rye* (with a fine beach 2 M. S. E. of the station), *Mamaroneck*, "the place of rolling stones," where Smallwood's Maryland battalion defeated Rogers's Tory Rangers in 1776, and **New Rochelle**. This village was settled by Huguenot refugees in 1691, after the fall of La Rochelle, and the French language was long used here. The State of New York granted a tract of land here to Thomas Paine.

Thomas Paine, was born in England, 1737, and came to America in 1774. Early in 1776 he published a tract, "Common-Sense," advocating republican independence, and in Dec. "The Crisis" was published, beginning with the words, "These are the times that try men's souls." This was read at the head of every Continental regiment, and aroused the drooping spirits of the army and people. After filling several offices in the U. S., he went to France in 1791, and was elected to the National Convention. After a stormy life in Europe, during which he attacked Burke in the "Rights of Man," and advocated atheism in the "Age of Reason" (1795), he came to New Rochelle in 1802, and settled on an estate given him by New York, where he died in 1809. In 1819 Wm. Cobbett removed his remains to England, and in 1839 the State erected a monument to Paine on his old farm.

After *New Rochelle*, the train passes *Pelhamville*, and at *Mount Vernon* turns to the S. W., and runs on the rails of the Harlem R. R., through several suburban villages without stopping, then crosses the Harlem River, and stops at the station, 42d Street, corner of 4th Avenue.

New York, see Route 51.

9. Boston to New Bedford.

Via Boston and Providence R. R., &c., in 2 hours.

Boston to Mansfield, see Route 8. Stations, Norton (Mansion House), Crane's, Attleborough Junction (where a branch line diverges to Attleborough), Whittenton, Taunton (see Route 3.) At *Weir Junction*, the line connects with the Old Colony R. R. (western division), at *Middleboro' Junction* with the Middleboro' and Taunton R. R., and at *Myrick's* with the Old Colony R. R. (eastern division). The track now crosses the towns of Freetown and New Bedford, and stops at the latter city.

New Bedford (Parker House, Mansion House), the Acushnet of the Indians, was settled in 1764, by Quakers, on lands owned by one Russell. This being the family name of the Dukes of Bedford, the settlement was named in compliment to them. In the Revolution the place became a perfect nest of privateers, until a British force under Earl Grey attacked it (in the autumn of 1778), and destroyed its shipping, wharves, and

stores. About the time of the settlement (1764), a few vessels were sent out in the pursuit of whales ; and this business soon became so great as to give New Bedford the name of the Whaling City. The Revolutionary War briefly interrupted this career of prosperity, but between 1790 and 1850 the whalers from this port penetrated every sea. The business began to decline after the Californian gold-fever ; scores of the old ships were filled with stone, carried to the South, and sunk in the channels before the rebellious cities on the coast ; and in the last hours of the Secession War the Confederate cruiser "Shenandoah" destroyed a large part of the Pacific whaling fleet. Although this business has greatly waned, the attention of the people has so been turned to manufacturing industry that the city still maintains its prosperity. The Wamsutta Mills have four large buildings of stone, containing 90,000 spindles, operated by 1,600 workmen, and consuming 10,000 bales of cotton yearly. 300 men are engaged in carriage manufactories ; 200 in glass-works ; 100 in the Gosnold Iron Works. \$ 2,500,000 worth of oil a year is turned out by large oil-works ; 2,000,000 lbs. of copper sheathing are made yearly ; and other industries are in full tide of progress. The city has lately laid out \$ 700,000 for an extensive system of water-works. The population in 1870 was 21,375.

New Bedford fronts on the widenings of the Acushnet River, near its mouth, and is built on the side of a ridge sloping to the water's edge. It "has a cosmopolitan air always blowing over its strata," from the number of foreign mariners who are found here, and one of its quarters is called Fayal, from the large population of Portuguese there residing. The upper part of the city is pleasant, and County St. is lined with stately old residences of the marine aristocracy, whence Lady Emma Stuart Wortley called this "a city of palaces." These "palaces" are all on the model of the "architectural boulders" so common in the decadent fishing-ports along the coast. The City Hall is a fine granite building, and the Custom House is built of the same material. Several of the churches are notable for their neatness and grace, especially the spacious Unitarian Church. The City Library is a large and rapidly increasing collection of books, kept in finely arranged rooms, and free to the public. The wealthy old families of the aristocracy of New Bedford are famous for their hospitality and culture, and but few of the citizens go abroad to seek summer recreation. The favorite drive is around Clark's Point, which extends into Buzzard's Bay, and is bordered by a broad, smooth road, constructed at great expense by the city to give its people the benefits of the sea-breezes in summer. This avenue (5 M. around) affords a brilliant scene in sultry summer afternoons.

Opposite the city, and joined to it by a bridge and steam-ferry, is Fairhaven (so named from its pretty location), a village formerly devoted to the whale trade. In 1778, while New Bedford was burning, a large British force crossed to Fair-

haven, intent on its destruction. But Major Fearing of the militia, fearing not, attacked and repulsed them and saved the village.

W. of New Bedford are the large but thinly settled towns of Dartmouth and Westport, on long inlets from the sea, and remote from railroads. These towns (the Aponiganset and Acoakset of the Indians) are nurseries of sailors, and have but an inferior soil, which produces fair crops when manured by menhaden fish. In one year (1843) six seines off Dartmouth shore and below Padan-Aram, caught 18,100 barrels of these fish, which sold for 30c. a barrel.

Railroad from Fairhaven to Tremont, on the Cape Cod R. R., see Route 6.

Steamers leave daily during the summer, for Martha's Vineyard. Upon leaving the wharf, a fine view is obtained of Fairhaven on the E., and of the long wharves and populous slopes of New Bedford on the W. Palmer's Island with its lighthouse and Fort Phoenix, is soon passed, and then the long, projecting Clark's Point, with a strong fortress now in process of construction. The steamer now passes straight to the S. E. across Buzzards Bay, a noble estuary 30 M. long by 10 M. wide, with thinly populated shores. The Norsemen (11th century) called this Bay, *Straum Fiord*; the origin of its present name is not apparent. Far to the S. are seen the Round Hills, on the Dartmouth coast, and Cuttyhunk, the outermost of the Elizabeth Islands. Cuttyhunk was colonized by Capt. Gosnold, in May, 1602, with a company sent out by the Earl of Southampton. He named the Island "Elizabeth," in honor, probably, of the maiden Queen. The island is $2\frac{1}{2}$ M. long, and at that time abounded in game. Gosnold and his people erected a fort and cabins on an islet in a pond near the centre of Cuttyhunk, and here inaugurated the first settlement of New England. But the Indians were hostile and numerous, and the colonists' supplies soon gave out; so within a few weeks the plan was abandoned, and the people returned to England. The island is now occupied by a merry club of New-Yorkers, who spend their summers in boating and fishing. On Penequeese Island (covering about 100 acres) is the villa long occupied by John Anderson, of New York, who (in April, 1873) gave the island and \$50,000 in cash to Prof. Agassiz for the location of a summer school of zoölogy and science connected with Harvard University. Nashawena (3 M. long) is E. of Cuttyhunk, and beyond that is Pasque Island. This is owned by a New York club, who have built a club-house, farms, and stables, and prepared fruit and flower gardens, and preserves of small fish for bait. The surrounding waters abound in bass, blue-fish, squeteague, sword-fish, &c. Next to Pasque is Naushon, 8 M. long, which was for many years the favorite residence of James Bowdoin, an early American diplomatist, whose mansion was adorned by a large library, philosophical apparatus, and a fine picture-gallery, which he had collected in Europe. At his death he left all these things, together with the reversion of Naushon, to Bowdoin College. Lady Wortley, who visited the island early in this century, says, "Naushon is a little pocket America, a Lilliputian Western world, a compressed Columbia."

Naushon was long inhabited by a Boston gentleman, and is said to be "stocked with all the varieties of English and Scotch game-birds, and most of their game animals, including also several hundred American deer, prairie fowl," &c. Kettle and Tarpaulin Coves are well-known harbors, respectively on the N. and S. shores of Naushon. Near the N. E. end of the island are the islets of Wepecket, Onkatomka, Nannamesset, and the Ram Islands. Between Naushon and the Falmouth shore is the strait called Wood's Hole, a difficult and intricate passage between Buzzard's Bay and the Vineyard Sound. The steamer stops at the village of Wood's Hole, where there are several summer boarding-houses. (See Route 7.) After leaving this point, and passing Nobsque Light on the I., the steamer crosses Vineyard Sound, and stops at the wharf at Martha's Vineyard (Route 7). Says an English tourist: "What scenes can be more refreshing and exalting than an expansive view of the mighty waves, dotted here and there with such beautiful islands as those in the Vineyard Sound? While aquatic birds skim the waves, and the gulls are screaming, dipping, and darting over a shoal of blue-fish, or menhaden, vessels outward and homeward bound are always passing, for it includes in its range of view the packets and sailing-craft between New York and Boston. We have here the foreground and perspective worthy of the pencil of Claude Lorraine, while the background is formed of the granite shores of Massachusetts."

10. Providence to Worcester.

Via Prov. and Worcester R. R., 43 M., Fare \$1.40.

The railroad follows the line of the Boston and Providence R. R. as far as Pawtucket, and then turns up the valley of the Blackstone River. Stations, Pawtucket, Valley Falls, and Lonsdale. At the latter place the track passes through a deep cut in Study Hill, to which William Blackstone, the first settler of Boston, retired after the Puritan immigration. He lived here in the wilderness from 1634 until his death, in 1675, surrounded by his books, and deeply respected by the Indians. The busy little river which flows by the hill was named in his honor. After passing the stations of Ashton, Albion, Manville, and Hamlet, the train stops at **Woonsocket** (*Central House, Woonsocket Hotel*), a thriving manufacturing town. Within a radius of 3 M. from the centre of the town are 25,000 inhabitants. In the town itself, 4,200 persons are engaged in cotton-factories 2,400 in woollen-factories, and 700 in other manufactories. In 1869, the production of these busy hands was reported as 43,000,000 yards of cotton cloth, 3,300,000 yards of woollens and cassimeres, 100,000 grain-bags, 30 tons cotton-warp, 1,000 tons of soap. The celebrated Harris cloths are made here. The Social Mills have 43,000 spindles and 500 hands. The town has erected a neat monument "in memory of her brave sons who, during the great Rebellion, gave their lives that the Republic might live." The Harris Institute is a popular institution given by Mr. Harris to the people, containing a large hall, and a library of 6,000 volumes. Woonsocket Hill, the highest land in the State, commands a fine view of the populous and busy valley.

Railroads. — A branch road runs from Woonsocket to Milford, Mass. The Woonsocket Division of the New York and New England R. R. terminates here, while the main line of that road crosses the Worcester route at Waterford, or Mill River Junction.

After passing Woonsocket, the train enters the State of Massachusetts. Stations, Waterford, and Blackstone (*Lincoln House*), a busy manufacturing village of about 5,000 inhabitants. Millville is in the town of Blackstone. Station, Uxbridge (*Wacantuck House*), near which Major Talcott, with his famous flying army, attacked the Queen of Narragansett, who had made a stand here in a fortified position. After a battle of three hours, the Queen and 34 of her warriors were killed, and 90 warriors surrendered, only to be butchered in cold blood. Considerable manufacturing is done in the valley of the Blackstone, but the hills are occupied by a population of wealthy farmers. Stations, Whitins, Northbridge, Farnum's, Saundersville, Sutton (with several ponds), and Millbury (*Millbury Hotel*), a prosperous manufacturing town. A branch road from this point runs N. to the Boston and Albany R. R. Shortly after leaving

Millbury, the train passes, by the Grand Junction, into the station at Worcester (see Route 21).

11. Providence to Hartford and Waterbury.

Via Hartford, Providence, and Fishkill R. R. To Hartford, 90 M., fare \$ 3.30. To Waterbury, 122½ M., fare, \$ 4.15.

After leaving Providence the train passes the stations, Cranston, Oak Lawn, Natick, Riverpoint, Quidnick, Anthony, Washington, Nipmuck, Summit, and Greene. These are mostly manufacturing villages in the extensive town of Greene, and several of them are occupied by the large factories of A. & W. Sprague. Shortly after leaving Greene the train enters the State of Connecticut, and passes the stations, Oneco, Sterling, Moosup, and Plainfield. The latter station is in the Indian district of Quinnibaug, which was bought by Gov. Winthrop in 1659, and settled by Massachusetts people. From the great quantities of corn which it produced, it was called in the colonial era the "Egypt of E. Connecticut." At Plainfield the Norwich and Worcester R. R. crosses the line. After passing the stations, Canterbury, Jewett City, Lovetts, Baltic, Waldo's, and S. Windham, the line crosses the New London Northern Division of the Vermont Central R. R. at **Willimantic** (Brainerd's Hotel). This is a large manufacturing village, on the river of the same name, which falls 100 ft. in 1 M. Extensive thread, silk, and cotton mills are located on the water-power thus afforded, occupying large factories built of stone found in this vicinity. The Air Line R. R. between Boston and New York passes through Willimantic, which is becoming a great railroad centre. The only legend connected with Windham (in which town Willimantic is situated) is of a long battle between two hordes of immigrating frogs, in which several hundred of the combatants were killed. This event has been duly attested and described by a local poet in a *Batrachyomachian* epic of 30 stanzas. The train now passes Andover, Bolton (near which is Bolton Notch, a romantic pass into the valley of the Connecticut), and Vernon. At Vernon a branch track (5 M.) runs to Rockville, a prosperous manufacturing village on the water-power afforded by the Hockannon River. Beyond Vernon is Manchester, which makes yearly 2,000,000 yards of gingham, 90,000 pairs of socks, 450 tons of book-paper, besides government and bank-note paper for several nations. From thence a branch railroad (2½ M.) runs to S. Manchester, the seat of the silk-works of the Cheney Brothers. After Manchester comes Burnside, where paper-making was a brisk business in 1776, and where there are now 3 paper-mills, whose yearly production is 300 tons of writing-paper, 400 tons of manilla paper, and 500 tons of book-paper. The next station is E. Hartford, with a wide, level street lined with elms, 2 M. long. This district was the home of the Podunk Indians, whose

chief, Totanimo, could bring 200 bowmen into the field. The train now crosses the broad Connecticut River and enters the city of Hartford (see Route 21). Connections are made here with the New Haven, Hartford, and Springfield R. R. (Route 21, for New York or Boston); also with the Conn. Western (Route 20) and the Conn. Valley (Route 14) Railroads. From Hartford the line runs by Newington to New Britain (*Strickland House, Humphrey House*), a wealthy and working town. The water-supply is from a large reservoir some 200 ft. above the village. In the centre of the town is a spacious square, adorned with trees and fountains, and near its end is the elegant and imposing S. Cong. Church. In the same vicinity is the State Normal School. The products of the industry of New Britain are varied and extensive. The Russel and Erwin Co. employs 500 men in 5 acres of works, and sends out millions of dollars' worth of locks, which are used in all parts of the world. Hardware, lace, hose, merino goods, gold jewelry, and knives are made here in large quantities.

Elihu Burritt, the "learned blacksmith," was born at New Britain in 1811. At the age of 16, he was apprenticed to a blacksmith, and followed that trade for many years. Desiring to read the Bible in its original languages, he mastered the Greek and Hebrew by evening studies, and acquired such a philological taste, that he afterwards became familiar with all the principal ancient and modern languages. He became an earnest advocate of universal peace, temperance, and the abolition of slavery, and published a paper and several books in defence of these movements. After making several visits to Europe, he became U. S. Consul at Birmingham, where he has since remained.

At Plainville, the next station, the New Haven and Northampton R. R. (Route 15) crosses this route. Many carriages are made in this village. At Forestville, Bristol, and Terryville stations are many large clock-factories, where every variety of clocks are made. After passing several flag stations, the train stops at Waterbury (*Adams House, Scovill's*). This is a small city (of 10,826 inhabitants), on a narrow plateau at the junction of the Mad and Naugatuck Rivers. The principal streets diverge from Centre Square, a small but well-kept Green, on which front two Cong. churches, the new and elegant building of the City Hall, and St. John's Episcopal Church. The latter is called the finest church in the State, and is built of granite and Ohio stone in the pointed Gothic style. The sharply pointed ceiling is highly ornamented, and the spire (200 ft. high) uplifts a massive stone cross. The Silas Bronson Library, the gift of a New York gentlemen, contains 13,000 volumes and is free to the citizens. On the hill near the Square is a large boarding-school for young ladies.

The manufacturing interests of the city employ a capital of nearly \$8,000,000. \$2,000,000 are invested in the brass-works, besides which there are 5 button-factories, 2 clock-factories, and works which turn out great quantities of wire, steel traps, hooks and eyes, hoop-skirts, and kerosene fixtures. The American Pin Co., the American Suspender Co.,

and the American Flask and Cap Co., have their works here. Silver-plated ware is made in large quantities, also the best quality of steel rolls.

There is a pleasant drive, much of the way on the quiet and embowered river-road, to the Riverside Cemetery ($1\frac{1}{2}$ M.), a small but picturesque rural ground among the forest-covered hills S. of the Naugatuck River.

At Waterbury the Naugatuck R. R. connects with the Hartford, Providence, and Fishkill line. The latter road finds its terminus here, but work is progressing on sections passing through Hawleyville, Danbury, and Brewster (N. Y.), to Fishkill, on the Hudson River. The river will probably be bridged, and a connection made with the Erie Railroad, thus opening a new route between Boston and the West.

12. New London to Vermont.

Via the New London Northern Division of the Vermont Central Railroad, New London to Brattleboro', 120 M.

The train leaves the Shore Line Station at New London. Beautiful views of the broad and expansive Thames on the E., so a seat should be secured on the r. side of the car. Near Mohegan is the old Mohegan reservation, where 824 Indians of that tribe were numbered in 1774. After passing Waterford, Montville, Massapeag, Mohegan, and Thamesville, the train crosses the Yantic River, and enters **Norwich** (* *Wauregan House*, \$2.50-\$3.00, corner Main and Union Sts.; *Uncas Hotel*, small, near station; *American House*). Norwich is a city of 16,653 inhab. with its streets terraced on a steep acclivity facing to the S. over the lake-like Thames, of which a local writer claims that "not Richmond Hill itself, or Greenwich observatory, looks on a Thames more fair." The situation of the city is indeed beautiful, being on high ground between the Yantic and Shetucket Rivers, which here unite to form the Thames. The business part of Norwich is in a semicircle of which Main St., from Franklin Square to Central Wharf Bridge, is the chord, and beyond this the residence-streets rise in terraced lines. The banks, stores, and hotels are mostly in the district between Main St. and the rivers. The city and county buildings are neat and substantial, and there are two or three fine churches.

Washington St. and Broadway are noble avenues lined with large and secluded old mansions. The former street runs near the Yantic, passing the ivy-clad Christ Church (Epis.), and ends at Williams Park, or the Parade, near which is the mansion of the Revolutionary General Williams, and the imposing building of the *Free Academy*. The latter is a mixed school, of high grade and of a wide reputation. Turning to the l. from the Parade, Sachem St. (opposite the Academy) leads to a pretty rural cemetery on the hills over the river. In this vicinity were the Yantic Falls, whose praises have been sounded by Mrs. Sigourney and others, both in prose and verse. A deep cutting in the hard rock, and curiously piled and water-worn boulders, are all that remain of "the

beetling cliffs, the compressed channel, the confused mass of granite, and the roaring, foaming river," by which a former generation's "lone enthusiasts wandered and dreamed." The river has been dammed and diverted into an artificial channel, through which it affords a heavy water-power to a large cluster of factories below. Fine wood-carving machinery, rubber goods, corks, iron pipes, files, blankets and carpets, flax and twine, paper, envelopes, and cotton goods are manufactured in Norwich and its tributary villages. On Sachem St., near the site of the Falls, is a little cemetery in a cluster of pine-trees. This spot was chosen centuries ago as a sepulchral ground for the "blood royal of Mohegan," and has been carefully reserved by the tribe ever since. Many of the Grand Sachems are buried here, from those earlier chiefs of whom earthly history has no record down to Mazeen, the last of the line, who was buried in 1826 in the presence of 25-30 of the feeble remnant of the tribe. In the centre of the ancient monuments stands a massive obelisk erected to the memory of Uncas. (Its foundation-stone was laid by President Jackson.)

Uncas was a chief of the Pequot tribe, who revolted in 1634 against the Sachem Sassacus, and joined the Mohegans. He was chosen Sachem of the latter tribe, and by sagacious alliances with the English colonists, he steadily increased the power of his people, who had previously held a subordinate position among the aboriginal clans. He led his warriors by the side of the colonial train-bands in the campaign of 1637, which annihilated his most dreaded foe, the Pequot tribe; and in 1643, he fought the powerful Narragansetts until the Anglo-Mohegan forces, under his direction, had defeated and humbled that tribe. He repelled an invasion of the Western Indians, aided by a strong Mohawk contingent, in 1648, and kept up an incessant war upon his Indian neighbors until he became "the most powerful and prosperous prince in New England." In 1640 he ceded to the colony of Conn. all his land except a tract on the W. shore of the Thames embracing three or four townships, and sold (for £70) the present site of Norwich, which was occupied in 1660 by a nomadic church from Saybrook. He frequently visited the colonial capitals, Boston and Hartford, and ever remained friendly to the settlers, holding his people to peaceful ways while every other tribe of New England (except the Christian Indians) joined King Philip's league against the colonies. After reigning as Sachem of the Mohegans for nearly 50 years, he died in 1683, a consistent Pagan to the last. He was crafty, cruel, and rapacious in his policy; but as the head of a savage people, he was sagacious and far-sighted, and as a military leader he was skilful and fearless. It is difficult to tell what would have been the course of New England history, or what final and overwhelming disasters might have blotted out those feeble colonies along the coast, had not the two great southern tribes been ruined by the attacks (sometimes aided by a few dozen English musketeers) of the Mohegans under their Sachem, Uncas. Beyond the village of Greenville is **Sachem's Plain** ($1\frac{1}{2}$ -2 M. from Norwich Horse-cars most of the way). Here was fought a battle between Miantonomoh and 900 Narragansetts, and Uncas with 500 Mohegans.

Miantonomoh was the nephew of Canonicus, and in 1636 succeeded to the government of the Narragansetts. He was ever a firm friend to the colonists, granting them a large portion of the present State of Rhode Island, and leaving his quarrels with Uncas to their arbitration. In 1642 he went to Boston to meet certain men who had accused him of planning hostilities against the colonies. He awaited his accusers in the presence of the Governor and council of Massachusetts, but no charges were preferred against him, and he left Boston after receiving high honors from Gov. Winthrop, who admired his character. In the following year, stung to madness by insults offered by Uncas, he led 900 Narragansett warriors in an attack on Mohegan. Uncas and 500 men met him on Sachem's Plain, and in accordance with a plan preconcerted by the Mohegan

chiefs, invited him to a parley. While this parley was going on, and the Narragansetts were off their guard, the Mohegans made a fierce and sudden attack and scattered them in all directions. The pursuit was continued for many miles, and hundreds of the invaders fell, but Miantonomoh was captured and led prisoner to Hartford. After remaining here in close confinement, he was surrendered to Uncas, by whom, "by the advice and consent of the English magistrates and elders," he was executed. The royal Narragansett was carried by Uncas and his warriors from Hartford to Norwich, and was put to death on the battle-field of Sachem's Plain, at a place now marked by a stone monument inscribed "Miantonomoh, 1643." He was a brave, magnanimous, and humane Sachem, incapable of dissimulation or treachery, and therefore he became their victim.

For many years his people came hither in the season of flowers and adorned his grave, each of them leaving a stone upon it. The lofty cairn thus formed remained till a farmer (of the English "Hodge" type) carried away the stones to make a foundation for a new barn. In 1841, the present granite monument was erected.

Nanunteno, the son of Miantonomoh, and his successor in the government, ever cherished a just hatred of the colonists, and joined King Philip's league with enthusiasm. Having been made prisoner, in 1676, he was offered pardon in case he would treat with the English. On declining to make terms, he was threatened with instant death, whereupon he answered, "I like it well; I shall die before my heart is soft, or I have spoken anything unworthy of myself"; "acting herein," says Cotton Mather, "as if, by a Pythagorean metempsychosis, some old Roman ghost had possessed the body of this Western Pagan, like Attilius Regulus." He was instantly shot.

About 5 M. S. of Norwich is the old fortress of Uncas, on the highest hill in Mohegan, and in the vicinity live the few half-breeds who are all that remain of the tribe of Uncas. President Dwight's remark about the Pequots at Groton will apply equally well to the Mohegans or to the Narragansetts in Charlestown, R. I., "the former proud, heroic spirit of the Pequot is shrunk into the tameness and torpor of reasoning brutism."

Steamers leave Norwich every morning, in summer, for New London and Watch Hill. The Norwich and Worcester R. R. diverges to the N. E., above the city.

After leaving Norwich the line passes the stations Norwich Town, Yantic, Franklin, and Lebanon. The village of Lebanon, situated in a rich farming district, was very lively during the War for Independence. Jonathan Trumbull, Governor of Conn. 1769-83, resided here, and here was the War Office of the State, which furnished more men and money in the Revolutionary War than any other State save Massachusetts. Gov. Trumbull was Washington's right-hand man during the northern campaigns, and when any perplexing question or pressing demand arose, the noble Virginian would often say, "Let us see what Brother Jonathan says." The name "Brother Jonathan" has passed into universal use as a humorous designation of the U. S., corresponding to the "John Bull" which is applied to England. At the gubernatorial mansion in Lebanon, Trumbull received Washington, Lafayette, Rochambeau, Jefferson, Franklin, and other distinguished men. Five French regiments were cantoned in the town and reviewed by the commander-in-chief, while De Lauzon's Legion (500 horsemen) wintered here. The Trumbull mansion and War Office are still standing, and in the little cemetery E. of the village is the family vault.

The most prominent of the Trumbulls are Jonathan, Gov. of Conn. 1769-83; Jonathan, his son, M. C. in 1789-95, U. S. Senator in 1795-6, and Governor in 1798-1809; Joseph, another son, commissary-general of the Continental Army;

Joseph, grandson of "Brother Jonathan," 5 years M. C., and 2 years Gov. of Conn.; Lyman Trumbull (born near Lebanon in 1813), the eminent jurist and U. S. Senator from Illinois, 1855-72; and Col. John Trumbull (some time of the 1st Conn., and afterwards aide to Washington), who studied painting under West, in London, and executed many large historical pictures, depicting scenes of the Revolutionary era. Four of his works are in the rotunda of the National Capitol, and a good collection of his paintings is in the Athenæum at Hartford. The Art Gallery of Yale College has a large number of his minor works, 57 in all.

The line now leaves the Yantic Valley, runs along the border of the Shetucket, and, passing S. Windham, stops at Willimantic (see Route 11). At this point the Hartford, Providence, and Fishkill, and the New York and New England tracks cross the New London Northern Railroad.

Running N. from Willimantic, the line follows the Willimantic River, through the county of Tolland. Stations, S. Coventry, Eagleville (with large sheeting manufactories), and Mansfield, with four companies engaged in making sewing-silk, a profitable industry which was inaugurated here in the last century. Stations, Merrow, S. Willington, and Tolland, about 4 M. W. of which is a sequestered village containing the modest county buildings. **Stafford** is celebrated for its mineral springs, the principal one being among the best of chalybeate springs. It contains considerable iron in solution, with carbonic acid and natron, and is a pleasant water to the taste. It is held to be very efficacious in all cutaneous affections. The other spring, which is charged with hydrogen gas and sulphur, has become choked up, and has long been disused. The Indians were in the habit of using these waters with beneficial effect, and the whites began to visit the springs about 110 years ago.

The *Stafford Springs House* is a large and inexpensive hotel near the chalybeate spring, on the l. of the track.

The train now runs N. for 10 M. across the sparsely populated town of Stafford, and at State Line it enters the State of Massachusetts. The town of Monson is next crossed (11 M.). Much manufacturing is done here along a branch of the Chicopee River, and a fine granite quarry is to be seen near the central station, from which great quantities of stone have been sent to Albany for the new State House. The extensive buildings of the State Almshouse are in this town.

Station, Palmer, where this route crosses the great trunk line of the Boston and Albany R. R. (Route 21).

The Ware River R. R., which is to run via Barre to Peterboro, N. H., is completed from Palmer to Gilbertville and Ware.

The soil of Ware is singular, even in New England, for its hardness and sterility. It was granted to a company of the veterans of King Philip's War, but after due examination they sold it for 2 cents an acre. President Dwight rode through Ware, and said of its soil, "It is like self-righteousness, the more a man has of it the poorer he is." The poetic account of the genesis of Ware asserts that

" Dame Nature once, while making land,
Had refuse left of stone and sand;
She viewed it well, then threw it down
Between Coy's Hill and Belchertown,
And said, ' You paltry stuff, lie there,
And make a town and call it Ware.' "

Stations, Three Rivers (near which the Chicopee River is crossed), Barrets, and Belchertown (*Belcher House*), a quiet hill-town of Hampshire County, whose present name is scarcely an improvement on its original appellation (in the colonial era) of Cold Spring.

From Three Rivers the Athol and Enfield R. R. runs through the sparsely populated towns of Enfield, Greenwich, Dana, and New Salem (all the villages by the railroad have small inns) to Athol (35 M. from Palmer) on the Vt. and Mass. R. R. (see *Route 25*).

After running across Belchertown (13 M.) the train passes S. Amherst and stops at

Amherst (*Amherst Hotel*, \$2.50 a day, $\frac{1}{2}$ M. from the station), a pretty village situated in a romantic district, and distinguished for its college. Its society is of that cultured and refined order which is usually found in American academic towns, and its æsthetic taste is seen in the fine architecture of its churches (notably Grace Church and the 1st Congregational). The buildings of **Amherst College** (founded in 1821) are located on a hill on the edge of the village to the S. On the street W. of the buildings are the President's House, the Library, and College Hall. The curious octagonal structure with a bright blue dome, which stands in advance of the line of college halls, is devoted to the display of rare collections. Part of it is occupied by the Lawrence Observatory, and on the upper story are the great *cabinets of minerals and meteorites prepared and collected by Prof. C. U. Shepard, a disciple of Silliman, who has been for the last 45 years one of the leading physicists of America. These collections "are only surpassed by those of the British Museum and the Imperial Cabinet at Vienna." They represent an immense value, some single pieces having cost thousands of dollars. The largest ruby in the world is shown here, being 2 ft. high by 1 ft. in diameter. It was found in N. Carolina. A sapphire, in the cabinet, weighs 30 lbs., and many other rare and costly specimens are here preserved. On the lower floor is Wood's Cabinet of geology and palæontology, embracing over 20,000 specimens. The Nineveh Gallery opens out of Wood's Cabinet, and contains many Oriental and Indian relics, together with a collection of rare coins and medals. Along the walls of this room are arranged a succession of large * Assyrian sculptures from the palace of Sardanapalus, at Nineveh. E. of this building is the line of the older college-halls, N. College, the old Chapel, and S. College. These are in the early Novanglian architecture, and closely resemble the older halls of Harvard. At the S. end of this line is the Appleton Cabinet, whose upper story, surrounded by barbarous frescos, contains several collections embracing 5,900 species of animals and 8,000 species of shells, prepared by Prof. Adams, of Amherst, the conchologist. An Herbarium (in the same hall) contains 4-5,000 kinds of plants, while seeds, lichens, &c., are arranged in other cabinets.

On the lower floor is a hall 110 ft. long by 45 ft. wide, wherein are kept 9,000 specimens of ancient tracks in stone. This wonderful *collection is by far the largest in the world, and well illustrates the science of ichnology which first arose at Amherst. The tracks of birds, beasts, and reptiles, which have been dead perhaps a myriad of years, and the marks of the pattering of rain-storms which fell through the silent air of pre-historic ages, are here preserved on the sandstone of the Connecticut valley.

Edward Hitchcock, D. D., the founder of ichnological science, was born at Deerfield, Mass., in 1793. He was connected with Amherst College, either as professor or president, from 1825 to 1854, and planned and executed the geological survey of Mass., "the first survey of an entire State under the authority of government in the world." He published 20-25 volumes, mostly on geological subjects, of which the "Elementary Geology" and the "Religion of Geology" passed through many editions in America and England. "The Ichnology of New England," published by the State in 1858, illustrated and explained the branch of science which he founded.

E. of a line of old dormitories is a verdant lawn covered with trees, at the farther end of which is E. College, which is soon to be taken down on account of its insecurity. This building completely hides the new and elegant * Memorial Chapel, whose exterior is a beautiful model of Gothic architecture. It is cruciform in shape with finely finished rose-windows in the transept, and colonettes of polished Scotch granite at various points on the outside. The graceful spire is built (as well as the Chapel walls) of stone, and within the tower is a marble tablet, containing the names of the *alumni* and past students of Amherst who fell in the War for the Union. From the E. side of the chapel is obtained a pleasing view of the rich valley E. of Amherst. The Barret Gymnasium is near the E. College, and the N. side of the prospective quadrangle is occupied by two fine stone buildings; the Walker Hall, a tasteful and ornate structure surmounted by a spired observatory, and fronted by an elegant portico, formed by five Gothic arches supported on coupled columns; and the Williston Hall, a substantial stone building. Before leaving the College Hill, the College Tower should be ascended for the sake of the * view, which is one of the most beautiful in New England, extending over parts of the rich Conn. valley and over the rugged and picturesque towns of eastern Hampshire. (Stereoscopic views taken from the tower in nine directions, as well as of the college buildings, are sold at a store in the village.) On the opposite side of Amherst, and about 1 M. from the Green, is the *Massachusetts Agricultural College*. Its handsome buildings are on the edge of a rich plain, from which fine views are obtained of the mountains on the W. and S. On the experimental farm of 400 acres is the Durfee Plant-House, where many rare and valuable plants are preserved. The "Aggies" (as the students here are called by the other New England collegians) are drilled to a high state of discipline (infantry

and light artillery) by military instructors; and of such a nature is the field-work, that, since its establishment in 1866, this has become the best agricultural school in America.

Excursions from Amherst to Norwottuck Hill (4 M.), Northampton (7 M.), Mounts Holyoke, Tom, and Sugar-Loaf, are easily made. 2 M. E. of the R. R. station is the Orient Springs Health Institute, a large, quiet hotel on a far-viewing and sequestered hill. Salubrious mineral springs are in the vicinity.

Beyond Amherst are the stations N. Amherst and Leverett. The latter is situated in the midst of very picturesque scenery. On the W. is Mount Mettawampe (or Toby), the highest peak in the lower Connecticut valley. The line now passes through Montague, with the Hunting Hills on the E. Stations, S. Montague and Miller's Falls, where the Vt. and Mass. R. R. (Route 25) crosses the present route. Stations, Northfield Farms and Northfield (*Northfield Hotel*), a charming village with broad, quiet streets, built on a plateau above the broad alluvial intervalles along the Conn. River. This peaceful agricultural town was settled in 1673, on the Indian lands called Squawkeague. During King Philip's War frequent and fierce attacks were made upon it by the Indians, and troops conveying supplies were ambushed and cut to pieces. When Major Treat, with his "flying army" of Conn. soldiers reached the place, its people evacuated it, and passed, under his escort, to a place of safety. It was reoccupied in 1685, but Indian attacks soon compelled the decimated settlers to leave, and it lay desolate until 1712, when the erection of Fort Dummer afforded sure defence. The station-house at S. Vernon (*Merrill's Hotel*) is on the boundary-line between Vermont and Massachusetts. The broad intervalles and the quiet stream of the Connecticut River are crossed between Northfield and Vernon.

At S. Vernon a connection is made with the Ashuelot Railroad, which passes the stations, Hinsdale, Ashuelot, Winchester, Westford, and Swanzey (all in New Hampshire), and at Keene connects with the Cheshire Railroad. Hinsdale was settled by Mass. people in 1683, and was the site of Hinsdale's and Bridgman's Forts. Throughout the early border-wars it was the scene of numerous attacks and skirmishes, but was boldly held as the outpost of colonial civilization. Hinsdale is now a prosperous town, through which the Ashuelot River flows to the Connecticut. From Mine Mt., a few years ago, volcanic signs were seen, and a lava-like substance was thrown out. An ancient Indian fort is situated on a hill near the river, and isolated from the plateau by a deep, broad trench. Winchester was granted by, and settled from, Mass. in 1733, under the name of Arlington, and was totally destroyed by an Indian attack in 1745. Swanzey is a large and thinly populated town, settled under the same circumstances, and destroyed at the same time as Winchester.

At S. Vernon the Conn. River Railroad from Springfield terminates.

From S. Vernon the New London Northern track runs N. about 9 M. through the town of Vernon (seats on the r. side of the car command a view of the fertile intervalles of the Connecticut, and of the river itself). This is one of the oldest towns of Vermont, and scores of its early set-

tlers were killed by the hostile Indians. The next station is **Brattleboro'**, 120 M. from New London.

Hotels. — *Brooks House*, the best in Vermont, accommodating 175 – 200 guests, \$3 – 3.50 a day; *Brattleboro' House* (near the station), \$2 – 2.50 a day; *Revere House*; the *Park House* (near the Park), and the *Wesselhoeft House* (founded in 1845 by a German water-cure physician) are large hotels for summer visitors.

In 1724 the Legislature of Mass. had a fort built near the river and about 1 M. S. of the present village. This fort, called Fort Dummer, was garrisoned by troops of the colony and friendly Indians, and served as a shield for the river-towns. Though often attacked, it was never lost. The first settlement in the State was located here under the protection of the fort, and but two or three small villages were established in the S. part until the conquest of Canada, after which, from 1760 to 1768, 138 townships were granted in Vermont. In 1753, the village near Fort Dummer was named Brattleborough, in honor of Col. Brattle, a distinguished Bostonian, who was one of its proprietors.

Brattleboro' is a large village well and compactly built, at the junction of Whetstone Brook (which affords a considerable water-power) with the Connecticut. The location of the village is beautiful, being on an uneven plateau above the great river, and surrounded by lofty hills. Main St., the principal thoroughfare, is near and parallel to the river, and 100 ft. above it. The Brook, with its numerous factories, is near the station, in the S. of the village. A beautiful view of Brattleboro' and its mountain-ampitheatre is enjoyed from Cemetery Hill, an eminence just S. of the town. The opposite side of the river is filled by the dark and frowning masses of Mine and Wantastiquet Mts. At the N. end of the village is a pretty park, on the edge of the plateau, whence a charming view of the mountains is gained, while the placid river is seen gliding between its broad and fertile intervals. Below the park, in the valley, is the Vermont Asylum for the Insane, a well-conducted institution, connected with which is a farm of 600 acres, which is carried on by the inmates of the Asylum. From various points (back of St. Michael's Church, &c.) on the riverward side of the plateau, pretty views of the river and Wantastiquet Mt. are obtained.

Daniel Webster was a frequent visitor to Brattleboro', and at present it is the home of Holbrook, the War-Governor of Vermont, and Gen. J. W. Phelps, a veteran of the Mexican and Secession Wars, who first enlisted and disciplined negroes in the armies of the Union. Among those born here were Wilbur Fisk, the Methodist divine, who twice refused a bishopric, and was President of Middletown University, 1830 – 39; R. M. Hunt, the architect; W. M. Hunt, the painter of *genre* pictures; and Larkin G. Mead, the sculptor, who, while yet a mere lad, worked one long winter night on a snow-figure at the head of Main St.; and on the next morning (New Year's) the citizens were startled to see there a statue of the "Recording Angel" modelled in purest snow. From that time his success has been of rapid growth, and now for several years he has lived and worked in Italy.

In W. Brattleboro' (Glen House, Vermont House) is the Glenwood Seminary, in a romantic site (stages three times daily).

A bridge crosses the river here, and a road runs into hilly *Hinsdale*, N. of which is the picturesque town of Chesterfield (N. H.), from whose level uplands much corn and hay is obtained by unwearied labor. Spofford's Lake, in Chesterfield (10 – 12 M. from Brattleboro'), is a beautiful sheet of water 8 M. around, said by Howells to possess natural charms equal to those of the Italian lakes. On an island in its waters are the remains of an ancient Indian settlement.

Brattleboro' is the centre of a great net-work of stage-lines. Daily stages run to Guilford (7-10 M.); to Newfane (12 M.), the county-seat; to Townshend (17 M.). Tri-weekly lines run to Dover (17 M.) and Wardsboro' (24 M.). More extended routes are those to Shelburne Falls (Mass.) via Halifax (cascades on North River, and Dun's Den, 25 ft. long, 5 ft. wide and high, in solid rock) in 27 M.; to Shelburn Falls (45 M.) via Whitingham, in which are the Sadawga Springs, with a hotel, near Sadawga Lake, in whose vicinity, in a poor log-hut, the heresiarch Brigham Young was born in 1801. Since 1844 he has been prophet and president of the Mormons, who moved (1846-7), under his guidance, from Nauvoo into the Western wilderness, and founded the flourishing colony of Deseret on the shores of the Great Salt Lake of Utah; to Greenfield (32 M.) via Halifax; to N. Adams via Whitingham (45 M.); to Bennington via Wilmington, (40 M.), passing through the thinly settled mountain towns of Marlboro', Wilmington, Searsburg, and Woodford; to Bennington via Somerset (50 M.); to Arlington via Stratton (page 185) in 46 M.; to Manchester via Jamaica in 45 M. Direct connections (in time) are not made on all these lines.

From Brattleboro' the Vermont Central Railroad runs N. to Montreal, Quebec, and upper Vermont (Route 26).

13. Norwich to Nashua.

Via Norwich and Worcester, and Worcester and Nashua Railroads. Distance, 106 M., fare, \$3.55.

Norwich to Putnam, see Route 19. Station, Thompson (good hotel), a pretty village 1 M. from the station, much resorted to in summer, and abounding in neat villas. Stations, Grosvenordale, N. Grosvenordale, Wilsondale, after which the train crosses to Webster, in Mass. (*Joslin House, Sheldon House*). In this vicinity is a great, island-studded pond, which enjoys two names, — Chabonakongkomon and Chargoggagoggman-choggagogg. About this lake were the Elysian Fields of the Nipmuck Indians and the reputed home of the Great Spirit. A small community of the Nipmucks still remains here, supported by the bounty of the State. Both at Webster and N. Webster are large manufactories. Station, Oxford, a pretty village, on the Indian lands called Mancharge. 2 M. S. E. of the station is Fort Hill, bearing the remains of a bastioned fort built by a community of French Huguenots who settled here in 1683. 13 years later, an Indian irruption so alarmed them that they abandoned the place, and lived in Boston for many years. Oxford Centre has large shoe manufactories, and several cotton and woollen mills are in the town. Station, Auburn, then Worcester Junction, and Worcester, where the passenger for Nashua changes cars.

Connections are also made at this point with the Worcester and Fitchburg R. R., and with trains for Boston and Lowell. Passengers for Springfield and Albany, or Providence, should change cars at Worcester Junction.

Stations, W. Boylston, Oakdale (Oakdale House). The line runs N. through

"Rich and rural Worcester, where through the calm repose
Of cultured vales and fringing woods the gentle Nashua flows."

From Sterling Junction the Worcester and Fitchburg track runs off to Fitchburg (14 M.).

After passing the Waushacum Ponds on the l. and the Clinton Ponds on each side of the track, the busy manufacturing town of Clinton (Clinton House) is reached, where the line is crossed by the Boston, Clinton, and Fitchburg R. R. Stations, S. Lancaster, and Lancaster (Lancaster House), an old and pleasant village, near which is the State Industrial School for Girls. The village was attacked in 1676, by 5 bodies of Indians. 42 of the people took shelter in Rev. Mr. Rowlandson's house, which was set on fire after a two hours' siege, and 22 of its defenders were killed, the other 20 being made prisoners. Stations, Still River, and Harvard (*Harvard Hotel*), a picturesque highland village, near a lake which is 3 M. around, and N. of which are the deep and sequestered Hell Pond and Robbins Pond. A considerable Shaker community is settled in the N. E. part of the town. Harvard Centre is 2 M. E. from the station (stages run frequently).

Groton Junction (see Route 25). The next station is Groton Centre, a pretty village in a country of hills and lakes. It was attacked in 1676, by the Sachem Monoco at the head of 400 Indians, and 40 houses and the church were burnt, though the people repulsed all attacks from their refuge in 4 garrison-houses. This same sachem boasted to the besieged that he was marching on Concord and Boston, to destroy those towns. Within a year he was indeed in Boston, but as a captive, led through the streets with a rope around his neck, and afterwards hung on the Common. Hon. G. S. Boutwell, Gov. of Mass., 1851-3, and Secretary of the U. S. Treasury, 1869-73, was for many years a merchant in this town. Groton is the seat of Lawrence Academy.

Station, Pepperell (*Prescott House*; the village is across the Nashua River, W. of the station), a town named after Sir Wm. Pepperell, the first New England baronet, by its first pastor, who was a chaplain in his Louisburg expedition. S. W. of the village is the curious hill called "The Throne," while to the N. are the picturesque Hills of Missittiset. This is a quiet village with an old church, whose bell, according to an old New England custom, tolls out the number of the letters in the name, and of years in the age, of each villager when he or she dies.

In the graveyard near by is a pretty marble monument from Italy. Otherwise the cemetery illustrates Beecher's words concerning the New England theory, "The dead are utterly gone. God has them in another world. Their state is fixed and unalterable. So thinking, it seems of but little worth to garnish their sleeping-places." The old Prescott mansion is on a broad domain $2\frac{1}{2}$ M. from the village. This was founded by Col. Wm. Prescott, who led the Middlesex minutemen to Cambridge, and commanded the Americans at the battle of Bunker Hill, where the Pepperell Co. lost 16 men. He left the redoubt within push of bayonet of the British, warding off their thrusts by his flashing sword. His son, Judge Wm., succeeded to the estate, and from him it was inherited by his son, Wm. Hickling Prescott, who here wrote a great part of his noble historical works. His son now owns the estate.

Soon after leaving Pepperell the line enters the State of New Hamp-

shire. Station, Hollis, 3 M. S. E. of the village of that name (stages to all trains) which gave 250 men to the Continental Armies. Soon after the train enters the city of Nashua (see Route 26).

14. Saybrook to Hartford.

Via Connecticut Valley R. R. in 44 M. Fare, \$1.50. This route follows the W. bank of the Conn. River, and a seat on the r. side of the car affords pleasing views of the river and the villages on its shores.

For Saybrook Point see Route 8. After leaving Saybrook and crossing the Shore Line R. R. (Route 8), at the Junction, the line runs N. W. through the old limits of Saybrook, with the river close at hand. The soil of this town is enriched by piling thereon great quantities of white-fish, which are caught off its shores, and sold for a trifling sum per thousand. Stations, Essex, Deep River, S. Chester, Chester (rich farming country, with an Episcopal academy dating from 1792), Goodspeed's (village across the river), Arnold's (near which the village of E. Haddam is seen on the E. bank), and Haddam. Near Arnold's, the mouth of Salmon River is seen on the E. bank, and 30 Mile, or Lord's Island divides the Connecticut some distance above. The ancient territory of the "fierce and warlike" Wongung Indians embraced Haddam and E. Haddam. They parted with their birthright for 30 coats, and the land was settled by people from Hartford. Quarries of some importance have been worked here, and the annual catch of shad is considerable. Stations, Walkley Hill, Higganum (a thriving river-landing and ferry), Maromas, and Middletown.

Middletown (* *McDonough House*, 150 guests), "the Forest City," is a beautiful academic city, built on ground gently rising from the river at the bottom of a great bend. Its maritime interests are along the wharves which run out from Water St.; the seat of trade and of the hotels is on Main St.; while High St. is above all, and is lined with fine houses and carefully kept gardens. The Custom House and Court House (of Middlesex Co.) are plain stone buildings, and there are several handsome churches in the city. The manufactures include pumps, webbing, and tape (\$600,000 a year), rules and chisels, sewing-machines, and several companies make britannia and silver-plated ware. The safe and convenient harbor (10 ft. of water at the wharves) renders this the last port on the river for heavy vessels.

The campus of **Wesleyan University** fronts on High St. (which, with its double lines of stately trees, Charles Dickens called the finest rural street he had ever seen). The University appertains to the Methodist sect, and sustains a high reputation. In the work of the intellectual uplifting of the Methodist clergy it has borne a prominent part. Besides the old buildings in the usual Novanglian style, there are three fine new

edifices of Portland sandstone. Rich Hall contains the library of about 20,000 volumes. Judd Hall (the gift of Orange Judd, the agriculturalist) is a finely finished building, containing admirable natural-history collections. Some of these cabinets are unexcelled in America, having been collected and arranged by scientists who have spent years in special studies. Casts of skeletons and parts of colossal animals whose species have long been extinct are arranged here. The Memorial Chapel is a fine work of architecture. Its lower room is used for daily college prayers, while above is the church proper, with memorial windows which cost \$ 700 each.

That on the left is in honor of the past students who died as soldiers of the Union, and bears the inscriptions, "The beauty of Israel is slain upon her high places"; "It is sweet and fitting to die for one's fatherland," in the Latin of Horace; "The earth is a grave of heroes," in the Greek of Homer. Under the symbolic figure of a pelican are the names of the slain. The Wesleyan Guard (Co. G., 4th Conn. Reg.) went from the University. On the r. opposite is a window bearing portraits of four presidents of the University: Wilbur Fisk, D. D. (1830-39); Stephen Olin, D. D., author of "Travels in the East," &c. (1842-51); Nathan Bangs, D. D., an itinerant minister, 1801-20, agent and editor of the Book Concern, 1820-36, and afterwards President of the University; and A. W. Smith, LL. D., a prominent mathematician. In 1871, the University had 10 instructors and 153 students.

The * view from the tower of the old chapel is delightful, embracing the bay-like river and its riparian hills, the city below, and the busy quarries at Portland, the long and imposing buildings of the Insane Asylum on a hill in the S., the Industrial School, and the rolling hills to the W. On this hill was the far-viewing fortress of Mattabesick, the aboriginal chief Sowheag, and around its base the Massachusetts immigrants settled in 1653. Brissot de Warville, a French tourist (in 1788), asserted that "from the hill over Middletown is one of the finest and richest prospects in America." The villas and gardens of High St. extend on each side of the campus, and not far from it is the Indian Hill Cemetery, with a handsome sepulchral chapel at the entrance, and fine views from its hills over leagues of farm-studded valleys. Here is buried Gen. J. K. F. Mansfield, who stormed Monterey, was highly distinguished at Buena Vista, fortified Washington City (1861), and was mortally wounded while leading his corps at Antietam. In this vicinity is the Industrial School for Girls, a model institution with fine buildings surrounded by broad lands, where the inmates are given three hours daily for study, and do their own work.

On a high hill $1\frac{1}{2}$ M. S. E. of the city are the vast and imposing buildings of the **State General Hospital** for the Insane. The main building is of Portland stone, and has a length of 768 ft. with accommodations for 450 patients. It stands on spacious grounds which cover 230 acres of the hill, and commands a fine view of the city and the widenings of the river.

Farther down the river are points often visited by geologists. Feldspar is found here in such quantities as to make it an item of trade, as it is used in making porcelain. The lead mines so actively worked during the Revolution have long been abandoned.

On Main St. near the McDonough House is the **Berkeley Divinity School**, an Episcopal institution under the presidency of Bishop Williams. It was founded in 1857, has graduated 122 men, and had, in 1871, 12 professors and 24 students. The chapel (of St. Luke) is a small but beautiful Gothic structure, built of stone and having very rich stained windows. The students attend service in robes, and their singing is fine. Near by and on Main St. is the elegant church of the Holy Cross (Episcopal) built of Portland stone, with a graceful timber roof. The N. and S. Congregational churches are fine buildings, and Main St. has three banks, built in the style of bank-architecture peculiar to New England, — with one high, solid story, of stone or brick. The quaint little Parthenon which is used for a Court House is on the same street.

Near the N. end of Main St. (with its large Roman Catholic church) is the pier of the Portland ferry. The quarries of red sandstone at Portland are of continental fame, and are situated near the pier at the other end of the ferry, whence also is gained a fine view of Middletown and the graceful Air Line Railroad bridge. The first quarry approached is the deepest, and from the sharp edge of the hill one can look down into a vast chasm from which has been taken the material for hundreds of fine buildings, and for fronts of long blocks in nearly every Atlantic city. The second quarry is the largest and oldest; and beyond this is a third. These works employ 800 men, great numbers of draught-animals, and 40 vessels. The stone is easy to work, of a durable character, and of a rich shade of brown.

The New Haven, Middletown, and Willimantic R. R., runs from the former city to Middletown, and here crosses the Connecticut River on a fine iron bridge. When the link between Middletown and Willimantic is completed, the Air Line from Boston to New York will run on the rails of this line. From New Haven to Middletown, $23\frac{1}{2}$ M., fare, 85c.

A branch track leaves the New Haven and Springfield Railroad at Berlin, and runs 10 M. S. E. to Middletown.

The steamers between Hartford and New York stop at this point, generally late in the afternoon, and then proceed down the river, from whose mouth Middletown is 34 M. distant.

After leaving Middletown the Conn. Valley Railroad runs N. about 15 M. passing through the towns of Cromwell, Rocky Hill, and Wethersfield, and enters the city of Hartford.

15. New Haven to Northampton.

Via N. H. and N. R. R., in 84 M.

This line is often called the Canal R. R., since it follows the line of the old Farmington Canal for a considerable distance. It runs through a quiet agricultural country, and terminates near the W. centre of Massachusetts, on the line of the (projected) Mass. Central R. R. Shortly after its completion in 1849 it was leased by the New York and New Haven R. R. for 20 years, and on the expiration of that time it reverted to the original proprietors.

The line passes West Rock soon after leaving New Haven, and enters the valley of Mill River, which it follows for nearly 20 M. The town of Hamden, which is soon entered, is in a valley between the W. Rock Mts. and the E. Rock Mts., two ranges which run N. nearly parallel until they unite in Southington, and then advance into Massachusetts. Mt. Carmel (near the station of the same name) is a lofty spur from the E. Rock

Range, and is composed of greenstone. Hamden is a quiet country town, on fertile lands. The stations, Cheshire and Hitchcock's, are in the town of Cheshire, a picturesque farming district, in one of whose villages is situated the Episcopal Academy of Conn. (military), which dates from 1801. Plantsville and Southington are in a town by the latter name, formerly noted for extensive tin-ware manufactories, but now depending on iron-works. Station, Plainville, with the Farmington Canal on the r. and the Blue Hills on the l. At this point the Hartford, Providence, and Fishkill Railroad crosses the present route. Station, **Farmington**. The village is seen about $\frac{1}{2}$ M. away in a beautiful situation near the broad, rich meadows of the Farmington River. A broad and shaded street 2 M. long composes the village. This fair and fertile valley was the Tunxis of the Indians, who dwelt here in great numbers. Many of their cemeteries and fishing-places have been found. The land was bought from them by immigrants from Boston and Roxbury, who settled here in 1640. It was the pastor of this village who preached to the troops marching to Boston in 1775, from the text, "Play the man for your country, and for the cities of your God; and the Lord do that which seemeth him good."

From Farmington a branch track runs to New Hartford (14 M.), by the stations Unionville, Burlington, Collinsville, and Pine Meadow. At Collinsville (*Valley House*, good) the Farmington River is dammed, and affords a great power which is used by extensive works for the manufacture of axes and edged tools. The business was founded by Mr. Collins, and now employs 6-700 men, who, with their families, make up a populous village. 15,000 steel ploughs are sent out yearly to all parts of the world, and 200,000 Brazilian hoes have been made here in one year. Vast numbers of Mexican machetes are turned out, and more axes than at any other factory in America. Here, also, were made the pikes for John Brown's raid on Virginia.

At Collinsville the Conn. Western R. R. forms a junction with the branch.

Beyond Farmington is Avon, a pretty village, where Silliman found "remnants of primeval New England customs." On the E., Talcott Mt. is plainly seen, with a lofty tower on its top. (See Environs of Hartford.)

Stations, Weatogue and Simsbury, in the town of Simsbury, which was settled in 1670 on the Indian lands of Massacoe. During King Philip's War the colonists buried their goods and fled, but the town was destroyed by the Indians and left so long neglected that the wilderness reclaimed it, and the returning settlers never found their buried treasures. On a hill W. of the track is the principal village, ambushed in trees. Just before reaching Granby, the next station, the Farmington River, which has followed the track for 15 M., turns sharply to the S. E. through a pass in the mountain, and flows down into the Connecticut. Station, **Granby** (three small hotels in the town), in a rugged farming town. Here was located Newgate Prison (State of Conn.),—a grim pile on the top of Copper Hill, where the prisoners were confined in the cavernous shafts and passages of a copper-mine,—abandoned in 1760. Some of the convicts lived

60 ft. below the earth's surface, amid unceasing darkness. The mouth of the main shaft was covered by a massive stone building, and the prisoners were guarded by 20 soldiers. This subterranean labyrinth served for a State Prison from 1775 to 1827. The State says that the average mortality during that period was less than that in the other American prisons, but harsh stories went abroad about the gloomy caverns of Newgate.

Soon after leaving Granby the line enters Massachusetts, and runs along the pond of Congamuck, stopping at Southwick (*Union Hotel*). Then the train descends on to the plains of Westfield, and, passing through the village (see *Route 22*), crosses Westfield River, and stops at the station at the junction of the Boston and Albany Railroad (*Route 22*). Soon after leaving Westfield the train passes into the valley of the Manham River, and stops at Southampton, under the shadow of high hills. After leaving the latter place, the long ridge of Mt. Tom looms upon the r., while Pomeroy's Mt. is farther away on the l. **Easthampton** is now reached (*Eyrie House, Mansion House*). This is the seat of Williston Seminary, a high graded institution attended by 180-200 students. This seminary has been endowed with \$250,000 by Hon. Samuel Williston, who has also given \$125,000 to Amherst College, large sums to Mt. Holyoke Seminary, and has 3 times rebuilt the Payson Church in Easthampton. He began business by making buttons at home with his wife's aid, after which he perfected machinery, and erected a factory. His income in 1864 was \$200,000.

Vulcanized rubber and rubber thread, cotton yarn, suspenders, buttons (1200 gross per day), and other goods are made-here.

From Easthampton, Mt. Holyoke is full in sight to the E. After passing near the great bend of the Connecticut River, the train enters Northampton (*Route 24*).

Station, Florence, where are the extensive manufactories of the Florence Sewing-Machine Company. The works surround a quadrangle, and 20-22,000 machines are turned out every year. Stations, Leeds (with large sewing-silk factories), Haydenville (brass-works), and Williamsburg (*Hampshire House*), a pretty village among the hills, and at present the terminus of the line.

Cummington is a lofty mountain-town, 12-14 M. W. of Williamsburg. Here was born, in 1816, H. L. Dawes, who was for some time a lawyer and journalist, and who has been one of the most useful members of Congress since his election in 1857.

William Cullen Bryant, born at Cummington in 1794, is one of the leading poets of America. His verses were published before he was ten years old, and the grandly solemn poem of "Thanatopsis" was written while he was in his 18th year. For most of the time from 1815 to 1825 he was a lawyer in W. Mass.; but in 1826 he connected himself with the "New York Evening Post," with which he still remains. He has made several tours in Europe, and since 1845 has lived in an old mansion at Roslyn, L. I. Besides several volumes of prose and poetry of great sweetness and grandeur, he has published the best translation extant of the *Iliad* and the *Odyssey* of Homer.

16. Bridgeport to Winsted.

Via Naugatuck R. R. in 62 M. Fare, \$1.85.

4 M. from Bridgeport the train crosses the broad Housatonic River. At Naugatuck Junction the rails of the Shore Line Railroad are left, and the line turns to the N. E. and follows the Housatonic as far as Derby. The village of **Birmingham** (*Basset House*) is picturesquely located on a high headland at the junction of the Housatonic and Naugatuck Rivers. Commerce was formerly carried on on a large scale from this point, its vessels running to the West Indies, but manufactures have now taken possession of Derby. Great numbers of pins, tacks, brads, corsets, crinoline, stockings, and melodeons (Sterling's) are made here. The great Housatonic Dam is about $\frac{3}{4}$ M. from the village and affords an immense water-power. It cost \$500,000, and was three years in building, being constructed of solid masonry in the form of an arch, with the convex surface turned toward the pressure of the stream. The dam is 600 ft. long, and has 23 ft. fall, and the heavy roaring of the plunging waters can be heard miles away at night.

Gen. David Humphreys was born at Derby in 1752. He was Washington's aide, and long resided at Mount Vernon, after which he was minister to Portugal and Spain, and commander of the Conn. militia.

Isaac Hull was born here in 1775. He entered the navy, and in 1800 captured Port Platte, in Hayti. He distinguished himself in the Tripolitan War, and in 1812, commanding the "Constitution," he escaped from a British squadron in hot pursuit, by warping his ship ahead during a calm. A month later he met the British frigate "Guerrière," and captured her after a short, sharp action. Gen. Wm. Hull, born here, 1753, was condemned to death in 1812, for surrendering the Army of the Northwest, at Detroit, but President Madison pardoned him.

An omnibus runs from Birmingham to its sister-village of Ansonia, passing along breezy heights which afford fine views of the Naugatuck Valley and the rural homes of Derby scattered on the Trans-Naugatuck hills. In the N. end of Birmingham a small Green is passed, with a Saxon-towered Episcopal Church, and near it are churches of the Methodists, Congregationalists, and Catholics.

A Railroad runs from Ansonia to New Haven direct.

Ansonia (*Ansonia House*), the next station beyond Derby, is a thriving borough near the falls in the Naugatuck. It was founded in 1838, and has become the seat of numerous rolling-mills and foundries, a large hoop-skirt factory, and manufactories of clocks, lightning-rods, and brass wares. Some fine mansions are built on the heights over the river, and from near the tall stone church is gained a neat valley-view, embracing a great part of the old Indian domain of Paugussett.

At Seymour, the next station, is a small village founded by Gen. Humphrey in 1810, for the manufacture of cotton, paper, and woollen goods. For the latter purpose he had imported large flocks of Spanish merino sheep.

Beacon Falls has a water-power which is used by factories making a great number of woollen shawls. Station, Naugatuck, which is the

seat of the Goodyear Glove (and Rubber) Co., a Pin Co., and of Tuttle's Works, which turn out 400,000 rakes and hoes each year. Naugatuck is derived from the Indian phrase, Nau-ko-tunk, meaning "one large tree," from a lofty and prominent tree which once stood on the Rock Rimmon, near the Falls Station. Union City, and Waterbury (see Route 11).

Junction is formed here with the Hartford, Providence, and Fishkill Railroad, and also with the Watertown Branch. Watertown (*Warren House*), about 6 M. distant, is a quiet village in a thinly settled and hilly farming town.

Stations, Waterville (where pen-knives are manufactured), Plymouth, (near which are fine quarries of white granite), Camp's Mills, and Litchfield. The beautiful village of **Litchfield** (*Mansion House, U. S. House*) is about 4 M. from the station (stages connect with trains). This is the county seat of Litchfield County, and once claimed jurisdiction to the Mississippi River.

The Royal Charter of Connecticut in 1664 defined that colony as "all that part of His Majesty's dominions, in New England, in America, bounded the E. by Narragansett Bay, . . . on the N. by the line of the Massachusetts Plantation, and on the S. by the sea. And in longitude . . . from said Narragansett Bay on E. to the South Sea on the W. part, with the islands thereunto belonging." Subsequently royal grants detached from this vast belt parts of New York and Pennsylvania, although much of the tract in the latter State (including the Valley of Wyoming), was settled from Conn. At the close of the Revolution the State ceded this, her western domain, to the Union, reserving a tract on the S. of Lake Erie, as wide as Conn. and 120 M. long, and comprising 4,000,000 acres. Of this land 500,000 acres (the "Fire Lands") were granted to the towns which had been destroyed during the war (New London, Fairfield, &c.), and the remainder of the Western Reserve was sold to a real-estate company for \$1,200,000, which sum was carefully invested as the school and church fund of Connecticut.

The village of Litchfield is situated on a broad plateau, 1,100 ft. above the sea, and consists mainly of two broad and embowered streets, which cross each other at right angles. The hotels and county buildings are near the intersection of these avenues, and front on a pretty Green, which is adorned by a soldiers' monument. Beneath the words "Pro Patria" is a list of nearly 60 men of Litchfield, who died in the armies of the Union. 2-3 M. from the village, on the S. W., is **Bantam Lake**, containing 900 acres, the largest lake in the State, the haunt of many fish, and scarcely yet invaded by the factories, which have ruined the charm of so many of the New England lakes. Near North St. (to the l.) is Prospect Hill, from which a fascinating * view is offered, embracing the wilderness of high hills which surround the plateau and stretch away in the W. Bantam Lake is seen, silver-shining between its sinuous shores, about a mile distant, and the great elms and old mansions of Litchfield are on the plain above it. Near the corner of North St., with the road diverging to the hill, was the Beecher mansion, which has been moved (1872) to Spring Hill (near the end of N. St.), where it forms a part of Dr. Buel's (private) asylum for the insane. On South St. is the old Wolcott Mansion, built about 1760, by Gov. Wolcott (see Windsor), and

where was born Oliver Wolcott, an officer of the Continental Army, Secretary of the U. S. Treasury (1795-1800), Gov. of Conn. (1818-27), and founder of the flourishing village of Wolcottville. The leaden statue of George III., which stood on the Bowling Green in New York City, was brought to this house, and melted into bullets by the Governor's daughters. Many other solemn old colonial mansions are along the roads, and French roofs have not yet invaded this dignified seclusion. This air of antiquity, together with the balmy, cool, and salubrious breezes which dwell among these hills, have given Litchfield a high place among the restful and unfashionable of the summer-resorts.

Considerable quantities of copper and nickel have been found in the town; but the latter mineral is so firmly united with other elements that it will not pay for extraction. In this town of 3,100 inhabitants, there are 10 churches, of which several belong to the Episcopal sect.

Among the pleasant drives in the vicinity is that to Bantam Lake, with its umbrageous groves (2-3 M.); to Mount Tom, and to the village of Morris, with a quaint old country inn, unchanged since the colonial days (5-6 M.). From Mt. Tom, on a clear day, the Catskill Mts. may be seen, and on the E. the hills beyond the Conn. River.

Litchfield was bought of the colony of Conn. in 1718, for about £300, and was settled in 1720. The village was surrounded by a palisade, lest the Indians should return in force to their ancient and favorite hunting-grounds of Bantam. In 1784, Judge Tapping Reeve (who married Aaron Burr's sister) established a Law School here, and in 1798, James Gould, Judge of the Supreme Court of Conn., joined him, and remained 40 years. This was then the most renowned law school in America, and 474 lawyers were educated here. The first Young Ladies' Seminary in the Union was established at Litchfield. The town has produced many able men, chief among whom are Beecher and Bushnell. Lyman Beecher, D. D., "the father of more brains than any other man in America," was pastor here 1810-26. Of his many illustrious children, the most famous is

Henry Ward Beecher, born at Litchfield in 1813. He was educated at Lane Seminary (Cincinnati), of which his father was president. From 1837 to 1847 he was settled in Indiana, and in the latter year he became pastor of the Plymouth Church, in Brooklyn. This position he has now held for 26 years, during which time he has won a world-wide fame for his oratorical powers, besides building up a powerful church with active auxiliary branches. His vigorous and picturesque style is very effective and convincing; and it may safely be said that, during the past 20 years, he has been the foremost of the clergy of America.

Mrs. Harriet Beecher Stowe, daughter of Lyman Beecher, was born at Litchfield in 1812, and married Rev. Calvin E. Stowe in 1832. In 1852 she published "Uncle Tom's Cabin," an antislavery novel, which sent a thrill throughout the republic and the world. She has since published "Dred," "Agnes of Sorrento," "The Pearl of Orr's Island," and many charming stories of New England life.

After leaving Litchfield the train stops at Wolcottville (founded by Gov. Wolcott in 1802), the seat of large woollen-mills, brass-works, and manufactories of plated goods. In this town, John Brown, of Ossawatimie, the invader of Virginia, was born in 1800. Station, Burrville, after which the train reaches

Winsted (Clarke House, \$2; Beardsley House), a long, narrow village between steep hills on the line of Mad River. Iron and steel works abound here; pins, scythes, hoes, clocks, and other articles are also made. Some distance above the village, on a high plateau, is Long Lake,

which contains 1,500 acres, and is nearly 4 M. long. The waters rush turbulently through a narrow channel at its end, and form the impetuous Mad River, which descends 200 ft. in 2 M.

At Winsted the Naugatuck R. R. forms a junction with the Conn. Western R. R. running from Hartford to Millerton on the Harlem R. R. (Route 20).

17. Bridgeport to the Berkshire Hills.

Via the Housatonic R. R. in 110 M. (to Pittsfield). Fare, \$3.30.

Shortly after leaving Bridgeport (on Route 8) the line enters the valley of the Pequannock, which it follows for 15 M. through a thinly settled country abounding in low hills. Stations, Stepney, Botsford, and Newtown, the latter being a village about $\frac{1}{2}$ M. from the R. R., situated on a high hill in the midst of Newtown, the Patatuck of the aborigines. It is here, according to Beecher, that "the hills first begin to show mountainous symptoms." At *Hawleyville* the Shepaug Valley R. R. comes in from Litchfield (see Route 16), and at *Brookfield Junction* a short railroad runs S. W. to Danbury (see Route 18). Station, Brookfield, beyond which the track approaches and crosses the Housatonic River, and stops at *New Milford* (New Milford House). This is a fine village near the junction of the Housatonic and Aspetuck Rivers, with a wide, verdant common, and well-shaded streets. A silver-mine was worked here in 1790, and much marble and slate has been quarried in the hills. At present, factories for making buttons, boots, hats, and twine sustain the place, which is furthermore one of the centres of the tobacco trade in the valley. Stations, Merwinsville, and **Kent** (restaurant in the station; Kent Plains Hotel). This sweet valley was the home of the Scaghticoke Indians, and here the Moravians founded a mission. The cause which more than any other forced the Christian tribes of New England to lose their identity by miscegenation operated in full strength here. 100 men of this tribe joined the Continental Army, and but few of them ever returned. So several negroes and a few poor whites joined the community; and from the combination arose the present representatives of the tribe, who plough and plant, wear pants and go to church, and otherwise are such Indians as Massasoit never dreamed of. President Woolsey, of Yale College, has spent much time with this fragment of the Scaghticoques. On a lofty plain W. of Kent (ascended by a long and arduous road) are the *Spectacle Ponds*, — two lakes surrounded by forests and connected by a short strait. From the round hill above the N. Pond the fittingness of the name is clear. It is said that a noble view opens to the W. from this summit, including the Mts. of Sharon and Cornwall, the Hudson Highlands, and the Catskills, 60 M. away. (When the editor made this ascent, in May, 1872, the remoter mts. were veiled by blue

heat-mist.) The next two stations are in Cornwall, which town was sold in 1738 for \$1,500 (46 square M.), and settled in the same year. It is in a double sense the roughest township in the county. S. Cornwall is situated in a deep valley, and here a Foreign Mission School was founded in 1810. In 1820 there were 19 Indians and 6 Pacific-Islanders studying at the school, and here, in 1818, died Obookiah, the gifted Hawaiian.

Daily stages run from Cornwall Bridge to Litchfield and Sharon, and from W. Cornwall to Goshen and the villages of Cornwall.

Goshen is a lofty town, in which are 5 ponds, and Ivy Mt. (the highest in the State). It is distinguished for the rich English dairy cheese (a staple of Litchfield County) which it produces. Here, in 1800, was born Daniel S. Dickinson, an eminent jurist, and senator from New York.

The train now runs along the narrow valley of the Housatonic with the ridge of Sharon on the W. Just beyond that ridge, and extending thence to the N. Y. line, is a rich and fertile valley.

Station, *Falls Village* (Dudley House ; and a snug country inn in the glen over the river). The *Great Falls of the Housatonic* are near the village, and form a fine sight, the river plunging over rocky ledges for 60 ft., with a tremendous roaring. A near scrutiny of the Falls is unadvisable, as its vicinity is crowded with squalid Irish shanties, while the R. R. repair-shops are situated above them on the site of the Ames foundries, which produced some of the heaviest iron fortress-cannon during the War of 1861-65. When President Dwight wrote so enthusiastically of these Falls (about 1800) they were surrounded by the fitting adjuncts of a great primeval forest. 2-3 M. N. W. of the village is *Mt. Prospect*, whose cleared summit is gained by a rude wood-road, and affords a view of the broad valley of the Housatonic. At the foot of Prospect is a remarkable group of rocks, the darkest, deepest nook of which is called the Wolf's Den. W. of the village is the far-viewing Gallows Hill, where, according to the tradition, the corpse of a negro was once found hanging from a tree, and no one ever knew how he came there, or who he was.

Daily stages to Salisbury and Lime Rock. Station, Canaan (two country hotels), a small village situated on the upper edge of the valley of the Blackberry River, with the great, ridgy mass of Canaan Mt. on the S.

The Conn. Western R. R. crosses the present route at Canaan, and runs W. through the rare scenery of **Salisbury** (see Route 20). At the next station (Ashley Falls), the line enters the County of Berkshire and State of Massachusetts. For the remaining 35 M. of this railroad line see the "Berkshire Hills" (Route 23).

18. S. Norwalk to Danbury.

Via Danbury and Norwalk R. R. in 24 M. Fare, 90c. Stations, *Norwalk, Winnepaug, Kent, Wilton, Cannon's, Georgetown, Ridgefield.*

The latter village is 3 M. from the station, on a branch track, and is situated on a lofty ridge, called by the Indians Caudatowa.

During Tryon's raid into the State (May, 1777), the militia withstood the Hessians behind a barricade in Ridgefield. It cost Tryon 170 men to take the frail defence, but Gen. Wooster, the American leader, was mortally wounded. S. G. Goodrich was born here in 1793. He wrote 170 books, most of which were under the name of "Peter Parley." His works attained the enormous sale of over 7,000,000 volumes. His brother, Rev. C. A. Goodrich, and his son, F. B. Goodrich ("Dick Tinto"), have also won fame as authors.

Station, *Reading*, where Putnam's rude eloquence quelled the revolt of the Conn. line (1779). Joel Barlow, born here in 1755, some time minister to France, was author of a fine, but forgotten epic, the "Columbiad." In 1783 - 86, he was one of the authors of the "Anarchiad," in connection with David Humphreys, Jonathan Trumbull, and Timothy Dwight, concerning which transatlantic critics wrote the pasquinade beginning,

"David and Jonathan. Joel and Timothy,
Over the ocean set up the hymn of the —"

Crossing Bethel (junction of the Shepaug Valley R. R.), the train enters **Danbury** (Wooster House, Turner House).

Banbury was "ankle-deep in pork-fat" in May, 1777, when Tryon's Hessians had destroyed the army supplies collected here. It is said that, as the raiders were advancing up a hill near by, a reckless farmer rode to its crest and shouted, "Halt, the whole universe, break off by kingdoms!" Alarmed at such a formidable force, the Hessians halted, threw out artillery to the front, and deployed a line of skirmishers. In 1764 Robert Sandeman came to Danbury (where he died in 1771), and founded a sect on the dogma that "faith is a bare belief in a bare truth." In 1870 there were 20 members of this church in the U. S., and they were divided into 2 sects.

The first American hat-factory was started here in 1780, when Zadoc Benedict, with 3 men, made 3 hats a day. Now there are 10 companies in the business, with \$500,000 capital, 4 of which make 216,000 hats a year. The Danbury Shirt Co. turns out 230,000 shirts each year, and many Bartram and Fenton sewing-machines are made here. The borough has about 10,000 inhabitants, 9 churches, 4 banks, a public library, the county buildings, and a great school, of which Danbury is justly proud. Main St. is 1½ M. long, and from Deer Hill a neat view of the town is gained. Lake Kenosha (2 M.) is a favorite resort, and is a pretty lake, with good boating and fishing. Powerful water-works supply the borough.

Near Danbury is a pretty cemetery of 100 acres, containing a monument 40 ft. high, erected by the Masons of Conn. to Gen. Wooster. He founded the first lodge in the State (Hiram, of New Haven), and was shot at the Ridgefield fight. A monument is raised to 67 soldiers (in the Secession War) of Danbury, who are buried elsewhere.

"They sleep their last sleep,
They have fought their last battle,
No sound shall awake them
To glory again."

19. Boston to New York.

New York and New England Railroad to Norwich, connecting at New London with the Norwich line of steamers.

The train leaves the terminal station at the foot of Summer St. (Pl. 39), running across the flats on the W. of Boston Harbor, then through S. Boston and over the S. Bay. It then passes through the rural district of Dorchester, so lately annexed to Boston, and crosses the Neponset River several times near the suburban stations of Mattapan and Hyde Park. Near Readville it crosses the Boston and Providence line, and then stops at **Dedham** station, N. of which is the large and prosperous village which contains the handsome Court House of Norfolk County. Near Dedham are several factories on the water-power afforded by Mother Brook, which is the oldest of American canals. It was made in 1640, in order to increase the navigable facilities of the Neponset River by turning part of Charles River into it. The canal is 3 M. long, and has a fall of 60 ft.

Fisher Ames was born at Dedham in 1758. He was an eminent lawyer and orator, and was the leader in Congress during the era of the Confederation. His "Brutus" letters, published in the Boston papers, were political writings which caused a great sensation.

A branch railroad runs in 2 M. to the main line of the Boston and Providence Railroad. This forms the nearest route from Boston to Dedham.

The stations, Ellis's, Norwood, Everett's, Winslow's, Tilton's, Walpole, Campbell's, Norfolk, City Mills, and Franklin, are then passed. The latter town was named after Benjamin Franklin, and a hint was conveyed to him (then at Paris) that a good church-bell would be an acceptable present in return for the honor conferred on him. The philosopher sent the town a collection of valuable books, observing that the people were probably "more fond of sense than sound."

Nathaniel Emmons, D. D., one of the leaders of the Hopkinsian school of theology, was pastor here for 54 years. At Walpole the line from Framingham to New Bedford crosses the track. Shortly after leaving Franklin, the line crosses the Woonsocket Division of the N. Y. & N. E. R. R. at Mill River Junction, and $2\frac{1}{2}$ M. farther on it crosses the Providence and Worcester R. R. (Route 10) at Blackstone. Stations, Millville, Ironstone, E. Douglas, Douglas, soon after passing which the line enters Connecticut and stops at E. Thompson, whence a branch railroad runs 18 M. to the N. W., through the Massachusetts towns of Webster, Dudley, and Southbridge. After crossing diagonally the large town of Thompson (much visited in summer), the train passes on the rails of the Norwich and Worcester Division, at Putnam (a village containing several cotton and woollen factories).

A daily stage runs from Putnam to **Woodstock**, starting generally late in the afternoon. Elmwood Hall, at Woodstock, is a fine summer hotel (opening June 15), surrounded by pleasant lawns. From this mountain village are obtained noble views. "It is a miniature Mount Holyoke; and its prospect, the Connec-

ticut Valley in miniature." (BEECHER.) Woodstock Lake, 1 M. from the village, is a beautiful and sequestered sheet of water, abounding in fish and encircled by forests.

S. W. of Woodstock (passing Crystal Lake on the way) is **Ashford**, a secluded rural town. Here was born Thomas Knowlton, who fought in the six campaigns ending in the conquest of Canada, and then in the Havana expedition. He led the Ashford minute-men to the lines at Cambridge, and fought with them at Bunker Hill. While commanding a light infantry reg. he was killed at its head in the battle of Harlem Heights (1776).

His grand-nephew was the knightly Lyon. Nathaniel Lyon was born at Ashford in 1819. He was engaged in the Florida War, the Mexican War (wounded at the Belen Gate of Mexico City), and the Kansas Free-State War. In May, 1861, while commanding at St. Louis Arsenal, with a handful of Regulars and several regiments of loyal Missourians, he captured a large rebel camp and army near the city. By rapid movements and hard blows, he saved Missouri to the Union, but was at last confronted at Wilson's Creek by a force 4 times as large as his own, composed of disloyal Missourians, Arkansians, and Texans. Disdaining to flee, he led his little army again and again to the attack, until he was shot dead while heading the foremost files of a charging regiment. He left his fortune (\$30,000) to the government, to aid in putting down the rebellion, and after a solemn triumphal transit across the country his body was laid to rest in the village churchyard at Eastford.

The people of Ashford were ultra-orthodox in the old days. One day while they were whipping a nonchurch-goer on the public Green, a stranger rode up and cried, "Men of Ashford, you serve God as if the Devil was in you. Do you think you can whip the grace of God into a man? Christ will have none but volunteers." Then he spurred away, leaving the little Inquisition of Ashford astounded, confused, and ashamed.

In 1773, Eliphalet Nott, D. D., the distinguished educator, and President of Union College (1804-66) for 62 years, was born at Ashford. Galusha A. Grow was born at Ashford in 1823.

Stations, Daysville and Danielsonville, busy villages engaged largely in the cotton manufacture (the former turning out 240 miles of fancy cassimeres and 540,000 yards of cotton cloth yearly). These stations are in the large town of Killingly, which occupies part of the Indian districts of Attawangan and Minnetixit.

This region is rich in Indian traditions, the most curious of which is attached to Mashapaug Lake, $\frac{1}{2}$ M. N. of Daysville. Far back in the ante-colonial days, the Indians were accustomed to hold revels on a hill on the site of this lake. But once, after a merry-making four days long, the Great Spirit became offended at their riotous orgies, and, as he struck out the foundations of the hill, it sank in deep waters, carrying down all the assemblage of the feasters. Of all the tribe one woman alone was saved on an island which still stands in the lake. On still, clear days, a great submerged forest may be seen under the deepest waters. A village of the Narragansetts once gave the Nipmucks (who inhabited this district) a grand sea-shore feast of clams and fish. The next year they were invited into this hill-country to eat venison in the wigwams of the Nipmucks. But a quarrel arose during the feast, and the guests from the sea-shore were massacred. The Narragansett tribe took action on the matter, and marched a strong force into the Nipmuck country, only to receive a severe defeat at the fords of the Quinebaug.

5 M. W. of Daysville is **Pomfret**, which was settled by Roxbury (Mass.) people on the rich lands of Mashamoquet, in the year 1687. In Pomfret is the Wolf Den, where the intrepid Putnam descended in the darkness, alone, and killed a great wolf which had been the terror of the town.

S. of Pomfret and 4. M. W. of Danielsonville is the pretty village of **Brooklyn** (Putnam House). This is the county-seat of Windham Co., and has a refined and cultivated society, while its broad streets are lined with stately trees and fine mansions. The Unitarian Church, on the Green, is the only church of that sect in the State, and the building is more than a century old. Celia Burleigh is the pastor of this society.

Israel Putnam, born at Salem, Mass., in 1718, settled within the present limits of Brooklyn in 1739. From 1755 to 1762, he fought in the French wars, and was at the capture of Crown Point, Montreal, and Havana. He then returned to Brooklyn and remained there until one day, when he was ploughing on his farm, the news of the battle of Lexington came down the country. The plough was left in the furrow as the old veteran sprang on his fleetest horse and rode toward the scene of battle. He raised a regiment in Windham County; was made a maj.-gen. in the Continental Army; and was one of the leaders at the fight on Breed's Hill. He commanded at New York, at Princeton, and in the Hudson Highlands, until he was forced to retire from active service on account of his age. His old farmhouse still stands, and his remains are obscurely buried in a cemetery S. of the village.

Danielsonville is the seat of extensive factories on the water-power furnished by the Quinebaug River. Cotton cloth and shoe-making are the principal industries.

Stages run thrice daily to Brooklyn, and other lines run to Willimantic, S. Killingly, and Providence (the latter route crosses the State of R. I.).

Stations, Wauregan (village W. of the station). Quinebaug Pond (3 M. long) is a pretty lake, where the "Narragansetts' fishing-light" rises in the form of a pillar of fire, at midnight, once in every seven years. Such is the old legend, and dwellers in the country-side claim to have seen this fiery column blazing over the centre of the pond. The large Wauregan Mills (cotton sheetings) are situated in this village.

Stations, Central Village (with several factories), Plainfield Junction (where the line crosses the Hartford, Providence, and Fishkill R. R.), Jewett City, and Greeneville. At the two latter places are large factories. The Quinebaug River is crossed at Jewett City, and soon after the train passes through a rock-tunnel 300 ft. long. At **Norwich** the cars run on the New London Northern Line, and reach the steamboat wharf at New London late in the evening.

After going on board the steamboat, passengers usually retire, and sleep while she moves through the quiet waters of Long Island Sound. Arising early in the morning, a fine view is obtained of the eastern environs and the city of New York. The boats land at Pier 40, North River, and from the next pier runs the ferry to Jersey City, which enters there the terminal station of the railroads to Philadelphia and Washington, the South and West.

When the section of the track between Willimantic and Middletown is completed, the **New York and Boston Air Line** will go into operation. From Boston to Putnam this line is the same as Route 19, and from New Haven to New York it is the same as Route 8. It is much shorter than the other routes, but passes through a less interesting country.

Boston to Woonsocket.

Trains leave the Boston and Albany Station. Distance to Woonsocket, 37½ M. Fare, \$1.10.

The line soon diverges from the Albany track, and passes the stations, Brookline, Reservoir, and Chestnut Hill (see Route 2). **Newton** is then entered, a large and picturesque town, abounding in suburban villages. In 1646 the Apostle Eliot came to the Indian village of Nonantum, in this vicinity, and after a formal reception by the aged chief and the medicine-men, he unfolded to them the tenets of Christianity. A large part of the tribe accepted his teachings, formed a church, and adopted the laws and customs of the colonists. Near Newton Centre, on a far-viewing hill, are the buildings pertaining to a Theological Institution of the Baptist denomination. This school is in high reputation, and has grown rapidly since its foundation in 1825. The course of study covers three years.

Stations, Newton Highlands, Upper Falls, Highlandville. Upper Falls is a manufacturing village where the track crosses the Charles River. At Charles River Station the river is again crossed. The line now passes through the towns of Dover, Medfield, Medway, and Bellingham, twice crossing the sinuous valley of the Charles. Medfield retains the memory of a fierce attack by a swarm of Indians led by King Philip, who "rode an elegant horse." 50 houses were burnt, 20 of the villagers killed and many made prisoners, but finally the people got an old cannon into position and drove off the invaders. John Wilson, Jr., a graduate of the first Harvard class, was pastor, physician, and schoolmaster of the village from 1651 to 1691. The stations beyond Charles River, are Dover, Medfield, E. Medway, Medway, W. Medway, Cary's, N. Bellingham, Bellingham, E. Blackstone, and Woonsocket (see Route 10). At Woonsocket a connection is made with the Providence and Worcester Railroad.

20. Hartford to Salisbury and Millerton.

Via the Connecticut Western R. R. Distance, 62 M. to Salisbury; 69 M. to Millerton.

After leaving the Union Station at Hartford the line runs N. W. towards the high hills which bound the valley of the Conn. Stations, Blue Hills, Bloomfield, Scotland, Tariffville (large carpet factories), and Simsbury (see Route 15). At this point a connection is made with the New Haven and Northampton R. R. (Route 15). Stations, Stratton Brook, and New Hartford. The latter town was formerly of much importance, being a halting-place on the great western wagon road, from Hartford and S. E. New England to Albany and W. New York. At present it is engaged in the manufacture of cotton and steel goods. Stations, Winsted (see Route 16), W. Winsted, **Norfolk**. This is a pretty village (Norfolk House, \$10-12 a week) with mountains on every side. Before the church is a Green, with a monument "to the memory of soldiers of this town who died for their country in the War of the Rebellion." The soil of Norfolk is cold, rugged, and stony, and it is written that, of the 50 proprietors who bought the town in 1742, after inspection of the tract, 49 forfeited their claims and the moneys paid on them. The dairy business at one time flourished here, but the town has been failing slowly for years: in the month of April, 1872, 75 persons moved away from it. The hotel is a large, quiet summer-house in the valley, and from the hills over it are obtained views of the Sheffield Mts. through long lowland vistas. The

most prominent elevation in the vicinity is the massive *Haystack Mt.* (footpath to the summit), from which a very extensive prospect is enjoyed, stretching from Mt. Everett in Mass. to the Mts. of New York. About 5 M. from the village are Camel's Falls, which are attractive after heavy rains. The line now follows the valley of the Blackberry River to its junction with the Housatonic, crossing at Canaan Station the Housatonic Railroad (Route 17) and River. After passing the stations, Twin Lakes, Chapinville, Salisbury, Lakeville, Ore Hill, and State Line, all in the town of Salisbury, the line enters the State of New York, and at Millerton connects with the Harlem, the Dutchess and Columbia, and the Poughkeepsie and Eastern Railroads.

Salisbury.

"O, this silence in the air, this silence on the mountains, this silence on the lakes. . . . On either side, to the E. and to the W., ever-varying mountain-forms frame the horizon. There is a constant succession of hills swelling into mountains, and of mountains flowing down into hills. The hues of green in trees, in grasses, and in various harvests are endlessly contrasted. At Salisbury you come under the shadow of the Taconic Range. Here you may well spend a week, for the sake of the rides and the objects of curiosity. 4 M. to the E. are the Falls of the Housatonic, called Canaan Falls, very beautiful, and worthy of much longer study than they usually get. Prospect Hill, not far from Falls Village, affords altogether the most beautiful view of any of the many peaks with which this neighborhood abounds." (This, and the other quotations under Salisbury, are from Beecher's *Star Papers*).

Hotels, Barnard House, \$2.00 per day; Miller's Hotel, at Lakeville; and a large summer boarding-house next to St. John's Church (Epis.) in Salisbury village.

The road to Falls Village leads for 2 M. down a narrow valley rich in grain, and then to the E. over bold spurs of Wolonanchu Mt. with Prospect Mt. on the l., and rapidly changing views of the Housatonic Valley. Or, without crossing Wolonanchu, the road down the valley may be followed to the hamlet of Lime Rock and the borders of the Mts. of Sharon.

A favorite excursion is to the Bald Peak on **Mt. Riga**. From Salisbury to the Mountain Pond on Riga it is 4 M. of easy ascent, most of the way along the edge of a ravine filled with resounding, but invisible, cascades. A road leads along the plateau to the base of Bald Peak, whence the ascent must be made by a rude path. The view from the summit is very extensive, embracing on the W. the Oblong, Buck, and Catskill Mts. in N. Y., on the S. the wilderness of high hills which form Sharon, on the E. Canaan Mt., Rarack Matiff, and the lakes of Salisbury, and on the N. Race, Alander, and Everett Mts. in Mass. From the little cluster of houses near the pond on Mt. Riga, one can return to Salisbury, via Lakeville, by a road over the brow of the hill, or by a slightly longer road (8 M.) leading down the side of a water-course with pretty views of the lakes, to *Ore Hill* (4 M.), the centre of the iron-mining industries of the town. There are 5 iron-mines in Salisbury, employing 240 men, and supplying metal to the forges, anchor-works, and foundries which abound on

the streams of N. W. Conn. In April, 1861, the miners of Salisbury sent 100 tons of iron to the government, to be made into cannon-balls. From Ore Hill (which is within $1\frac{1}{2}$ M. of the New York line) the road lies near the railway track, and passes to Lakeville, $2\frac{1}{2}$ M. from the mines. As the road passes the lakes Wononkapok and Wononscapamuc, pleasant views are obtained, and the mts. on the S. rise clearly above their quiet waters. Between the road and the latter lake is seen the stately old mansion of the Holley family, built by the Governor of that name, and the birthplace of Horace Holley, the Unitarian divine, long President of Transylvania University, and of O. L. Holley, the N. Y. lawyer and journalist. On the shores of the same lake are seen the large white buildings of the State Hospital for the Imbecile, where, by skilful treatment, the thought-germs in stricken minds are developed into action, useful instruction is imparted, and many heretofore useless persons are elevated, and sent forth as self-sustaining members of society. The Hospital accommodates about 50 patients, and is situated on a hill which commands fine views of the lake and of Indian Mt. After leaving these charming lakes, a ride of $1\frac{1}{2}$ M. brings one to Salisbury. Mr. Beecher suggests that after leaving Bald Peak, the road may be taken to Brace Mt. and the Dome, "thence to that grand ravine and its wild water, Bash-Bish, — a ride, in all, of about 18 M., and wholly along the mountain-bowl."

* **Bash-Bish Falls** are about 12 M. from Salisbury village, and near Copake station on the Harlem R. R. This is a beautiful little waterfall, which has been well painted by Kensett, and was much visited before the destruction of the hotel by fire.

4 M. N. of Salisbury is * "**Sage's Ravine**, which is the antithesis of Bash-Bish. Sage's Ravine, not without grandeur, has its principal attractions in its beauty; Bash-Bish, far from destitute of beauty, is yet most remarkable for grandeur. Both are solitary, rugged, full of rocks, cascades, grand waterfalls, and a savage rudeness tempered to beauty and softness by various and abundant mosses, lichens, flowers, and vines. I would willingly make the journey once a month from New York to see either of them. Just beyond Sage's Ravine, very beautiful falls may be seen after heavy rains, which have been named Norton's Falls." The way to the ravine leads along the under-mountain road (4 M.). Just before reaching a blacksmith's shop at the bridge over a rill from the hills, there is a small hut on the l., and the field-road turns in alongside, by taking down bars. It is best to leave horses outside, and, entering the field, take the first path to the r. and follow the stream up the ravine. The principal falls are known as the Lower, Twin, and Upper Falls (well represented in a series of 12 stereographs). A vague path follows up the l. side of the water (r. bank), "which, if you love solitude, wildness, and

beauty, will be worth all the pains you may take to climb through it. One requires a good foot, a strong hand, and a clear head, and then there is but little danger," though the path is soon lost in a perfect chaos of rocks. Heavy gloves and boots are necessary, and the ascent is not recommended for ladies, although several have accomplished it. An obscure mountain road leads to the vicinity of the upper end of the ravine, but the descent is harder than the ascent.

From Salisbury, by Sage's Ravine, N. into Massachusetts, runs the under-mountain road, along the foot of the Taconic Range, to Sheffield and the Berkshire Hills. From the ravine to Salisbury, visitors sometimes return by way of the Twin Lakes, a longer but pleasanter route.

The * **Twin Lakes** are gained from Salisbury by a road passing along the low spurs of Rarack Matiff Mt., with the isolated mass of Lion's Head on the W. The beautiful lakes of Washining and Washinee are soon reached, and the high hills in the vicinity (Tom's Mt., Boar Mt.) are seen mirrored in them. Near the S. shore of Washinee a road diverges to the l. through the thick pines, to a remarkable cave. This was but lately discovered by a hunting dog chasing a small animal into it, and the hunters, uneasy at his long absence, tore away the *débris* from the hole and entered. At a hut near the cave, where the keys are kept, visitors can get appropriate clothing, lights, and refreshments. The main cavern has been explored for about 700 ft., and its course trends steadily downward. The curious forms assumed by stalagmites are well shown here. In one place a stone lady is seen, facing the wall; in another, vast numbers of stalactitic candles depend from the roof; and numerous other marvels are found by imaginative visitors. The village and station of **Chapinsville** is situated near the lakes. Mr. Beecher speaks of the lake rides as "extremely beautiful. But they should always be afternoon rides; for these discreet lakes do not choose to give out their full charms except at about an hour before sunset."

Rides are taken from Salisbury through the romantic hills of Cornwall and Sharon, and even as far as Great Barrington (N.), and Litchfield (S. E.).

Salisbury was first settled by the Dutch in 1720, who lived in peace with the Indian tribe who held the valley and of whom no relic remains save the quaint names which they gave to lakes and Mts. This was the farthest advance of the timid Hollanders on that Alpine land (the present Mass., Conn., and Vt.), which was portrayed on their maps by a blank white space (as Greenland is on our maps), inscribed with the cool word "Winterberg." The word "Housatonic" has given rise to more controversy among antiquarians and philologists than almost any other Indian word, and one good authority removes it from an aboriginal derivation, and claims that it is a euphonic change of "Westenhok" (Western corner or nook), the name given to the Dutch settlement here as being in a western nook of the rugged hills which stretch away E. toward the Conn. River. But in 1740 the restless Anglo-American wave of advance reached this point. There are no Dutch or Indians there now.

21. Boston to New York.

The great Express route, via Springfield and Hartford. There are three through express trains daily in 8-9 hours. Distance, 236 M.; fare, \$6.00. This is the most popular and pleasant of the railway routes to New York, passing through the large cities of Worcester, Springfield, and Hartford, and following the rich valley of the Connecticut for a great distance. Elegant parlor and sleeping cars are attached to all through trains. By leaving Boston at 9 in the morning, one can pass over this route by daylight; while by leaving at 9 o'clock, P. M., one sleeps all night (\$2.00 for a berth in the sleeping-car) and reaches New York at 5.30 o'clock in the morning.

The train leaves the terminal depot in Boston (corner of Beech and Lincoln Sts., Pl. 35.), and passes out over the Back Bay lands. Charles River is approached on the r., and a fine view is given of the compact and more ancient parts of Boston, crowned by the State House dome. Beyond the city, and apparently at the end of the lake-like widenings of the river, the populous heights of Charlestown are seen, while Cambridge lifts her spires on the nearer western shores. The line crosses the town of Brookline, studded with pretty suburban villages, and stops at *Brighton* (Cattle Fair Hotel), celebrated for its great cattle-market. The stock-trains on this railroad bring immense numbers of cattle, sheep, and swine from the West, which are here made into beef, mutton, and pork, for the daily needs of Boston. The sheds, yards, and pens cover many acres, and the business has been increasing for scores of years. As far back as 1837, the yearly sales were \$2,500,000. N. of the station is seen the tower on Mt. Auburn, and the U. S. Arsenal at Watertown, on the other bank of the Charles. *Newton* is next entered, a wealthy suburban town (valuation, \$18,000,000), with a population of 13,000. Newton Corner is near the ancient Nonantum Hill, where the Apostle Eliot first preached to the Indians (probably the present Mt. Ida, from which a pleasant view is obtained). This village has a public library in an elegant and costly stone building, and three or four churches. From this point to Waltham it is 3-4 M., to the Watertown Arsenal and Mt. Auburn, 2-3 M., and to the Baptist Theological Seminary at Newton Centre, 2-3 M. S. The line now passes Newtonville (1½ M. N. of Grove Hill Cemetery), W. Newton (2 M. S. of the Watch Factory at Waltham), and Auburndale (the seat of the Laselle Female Seminary). These villages are all in the town of Newton. From Riverside Station, a branch track runs S. to the manufactories at Newton Upper Falls. Stations, Grantville (a factory and residence village), and Wellesley, a picturesque suburban village, near the art-embellished shores of Lake Wauban. 2 M. beyond Wellesley the train reaches

Natick (Summer St. House), "the place of hills," a large town near the river Charles, engaged in the manufacture of shoes. A large hat-factory is located here, also a base-ball manufactory, where many women are employed.

In 1651 the Christian tribe of Nonantum, which had embraced the faith after the preaching of Eliot, removed to Natick, where they formed a government based on the 18th chapter of Exodus, with rulers of hundreds, of fifties, and of tens. Their village consisted of three streets lined with gardens and huts, a building for a church and school, a large, circular fort, and a bridge over the river. The Bible was translated into their language by Eliot, and published at Cambridge in 1663 (second edition in 1685), whose title-page read as follows: "Mamusse Wunneetupanatanwe Up Bidlum God Naneeswe Nukkone Testament Kah Work Wusku Testament." But despite the tender care of the colony, the Indian church and tribe suffered the usual fate of inferior races in the presence of Anglo-Americans, and died out from the operation of internal causes. In translating the passage, "And the mother of Sisera looked out at the window, and cried through the lattice," in searching for an Indian equivalent for the word "lattice," after much labor Eliot found a barbaric phrase which was printed for it in his Bible. Many years after, he found that his word for "lattice" meant "eel-pot," and the ludicrous change in the text excited much merriment in Cambridge.

Just N. of Natick, across the track, and visible from the train soon after leaving the station, is *Cochituate Lake*, from which the water supply of Boston is carried to that city by a long and sinuous aqueduct.

Station, **S. Framingham** (restaurant in the station), near which is Harmony Grove, and the camp-ground of the 52 Methodist churches of the Boston circuit.

S. Framingham is the centre of a system of divergent railroads.

A branch of the Boston and Albany track runs S. 12 M. through the farming town, Holliston, to Milford, a town of 10,000 inhabitants. Stages run from Milford to Mendon (celebrated for its apples), Uxbridge, and Upton.

The Boston, Clinton, and Fitchburg R. R. brings its various divisions to a centre at this point. The Mansfield and Framingham Division runs hence 18 M. S. E., passing the stations, Sherborn, Medfield Junction (connecting with Woonsocket Division of the B., H., and Erie R. R.), Medfield, Walpole (connecting with the N. Y. and N. E. R. R.), S. Walpole, Foxboro', and Mansfield. At the latter station connections are made with the Boston and Providence Railroad, and with the Taunton Branch Railroad.

The Lowell Division runs from S. Framingham to Lowell, 28 M. N. Stations, Framingham and Sudbury. **Sudbury** was settled in 1638, and in 1676 was the scene of a bloody contest, when 70 men, marching to relieve Marlboro', were ambushed here by Indians. 26 of the colonists were killed on the field, and the remainder were captured, and many of them were put to death by terrible tortures. A monument to their memory was erected on the field, by President Wadsworth, of Harvard College, whose father was captain of the defeated party.

In Sudbury was a famous old tavern in the colonial days, which, during the march of the western counties' militia on Boston, was a busy place. This is the "Wayside Inn" of Longfellow's poems, the purer, fairer Canterbury Tales of American literature:—

"As ancient is this hostelry
As any in the land may be,
Built in the old Colonial day,
When men lived in a grander way,
With ampler hospitality.

A region of repose it seems,
A place of slumber and of dreams,
Remote among the wooded hills."

The characters represented among the story-tellers "around the fireside at their ease" were as follows: The Landlord, "grave in his aspect and attire," was Squire Lyman Howe, of Sudbury. The

"Student of old books and ways,
With tales of Flores and Blanchefleur
Sir Ferumbras, Sir Eglamour,"

was young Henry Wales. The young Sicilian,

“In sight of Etna bred and born,”

was Luigi Monti, American consul at Palermo. The “Theologian, from the school of Cambridge on the Charles,” was Prof. Treadwell, of Harvard. The Poet was T. W. Parsons, of Boston, translator of Dante’s “Inferno,” and author of many short poems. The “blue-eyed Norseman,” who bore the Stradivarius violin, “a miracle of the lutist’s art,” and sang the Saga of King Olaf, was Ole Bull.

Beyond Sudbury is W. Concord, where the Fitchburg Railroad crosses the present route. Station, Acton (Monument House), whence marched a company of minute-men, who were among the first engaged at the battle of Concord. Their captain was killed at the fight by the bridge. The line crosses the towns of Carlisle and Chelmsford, and stops at Lowell.

Another division of this railroad runs from S. Framingham to Fitchburg. Station, Framingham Centre, built around a level Green, in a large farming town. The great tide of travel between Boston and the West formerly passed through this village, which then had a famous inn. The town hall, old church, and Academy (founded 1792) front on the Green. The line now passes across the farming town of Southboro’, and enters fair and fertile Marlboro’. This was the site of the Christian Indian village of Okommakamesitt, and was colonized by Sudbury people in 1655. Its first pastor (1666–1701) “uniformly refused baptism to children born on the Sabbath.” At Marlboro’ the present route connects with a branch of the Fitchburg Railroad. Northboro’ is the next town, and is devoted to farming and cattle-raising. The village churchyard contains the grave of the Rabbi Judah Monis, who renounced Judaism in favor of Christianity in 1722, and became teacher of Hebrew at Harvard College, where he remained till his death in 1761. The train crosses the Assabet River E. of the station, and then passes on through the town of Berlin to Clinton (Clinton House), a busy village at the junction of the Worcester and Nashua Railroad. At Pratt’s Junction the Fitchburg and Worcester Railroad is crossed, and the train runs across Leominster, with occasional views of Wachusett Mountain on the W. The central village of Leominster is finely situated. Soon after leaving this station the train reaches Fitchburg.

From S. Framingham the main line follows the Sudbury River, which it often approaches and once or twice crosses. Stations, Ashland (Central House), Cordaville, Southville, and Westboro’ (Westboro’ Hotel). This is the seat of the State Reform School and a large water-cure establishment. $3\frac{1}{2}$ M. S. E. of the station are the *Hopkinton Springs* (small hotel) near the large and handsome Whitehall Pond, abounding in fish. There are three springs, all different, and carbonate of lime and iron are the chief ingredients. This was formerly a fashionable resort, and is on the old Indian domain of Maguncook.

Station, *Grafton* (the Indian Hassanamesit), with 3 small hotels, on a reservation of 4 M. square, given by the colony to a tribe of Christian Indians. *Shrewsbury* is a town just N. of the track, where was born Artemas Ward, major of the 8th Mass. Reg. at the siege of Louisbourg (1758), and commander of the army besieging Boston until the arrival of Washington. Levi Pease was born here, who started the first line of mail stages between Boston and New York (1784), previous to which a fortnightly mail was borne between the two places, and contained in a pair of saddle-bags.

Station, Millbury (near New England Village), whence a short branch track runs (3 M.) to Millbury village. The line now turns to the N. and runs above and near Quinsigamond Pond, a pretty lake, 4 M. long, nar-

row and deep, with 12 islands in it. The college boat-races have often taken place on this pond. Shrewsbury's spires are seen afar, over its waters.

Worcester.

Hotels. * Bay-State House, \$3.50, corner Main and Exchange; Waldo House, \$2.50, Waldo St., near the station; European House; Exchange Hotel.

Reading-Rooms. At the Free Library, Elm St., near Main; Y. M. C. Association, Pearl St.

Horse-Cars on Main St., from Webster Park to Harrington Avenue.

Stages to Quinsigamond, S. Worcester, Oakham, Shrewsbury, and Marlboro', Leicester and Spencer, Webster and Oxford, Paxton, Coldbrook and Barre.

Railroads, to Providence (Route 10), Norwich, Nashua (Route 13), Albany (Route 22), Barre and Gardiner, Fitchburg, and Boston.

Worcester, the second city in wealth and population in the Commonwealth, and the capital of Worcester County, is situated among a group of hills on the Blackstone River. Its manufacturing interests have risen rapidly to a commanding position, being favored by the central location of the city, and the large railroad system converging there. The population is over 50,000. There are 29 churches, 9 temperance societies, 11 bodies of Masons, 3 of Odd Fellows, and 3 societies of Irish, 3 of Germans, and 1 of Scotchmen.

Worcester claims the name of an academic city, in virtue of its numerous fine schools. Its *Classical and English High School* employs 4 masters and 5 assistants, and has a noble building, which is surmounted by a graceful tower terminating in a spire. This tower is a copy of one of the best European campaniles, but is unfortunately too slender in comparison with the heavy mass of the building. Near Main St. on the S. is the celebrated *Oread Seminary* for young ladies, in picturesque stone buildings located on a hill and surrounded by trees. The castle-like structure, with embattled towers, on a commanding hill S. E. of the city was built for a Medical School, but is now used as an academy under the care of the Baptist Church. The Roman Catholic *College of the Holy Cross* occupies an extensive range of imposing buildings on Packachoag Hill, 2 M. S. of the city, and is well attended by the youth of that church from all parts of New England. A *State Normal School* occupies a hill E. of Lincoln Square, and across the valley to the W. are the buildings of the *Free Industrial School* (90 students), with lectures, laboratories, machine-shops, and all appliances for learning young men to be practical architects, carpenters, engineers, chemists, civil engineers, &c. "The ultimate end of this institution is the elevation of the mechanic by giving him thorough and complete scientific knowledge on which he may base his future work." The school is richly endowed, and is free to young men of this county (others pay \$100 a year). Boynton Hall (named in honor of the founder of the school) is a graceful and ornate stone building. 1½ M. N. of Worcester is the *Highland Military School*, widely known for the stringent thoroughness of its discipline.

A *State Lunatic Asylum* (on the family plan) is located near the city. It accommodates 350 - 400 patients, and is about to move to a pleasant estate near Lake Quinsigamond. It now occupies several buildings forming a quadrangle, on a hill E. of the city.

Hope Cemetery in New Worcester, and Rural Cemetery on Grove St., are attractive burying-grounds. 2 M. E. is *Quinsigamond Lake*, a long, deep, narrow sheet of water, on which the college boat-races often take place.

Main St. is about 2 M. long, and contains the principal business houses and hotels. It is a wide, pleasant street, well lined with trees, and adorned with some fine commercial buildings. Near its lower end is the Oread Seminary, and the Jesuit College is seen across a broad valley. Central Park (the Common) is E. of Main St. and contains the Old South Church and the Bigelow Monument, while four other churches are seen on its sides. Passing N. on Main St. many fine business blocks are seen, with St. Paul's Catholic Church, Trinity M. E. Church, the towers of the High School, and numerous tall spires on the hills to the l. On the r. is Mechanics' Hall, a fine audience-chamber seating 2,500, with a brown-stone front in rich Corinthian architecture. On side-streets diverging to the l. in this vicinity are the Post Office and the reading-room of the Y. M. C. A. (Pearl St.), and the Free Library (Elm St.). The latter contains 32,000 volumes, being especially rich in mechanics and medical works, while its reading-room (open from 9 A. M. until 9 P. M.) has 170 different magazines and papers, in 4 languages. On Foster St. are the rooms of the Natural History Society with valuable cabinets (open Wednesday afternoons). On Main St. beyond Mechanics' Hall and the Bay State House, is the old Exchange Hotel, a famous inn of the colonial days, where Washington and Lafayette have stopped. Just beyond is Lincoln Square, where, on a high terrace, are seen the Congregational Church, the granite Court House with its classic front, and the neat building (in the Italian architecture) of the *American Antiquarian Society.

In the latter structure is preserved a valuable library of 50,000 volumes, with ancient portraits of Samuel, Increase, and Cotton Mather and other Puritan divines; Governors Winthrop, Endicott, and other founders of the State. Many busts adorn the walls, and there are large casts of Michael Angelo's Moses, and Christ (bought in Rome by Hon. Stephen Salisbury). In glass cases about the hall are several literary curiosities, ancient black-letter MSS on vellum (15th century); an elegant Persian MS. richly illuminated (date, 1480); 3 British tax-stamps of 1763; MS. sermons of microscopic fineness written by old Puritan pastors; Latin books printed at Rome and Venice in 1475-6; Cranmer's Bible (1538); Ptolemy's Geography; missals on vellum; and a superb *Koran in Arabic, brilliantly illuminated. Two cases of Indian relics are near the entrance to the hall. This collection is open, 9-12, and 2-5 o'clock daily, except Saturday and Sunday. From the hill behind the building, the Free Industrial School and the Normal School may be seen.

On the Common, near the Old South Church, is a pretty English Gothic

monument, built of granite and Tuscan marble, over the remains of Timothy Bigelow, Colonel of the 15th Mass. Continental Reg. Near this will be raised (late in 1873) the *Soldiers' Monument, whose bronzes are now cast in Munich. Colossal figures in the uniform of the American infantry, cavalry, artillery, and marine services will surround a tall Corinthian column, surmounted by a statue of Victory, standing on a globe, with a drawn sword in her uplifted hand. "The expression of her beautiful face is full of exultancy and pride. In spite of her colossal size, she hardly seems to rest on the ball. But with such powerful wings, and such an innate consciousness of strength, the air itself would be a sufficient support."

The Boston and Albany Railroad are at work here on an elegant new station (on Washington Square), to be 514 ft. long and 256 ft. wide, with an Italian clock-tower 200 ft. high, all in heavy granite masonry.

In 1669 a legislative committee located a settlement for 30 families at Worcester (Saxon, *Wegera*, *Ceaster*, War-Castle), as a half-way halting-place between the valley-towns and the coast. The citadel of this colony was near the present corner of Main and Columbia Streets. The Indians soon forced the evacuation of the settlement, and it lay desolate from 1702 to 1713, when it was reoccupied, and stern defensive laws were passed. A fortress-like church was built (on the Common), and each man was ordered to carry to Sunday services his musket and 6 rounds of ammunition. In 1720 some Scotch Presbyterian immigrants built a church of their own, which was assaulted and torn down by the Puritan colonists as a cradle of heresy. In 1755 numerous exiled Acadians were sent here, and soon after the "Massachusetts Spy" newspaper (still published there) began to fan the flames of revolution. April 19, 1775, a breathless messenger bore into town, the news of the battle of Lexington. His white horse, flecked with blood and foam, fell dead on Main St., but he rode westward on another, while the minute-men moved on Boston by thousands. In July, 1776, the Sons of Freedom had a grand feast, and among their toasts were, "May the freedom and independence of America endure till the sun grows dim with age, and this earth returns to chaos." "Perpetual itching without the benefit of scratching, to the enemies of America." The town sent 27 officers and 409 men to the army. In 1786, Worcester was taken, and its courts closed by 800 of Shays' insurgents, wearing the emblematic pine-branch. Father Fitton, on a missionary tour in 1834, found four Catholic families in Worcester: that denomination now has four churches in the city, including *Notre Dame des Canadiens*. The population in 1830 was 4,082. In 1861, at the very hour when the 6th Mass. was fighting in the streets of Baltimore, the Bigelow Monument was dedicated here. Said Judge Thomas at the dedication, "The cry to-day in the streets of this beautiful city is that which 86 years ago startled the quiet village, 'To arms!' So be it, to arms! . . . It will cost us a long, severe, and bitter struggle, but this rebellion must be crushed out. There is for us no hope of freedom, of peace, of safety even, till this work is fully done. Seven years of war were spent in the purchase of our freedom; seven more of toil in giving it organic life. If seven years of toil and blood are spent in securing it, in our national redemption, they will be wisely, divinely spent, with the blessing of God and all coming generations of men." Within five months 5,000 men marched from the Park to the Potomac. The 15th Mass. (Worcester Co.) Reg. paraded here before leaving, and received their colors from the ladies. "I am deputed by the ladies of Worcester to present to you this banner. Eighty-four years ago to-day there was mustering in these streets the first regiment ever raised in Worcester Co. for actual warfare, the 15th Reg. of the Mass. Line. What hard-fought fields at Monmouth and Trenton, what sufferings at Valley Forge, what glory and victory at Saratoga and Yorktown, have made that name famous! . . . What they won for us, it is yours to preserve for us." — JUDGE HOAR.

Stations, Rochdale (Union Hotel), 4 M. S. of the village of Leicester,

on Strawberry Hill, the Indian Towtaid ; Charlton, and Spencer, 2 M. S. of the village (Spencer Hotel), which is on a plateau 950 ft. above the sea. It has a venerable look now, though De Warville (1788) spoke of it as "a new village in the midst of woods."

Elias Howe, Jr., was born at Spencer in 1818. After working in a Lowell cotton-factory and a Boston machine-shop, he wrought out his great idea of a sewing-machine (patented 1846). The idea did not become popular, and he was forced to support himself as a railroad engineer until penury and harsh labor broke his health. After a time, capitalists took up his invention, and by their help, after long litigation, he proved his prior right to the patent against several competitors (1854). Between 1854 and his death in 1867, he realized \$ 2,000,000 from his sewing-machines.

The line now enters the valley of the Chicopee, passes E. Brookfield (Wesbakim), and stops at **Brookfield** (Brookfield Hotel).

This town was settled on the Indian lands of Quaboag, by Ipswich men, in 1660. In 1675 a large force of Nipmucks advanced on the place. Envoys were sent out to treat with the Indians, but six of them were killed, and the village (the present W. Brookfield) was attacked. The inhabitants had gathered in a garrison-house, which, after the rest of the village had been plundered and burnt, was attacked by the enemy. For three long days the house was defended with desperate bravery, though shot and flaming arrows were showered against it. Then a cart full of blazing flax and straw was pushed against it, and the defence would have been ended, but for a sudden shower which extinguished the rising flames. After this shower, which they held to be miraculous, a brave partisan officer with a troop of light horse galloped in from Lancaster, after a forced march of 30 M., and scattered the besiegers. In 1676, the evacuation of the town was ordered, as a military necessity, by the Legislature, and it remained desolate for 12 years. The Quaboag Pond is a large pond S. of the village, whose waters flow by the Sashaway River through the Podunk Meadows, to the Chicopee.

Station, W. Brookfield, near the village of heroic memory (Wickaboag House). These various hamlets of Brookfield are now chiefly noted for their extensive shoe-manufactures.

Stations, Warren (Warren Hotel), a prettily placed village, near which is the old Quaboag Seminary; W. Warren, Brimfield.

In the Brimfield churchyard (5-6 M. to the S. E.) is buried Gen. William Eaton, some time an officer in the U. S. Army, and then Consul to Tunis. In 1805 he planned the restoration of Hamet, the rightful Bashaw of Tripoli, and marched from Cairo, Egypt, with 400 Moslems and 100 Christians, across the desert. With reckless bravery he stormed the ramparts of the Tripolitan city of Derne, garrisoned by a force larger than his own. The United States having concluded a peace with the reigning Bashaw, Eaton was forced to abandon his conquest, and he returned to America, where he died (at Brimfield) in 1811.

Station, **Palmer** (American House, Nassawanno House), in a flourishing manufacturing town. The State Almshouse in Monson may be seen to the S. across the Chicopee River.

From this point diverge the Athol and Enfield and the Ware River Railroads, while the New London Northern Line crosses the track here.

Stations, Wilbraham (with the flourishing Wesleyan Academy 3 M. S.) and Indian Orchard (horse-cars to the village).

Springfield.

Hotels. *Massasoit House (said to set the best table in New England), directly alongside of the station, \$4 a day; *Haynes's Hotel, a large first-class house on Main, near Pyncheon St.; Cooley's Hotel, on Main St., near and N. of the station; Pyncheon House.

Reading-rooms, at the City Library on State St., and the Y. M. C. Association, on Main St.

Horse-cars run on Main St. and to the Armory and Water Shops.

Railroads leave the central station for New York (135 M.), Boston (98 M.), Albany (104 M.), and the North.

Springfield was settled by a company under William Pyncheon, in 1638, whose compact began as follows: "Article I. Wee intend, by God's grace, as soon as wee can, with all convenient speede, to procure some godly and faithfull minister, with whome wee propose to joyne in church covenant to walk in all the ways of Christ. Article II. Wee intend that our town shall be composed of fourty family's, or if wee think meete after to change our purpose; yet not to exceed the number of fifty family's, rich and poore." The town would have been abandoned at one time but for the orders of the Legislature, forbidding the evacuation of Mass. settlements, whereupon the people erected a strong palisade. Great suffering was experienced during the first winter, for the freezing of the river prevented vessels ascending with supplies. Several persons started for Boston, and were frozen on the way. Pyncheon, the magistrate of Springfield, wrote an anti-Calvinistic theological book in 1650, which was condemned by the Legislature and burnt on Boston Common. He was deposed from his office, was forced, amid a storm of clerical wrath, to retract, and soon returned to England to escape persecution. In 1675, while the train-bands of Springfield were guarding Hadley, the Indians laid a plot to destroy the place. Their plan was exposed by a friendly Indian at Windsor, whence a rider was despatched, who reached Springfield at dead of night, and aroused the people. Just as they had gained the shelter of three garrison-houses, 600 Indians entered the streets and burnt every other house in town. They successfully disputed the passage of the river against Major Treat's command, and only retired at the approach of Major Pyncheon and 200 men from Hadley, leaving behind them a sad scene of ruin and destruction. During the Revolution works for repairing muskets were established here, and also a cannon-foundry, at which were cast the guns of several of the batteries which were engaged in the battles near Saratoga. Jan. 25, 1787, 1,200 of Shays' rebels attacked the Arsenal, which was defended by 1,100 militia men. A few cannon-shot dispersed the assailants. During the present century Springfield has grown rapidly, by reason of the establishment here of the U. S. Armory and numerous other manufactures, and by the convergence, at this point, of important railway systems.

Springfield is a handsome city of about 28,000 inhabitants, situated on the E. bank of the Connecticut River. Its principal thoroughfare is Main St., a wide and level street, 3 M. long, adorned with many fine commercial buildings. The principal object of interest in the city is the ***United States Armory**, which is established on a park of 72 acres on Arsenal Hill (E. of the station, and best reached by way of State St.). The buildings surround a great quadrangle called Union Square, and have 5-700 men constantly engaged. 1,000 each of the Sharp, Remington, and Springfield breech-loading rifles have lately been issued to the army for test, while the manufacture and alteration of rifles and carbines is constantly going on. During the War of the Rebellion the works were run night and day for four years, and at one time over 3,000 men were employed. Nearly 800,000 guns were made during that time, at an expense of \$12,000,000. The Arsenal is a large building on the W. of the quadrangle, in which 175,000 stand of arms are stored, rivalling in their symmetrical arrangement the similar collection in the Tower of London.

"This is the Arsenal. From floor to ceiling,
Like a huge organ, rise the burnished arms;
But from their silent pipes no anthem pealing
Startles the villages with strange alarms.

Ah! what a sound will rise — how wild and dreary —
When the death-angel touches those swift keys!
What loud lament and dismal Miserere
Will mingle with their awful symphonies!"

LONGFELLOW.

From the tower of the Arsenal is gained a fine view of the city and its environs. Passes for a survey of the shops, &c., may be obtained at the Armory office. The eight-hour system is in force in these works, although much of the work is paid for by the piece. 1 M. S. E. of the Armory are the Water-Shops, where the heavier labor is done, and where the gun-barrels are made and tested.

Near the Armory, on the S. E., is the large and beautiful Springfield Cemetery, covering about 40 acres. Near this, on the S., is Crescent Hill, with two elegant villas and an extensive and pleasing view.

On State St., between Main St. and the Armory grounds, are several fine buildings. The ***Church of the Unity** (on the r.) is one of the noblest ecclesiastical structures in the State, and, with its cloistered portico, broad windows, and lofty detached tower and spire, it forms a strikingly beautiful object. Its architecture is Gothic, and its material is brown stone. Just above the church is the unique and graceful building of the High School, and opposite the church is the ***City Free Library**, with its handsome building. A library of 32,000 volumes is contained in a richly ornamented and well-arranged hall, while on the floor below is a Museum (open Wednesday and Saturday, 2–5 P. M.) containing 900 stuffed birds, 120 stuffed quadrupeds, and several thousand specimens of fossils, fish, reptiles, and minerals. There are also cabinets of Indian antiquities, and several captured Confederate flags. Just above the Library is the Roman Catholic **Cathedral of St. Michael**. Court Square is near the centre of the city, and has on one side the **City Hall**, containing a hall which can contain 3,000 persons. S. of Court Square is the ***Court House** of Hampden County, a massive new structure of granite, costing \$200,000. It has a tall tower, balconies, and other features drawn from Italian municipal palaces. The 1st Congregational Church (society founded 1637) fronts on this square. In 1 M. from the City Hall, passing N. W. on the busy and attractive Main St., one reaches Round Hill and the **Memorial Church**, built of granite in Gothic architecture. Hampden Park, near by, on the banks of the river, has fine race-tracks, and is used for cattle-shows.

There are several fine churches in the city besides those mentioned (20 churches in all). There are 9 Masonic bodies, 4 of Odd Fellows, 7 banks of deposit, and 3 savings banks. The valuation of the city in 1872 was \$30,000,000, and during the same year its merchants had \$20,000,000

worth of wholesale trade, mostly from the valley towns which draw their supplies from this point.

In 1870 Springfield had 300 manufacturing companies, employing 4,000 men and 1,000 women. Among the principal works are those of Smith and Wesson, where 600 men are employed in making pistols. This company received in 1873 orders from the Russian government for 40,000 revolvers. At Brighwood (N. of the city) is the Wason Car Manufactory, whose buildings required 2,000,000 bricks in their construction. These works employ 400 men, and turn out 100 passenger and 900-1,000 freight cars yearly, besides many thousand car-wheels. They have made most of the cars for the Pacific Railroad and the New Jersey Central, and also a superb car for the Egyptian Khedive. Nearly 800 men were engaged in this city, during the Secession War, in the manufacture of saddles and heavy harness for the army. They delivered to the government \$2,500,000 worth of these articles. At present about 200 men are employed in making trunks and harness.

Station, Longmeadow (the Indian Massacsee), settled in 1644 on the long meadows by the Connecticut. It is a pretty village on a gentle swell near the intervalles, and its people are devoted to farming.

The State of Conn. is now entered, and the train stops at Thompsonville (Globe Hotel), the seat of the largest carpet-works in the country. Since 1828 this industry has been growing, until now it uses up 900 tons of imported wool each year, and turns out 1,800,000 yards of ingrain and Venetian carpets, from 141 looms. 3-4 M. E. of this village is the large community of the Enfield Shakers. The village of Enfield (settled by Salem men, in 1681) is a short distance S. of Thompsonville.

Station, Warehouse Point, where the line crosses the Conn. River by the * Iron Truss Bridge, a noble piece of engineering, built in Manchester, England, and set up here in 1866. The road-bed of 18 ft. wide is sustained 47 ft. above the water by wrought-iron trusses, held up by 17 granite piers. The bridge is 1,525 ft. long and cost \$265,000.

At Hazardville, a few miles N. E., are the powder-works of Col. Hazard. These are the largest in England or America, and the former country bought \$1,250,000 worth of Hazard's powder during the Crimean War, while vast amounts were made for the United States during the Secession War.

Station, Windsor Locks (Charter Oak House), with iron and paper mills on the water-power afforded by a canal built before the era of railroads to enable vessels to pass the Enfield Falls and gain the Upper Conn. Tourists were formerly carried from Springfield to New Haven in small steamboats by this route. The line crosses the Farmington River by a fine seven-arched bridge of red sandstone, 450 ft. long.

Station, **Windsor** (Alford House), settled in 1633-6 by men of Dorchester, on the rich intervalles of Mattaneag.

In addition to harassments from the ten Indian tribes with their 2,000 bowmen who lived about Mattaneag, the little colony was early attacked by 70 Holland troops, sent by Gov. Van Twiller. The Dutch expedition retired before the firm and fearless Puritans, and the Indians soon sold out. Rev. John Warham, the pastor-chief, who led this nomadic Doreestrian Church in its 14 days' march through the wilderness, was the first of the New England clergy who used notes in preaching. In 1644 a road was built to Northampton, freight by sea to or from

Boston costing at this time 33 per cent *ad valorem*. Matthew Grant came from England to Dorchester in 1630, and thence went to Windsor. The family lived here for over a century, until Noah Grant was killed in the battle of Lake George (1755). This officer was the great-grandfather of President Grant. Roger Wolcott and his son Oliver, governors of Conn. 1751-4, and 1796-7, were born here. Oliver Ellsworth, U. S. Senator, 1789-95, and afterwards Chief Justice of the U. S., was born here in 1745. Another native of Windsor was Gen. Phelps, who, with his associates, bought of Mass. and Conn. 5,500,000 acres of the Western wilderness, at a nominal price. These tracts were laid off in townships and ranges, and sold to settlers. They now comprise the counties of Ontario and Steuben (New York), and the Western Reserve of Ohio.

There is a long, broad Green near the station, near which are the Wolcott and Moore mansions, and the new Episcopal Church, and just over the river, is the old Cong. Church and the Green which was the cradle of Windsor, and is still called the Palisado. This town grows much tobacco, of which 5,830,000 pounds were raised in the county in 1870.

Hartford.

Hotels. — * Allyn House, a fine brownstone building near the station, accommodating 300 guests. \$4.00 a day; * City Hotel, on Main St., \$3.00 a day; the United States and the American Hotels, on the old State House Square.

Railroads. — The present route to Springfield and Boston (124 M.), New Haven and New York (109 M.); the Hartford, Providence, and Fishkill, to Providence on the E. (90 M.) and Waterbury on the W. (32 M.); the Conn. Valley R. R. to Saybrook Point (44 M.); the Conn. Western, to Salisbury and Millerton (69 M.).

Steamers. — Daily to the river-landings and Sag Harbor (Long Island) in the morning; daily, in the afternoon, for the lower landings; daily for the river-landings and New York City.

Stages to Farmington, Broad Brook (14 M.), Wethersfield, Rocky Hill, Cromwell, Marlboro (20 M.); to Bloomfield and Simsbury, N. Canton, and W. Hartland (30 M.).

Horse-Cars run along Main St. from Spring Grove Cemetery to Wethersfield (7 M.), also from the New York steamboat pier, at the foot of State St., through State and Asylum Sts. 2 M., passing the R. R. Station and the Deaf and Dumb Asylum.

Carriages cost 50c. a course in the city, 75c. for 2 persons, and \$1.00 for 3 persons. Double fares between 12 and 6 at night. By the hour, \$2.00.

Amusements and lectures frequently at Roberts' Opera House (an elegant auditorium), 395 Main St., or at Allyn Hall, on Asylum St. near the Allyn House.

Post Office at 252 Main St. Masonic Hall at 395 Main St.

* **The Park** (45 acres) is a pleasant resort in the afternoon. It is reached by several stone bridges over Park River, and has cost the city \$270,000.

Connecticut was first explored by the Dutch, one of whose sturdy mariners, Adrian Black, ascended the Conn. River as far as the Enfield Falls in the 16-ton yacht, "Onrest" (1614). In 1633 the Dutch built a 2-gun fort, called the "Hirse of Good Hope," on the present site of Hartford, and lived peaceably, tilling the ground and trading with the Indians, until June, 1636, when Thomas Hooker led his church from Newtown through the wilderness, and settled here. The Park River afforded a water-power for a grist-mill, which was speedily utilized, and Windsor and Wethersfield, previously more important, brought their grain here to be ground. The colony was named for an old Saxon town 21 M. N. of London, derived from "the Ford of Harts." Three watch-towers were built, and the men of the colony enrolled in train-bands, two thirds of whom had matchlocks, bandoleers, and rests, while the other third were armed with pikes 10 ft. long, and guarded the standard. These train-bands stormed the breach in the Narragansett Fort fight. Waiquimaicut, sachem of the river tribes, deeded the lands to the settlers, and gave them a tribute of beaver-skins and corn, in return for their protection against Pekoath, king of the Pequots, and the dreaded Mohawks. Under the influence of her stern Puritan pastors, Hartford enacted the "Blue Laws," by

which the penalty of death was visited for the crimes of idolatry, unchastity, witchcraft, blasphemy, murder, man-stealing, rebellion, smiting parents, &c., with savage laws against Sabbath-breaking and the use of tobacco. In 1765, a stamp-agency was established here, but it was speedily broken up by an irruption of 200 armed riders from Windham County. In 1790-1800 the town became an important point on the great Atlantic stage-road, and 16 lines of stages centred here. De Warville wrote here, "In Conn. Nature and Art have displayed all their treasures; it is really the Paradise of the U. S."; and among other products of the State, he speaks enthusiastically of "the fair Conn. girls." In December, 1815, the infamous Hartford Convention, composed of 26 delegates from the States of New England, met here, to deliberate about crippling the general government in the war with England, to which war many of the people in this section were opposed. In 1799 Hartford had a valuation of \$751,533, and in 1818 its population was 6,500, at which time a writer predicts "that it will continue to extend its size, its interests, and its consequence."

Hartford, "The Queen City of New England," is a semi-capital of the State of Conn., and is finely situated on low hills at the junction of the Park and Conn. Rivers. It is noted for its benevolent and educational institutes, its extensive manufactures, and its powerful insurance companies. The population is 38,000.

Trinity College is a wealthy Episcopalian institution, founded in 1823, and in 1871 having 15 instructors and 92 students. This was first known as Washington College, and in 1872 it had 3 long, brownstone buildings (Seabury, Jarvis, and Brownell Halls) on the site sold for the present new State House. These halls stood on a beautiful summit over the Park, on which the State House is to be erected. This will be a noble building, in the architecture known as the Secular Gothic (whose best forms are seen in the *Hotels de Ville* of Belgium), after plans by Upjohn, of New York. On this hill is a colossal *statue of Bishop Brownell (founder of the College, and Bishop of Conn., 1819-65) in his episcopal robes. The statue (11 ft. high) is of bronze, and was made at Munich. The Episcopal church is stronger (proportionally) in Conn. than in any other State.

The **Congregational Theological Institute** (founded 1834, and has graduated 290 men) is back of the Wadsworth Athenæum.

Of the 30 churches of the city, several are adorned with ivy of great luxuriance. The 1st Presbyterian is a neat Romanesque building of Conn. granite and Ohio stone, and the following are built of red-stone, in Gothic forms: Christ, St. John's, Trinity, Incarnation, the 1st M. E., the South Baptist (with a fine portico supported by Caen stone columns), the Pearl St. Cong. (with a spire 212 ft. high). The three Cong. churches on Main St., the 1st Church (organized in 1633), the South Church (organized in 1669), and the 4th Church have fine buildings. The *Park Cong. Church is of sandstone, in the early English Gothic style, with stone columns along the aisles, and a timber roof. The Catholics have 2 large stone churches (St. Peter's and the Cathedral of St. Patrick), and are about to build an elegant new Cathedral. The ***Church of the Good Shepherd** (Episco-

pal), built by Mrs. Colt as a memorial of her husband and children, is a gem of Gothic architecture, built of Portland stone trimmed with Ohio white stone, with a spire 150 ft. high, containing a sweet chime of bells. The W. front has a grand memorial window, in the centre St. Joseph carrying the child Jesus, above which is an angel with 3 children; on the l. the angel of the resurrection, on the r. a singing angel. The clerestory windows are low and brilliant, while the chancel windows represent Christ and the 12 Apostles. The chancel is separated from the organ (on the r.) and the baptistery (on the l.) by columns of Scotch granite. The * baptismal font is sustained by a group of marble cherubs.

The **High School** is near the Park in a noble * building of Norman and French architecture, finished in 1869, at a cost of \$ 160,000. Near it, and on Asylum St. (also near the R. R. station, with its Italian campaniles) is the mansion long occupied by Mrs. Sigourney, the poetess. The city is about to erect on the Park a statue of Dr. Horace Wells, one of the discoverers of surgical anæsthesia.

Back of the Cong. Church, opposite the Athenæum, is the ancient graveyard (entrance to the r. of the church). Here are many graves of the 17th and 18th century, with a massive sandstone monument to the memory of the first settlers. Two tables (on the r.) cover the remains of Thomas Hooker, "the renowned minister of Hartford and pillar of Conn., the Light of the Western Churches" (MATHER); and of Samuel Stone, a divine who died here in 1633, and whose epitaph begins,

"New England's glory and her radiant crowne
Was he, who now on softest bed of downe,
Till glorious resurrection morn appeare,
Doth safely, sweetly sleepe in Jesus here."

The *Deaf and Dumb Institute* was founded by Dr. Gallaudet in 1817, and is the oldest in America. The building (130 by 50 ft.) was erected in 1820, and stands on an embowered hill near the R. R. station, on Asylum St. It has 200-250 inmates. The *Retreat for the Insane* (established 1824) is a stately building of sandstone covered with gray cement, in the S. W. part of the city. From its great elevation, its vicinity commands fine valley-views. It has received over 4,000 patients, and has discharged 2,000 as cured. The *City Hospital* is near the Retreat, and is a large, plain, and commodious building of sandstone. In the opposite section of the city (Upper Main St.) is the *State Arsenal*, the Widows' Home, and the extensive North Cemetery.

The old State House Square is in the heart of the city. Here stands the *State House*, a homely old structure of brick, which dates from 1794. In its Senate chamber the Hartford Convention assembled in 1815. The Secretary's office contains the original royal charter, framed in wood of the Charter Oak. In the Senate Chamber, also, besides Stuart's picture of Washington, and portraits of the governors of Conn. from 1635 to 1870, is a large chair made of the same wood.

In Oct. 1687, Sir Edmund Andros, the royal governor of New England, entered Hartford with his troops, and demanded the royal charter, the only safeguard of the liberties of Conn. During a stormy evening-meeting the lights were suddenly extinguished, and a bold colonial gentleman seized the charter and fled forth. He hid it in a hollow in an oak-tree, and there it stayed until Andros had left the town in great anger. The charter was ever after preserved, and the tree was held in increasing veneration until 1856, when it was blown down in a storm. Its place is now marked with a marble slab.

Mark Twain asserts that in a late visit to Hartford he saw articles as follows made from this tree: "a walking-stick, dog-collar, needle-case, three-legged stool, boot-jack, dinner-table, ten-pin alley, tooth-pick, and enough Charter Oak to build a plank-road from Hartford to Great Salt Lake City."

Near the State House Square, on the N. facing Market St., is the *City Hall*, in the Grecian architecture, but dingy in appearance.

The old State House is to be removed to another part of the Square, and an extensive government building will be erected on its present site.

Opposite State House Square is the superb granite *building of the Conn. Mutual Insurance Company, recently completed at a cost of \$7-800,000. A short distance below this building is the fine granite block belonging to the Hartford Fire Ins. Co. On Main St., alongside of the Athenæum, is the lofty *granite palace of the Charter Oak Insurance Co., which cost above \$700,000. The beautiful halls and offices within should be visited, and by ascending in the elevator to the observatory on the roof (a courtesy granted by the company; small fee to the conductor of the elevator), a fine view is obtained of the city and its environs. The elegantly finished sandstone office of the Etna Ins. Co. is nestled alongside of the Charter Oak building. There are 21 insurance companies in the city (9 Life, and 12 Fire), having an aggregate capital amounting to scores of millions.

Wadsworth Athenæum.

While Arnold was plotting at West Point (1780), Washington and Rochambeau were making plans and enjoying hospitable cheer at the mansion (in Hartford) of Col. Wadsworth, Commissary-General of the Army. Wadsworth's son gave the land, after removing the mansion, for a public library, and the present building (of Glastenbury gneiss, in castellated architecture) was built from the proceeds of a popular subscription of \$52,000. On the lower floor of the **Athenæum** is the Statuary Hall (fee 25 c.), containing casts of Ganymede, Washington, Pan, the Shepherd Boy, the Truant, Genevieve, Calypso, and an allegorical figure of Commerce, all by Bartholomew (who died at Naples, 1858). Casts, by the same designer, of Ruth and Naomi, Hagar and Ishmael, the Morning Star, Belisarius at the Pincian Gate. There are also casts of Schwanthaler's "Bavaria," and small busts (German) of Schön, Murillo, Correggio, Velasquez, Domenichino, Raphael, Angelo, Leonardo da Vinci, Ghirlandaja, Fiesole, Mozart, Goethe, Andrea del Sarto, Bellini, Van Dyk, Rubens, Francia, Masaccio, Perugino, Claude Lorraine, Poussin, Van Eyk, Hemling, Dürer, Holbein, and Titian. 17 of Rogers's statuettes occupy one long shelf.

Busts (in marble) of President Fillmore, and *Diana, by Bartholomew; Wadsworth, Horace Bushnell, and C. H. Olmstead, by Ives.

Statues, Stella, and *Sappho, Bartholomew, and an elaborate work, *Eve Repentant, his masterpiece. She is sitting with head bowed and hands clasped in contrition, while her long, luxuriant hair hangs down her back, and a serpent is seen curling about her on the ground. The statue is upon an octagonal pedestal of marble, with the following well-designed bas-reliefs: 1st Panel, Creation of Woman; 2, the Temptation; 3, the Fall; 4, Hiding from God; 5, the Expulsion from Eden; 6, Lamentation; 7, Tilling the Ground; 8, the First-Born.

On the upper floor is the *Picture Gallery*. *West Wall*. 93, *Quebec*, by *Church*; 94, *View on the Susquehanna*, *Church*; 28, *Ecce Homo*; 119, *St. Jerome*; 2, *Venice*; 21, *George Washington*, copy from *Stuart*, by *Ellsworth*; 58, *Feast at Levi's House*, after *Paul Veronese*; 134, *Landscape*, *Landman*; 120, *St. Joseph and Jesus*, after *Raphael*; 32, *Marie Antoinette*.

South Wall. 92, *Hartford Puritans in the Wilderness*, *Church*; *Burning Ship at Sea*, *Jewett*; 4, *Battle (17th century)*; *Samson in Bonds*; 1, * *Death of Warren at Bunker Hill*, *Trumbull* (the celebrated historical pictures by this artist have explanatory charts appended); 5, *Mrs. Sigourney*, *Trumbull*; 62, *Humboldt*; 121, *Wellington*; 80, *Oliver Wolcott*, *Stuart*; 2, *Battle of Trenton*, *Trumbull*; 87, *W. Ellery Channing*; 113, *Brutus*; 91, *Christ in the Temple*, *Terry*; 49, *Sea View in Fog*; 50, *Night-scene at Naples* (the last two are bright "restored" pictures, said to be by *Vernet*); 10, *Battle of Princeton*, *Trumbull*; 11, * *Death of Montgomery at Quebec*, *Trumbull*; 30, *Elevation of the Cross*, after *Rubens*; 12, *Holy Family*, *Trumbull*; 86, *Joel Hawes*, D. D.; 90, *Horace Bushnell*, D. D.

East Wall. *Destruction of Jerusalem*, a large picture, 22 x 14 ft., in poor light, but full of study (plans on the tables near), by *Whicelo*; 27, *Ruth and Boaz*; 95, *Landscape*, *Isham*; 13, *Death of Jane McCrea*, *Vanderlyn*.

North Wall. 128, *John in the Wilderness*, *Cole*; 127, *White Mountains*, *Cole*; 123, *Marine View*, *Corne*; 129, *Cascade in the Catskills*, *Cole*; 124, *The Lady of the Lake*, *Trumbull*; 130, *Lake Winnepesaukee*, *Cole*; 131, *View on Talcott Mt.*, *Cole*; 34, * *View of Mt. Etna*, at sunrise, from *Taormina*, *Cole*; 15, *Americus Vesputius*; 16, *Columbus*; * *Benjamin West*, *Sir Thomas Lawrence*; 39, *Declaration of Independence* (small artist's copy), *Trumbull*; 89, *Landscape near New Haven*; 106, *Milton's Descent of Satan*; portraits of various celebrities of the State of Conn.

In the N. wing of the Athenæum is the *Young Men's Institute*, with a circulating library of 25,000 volumes, and a reading-room (an introduction by a member of the Institute entitles one to four weeks' use).

The **Conn. Historical Society** has its rooms in the S. Wing (open daily; no fees). Besides a large library, many curiosities are kept here, among which are, *King Philip's club*; *Putnam's battle-sword*; bows, arrows, pikes, swords, &c., of six wars; old German missals; dress-suits at *French Court of Commissary Wadsworth* and *Commodore McDonough*; * *Turkish scimeter* with coral and ivory hilt and silver scabbard, and inscriptions in Arabic and Persian; gold pen "worn out in the service of *Washington Irving*"; a link (3 ft. long) of the chain stretched across the *Hudson* in 1776; a foot-stove of 1740; *Elder Brewster's chest*; *Standish's dinner-pot*; *Putnam's tavern-sign*; *British shells* thrown into *Stonington*; a mortar captured in *Mexico*; relics of *Nathan Hale* and *Col. Ledyard*; *Robbins Bible* (1478); *Farmington church drum*; mail-bag (A. D. 1775) used between *Hartford* and *New Haven*, 6 x 9 inches; the first telegraphic message sent in *America* (from *Washington* to *Baltimore*), "What wonders hath God wrought"; 13 *Russian medals*; *Continental money*; a pistol from *Colt*; *Confederate money*; a number of the "*Boston News Letter*" for April 17, 1704 (the first number of the first newspaper in *America*: it lasted 72 years); numerous portraits, MSS., and pieces of *Charter Oak*; *Arnold's watch*; the chair in which *Lee* signed the capitulation of *Appomattox*; several battle-flags well used; the swords of *Putnam*; of *McDonough* (victor in the battle of the fleets on *Lake Champlain*); of *Capt. Ward*, of the U. S. Navy (born *Hartford*, 1806, killed in the attack on *Matthias Point*, Va., June 27, 1861); of *Commander Rogers* (killed in the naval assault on *Fort Sumter*); of *Col. Russell* (of the 10th Conn., killed at *Roanoke*, 1862); of *Gen. Sedgwick* (killed at *Spottsylvania*, May 9, 1864); and of *Gen. Nathaniel Lyon* (commander of the U. S. Army in *Missouri*, killed at the battle of *Wilson's Creek*, Aug. 10, 1861). Adjoining this room is the hall containing a large reference library, endowed with \$100,000 by *David Watkinson*, who died in 1857.

The principal manufactories of *Hartford* are the *Colt Rifle and Pistol Factory*, which has \$1,000,000 capital, and employs 800 hands. Since *Col. Colt's* death it has been run by a company, of which *Gen. Franklin* is President. Its immense buildings are in the S. E. part of the city, near the river, from whose inundations they are guarded by a dike (50 ft. broad at the top, and 8,700 ft. long), which cost \$80,000. The *Church of the Good Shepherd* is near by, and close to the factory is a colony of *Swiss*, who make up willow-ware from material grown here. In the W. part of the city is the *Sharp Rifle Manufactory*, employing 6-700 men, which

has made 100,000 rifles for the U. S., besides filling large orders for England, Germany, Spain, China, Japan, Mexico, Peru, and Chili. The Wm. Rogers Co. turns out \$800,000 worth of plated spoons and forks yearly; the Ashmead Gold-Beating Co. use up 3,640 ounces of gold yearly; the Weed Sewing-Machines are made to the number of 20,000; the Colt Willow-Ware Co. have 75 acres of willow, and turn out 100 tons of ware each year; the Coburn Soap Co. produces 900 tons, in 40 varieties; and the great publishing houses (subscription books) print many score thousand volumes yearly. Hartford is also an important market for wool and tobacco.

The city has 17 banks, 7 Masonic lodges, 4 lodges of Odd Fellows, 3 of Knights of Pythias, 2 Grand Army Posts, 6 temperance societies, and 7 *élite* military companies, one of which, the Putnam Phalanx, is widely famed. Its members dress in antique uniforms, and the corps (125 men) is said to represent \$11,000,000. The city has more wealth in proportion to its population than any other American city, and its society is of a high and cultivated order.

By following Main St. to the S. beyond St. Peter's Church, *Armsmead* is soon reached (on the l.). This is the residence of the Colt family, with spacious grounds adorned with groves, lakes, marble statuary, green-houses, and a deer-park. Near the mansion is a beautiful *copy (in bronze) of the Amazon and Tiger, at the Museum in Berlin. About 3 M. beyond is ancient Wethersfield, settled by men of Watertown, Mass., in 1635. At 1636, the first Conn. legislature convened here declared war against the Pequots. The old Webb mansion, near the Cong. Church, was Washington's head-quarters, and here frequent and protracted councils of the French and American officers prepared the plans which ended at Yorktown. The town has long been noted for its great crops of onions. Since 1826, the State Prison has been established here.

About 3 M. S. W. of the city is **Cedar Grove Cemetery**, on a bare and lofty hill commanding views of the Queen City and the valley of the Conn. The *Beach Memorial is a beautiful work of Italian art. A high base, surrounded by elegant bas-reliefs, supports a vase, which is sheltered by a tabernacle in red, yellow, and white marbles, supported by columns of Scotch granite. The Clark Monument is surmounted by a colossal bronze Angel of the Resurrection (cast in Munich). The Russel Monument is crowned by a life-size and life-like seated statue. The monument to Col. Samuel Colt (who invented the revolving pistol) consists of a lofty Egyptian column of Scotch granite, surmounted by a bronze angel, while on the pedestal is the family coat-of-arms (a colt rampant, with a broken spear in his mouth).

Talcott Mt. is about 9 M. W. The estate "Monte Video" of the old family of Wadsworth is on its summit, and the pretty Gothic villa is near a "deep, cold, crystalline lake," on the brow of the mt. From a neighboring tower, "you have a glorious *view of the surrounding country, and into the adjoining States of Mass. and N. Y.; the whole surrounded by an impurpled outline of mts. The Conn. is seen sweeping onward like a king, through its fair domain, amid the spires of numerous towns and villages, while, by the aid of a glass, the sails of

the vessels in the port of Hartford, and the movements in the streets, are distinctly visible." (MRS. SIGOURNEY.) "The peculiarities of the beautiful and grand scenery of Monte Video make it quite without a parallel in America, and probably with few in the world." (PROF. SILLIMAN.)

Rocky Hill (7 M. S.) presents a remarkable junction of trap-rock and sandstone. From this point is enjoyed a rich view over the river valley, embracing Wethersfield and its intervalles, Glastenbury and the Lyme Mts., N. Hartford, and, 40 M. to the N., the Mts. of Tom and Holyoke. The ride to Rocky Hill, by the river-road, is a favorite one with the Hartford citizens.

Other excursions are to Tumble-Down Brook (8 M. W.), to E. and W. Hartford, to Glastenbury, and over Newington Mt. *S. Windsor* (6 M. N.) was a depot for prisoners during the Revolution, and its numerous lines of elms were planted by British and Hessian captives, under the direction of Lafayette. Here was born John Fitch, inventor and builder of the first steamboat in America. He ran a steamer-line on the Delaware River from 1786 to 1790, the boat making 8 M. an hour. Fulton's steamers, the "Clermont" and the "Car of Neptune," were put on the Hudson in 1807. 50 years ago more gin was made in E. Windsor than in any other town in America.

After leaving Hartford, the line runs S., leaving the river, past Newington to **Berlin**, whence branch tracks diverge to Middletown, 10 M. on the S. E., and New Britain, 2½ M. on the N. (see Route 11). Berlin village (S. E. of the station) was for scores of years the home of the peripatetic tin-peddlers who traversed the country between Mobile and Quebec. The manufacture of tin-ware originated here about 1775, and is still carried on. The heroic Major Hart was born here, who, at Gen. St. Clair's defeat on the Miami River (1791), led a battalion of the 2d U. S. Infantry (the rear-guard) on a fearful charge, in which he and nine tenths of his men were killed. At E. Berlin are the works of the American Corrugated Iron Co. Percival, the poet, was born here in 1795.

Station, **Meriden** (Meriden House), a busy little city midway between Hartford and New Haven. Near the City Hall (E. of the track) are several churches, and some neat villas crown the heights beyond. The spacious and imposing building of the *State Reform School* is passed by the train just before reaching the station. The highway to the N. passes Mt. Lamentation, and then runs through a narrow pass in the Blue Mts. called the Cat Hole, 1 M. long. Ice is found near this deep glen throughout the year. *West Peak*, 3 M. from the city, commands a view extending from Hartford to New Haven, and over Long Island Sound.

The Meriden Britannia Co. has 6 large buildings, one of which is 527 x 40 ft. 1,000 hands are employed, 420 tons of nickel, white metal, and silver are used yearly, and \$2,500,000 worth of wares are sent out every year to all parts of the world. Ives, Ratty, & Co. make 4,000 tons of tin-ware yearly; the Meriden Cutlery Co. (the first in America) employ 400 hands; Wilcox & Co. employ 300 hands in making balmorals, hoops, and corsets; and the Malleable Iron Co. and the Parker Shot-Gun Co. have works here.

On the great land route from Boston to New Haven, Belcher built a fortified tavern here in 1660. Levi S. Ives, Episcopal Bishop of North Carolina (1831-52), who was received into the Roman Catholic Church at the city of Rome in 1852, was a native of Meriden.

After Yalesville is **Wallingford Station** (Beach House, an elegant summer-house, formerly the home of M. Y. Beach, proprietor of the "N. Y.

Sun"; the ancient Washington House was burned in May, 1872). - Davenport preached a sermon at the founding of this town (in 1669) from the text, "My beloved hath a vineyard in a very fruitful hill." On that fruitful hill the village is built, with a neat town hall, a costly Episcopal church, and a fine modern school-house, besides several neat villas. Manufactures of German-silver ware, Albata plate, &c., are carried on on the plain. The Hanging Hills form a lofty and picturesque scene to the W. of the village. W. of the station ($\frac{3}{4}$ M.) is a branch of the Oneida Community, containing about 50 persons, on an estate of 2-300 acres. They believe in the power of the New Testament doctrines to render men morally perfect, and all their property is held in common. The object of this mission colony (which receives subsidies from Oneida) is to propagate the Oneida tenets in New England.

The line follows the Quinnipiac Valley to N. Haven. There is here a Gothic church (Episcopal) facing the Green, near which is the house where Dr. Trumbull the historian lived for 50 years, and wrote 4,000 sermons and several books. North Haven makes several million bricks yearly. The train soon passes East Rock (on the r.), crosses Mill River, and enters **New Haven.**

New Haven to New York, see Route 8.

22. Boston to Albany, Saratoga, and the West.

Via the Boston and Albany Railroad, Rensselaer and Saratoga R. R., and New York Central R. R. Boston to Albany, 202 M. Fare, \$5.80. Boston to Saratoga, 240 M.

This is the favorite route running W. from Boston, and will long hold this position, since the principal inland cities of Massachusetts are on its line. When its construction was first talked of, the "Boston Courier" derided the scheme, saying that it could be built only at an "expense little less than the market value of the whole territory of Massachusetts, and which, if practicable, every person of common-sense knows would be as useless as a railroad from Boston to the moon." Yet the work went on, the road was completed to Worcester in 1835, to Springfield in 1839, and to Albany in 1842. The admirable appointments and organization of this route, and its immunity from accidents, have given it a wide reputation and an extensive patronage.

The Station in Boston is on the corner of Beach and Lincoln Sts. (Pl. 35).

After emerging from the city, the line crosses the Providence Railroad (Route 8) on the Back Bay lands, and passes the junction of the Woonsocket Railroad (2 M. out). A fine panoramic view is gained by a backward glance from the windows on the r. of the car, embracing the ancient academic city of Cambridge, with the heights of Somerville and Charlestown, while much of Boston is visible to the rear.

For the itinerary between Boston and Springfield, see Route 21.

The line crosses the Connecticut River on a long bridge just after leaving Springfield, and follows the valley of the Agawam River past W.

Springfield Station (a manufacturing village; Agawam Hotel) to **Westfield** (Willmarth House, Westfield House). The Indian domain of Woronoco was settled by the English in 1660, and called Streamfield, from the abundance of its waters, but later, the Legislature named it Westfield, as the most westerly of the settlements. Late in King Philip's War, the colonial council ordered that this, and all the other valley towns, should be evacuated, and that their inhabitants should concentrate at Springfield and Hadley. An angry refusal was returned, and the towns negotiated for union with Conn. until the obnoxious edict was repealed. Westfield built a fort and stood her ground. At present it is a busy village, where 32 firms make 2,500,000 whips a year, and 8-12,000,000 cigars are annually made. The *State Normal School* located here has 160-200 students, and is of high reputation. Several churches front on the Green, which is adorned by a monument by which "Westfield honors the memory of her sons who have fallen in defence of Liberty, Union, and Independence, 1861 to 1865." The pedestal bears the arms of the State and of the Union, and a list of the slain, and is surmounted by a bronze soldier, of heroic size. The village is situated in a beautiful valley by the Westfield River, $\frac{1}{2}$ M. S. of the station. The New Haven and Northampton Railroad crosses the line at this point.

The line now runs up the valley of the Westfield River, passing Pochassie Hill and Mt. Tekoa on the r., and stops at Russell (Russell House), in a mountainous town. Station, Huntington and Chester, after which the line passes into Berkshire County (see Route 23). Beyond the borders of Berkshire and of Massachusetts the line enters New York State, and connects at Chatham with the Hudson and Boston R. R. and the Harlem R. R. From Chatham, it runs N. W., through Kinderhook and Schodack, to Greenbush, and thence crossing the Hudson on a noble bridge, enters the city of Albany.

Connections are here made with the New York Central R. R. for the West, and with other routes for New York, Saratoga Springs, &c. Also with the Hudson River boats. From Albany to Utica, 95 M.; to Rome, 109 M.; to Syracuse, 147 M.; to Rochester, 250 M.; to Buffalo, 297 M.; to Niagara Falls, 305 M.; to Detroit, 536 M.; to Chicago, 820 M. These distances are calculated on the N. Y. Central R. R., and the Lake Shore and Michigan Southern R. R. (via Toledo and Cleveland), which it meets at Buffalo. By the same route and the shortest lines beyond, the whole distance from Boston to Niagara Falls is 507 M.; to Chicago, 1,022 M.; to St. Louis, 1,302 M.; to Omaha, 1,515 M.; to San Francisco, 3,429 M.

23. The Berkshire Hills.

This district will be considered in connection with its railway system, whose various lines will be treated of independently of their connections beyond the county limits.

The Berkshire Hills form a beautiful and picturesque district of mountains and lakes, abounding in charms for the lover of nature. Thousands of city people flock hither every summer, and rest and relax amid scenes so peaceful and attractive. The best time for a visit here is in October, "when the holiday hills lift

their wreathed and crowned heads in the resplendent days of autumn." Says Beecher of this season in Berkshire, "Have the evening clouds, suffused with sunset, dropped down and become fixed into solid forms? Have the rainbows that followed autumn storms faded upon the mts., and left their mantles there? What a mighty chorus of colors do the trees roll down the valleys, up the hill-sides, and over the mts.

"From Salisbury to Williamstown and then to Bennington in Vermont, there stretches a county of valleys, lakes, and mts., that is yet to be as celebrated as the lake-district of England, or the hill-country of Palestine."

Another writer says: "Berkshire is a region of hill and valley, mt. and lake, beautiful rivers and laughing brooks, — the very Piedmont of America." Godfrey Greylock naively writes, "Somebody has called Berkshire the Piedmont of America. I do not know how just the appellation may be, but I do know that if Piedmont can rightly be called the Berkshire of Europe, it must be a very delightful region."

The route from Boston to Central Berkshire is by the Boston and Albany R. R. Distance to Pittsfield, 151 M.; fare, \$4.35.

The route from New York to Berkshire is by the Housatonic R. R. Distance to Pittsfield 166 M. Pittsfield is 53 M. from Springfield and 51 M. from Albany.

"That section of the Western R. R. which traverses the wild hills of Berkshire is a work of immense labor, and a wonderful achievement of art. After leaving the wide meadows of the Conn., basking in their rich inheritance of alluvial soil and unimpeded sunshine, you wind through the narrow valleys of the Westfield River, with masses of mts. before you, and woodland heights crowding in upon you, so that at every puff of the engine the passage visibly contracts. The Alpine character of the river strikes you. At Chester you begin your ascent of 80 ft. in a mile for 13 M. The stream between you and the precipitous hillside, cramped into its rocky bed, is the Pontoosne, which leaps down precipices, runs forth laughing in the dimpling sunshine, and then, shy as a mountain nymph, it dodges behind a knotty copse of evergreen. In approaching the summit-level you travel bridges built a hundred feet above other mountain streams, tearing along their deep-worn beds; and at the 'deep cut' your passage is hewn through solid rocks, whose mighty walls frown over you."

"We have entered Berkshire by a road far superior to the Appian Way. On every side are rich valleys and smiling hillsides, and deep set in their hollows lovely lakes sparkle like gems." (MISS SEDGWICK.)

While staging through this part of Berkshire, early in this century, Captain Marryatt, the English novelist, derided the madness of "certain crazy spirits who have conceived the idea of constructing a railroad through this savage region."

From Tekoa Mt. to Washington Summit the track rises 1,211 ft., or 82 ft. in a mile in some long stretches. The first station is *Becket*, in the N. of a large town abounding in lakes, from one of which flows Farmington River, which makes glad so much of Northern Conn. 10 M. S. of Becket Station is Otis (two inns), with the island-studded Great Lake. Station, *Washington*, among the hills which the Indians called Tukonick. The village is S. of the station in a pretty valley. Station, *Hinsdale*, in a

large town (so named in honor of its first pastor) which is "more pleasing to the lover of fine mountain scenery, exhilarating breezes, and crystal fountains, than to the farmer in quest of fortune." The mts. here recede from the line of the track, and the tall hills of Peru are seen on the E. (r.). Station, *Dalton* (Eagle Hotel), originally named Dale-town, which has large paper-factories. From Dalton a highway leads to Windsor (Cleveland House) 7 M. N. E.; the Indian "Ouschaunkamaug," a loftily situated village in a town rich in Saxony and Merino sheep, and "noted for the longevity of its inhabitants." About 3 M. from Dalton, on the Windsor road, are the Wahconah Falls, where a mt. stream falls in 3 leaps over an 80-ft. cliff of gray marble. 5 M. beyond Dalton the train passes Silver Lake, and stops at the costly and handsome station in **Pittsfield**.

Hotels. American House, on the Main St., 120 guests, at \$10-15.00 a week; Burbank House, opposite the station, \$9-12.00 a week. Good restaurant in the station.

Pittsfield is a beautiful city of 11,113 inhabitants, and is the centre and capital of Berkshire County. It was settled about the middle of the last century (1752) on the Indian domain of Pontoosuc, and in 1761 it received its present name, in honor of William Pitt, the English statesman and friend of America.

In 1844 the Berkshire Jubilee was held here, calling in thousands of the sons of the county from all parts of the Union; and on Sept. 24, 1872, the largest multitude ever seen in Berkshire gathered here at the dedication of the **Soldiers' Monument**. At sunrise the church-bells rang, and 37 guns were fired, and the procession included 8 bands of music, detachments from 9 veteran regiments, the 2d Mass. Militia reg., and 2 Commanderies of Knights Templar. G. W. Curtis was the orator of the day. "The soldiers' monuments of the late war, happily arising in every town and in every village, with the beautiful rites of Decoration Day, hallowing the memory of heroes, are like the spring of liberty, flowing everywhere in the land." The monument consists of a massive pedestal on which is a bronze statue of a lithe young soldier in fatigue uniform, standing at rest, with his left hand holding a flag-staff, and the right hand high up in the folds of the flag. This "Color-Bearer" was designed by Launt Thompson, and cast from the metal of 5 cannon given by Congress for the purpose. The pedestal contains the names of 5 officers and 90 men who died in the field, out of 1,250 who enlisted at Pittsfield.

"A voice from lips whereon the coal from Freedom's shrine hath been,
Thrilled, as but yesterday, the hearts of Berkshire's Mountain men;
The echoes of that solemn voice are sadly lingering still
In all our sunny valleys, on every wind-swept hill.

And sandy Barnstable rose up, wet with the salt sea spray;
And Bristol sent her answering shout down Narragansett Bay;
Along the broad Connecticut old Hampden felt the thrill,
And the cheer of Hampshire's woodmen swept down from Holyoke Hill.

No slave-hunt in our borders — no pirate on our strand!
No fetters in the Bay State — no slave upon our land!"

WHITTIER.

The monument stands in the Park, a green in the midst of the city, which is called the heart of Berkshire.

Here, in the centre of an elliptical line of trees, stood the Old Elm, with its 90 ft. of smooth shaft, and concentric rings representing 340 years of growth. After being twice thunder-smitten, the Old Elm became un-

safe, and was taken down in 1864, amid the mourning of the county. On one side of the Park is the Congregational Church (of stone), where Dr. John Todd (a powerful and prolific writer) preached, 1842-70. Next to it is St. Stephen's Episcopal Church. At the end of the Park is the elegant white marble ***Court House**, which, together with the Jail (in another street), cost \$ 400,000. Near the Court House, and fronting the Park, is the building of the Berkshire Athenæum, containing a fine library and collections of local curiosities. On the corner of North and West Sts., near the Park, is the noble building of the Berkshire Life Insurance Co. On the main street are some fine business buildings, and beyond the American House is the small but handsome marble Cathedral of St. Joseph. The French residents have, also, a Catholic Church for their hundred families, and there is also a German Lutheran Church. Beyond St. Joseph's is the Maplewood Institute (for young ladies), "whose graceful chapel, gymnasium, and half ivy-covered dwellings gleam white through groves and avenues of famed attractiveness." The Springside School (for boys) is on the borders of Pittsfield, in pleasant grounds. At one end of the main street is the building of the Berkshire Medical Institute, established in 1821 as an appanage of Williams College, but long ago discontinued. The Innisfallen Greenhouse (500 ft. long) has a high reputation, and in the W. suburb is the Pittsfield Pleasure Park, with a race-course, games &c. The city is situated on a plateau 1,000-1,200 ft. above the sea, and surrounded by lofty hills, the Taconics on the W. and the Hoosacs on the E. Beautiful villas abound in the suburban streets, and extensive manufactures of cotton and woollen cloths, fire-arms, and cars furnish employment for the foreign population. The city is supplied with water from Lake Ashley, a little romantic loch which lies upon the summit of Washington Mt. (1,800 ft. high), 7 M. to the S. E. Near this lake is West Pond, from which Roaring Brook flows down through Tories' Gorge to the Housatonic.

Lake Onota (683 acres) is about 2 M. W. of Pittsfield. From the hill where Ashley's Fort stood, a fine view is enjoyed, but the best prospect is from a long point running from the N. shore, to which locality belongs the legend of "The White Deer of Onota."

Pontoosuc Lake, "the haunt of the winter deer" (575 acres), is 3-4 M. N. of Pittsfield, on the road to Williamstown (20 M.).

Berry Pond is to the N. W. in Hancock. "Berry Pond does not derive its name from the strawberries, blackberries, and raspberries, which by their abundance in the vicinity would justify the appellation, but from an obscure, stout-hearted man who once dwelt upon its border, and wrung subsistence for a large family of girls out of the margin of its rocky chalice. Nothing can exceed the beauty of this pond. Its margin is sometimes a beach of silvery sand, strewn with blocks of snowy quartz and delicate, fibrous mica; again grassy and green to the water's edge; and yet again fringed with long eyelashes of birch and hazel-trees, that dreamily gaze at their reflection in the mirror." (TACONIC.)

South Mountain is 2-3 M. S. of Pittsfield. From its S. summit Greylock

is seen in the N., Mount Oceola and Perry's Peak in the W., the Lenox Mt. in the S., and the Mts. of Washington in the E. The city is close at hand in the N. with Lake Onota at its side. Nearer is Melville Lake, or Lilly Bowl, near Lilly Ope, so named from an old Meg Merrilies of a hermitess named Lilly, who once lived in the valley.

In the mts. N. W. of Pittsfield, and distant several miles, are some romantic points. Below Mt. Honwee is the Promised Land, a name given with grim New England humor to a tract of land for which grants were long promised and longer delayed. On its W. summit is a pretty lakelet whence Lulu Ope (or valley) may be descended to Lula Cascade, "a foam-white column which finds its base in a circular pool of black and glossy surface, overhung by a gray old boulder, and by masses of tangled foliage." S. of the Promised Land is the Ope of Promise, the nearest (though arduous) path to Berry Pond. Then comes Arbutus Hill and Ope, which are covered with arbutus in May, and beyond them is Old Tower Hill, with a tower which commands a broad view.

S. of the Lebanon road (which runs through Lilly Ope) is Doll Mt., where the Shakers formerly worshipped, and which they called Mt. Zion. Silver Lake is in the E. environs, and Sylvan Lake is 2-3 M. E. of the city. The larger lakes hereabouts are prolific in pickerel, but the trout have been nearly exterminated.

O. Wendell Holmes long resided at a villa 2 M. N. of the city, on a small farm remaining from 24,000 acres purchased by his grandfather in 1735. Near him lived Herman Melville, the rover, and author of sea-novels. "White Jacket," "Moby Dick," and other works were written here, where he resided 1850-60.

William Allen, D. D., the pastor, poet, and biographer (1820-39 Pres. of Bowdoin College), was born at Pittsfield in 1784. William Miller was born here in 1781. In 1833 he began to harangue the people in different cities, prophesying the coming of the millennium in 1843. He built up a large sect, which fell to pieces when the appointed day passed and was seen to be like other days.

Near the station of Richmond are the remarkable geological phenomena of Richmond Valley, consisting of seven parallel lines of boulders, stretching across the valley from Perry's Peak to Lenox Mt. in a S. E. direction. This feature was carefully studied by Sir Charles Lyell (in two visits), and is mapped and described in his "Antiquity of Man." Perry's Peak is famed for its superb over-view.

To New Lebanon Springs is a favorite excursion from Pittsfield. By the highway the distance is 12-15 M. ; the railroad route is circuitous, being by the Albany line to Chatham, and thence up the Harlem Extension R. R.

Hotel.—Columbia Hall, a fashionable and elegant summer-house.

The thermal springs at New Lebanon have won an excellent reputation for their efficacy in diseases of the skin and liver. The flow of the waters is very large, and its temperature is about 73°. There are many fine drives and walks in this vicinity, the favorite of which is to the Shaker Village, about 2 M. distant.

The Shakers originated from a French sect which came to England in 1706, and Ann Lee, of Manchester, the daughter of a blacksmith and the wife of a blacksmith, joined them in 1758. In 1770, after emerging from a madhouse where she was confined for reviling matrimony, she announced, "I am Ann, the Word," and soon after came to America, and was made the "Spiritual Head" of the sect. In 1780 she produced a revival at New Lebanon, and converted many to Shakerism, soon after which the sect established its head-quarters there, and in 1795 accepted the commonwealth covenant. She claimed the power of working miracles, and held that Christ's coming was not the fulfilment of "the desire of all nations, but that the second Divine advent must naturally be manifested in that particular object, to wit, woman, which is eminently the desire of all nations." Mother Ann made New Lebanon "the capital of the Shaker world, the rural Vatican which claims a more despotic sway over the mind of man than ever the Roman Pontiff assumed." On her death a peculiar hierarchy assumed the government. The First Elder, the successor of Mother Ann, appoints the second elder, and the

first and second elders. These four, called the "Holy Lead," remain secluded in the church at Lebanon, and appoint subordinate clergy, including one elder in each family. Their Scriptures are contained in the "Holy Laws" and Order Book, which are claimed as works of inspiration, and as partly dictated by the Recording Angel, although they may be amended or rescinded by the Holy Lead. Unlike other sects, the Shakers claim that men may join their church after death, and among other illustrious posthumous members, they count Washington, Lafayette, Napoleon, Tamerlane, and Pocahontas. "By frugality and industry they give us many useful things, but they do not produce what the Republic most needs, — men and women."*

The sect has been declining since the death of its great head and her disciples, because it has no powers of internal development. There are many Shaker villages in the N. Atlantic States, but the community at New Lebanon has dwindled to 20–30 members.

3 M. S. W. of Pittsfield (by R. R.) is a Shaker village, near Richmond Pond, and a little way to the N. of it is a mountain (in Hancock) where the devotees of this faith formerly held their weird meeting. Their tradition states that here on Mt. Sinai, the Shakers hunted Satan throughout a long summer night, and finally killed and buried him. Over his grave, to this day, Washington and Lafayette keep guard, mounted on white horses, and are seen on summer nights by the faithful who chance to pass their ancient shrine.

From Pittsfield the Housatonic R. R. runs through Southern Berkshire. "Of all the railroads near New York none can compare, for beauty of scenery, with the Housatonic from Newtown to Pittsfield, but especially from New Milford to Lenox." (BEECHER.) Fredrika Bremer speaks of "the wonderfully picturesque and sometimes splendidly gloomy scenery" along the line of this railroad. By this route it is 8 M. to **Lenox** Station (passing South Mt. on the r.), from which stages ascend to the village in 2 M. By a fine carriage road it is 6 M. S. of Pittsfield.

Hotels. Curtis's Hotel accommodates 80–100 guests at \$4.00 a day, with considerable reductions for a long stay. There are several large summer boarding-houses here (Mrs. Flint's, Mrs. Clark's, &c.), more quiet and inexpensive than the hotel, and some of them better situated.

"**Lenox**, known for the singular purity and exhilarating effects of its air, and for the beauty of its mountain scenery. If one spends July or October in Lenox, he will hardly seek another home for the summer. The church stands upon the highest point in the village, and if, in summer, one stands in the door and gazes upon the vast panorama, he might, without half the Psalmist's devotion, prefer to stand in the door of the Lord's house to a dwelling in tent, tabernacle, or mansion." So says Beecher, whose "Star Papers" were written during his summer visits to Lenox, in a house which stood near the site now occupied by Gen. Rathbone's mansion.

Fredrika Bremer wrote, "The country around Lenox is romantically lovely, inspired with wood-covered hills and the prettiest little lakes."

This "gem among the mountains" (SILLIMAN) was settled in 1750, and received the family name of the Duke of Richmond. It is situated on a high hill, and contains the old Court House (which now has a library and reading-room) and numerous villas pertaining to gentlemen of Boston and New York. Fanny Kemble (Butler) long resided here, and wished to be buried in the graveyard on the hill, saying, "I will not rise to trouble any one if they will let me sleep here. I will only ask to be permitted, once in a while, to raise my head and look out upon this glorious scene";

* Much of the foregoing account has been condensed from Dwight's *Travels*. The editor does not know whether the government remains now in the same form.

and Beecher adds, "May she behold one so much fairer that this scenic beauty shall fade to a shadow." Lenox is the healthiest town in Berkshire, and is 1,300 ft. above the sea-level. 600 summer visitors remained here through the summer of 1872.

Bald Head is 2-3 M. from the village (carriage-road to the top). From this point is seen the rich Stockbridge Valley, the Bowl (Lake Mahkeenac), and the wide Housatonic valley on the S., with Laurel Lake and Rattlesnake Mt. on the S. E. On the N. and W. are Lenox and Oceola Mts., on the N. is South Mt., and on the E. are the tumultuous hills of Washington, "a view wide, rich, and joyous."

The *Stockbridge Bowl* and *Laurel Lake* are S. W. and S. E. of Lenox, — each being 3-4 M. distant (see Stockbridge and Lee). A pretty view of Laurel Lake is gained from the first hill S. of the village, with Lenox Furnace near it on the l.

Perry's Peak is 6-7 M. distant, passing Lenox Mt. and Richmond Valley. This lone summit, which stands on the frontier of New York, is 2,100 ft. high, and overlooks the Hudson, the Catskills, and the Green Mts. New Lebanon, "the Shaker capital, and Gretna Green of Mass.," is but 7-8 M. beyond the Peak.

At Lenox Furnace, 2 M. S. E. of the village, on the R. R., are extensive glass-works, where, among other varieties, the best quality of plate-glass is made, from pure granulated quartz.

Other excursions are to the Ledge, the Pinnacle, and Richmond Hill. The sunset view from Church Hill (at the N. end of the village) is one of great beauty, embracing even the distant Greylock.

Lee is $4\frac{1}{2}$ M. S. E. of Lenox, by the highway, and 5 M. by stage and R. R. Hotels, Morgan House ; Strickland House (in E. Lee).

Lee was settled in 1760, and was named for one of the Virginian Lees, who were so distinguished in the Continental Army. Paper-making was early commenced here, and now the business has assumed vast proportions. But the town is most widely known for its excellent white marble, of which \$1,000,000 worth was used in building the U. S. Capitol at Washington. The quarries are close to the village on the S., and lie between the R. R. and the river. The State fronts the sea with a line of granite and greenstone, while it fronts to the W. with hills of gneiss, slate, and marble. The Lee and Hudson, and Lee and New Haven Railroads are projected routes, which, if finished, will increase the importance of the town and diminish the romance of the Berkshire Hills.

Laurel Lake is a pretty sheet of water 2 M. N. of Lee, that should be visited in the late afternoon to catch "the delicate evening lights that glance from its tranquil surface."

The Yokum Ponds are among the hills a few miles S. E. of the village, and near the romantic Monterey road. The numerous summer visitors at Lee make excursions to Stockbridge (4 M.), Lake Mahkeenac (4-5 M.), Tyringham and Monterey, (11 M.), and Lenox ($4\frac{1}{2}$ M.).

Stockbridge

(Stockbridge House, 70-80 guests, open only in summer. \$3.00 a day, \$12-18.00 a week) is 6 M. from Lee by R. R., and 4 M. by the highway. Stockbridge is one of the fairest of what Gov. Andrew called "the delicious surprises of Berkshire." It is "famed for its meadow-elms, for the picturesque beauty adjacent, for the quiet beauty of a village which sleeps along a level plain just under the rim of the hills." (BEECHER.) The hotel fronts on the wide, main street; to its l. is a beautiful little marble fountain from Italy; and before it is the quaint and picturesque Episcopal Church, of ivy-grown and weather-stained wood, with its sweet and deep-toned bell. On a verdant lawn near the church is a brown-stone shaft with sculptured trophies, inscribed, "To her sons, beloved and honored, who died for their country in the great war of the Rebellion, Stockbridge, in grateful remembrance, has raised this monument." On the same side of the street, to the W., the fourth house is the ancient house where Edwards wrote his famous treatise on "The Freedom of the Will." Some distance beyond is the Congregational Church, with a large cemetery in front of it. On the Green near by is a fine memorial monument to Edwards, built of polished Scotch granite.

On the main st., E. of the hotel, is the Jackson Library, a neat little stone building containing 4-5,000 volumes, a cabinet of minerals, certain relics of Edwards, and a marble tablet, on which are inscribed the names of 134 officers and men who went from Stockbridge to the Secession War. On the street diverging from the Library is a small Catholic Church of marble. Beyond the Library is the old Academy with a long semicircle of elms in front, a copy, in living trees, of the stone porticos before St. Peter's Church in Rome. Back of the Academy is Laurel Hill, with a turf rostrum in a glen surrounded by trees and rocks. Here in late August of each year meets the Laurel Hill Association, devoted to preserving, protecting, and increasing the beauty of the village and its environs. On the heights above the village are the mansions of David Dudley Field (for 40 years a prominent N. Y. lawyer and jurist), H. M. Field, D. D. (author, and for many years editor of the "Evangelist"), Ivison (the publisher), Prof. Joy (of Columbia College), and the old Mission House, built by "the Great and General Court of His Majesty's Province of Massachusetts Bay" early in the last century. The view from these heights, especially about sunset, is one of the most beautiful in nature (it was pronounced by Dr. McCosh equal to any in Scotland), embracing the rich valley of the Housatonic to the E. and W., with the valley of Konkapot River stretching away in the S. to Monument Mt., Bear Mt. rising close on the l. and the tufted Evergreen Hill dividing the valley.

A great people crossed deep waters from a far-distant continent in the N. W. and marched by many pilgrimages to the sea-shore and the valley of the Hudson.

Here they built cities and lived, until a great famine scattered them and very many of them died. Wandering for years in quest of a precarious living, "they lost their arts and manners," and a part of them settled by the Housatonic River. Such were traditions of the Muhhekanew Indians told to President Dwight. In 1734 the colony established a mission, and sent John Sergeant to teach the Muhhekanews ("people of the great moving waters") at their village of Houssatonnuc, which was named Stockbridge. This tribe was ever friendly to the English, and gladly received the Gospel, first from the teachings of Sergeant, who labored here 1734-49, and translated the New Testament, and part of the Old, into their language. In 15 years he baptized 129 Indians. He was succeeded by Jonathan Edwards (preaching by interpreters, 1751-7), who in turn was succeeded by Stephen West. Many of the Indians enlisted in the Continental Army, and a company of them won high distinction at the battle of White Plains. In 1751 there were 150 Indian families here, and but 6 English families; but by 1783 the balance had changed, and John Sergeant's son, then their pastor, led the tribe to New Stockbridge, on land given by the Oneida tribe, in Western New York. About 400 people were numbered in this emigration. They remained there 34 years, and then moved to Wisconsin, where they stayed 17 years more, and about the year 1840 moved to the vicinity of Leavenworth, in Kansas. Where they have been crowded to since, this record cannot tell.

In 1669 the great Sachem Checkatabut, head of the Massachusetts Indians, with 700 warriors, marched from the sea to the Hudson on a campaign against the Mohawks. The latter, concentrating their forces at the great tribal fortress, repelled all assaults and made fierce sorties, until the men of Massachusetts, finding their provisions failing, and the whole country rising about their ears, beat a retreat. Their march was probably directed on Stockbridge, as being the seat of a rich, peaceful, and friendly tribe, where they could hope to get food and aid. But a powerful force of Mohawks, by a forced march, got ahead of them and laid an ambush among the dense forests and rugged ravines of the Taconics (Taghkanak, "the wood place," or "Forest Hills"). The retreating warriors fell into the snare, and in the long and desperate conflict which ensued, Checkatabut and 58 of his sagamores were killed, together with a great portion of the men. Only a handful succeeded in reaching the coast again.

At the close of King Philip's War, the remnants of the insurgent confederation took refuge in the S. Berkshire Hills. But Talcott's "Flying Army," from the E., and the Mohawks, from the W. made such devastating inroads upon them that they speedily made their submission.

Among the natives of Stockbridge are H. M. Field, D. D., the editor; Cyrus W. Field, the projector and organizer of the Atlantic Telegraph Cable; E. Bacon, the jurist; J. S. Hart, the author; and Caroline M. Sedgwick, the popular authoress of "Redwood," "Hope Leslie," &c.

Jonathan Edwards, the greatest of American metaphysicians, was born in Conn., 1703, and a ter 30 years of preaching he settled at Stockbridge. Here he wrote the remarkable treatise on "The Freedom of the Will," in whose close and subtle argument he maintained "that philosophic necessity was compatible with freedom of the will, rightly defined, and with human responsibility. Tall and slender in person, he had a high, broad, bold forehead, piercing and luminous eyes, and a countenance indicative of sincerity and benevolence." The great religious awakening which convulsed the frozen churches of New England before the middle of the last century was largely caused by his marvellous sermons, unevadable in their directness, incontrovertible in their logic, and terrific in their lurid earnestness. Probably no preacher since Chrysostom has had such power of striking convulsive terror into an audience; and this he did simply by his words and by his intense earnestness, and without any of the graces or artifices of oratory.

While President of New Jersey College, Edwards died (1758), leaving "The Freedom of the Will," "The Religious Affections," and "The History of Redemption," as his great monuments. These, and his other writings, including many sermons, fill 10 octavo volumes.

"These three, Augustine, Calvin, and Jonathan Edwards."

* **Lake Mahkeenac** (Stockbridge Bowl) is 3-4 M. N. of the village by admirable roads. This is a beautiful, calm lake, surrounded by hills, and

with the village and spire of Curtisville peering above the trees on the S. The best way is to go up by the road on the heights, leaving Mahkeenac on the l. and passing around its N. end, return on a road W. of the Lake through Curtisville. 5 min. walk from the latter village is a beautiful little tarn called Lake Averick, or *Mountain Mirror*. Hawthorne lived in a little red farmhouse near Mahkeenac for a year and a half (1850-51), but remembered the many-sounding sea on whose shores he was born and had lived, and says but little about this mountain-water. But he found rare pleasure in watching the mountains themselves. "In its autumn hues, Monument Mt. looks like a headless sphinx wrapped in a rich Persian shawl"; "this valley in which I dwell seems like a vast basin filled with sunshine as with wine; and the changes of the seasons on Monument and Bald Mts., and the black-purple dome of Taconic, with the winter sunset which has a softness and delicacy which impart themselves to a white marble world."

* **Monument Mt.** is 3-4 M. from Stockbridge. The Great Barrington road is followed to the top of the ridge, then a wood-road diverges to the r. When $\frac{3}{4}$ M. from the N. summit a path is taken which conducts to Pulpit Rock, the Profile (beyond the N. summit), &c. On the E. side is a white quartz cliff of vast depth, detached from which is the Pulpit. From the summit a noble * view is gained, embracing the Housatonic Valley for many leagues, with its fair villages and mountain-walls, while the Green Mt. and Greylock tower in the N. and the Catskills may be seen in the W., if the day is clear.

"To the north a path
Conducts you up the narrow battlements.
Steep is the western side, shaggy and wild,
With many trees and pinnacles of flint,
And many a haughty crag. But to the east
Sheer to the vale go down the bare old cliffs,
Huge pillars that in middle Heaven uprear
Their weather-beaten capitals — here dark
With the thick moss of centuries, and there
Of chalky whiteness, where the thunderbolt
Hath smitten them." — BRYANT.

The Mt. derives its name from a cairn which was made of stones, to which each passing Indian added a stone. The legend states that it was raised over a beautiful maiden who passionately loved her cousin, and being forbidden by the Indian laws to marry him, she threw herself from a lofty cliff and was dashed in pieces.

Icy Glen is about $1\frac{1}{2}$ M. from Stockbridge, by the road crossing the R. R. just to the l. of the station, — and leaving the road near some houses at the mt. foot, go up into a romantic glen, with seats arranged about it. From this point a wild chaos of rocks, caverns, and trees extends through a long ravine, where ice is found in July. This is the N. end of Bear Mt., on whose top an observatory has been raised, commanding a neat view. It is gained by crossing the river on a wire foot-bridge near the Main St., and taking a pleasant forest-path up the slope.

Excursions are made from Stockbridge to Lee, Lenox, Great Barrington, and Mt. Everett, also to the romantic and desolate town of Monterey (11 M. S. E.).

"If you wish to be filled and satisfied with the serenest delight, ride to the summit of this encircling hill-ridge" (above Stockbridge) in a summer's afternoon, while the sun is but an hour high. The Housatonic winds, in great circuits, all through the valley, carrying willows and alders with it wherever it goes. The

horizon on every side is piled and terraced with mountains. Abrupt and isolated mountains bolt up here and there over the whole stretch of plain, covered with evergreens." (BEECHER.)

Great Barrington is S. of Stockbridge, 8 M. by R. R., $6\frac{1}{2}$ M. by highway.

Hotels: **Berkshire Hotel**, a roomy old stone building, \$10-14.00 a week; **Miller's Hotel**. This "is one of those places which one never enters without wishing never to leave. It rests beneath the branches of great numbers of the stateliest elms." (BEECHER.) Fine macadamized roads are built around the place, on which excursions are made to Monument Mt. (4 M.), Monterey (8 M.), and Sheffield (6-7 M.). In the vicinity is a curious rock formation called Purgatory, while a path leads to the top of E. Mt. in 2 M. The *Berkshire Soda Springs* (small hotel) are about 3 M. to the S. E., amid wild scenery. Several fine villas are in the outskirts of the village, and the Cong. and Epis. churches, on the main street, are fine buildings.

A daily stage runs to New Marlboro' (Centre House), which has a large cave with stalactites, a rocking stone of 30 tons, and Hermit Pond, near which a lone hermit lived from 1770 till his death, in 1817. He was a woman-hater, and epitomized the female character thus:—

"They say they will, and they won't;
What they promise to do, they don't."

W. of New Marlboro' is Sandisfield, with Seymour and Hanging Mts. and Spectacle Ponds. Here was born Col. John Brown (1744), a brave partisan officer in the Revolutionary War, whose fearless and fanatical Puritan grandson, John Brown, invaded the powerful State of Virginia at the head of 20 men (Oct. 16, 1859), intending to become the liberator of the slaves of the South. The Virginian militia gathered quickly, attacked him at Harper's Ferry, killed most of his men (including his two sons), and captured the wounded leader. He was hung, according to the sentence of the law, in November, "and met death with serene composure."

A daily stage runs from Great Barrington to N. and S. Egremont, 4-5 M. S. E. The Mt. Everett House, in S. Egremont, is a small and secluded summer-hotel, situated about 5 M. from the lofty Mt. Everett, and in a thinly settled town abounding with lakes. The ascent of **Mt. Everett** is "along a vast, uncultivated slope, to the height of nearly 2,000 ft., when you reach the broad valley where the few inhabitants reside, in the centre of a vast pile of mts." The town has but 256 inhabitants. Dr. Hitchcock thus describes the *view from Mt. Everett: "You feel yourself to be standing above everything around you, and possess the proud consciousness of literally looking down upon all terrestrial scenes. Before you on the E. the valley through which the Housatonic meanders stretches far N. in Mass., and S. into Conn.; sprinkled over with copse and glebe, with small sheets of water and beautiful villages. To the S. E. a large sheet of water appears, of surpassing beauty. In the S. W. the gigantic Alander, Riga, and other mts. more remote, seem to bear the blue heavens on their heads in calm majesty; while stretching across the far distant W. the Catskills hang like the curtains of the sky. O what a glorious display of mts. all around you! This is certainly the grandest prospect in Mass., though others are more beautiful."

Mt. Washington town was an appanage of the great Livingston Manor, of New York, and was first settled by the Dutch, as were Egremont, Great Barrington, Sheffield, and Salisbury. The tourist may wonder at the apparent lack of originality displayed in the name of the town, but without reason, since this is the first of the many American towns named in honor of the great Virginian, its name having been given by the State Legislature in 1776, as being a fitting title for the loftiest town in Massachusetts.

In Egremont occurred the last engagement in Shays' rebellion, when the insurgents, after plundering Stockbridge, were attacked here by the Great Barrington militia, and 40-50 were killed and wounded.

Bash-Bish Falls (see Salisbury, Conn.) are about 10 M. from the Mt. Everett House, by a road running down through Mt. Washington, and around Cedar Mt. The views of Mt. Everett, Elk, Alander, and Cedar Mts. are fine.

6 M. S. of Great Barrington is **Sheffield** (Miller's Hotel, small), "full of rural simplicity and beauty, richly decorated with lovely valley and majestic mountain scenery." It is a quiet village, with a broad, shady street, in a rich intervale of the Housatonic, and is chiefly noted for its marble, of which Girard College (Philadelphia), with its huge columns, was built. Picturesque roads run S. into Salisbury, and N. W. into Egremont.

Bishop Janes, of the Methodist Church; D. D. Barnard, 8 years M. C. and Minister to Prussia, 1849-53; F. A. P. Barnard, President of Columbia College since 1864; H. D. and T. Sedgwick, lawyers, the latter of whom was derided for introducing a bill in the Legislature, projecting a railroad from Boston to Albany (1827); Chester Dewey, D. D., clergyman and botanist; Orville Dewey, D. D., the Unitarian divine; and Judge Daniel Dewey, — were natives of Sheffield.

Northern Berkshire

is approached from Pittsfield by the Pittsfield and N. Adams Branch R. R. There is also a romantic road leading through the western valleys and remote from the R. R., passing Pontoosuc Lake, and then through the glens between the Saddle-Back Range and that line of mts. which stretch from Old Tower Hill to the tall peak of Berlin Mt. This road passes through the villages of Lanesboro, New Ashford, and S. Williamstown. The R. R. first crosses part of *Lanesboro* (station, Berkshire, 2 small hotels), a town which has beds of snow-white granular quartz, used here in the manufacture of superior cylinder glass. Variegated marble also abounds here. In 1676 King Philip attacked Lanesboro with 1,500 men, and effected its destruction. H. W. Shaw was born in this town in 1818, and has since 1863 attained a high reputation as a humorist, under the name of "Josh Billings." The line here enters the valley of the Hoosac River, which it follows to N. Adams. *Cheshire* is the next town, in a fertile alluvial valley surrounded by lofty hills. This town is famous for its dairies, and in 1802 its people sent as a New Year's gift to President Jefferson a mammoth cheese weighing 1,450 pounds. Before reaching Cheshire Harbor the great Saddle-Back Range begins, on the W., about 2 M. from the track. A road leads from Cheshire Harbor E. into Savoy, a wild mt. town, with one small village called Savoy Hollow (Green Mt. House).

S. Adams (the birthplace of Susan B. Anthony) is next reached. From S. Adams is the shortest and easiest of the routes to the top of the majestic Greylock Mt. which towers over the valley. This is the highest mt. in Mass. and commands a * view "immense, and of amazing grandeur."

The road runs W. and then N., crossing a spur of the mt., from which pretty views of the valley of the Hoosac and its villages are gained. Descending now over a very rough road, the Notch (sometimes called the Bellows Pipe, from the gusts which draw through it) is entered. The mt. just crossed is called Mt. Hawks. At Walden's house the Notch road is left, and Mt. Williams is rounded on its N. side, then the clearing between Mts. Williams and Prospect is passed; the long W. slope of a ridge is ascended, and after a southerly walk the summit is attained. A straighter and simpler, though less picturesque, way is right up the S. slope from S. Adams.

The summit of Greylock is partially cleared, and overlooks the valley of the Hoosac on the N. with its villages, and the peaks of the Green Mts. beyond. N. of E. and S. of E., nearly 60 M. away, are Mts. Monadnock and Wachusett; due S. E., nearly 40 M. distant, are Mts. Tom and Holyoke. Southward are the many peaks of the Berkshire Hills, bounded by Mt. Everett, with Pittsfield and its lakes, and other villages and towns. S. W. are the Catskills, and it is thought that the Mts. in the N. W. are those which environ Lake George. Saddle Mt. and Saddle Ball are close to Greylock, and respectively N. and S. The paths to the summit of Greylock are difficult and easily lost, and the excursion will require a long day.

N. Adams (* Wilson House, expensive and first-class, with 100 rooms, built by Wilson, the sewing-machine inventor; Berkshire House) is a prosperous manufacturing village, on the Hoosac River. It has 20 cotton and woollen mills, and various other industries, employing 3,600 hands, and turning out \$7-8,000,000 worth of goods a year. Some neat villas and a fine high-school house have been built, and the town expects great benefit when the Hoosac Tunnel is done, by the junction of railroads here. The population in 1870 was 12,092.

About 1 M. from the village (to the E.) is the *Natural Bridge*, on Hudson's Brook, where the waters have worn a passage through the solid rock 30 rods long and 15 ft. wide, leaving an arch of stained marble above it at a height of 30-60 ft. This cavernous passage was a favorite resort of Hawthorne, who spent the summer of 1838 at N. Adams, and often bathed in the waters of the brook. "The cave makes a fresh impression upon me every time I visit it, — so deep, so irregular, so gloomy, so stern; part of its walls the pure white of the marble, others covered with a gray decomposition and with spots of moss, and with brake growing where there is a handful of earth. I stand and look into its depths at various points, and hear the roar of the stream re-echoing up. It is like a heart that has been rent asunder by a torrent of passion, which has raged and foamed, and left its ineffaceable traces; though now there is but a little rill of feeling at the bottom."

The Cascade in Notch Brook is about $1\frac{1}{2}$ M. from the hotel, and has a fall of 30 ft. It is situated in a pretty glen.

From the hill E. of the village are "various excellent views of mt. scenery, far and near," with "Greylock, appearing, with its two summits and a long ridge between, like a huge monster crouching down slumbering, with its head slightly elevated." Other fine prospects are gained from the various hills which surround the village.

2 M. S. is the W. end of the * **Hoosac Tunnel**. This stupendous piece of engineering is designed to furnish a shorter route by 9 M. than now

exists from Boston to the Hudson, with easy grades. By opening a new line to the West, it is hoped to reduce by competition the present high tariffs on through freight. The tunnel is to be $4\frac{3}{4}$ M. long, cut through the Hoosac Mt., whose vast bulk running N. and S. closed the way. The Nerthe Tunnel in S. France, and the Woodhead Tunnel in England, are each nearly 3 M. long; so the Hoosac Tunnel will be second only to that at Mt. Cenis, which is $7\frac{1}{2}$ M. long. The work is now undertaken by the State, and has been a fearful drain on the treasury, having already cost, since 1855, \$5-6,000,000, and half as much more will be needed to finish it. Less than 2,000 ft. of excavation now remains to be done, and it is thought that the E. and W. cuttings will meet by Nov., 1873. From a valley between the peaks of the Hoosac Mt. a great shaft has been sunk to the grade level, and the boring operations have been conducted in each way from this point toward the excavations at the E. and W. ends. In 1872, the cutting which was being made from the shaft westward met the tunnel from the W. end in the heart of the mountain.

The mountain consists of solid mica slate, except at the W. end, where great trouble was given by a soft, treacherous "porridge stone," through which a tube of brick 900 ft. long was built. The cuttings through the slate-rock are done by power drills propelled by compressed air (pressure of 6 atmospheres) and are afterwards exploded by nitro-glycerine.

Six-horse stages leave North Adams daily for the passage of Hoosac Mt. to the E. end of the tunnel (8 M.). After a long, slow ascent by zig-zag gradients, the W. crest of Hoosac is gained, with a view of Greylock in the S. W. and the broad sweep of the Taconic Hills from the parent range in Vermont to the blue and cloudlike southern peaks. S. Adams is plainly visible, and the valley of the Hoosac stretching W., and the broad, central valley of Berkshire running S. Descending the slope to the plateau, the buildings over the Central Shaft are seen. The lofty and winter-worn plateau is soon crossed and the E. summit is climbed.

A noble view is obtained from this point, above the romantic gorge of the Deerfield River to Wachusett Mt., "and beyond it the blue and indistinctive scene extended to the E. and N. for at least 60 M. Beyond the hills it looked almost as if the blue ocean might be seen. Monadnock was visible, like a sap-phire cloud against the sky. The scenery on the E. side of the Green Mts. is incomparably more striking than on the W. where the long swells and ridges have a flatness of effect. But on the eastern part, peaks 1-2,000 ft. high rush up on either bank of the river in ranges, thrusting out their shoulders side by side. Sometimes the precipice rises with abruptness from the immediate side of the river; sometimes there is a valley on either side; cultivated long and with all the smoothness and antique rurality of a farm near cities, this gentle picture is strongly set off by the wild mt. frame around it. I have never driven through such romantic scenery, where there was such variety and boldness of mt. shapes as this; and though it was a sunny day, the mts. diversified the view with sunshine and shadow, and glory and gloom." (HAWTHORNE.)

At Hoosac Tunnel station, at the E. foot of the mt., one meets the trains of the Vt. and Mass. R. R.

About 1 M. W. of N. Adams, and beyond the small factory village of Braytonville, the road to Williamstown crosses the railroad and the Hoosac River. Near this crossing a small elm is seen in a meadow about 20 rods from the track. This elm stands on the site of old *Fort Massachusetts*, "the Thermopylæ of New England." (EVERETT.)

This was built in 1744 as one of a cordon of forts to protect the frontiers. Fort Dummer guarded the N. route down the Conn. valley, and this fort was to block up the W. route through the Hudson, Hoosac, and Deerfield valleys. In 1746 Col. Williams and many men marched hence to Albany to join the army for invading Canada, but meanwhile the enemy had made a flank march, and the Chevalier de Vaudreuil attacked the fort at the head of 900 French and Indians. Sergeant Hawks and 22 men held the place for 48 hours against this overwhelming force, and only surrendered when every grain of powder was exhausted. The Franco-Indian force lost 47 men before the fort.

From Fort Massachusetts the highway, railroad, and river run through the narrow valley to **Williamstown** (Mansion House, 125 guests). This is a beautiful village situated in a fertile valley which is grandly mountain-walled. From its air of academic quiet it will be preferred as a summer-home to its neighbor, N. Adams, which is too prosperous to be still. The reason of Williamstown's being is **Williams College**, a flourishing institution (founded in 1793), with 11 instructors and 161 students. W. College and Kellogg Hall are opposite President Hopkins's house on the main street, and beyond them, to the E., is a cluster of buildings embracing the Chapel, Alumni Hall, the octagonal Lawrence Hall (containing a library of 12,000 volumes, many portraits of graduates, and some bas-reliefs from Nineveh), the E. and S. Colleges, the fine stone structure called Goodrich Hall, and Griffin Hall. Opposite the latter is a brownstone shaft sustaining the bronze statue of a soldier. It was erected in memory of the students of the college who died in the Secession War.

Col. Ephraim Williams, the founder of Williams College, was born at Newton, Mass., in 1715. He was lieutenant-colonel of the 8th Massachusetts Reg. at the siege of Louisbourg, in 1745, and commanded the trans-Connecticut forts from 1748 to 1755. In 1755, with his regiment, he joined Gen. Johnson's army, and while at Albany he made a will leaving his estate for the erection of a school in a town to be located W. of Fort Mass. to be called Williamstown. Shortly after, while marching with 1,200 men to engage Dieskau near Lake George, his command was ambushed and overpowered, and Col. Williams was killed. The school was established in 1790, in a brick building (the present W. College), and was chartered as Williams College in 1793. Its presidents have been Dr. E. Fitch (1793-1815), Dr. Z. S. Moore (1815-21), Dr. E. D. Griffin (1821-36), and Mark Hopkins, D. D., LL. D., an able and active writer and scholar.

Near W. College is *Mills Park*, with a marble shaft surmounted by a globe, which indicates the place where Samuel J. Mills, "the Father of Foreign Missions in America," and his companions, consecrated themselves to the mission-cause (1807). Mills originated the A. B. C. F. M., and the American Bible Society, and died at sea (after exploring Liberia for a site for a colony of freedmen) at the early age of 35.

About 2 M. N. of the village is the famous *Sand Spring*, with exten-

sive bathing-houses. The abundant waters maintain a temperature of about 70°, and are beneficial in cutaneous diseases. * Greylock Hall is a large new hotel recently opened at this point, commanding pleasant valley views. A short walk to the N. leads into the rugged town of Pownal, in the State of Vermont.

About 18 M. N. W. (by R. R.) is the Bennington battle-field, near Hoo-sac Junction, in the State of New York.

Mt. Hopkins, S. of Williamstown, is often ascended (2,800 ft.) for the sake of its views of Greylock, the Green and Taconic Mts. the valleys of the Hoosac and Green Rivers, and the far-distant Hudson.

The Hopper is a gulf surrounded by a vast amphitheatre of mts., gained by a road running S. from the colleges, which is left about 4 M. out, and a wood-road is followed up the glen in which flows Money Brook. The three walls of the Hopper are Bald Mt. (S.), Prospect Mt. (N.), and Greylock on the E. Far up in this stupendous gulf are the finest cascades in Berkshire, rarely visited and difficult of access. A noble view down the Hopper is obtained from Bald Mt. which is crossed in the ascent of Greylock, sometimes ascended on this side.

S. Williamstown (small inn) is a village about midway (2½ M.) between the Greylock group on the E. and the New York Mt. of Berlin on the N. W. The Snow Glen (where snow remains always) and Flora's Glen (where William Cullen Bryant composed "Thanatopsis" while a student at Williams College, and but 18 years old; it was first published 5 years after, in 1817, in the "North American Review") are favorite resorts near Williamstown.

The Troy and Boston R. R. runs to Troy, in New York, 44 M. from "beautiful Williamstown on her classic heights."

24. New York to Quebec.

Also New Haven, Hartford, and Springfield to Montreal, Quebec, and the Franconia Mts. Distances, New York to Quebec, 526 M.; to Lake Memphremagog, 365 M.; New Haven to Quebec, 453 M.; Hartford to Quebec, 417 M.; Springfield to Quebec, 391 M.; Springfield to Lake Memphremagog, 229 M.

The line between New York and Springfield is described in Route 21. In the station at **Springfield** the traveller leaves the New York and Boston train, and gets into the cars of the Conn. River R. R. Time is usually allowed for refreshments (small restaurant in the station; if time allows, the best dinner in New England may be obtained in the *Massasoit House*, alongside the station).

The first station N. of Springfield is **Chicopee** (*Cabot House*). The Dwight Co's. Cotton Mills, at this place, employ 2,000 hands, with 70,000 spindles, and make \$20,000,000 worth of goods yearly. The Ames Manufacturing Co. employ 4-500 men in making machinery, brass cannon, fine swords, and bronze statuary. The equestrian statue of Wash-

ington, at Boston, many soldiers' monuments, and the superb bronze doors of the Senate at Washington were cast here. The doors of the House of Representatives were cast at Munich, and those of the Senate were to have been made there, but the over-prudent Bavarians demanded prepayment from the U. S. Government (it was the darkest year of the Secession War). With a proper spirit this was refused, and the work was given to the Chicopee Foundry, though but little was hoped from it. To the surprise of all, the doors were finished admirably, and challenge comparison with the best of Munich work. During the Rebellion, this foundry was worked night and day, and supplied the Republic with vast amounts of shot and shell, and over 1,000 cannon.

At Chicopee Falls, 2 M. E., are cotton-mills employing 1,000 hands, besides large factories which make farmers' tools.

Station, Willimansett, about 2 M. N. of which is *S. Hadley* (S. Hadley Falls Hotel), a pretty village on a hill near the river. This is the seat of the famous *Mt. Holyoke Female Seminary*, "designed to give a solid, extensive, and well-balanced English education," while the pupils are required to do the general housework of the institution, for the sake of a thorough knowledge of that useful art. After leaving Willimansett, the line crosses the Connecticut and stops at **Holyoke** Station (*Holyoke House*; *Samoset House*). This is a rapidly growing manufacturing place of 11-12,000 inhabitants, and is located at the South Hadley Falls, which furnish the greatest water-power in New England. Timothy Dwight speaks of "the fantastic beauty, excessive force, and sublime majesty of these Falls. Until I visited this spot, I knew not that it was possible for water to become so beautiful an object." Within $1\frac{1}{2}$ M. the river falls 60 ft., and opposite the town a dam has been built 30 ft. high and over 1,000 ft. long, throwing the water into a canal system 3 M. in aggregate length, which can furnish power enough to drive 1,000,000 spindles. The original dam of 1847 was burst away before the water had filled it, and the present one (1849) contains 4,000,000 ft. of lumber, spiked to the ledges on the bottom of the river, and plated with boiler-iron. The leading staple of Holyoke is paper of all sorts, of which about 5,000 tons are made annually by 800 workmen. 750 men are engaged in the thread mills; 450 in making woollen cloths (beavers, doeskins, and cassimeres); and about 2,000 operatives make 5-6,000,000 yards of cotton cloths, prints, &c., yearly.

Holyoke has about 11,000 inhabitants, and is surrounded on three sides by the river. It is now building a new Town House, at an expense of \$170,000, and otherwise adorning its streets, which run along the E. side of a hill.

At *Ingleside*, $2\frac{1}{2}$ M. from Holyoke, is a favorite summer-resort upon the highlands which overlook the valley.

The railroad passes out in full view of the great dam, whose fine water-fall has been removed by the necessity of building out an inclined plane, to prevent the eating out of the ledges by the heavy perpendicular fall.

After leaving Holyoke the line runs N. between the river and the long range of *Mt. Tom* (on the l.), while *Mt. Holyoke* is seen ahead on the r. The train now passes through the gap between these two mts., and Amherst and Mt. Warner are visible on the r. front, leagues away over the rich valley, while Easthampton and Pomeroy's Mt. are seen on the l. The line crosses the river to Ox Bow Island, which was a peninsula until 1840, when a rush of the swollen river cut through its isthmus. After crossing the rich intervalles bordering on the river, the train enters **Northampton.**

Nonotuck was bought of its Indian owners, in 1653, for 100 fathoms of wampum, 10 coats, &c., and was named Northampton, since many of its settlers came from that English town. Solomon Stoddard was for 30 years pastor here, and was a man of grave and majestic appearance. He rode once through an ambush in the forest, and when the French soldiers were about to shoot him, the awe-struck Indians stopped them, saying, "That is the Englishmen's God." The village was surrounded by a palisade and wall, which, however, was stormed in three places by King Philip's Indians (1676). Three veteran companies were defending the place, and after a desperate conflict in the streets the assailants were driven out. The church was built in 1655, at a cost of £ 14, and was 26 ft. by 18. The present old church is the fourth on that site. The Christians were called to meeting by the blasts of a trumpet :

"Each man equipped on Sunday morn,
With psalm-book, shot, and powder-horn, And looked in form, as all must grant,
Like th' ancient true church militant."

McFINGAL.

In the old cemetery are buried 4 Senators of the United States, — Ashmun, Mills, Bates, and Strong, the latter of whom was for 11 years Gov. of Mass., and, opposing the War of 1812, limited the exertions of the State to her own defence. Here also is buried David Brainerd, a heroic and powerful missionary to the Indians, author of "*Mirabilia Dei apud Indicos*," and son-in-law of Jonathan Edwards. Edwards was pastor here, 1727 - 50, and "was dismissed for insisting on a higher and purer standard of admission to the communion table." The Dwights, Allens, and Tappans were Northampton families prolific in able men, and W. D. Whitney, the leading American philologist (one of the finest Sanscrit scholars in the world) was born here in 1827.

Northampton (* Fitch's Hotel; Mansion House; Warner House) "is the frontispiece of the book of beauty which Nature opens wide in the valley of the Conn." An English tourist (Stuart, in 1833) calls it "the most beautiful village in America." Its broad and shaded streets and handsome villas are placed in a rich tract of broad intervalle and about 1 M. from the river. There are a number of stores and public buildings on the broad street near Fitch's Hotel (a new and extensive house), and in this vicinity is the brownstone building occupied by the Trustees of the *Smith Charities*.

Oliver Smith, of Hatfield, died in 1845, leaving \$370,000 for charitable objects. The youths and maidens and widows of the eight adjacent towns receive, under certain conditions, loans, dowries, and small pensions from this fund. By skillful management on the part of the Trustees (who are chosen by electors from the eight towns), the funds had increased by 1866 to \$854,000, and by the terms of

Mr. Smith's will, the whole amount (whatever it may be at that time) is to be devoted to the establishment of an agricultural school in this town in the year 1905.

The Farmington Canal was completed in 1831, at a cost of \$600,000. It was 78 M. long, running from Northampton to New Haven, and has been disused since the railroads were built.

The New Haven and Northampton Railroad (Route 15) runs hence to New Haven (76 M.) in 3-3½ hours. Also to Williamsburg, 9 M. N. W.

On a beautiful hill W. of the village, and surrounded by groves of forest trees, is the large and imposing * *Round Hill Water-Cure and Hotel* (open all the year), with Turkish and chemical baths, billiards, bowling, a band of music, and accommodations for 200 guests. This site was once occupied by a famous classical school, the Massachusetts Eton, founded in 1823 by George Bancroft, the historian, and J. G. Cogswell, the author. The views thence are very extensive and pleasing. On the same hill is the *Clarke Institution for Mutes* (endowed with \$300,000), which teaches the system of articulation in place of the sign alphabet. It accommodates 80-90 persons. In the same vicinity (1 M. W. of the village) is the * *State Lunatic Asylum*, with imposing buildings which accommodate 350 patients. These buildings are 512 ft. long, and have 4 acres of floors, and are under the superintendence of Dr. Pliny Earle.

Florence is 2½ M. W. of the village, and is the seat of several factories, the chief of which is that of the Florence Sewing-Machine Co. In their great quadrangle of works this company makes 12-15,000 sewing-machines yearly.

Mt. Tom (more properly called Nonotuck) is directly S. of Northampton (4-5 M. by road). It is 200 ft. higher than Mt. Holyoke, and commands a wider view, but is seldom visited, on account of the difficulty of its ascent.

* **Mt. Holyoke**, "the gem of Mass. Mts.," is 3 M. S. E. from Northampton. A carriage-road winds upward to the summit, but the usual route is by horse-cars from the ferry to the mountain railway, up which passengers are drawn in small cars by a stationary engine. Upon the summit a small hotel was built in 1821, whose site is now occupied by the Prospect House. 18-20,000 persons ascend the mt. every season. The carriage road is $\frac{3}{4}$ M. long, and the railway, in its 600 ft. of incline, rises 365 ft. perpendicular. Between the building of the railway in 1854 and its remodelling in 1866, 125,000 persons ascended on it. The summit is 1,120 ft. above the sea, and 830 ft. above the river, and is part of a greenstone ridge running from West Rock at New Haven to Belchertown. The invincible trap-rock of the mount resisted the glaciers during their long grinding attacks, but the great lake which, according to Indian tradition, filled the basin to the N., at last broke away between Nonotuck and Holyoke, and became a river. Western Mass. is underlaid with gneiss, but the Conn. Valley has a belt of coarse, new red sandstone 10-16 M. wide, of the Permian and Triassic systems.

From this peak is "the richest * * view in New England, if not in the U. S." It has often been called, by distinguished visitors, the finest view in America.

On the S. are seen numerous villages in the valley, Springfield, the graceful sinuosities of the broad river, the distant spires of Hartford (40 M.), the Blue and the Lyme Mts., and East and West Rocks at New Haven (70 M.). S. W., beyond Mt. Tom, are glimpses of the valley of Westfield River, and on the W. Pomerooy's Mt. and the high hills of Hampshire and Central Berkshire are seen. N. W. are 8,000 acres of garden-like meadows, with Northampton directly over them, and above the village, 42 M. away, is Greylock, "in dim and misty grandeur." Farther to the r. the hills of Franklin County are seen, dominated by Mts. Toby and Sugar Loaf, while in the far N. the blue peaks of the Green Mts. overlook all. The great lacustrine basin of the Conn., 20 M. by 15, is nearer, in the N., with fair Hadley on its "plaided meadows," in a bend of the river, and Hatfield just across the river and intervals, under the shadow of Mt. Warner (to the r.). 6 M. N. E. is Amherst with its colleges, and beyond, "far in the N. E., rises in insulated grandeur the cloud-capped Monadnock" (50 M.). In the E. Mt. Wachusett (35 M. away) rises above the crowd of hills which fill the E. and S. E. 38 towns are seen from this lofty peak, with parts of 4 States.

There are good views from other peaks of the Holyoke Range (which is 9 M. long), and at its W. end are lofty cliffs of columnar basalt which have been named the Titan's Piers.

In 1642 Capt. Holyoke, on the l. bank, and Rowland Thomas on the r. bank, led exploring parties up the Conn. valley. They are said to have met near this mount, and to have talked across the river at Rock Ferry, when Holyoke gave his name to the mount near him, and Thomas gave his name to the one on his side of the river. The people have not assented to the self-asserting spirit shown in this tradition, for Mt. Holyoke is usually associated with the learned classical scholar of that name who was President of Harvard College, 1737-69, while the other name has been clipped into Mt. Tom, and its ancient Indian name, "Nonotuck," is now gaining ground in the countryside.

Old Hadley is 3 M. N. E. of Northampton, over the river, and lies on the E. of a rich and level intervale, containing 2-3,000 acres, which is annually overflowed by the river. The Connecticut here makes a curve of 7 M. to accomplish 1 M. of direct course, and the neck of the peninsula is crossed by the street of Hadley. West Street was laid out before the settlement as 1 M. long and 20 rods wide, but by the encroachments of the river and the inhabitants, it has been reduced to a length of 300 rods and a width of about 16 rods. This wide, park-like *street is adorned with about 900 ancient elm-trees, 4 lines of which stretch from river to river, and is called "the handsomest street by nature in New England." Middle and East Sts. are also wide and shaded avenues, running N. and S. On the meadows near this charming rural village great quantities of broom-corn are raised, which, with much of the same material imported from the West, is made into brooms and brushes. This industry was commenced in 1790, and now amounts to over \$200,000 a year.

In 1650, fierce theological discussions were carried on at Hartford, and many of its wealthier families left the place in search of peace and good-will, and settled on the Indian domain of Norwotock, which they named in honor of Hadleigh, in Suffolk, England. In 1664 Goffe and Whalley, two generals of the Army of Parliament, and judges of the court which put King Charles I. to death, came here and lived for 15 years concealed in the pastor's house. They had been forced to fly for their lives after the Restoration, and after 3½ years of hiding about New Haven they came to Hadley. Their presence here was only known of by three citizens. On Sept. 1, 1675, while the people were assembled in the church, in fasting and prayer, the town was attacked by swarms of Indians. After a sharp fight, the English gave way, when Gen. Goffe, "an ancient man with hoary locks, of a most venerable and dignified aspect," appeared suddenly, commanded and

led a fresh attack by the people, and scattered the dismayed Indians in all directions. He then disappeared to his hiding-place, and the astonished villagers, for many years, attributed their deliverance to the visit of a militant angel. Gen. Whalley died here, and was buried, in 1679, and Goffe died a few years later.

In 1676 700 Indians attacked the town just after the Falls Fight, but after a long and bitter struggle they were repelled with severe losses.

F. D. Huntington, Episcopal Bishop of Central New York, was a native of this village. Joseph Hooker, "Fighting Joe," was born at Hadley in 1815. He was distinguished at the battles of Monterey and Chapultepec, in the Mexican War and bore high commands during the Secession War. At Antietam, he commanded the r. of the army, and afterwards, at the head of the Army of the Potomac, he was defeated in a long and terrible battle at Chancellorsville, Va., losing 16,000 men. In 1863-4 he did brilliant service in the battles resultant on the reoccupation of Georgia and Alabama by the National armies.

Hatfield (*Hatfield House*) is about 5 M. from Northampton. It is a small and beautiful village $1\frac{1}{2}$ M. N. of Old Hadley, and is noted for its early battles. In 1675 it was attacked by 800 Indians, but the veteran companies of Moseley and Pike fought desperately amid the burning houses, and held the town till succor came, suffering heavy losses. In May, 1676, 600 Indians attacked the place, and destroyed many houses, and in 1677 it was taken by a flotilla, whose men carried the riverward palisades, and killed and captured 24 persons.

Easthampton (see Route 15) is 4 M. S. W. of Northampton. Amherst (see Route 12) is 7 M. N. E., on the road which crosses the river on a bridge 1,080 ft. long, and passes through Old Hadley.

After leaving Northampton, the Conn. River Railroad passes near the Great Bend of the Conn. in sight of *Old Hadley* (to the r.), then diverges from the river, which is not seen again for 30 M. Station, *Hatfield*, beyond which the track runs near the base-line of the State Trigonometrical Survey (39,009.73 ft. long), which is laid along the plains of Hatfield and Whately (on the r.). Stations, *N. Hatfield* and *Whately* (Whately House), whose village is seen in the W. Beyond the village is the far-viewing Mt. Esther, and the picturesque Whately Glen, with its cascades.

The train passes Sugar Loaf Mt. and stops at **S. Deerfield** (small hotel). A road leads from the village to the Mountain House, on the summit of the conical S. peak of *Sugar Loaf Mt.*, which rises sheer from the meadows and near the river. From this point is visible the broad, rich valley, with its villages of Amherst, Hadley, Hatfield, Northampton, and several others, with Holyoke seen beyond the Titanic gateway between Nonotuck and Mt. Holyoke. Close at hand on the E. is Sunderland, under the shadow of Mt. Toby.

The rich and peaceful valley seen from Sugar Loaf was the scene of the bloodiest tragedies of King Philip's and the later Indian wars. King Philip directed the movements of the western Indians from his head-quarters on this peak, — so runs tradition. Table Rock is a beetling cliff on the E. side, beneath which is a seat cut in the rock, called King Philip's Chair (see Bristol, R. I.). A sharp skirmish took place just S. of the Mt., in August, 1675, when 26 Indians and 10 colonists were killed.

In the N. part of S. Deerfield village is a monument on the *Bloody Brook battle-field*. Sept. 18, 1675, Capt. Lathrop and 84 men were conveying a train of grain-

wagons from ruined Deerfield to Hadley, and as they passed over a small brook, they stopped to rest and pick the wild grapes which hung in clusters over its waters. While thus disbanded, they were suddenly attacked by 700 Indian warriors. Lathrop ordered his men to take refuge behind the trees and fire from their shelter, but they were speedily enveloped by the enemy, and but 7 men escaped the general massacre, which included the teamsters and reapers and 76 soldiers. Capt. Moseley, "an old Jamaica buccancer," marched rapidly to the sound of the volleys, and charged and recharged in solid company front through the heathen swarms. Major Treat and 100 Mohegan and Pequot Indians (allies of the English) also marched up from Hadley, and 96 of the hostile warriors were killed on the field.

A rude monument was soon erected here, and in 1835 the people of 5 towns assembled and dedicated a fine marble monument, with an address by Edward Everett.

"In the country, districts that nestle in the dells seem to have been there for ten centuries at least; and it gives one a shock to light on such a place as Bloody Brook, and to be told that only 190 years ago Capt. Lathrop was slain here by Red Indians, with 80 youth, 'the flower of Essex County,' as the old Puritan histories say." (SIR CHARLES DILKE.)

About 5 M. N. passing (on the r.) the monument, and then the long ridge of Deerfield Mt., the line approaches the Deerfield River, and stops at **Old Deerfield** (*Pocomtuck House*, good). This place was settled by men of Dedham in 1670, on the Indian domain of Pocomtuck, and was named from the abundance of deer found in its forests.

Sept. 1, 1675, the village was attacked and burnt, and then abandoned. It was after harvesting its deserted fields that such disaster befell at Bloody Brook, "a choice company of young men, the very flower of Essex County, none of whom were ashamed to speak with the enemy in the gate." In 1697 a fresh attack was made, but it was repulsed by the people, headed by their pastor, Rev. John Williams. Feb. 29, 1704, while the watch was sleeping, and the snow had drifted over the palisades, 2 hours before daylight, the place was attacked by Major de Rouville, with 340 French and Indians. The walls were easily passed, and a terrible scene of slaughter, pillage, and conflagration ensued, which lasted for three hours. But one house escaped, and its loopholes were guarded by 7 bold colonists, whose wives were casting bullets for their guns. 47 English were killed, and 180 taken prisoners. A few escaped, and alarmed the lower towns, and Hatfield sent a force in pursuit, which overtook and was defeated by De Rouville on the same day. Mrs. Williams was murdered in the Leyden Gorge, and other weakly captives soon shared her fate. On the first Sunday of their march north, Rev. John Williams preached from the text, "My virgins and my young men are gone into captivity." Arrived in Canada, the prisoners were forced to attend Roman Catholic services, and Mr. Williams was offered his freedom, a pension, and his children, if he would join that church. He sternly refused, but 28 of his people chose to remain in Canada, and joined the Roman Church, "whence kindred blood now rattles bad French in Canada or sputters Indian in the N. and N. W." The captives were kindly treated by the French, and 60 of them were redeemed in 1706. The pastor's little daughter, Eunice (7 years old), who was kept by the Indians, afterwards married an Indian and became a Catholic, and often in after years made visits to Deerfield with her tribe. Not one iota of regard for the customs of civilized life, or for the tenets of the Puritan Church, remained in her heart. Rev. Eleazer Williams, the pretended Dauphin of France, and Bourbon Prince Royal, about whom (a quiet missionary among the Indians) the newspapers made such a great sensation, was Eunice's grandson.

This raid on Deerfield was a crusade, for the Mass. Puritans had captured a ship which was bearing a bell to the Catholic Church at St. Regis. The bell was hung in the Puritan meeting-house at Deerfield, and was taken thence by the invaders, under the care of their chaplain. It was carried to the St. Regis Church (near Potsdam, in N. New York), where it has sounded matins and vespers for nearly 170 years. The same De Rouville attacked Deerfield again in 1710, but was handsomely repulsed.

Among the natives of this town were Richard Hildreth, the gifted historian of the U. S.; Edward Hitchcock, the geologist, and President of Amherst College; John Williams, D. D., present Episcopal Bishop of Conn.; and Gen. Rufus Saxton.

Just beyond Deerfield, the railroad reaches the *Deerfield River*, which it crosses on a bridge 750 ft. long, and 90 ft. above the water. This bridge was burnt during the draft riots (in Greenfield) in 1864, and was rebuilt in six weeks.

Station, **Greenfield** (see Route 25). From this place the line runs N. E. to *Bernardston*, a small village under the shadow of West Mt. This cold and lofty town was granted in 1736 to the veterans of the Falls Fight. A few min. after passing Bernardston the train comes in sight of the Conn. River, and reaches the station-house at *S. Vernon*, the terminus of the Conn. River Line.

The train now passes on the rails of the Vermont Central R. R. Stations, *S. Vernon*, *Vernon*, and **Brattleboro**, see Route 12. Beyond Brattleboro are the stations, *Dummerston*, *Putney*, *E. Putney*, and *Westminster*, which pertain to small hill-villages. In Putney are long strata of roofing-slate; and the rare mineral called fluor spar (of a rich emerald green) is found in the E. of the town. In 1755 a strong timber fort was built on the Great Meadows in Putney, which protected the settlement until the conquest of Canada rendered it unnecessary. All the inhabitants lived in the fort in small houses.

At Westminster occurred a sharp skirmish in the course of "the contest between Puritan and Patroon" (as the struggle of Vermont against the royal edict which gave her to New York has been termed). The royal New York judges were to hold court here, but the citizens captured the Court-House, March 13, 1775, and were only dislodged by an attack at midnight. Several Vermonters were wounded, two of them mortally, and one of these has inscribed on his tombstone:—

"Here William French his body lies,
For Murder his blood for vengeance cries,
King George the Third his Tory crew
Tha with a bawl his head shot threw."

The oldest church in Vermont is in this village (1 M. S. of the station). It was built in 1770, and has been secularized. Across the river from Westminster is the old frontier town of Walpole (see Route 26).

Station, **Bellows Falls** (* Island House). This was a favorite Indian resort because of the great numbers of salmon and shad near the rapids. 8 rods S. of the old bridge, on the W. bank, Schoolcraft found Indian hieroglyphs on the rocks, which he thinks are the records of some ancient battle. The village was named for Col. Bellows, the founder of Walpole, and great-grandfather of Dr. H. W. Bellows. The river falls 42 ft. within $\frac{1}{2}$ M. near the village, and forms white and impetuous rapids, dashing between and among the rocks which strew the river-bed. In low water the current is compressed into a channel of 16 ft. in width, between two large rocks. A canal $\frac{1}{2}$ M. long has been built around the

falls, and on the water-power thus afforded, several factories are located. Opposite the falls is *Mt. Kilburn*, a wooded eminence which gives a pretty view of the river and village. The old name of this hill was Fall Mt., but President Hitchcock and a large delegation of students from Amherst and Middlebury Colleges met here in 1856, and named it Mt. Kilburn, in honor of a brave frontiersman. The Fall Mt. House is situated at the foot of this eminence.

Pleasant excursions are made by the summer visitors here, to *Warren's Pond*, in Alstead, N. H.; to the *Abenakis Mineral Springs*; and to *Westminster*.

From Bellows Falls the Cheshire R. R. runs S. E. to Fitchburg and Boston (114 M.), and the Rutland and Burlington R. R. goes to Burlington (143 M. See Route 26).

The train crosses the Conn. River into the State of New Hampshire, and runs through the long river-town of *Charlestown*, with 3 pleasant villages and 3 inns.

This town was settled under the authority and by the people of Massachusetts, in 1740, and was named Number Four. A garrisoned fort was located here, and between 1746 and 1760 the enemy committed many depredations in the vicinity. The fort was formally besieged in August, 1746, and after a successful defence, the garrison and colonists abandoned the place. In 1747, Capt. Stevens reoccupied it with 30 men, under orders from the Mass. government. He was soon attacked by Debeline, a skillful partisan, with 400 French and Indians, who besieged the Fort for three days, exhausting every appliance of craft and tactics. Debeline threatened to massacre the garrison unless they surrendered, but they sent back a defiant answer, and a long and desperate attack followed. The heroic handful of provincials multiplied themselves and repelled the attacks on every side, until the enemy withdrew and retreated to Canada. Capt. Stevens was highly honored by the people, and Commodore Sir Charles Knowles, whose ship then lay at Boston, sent him an elegant sword. When the tract was resettled, it was called *Charlestown*, in honor of Sir Charles. During the later French wars this was the principal station on the military road between the New England coast and Ticonderoga and Montreal. The remains of the Fort were plainly perceptible in 1810.

Charlestown village is situated between two broad, rich meadows, and has some neat buildings, on a long, wide, well-shaded street. "Its secluded loveliness is calculated to awaken the admiration of the traveller." Across the river is the town of *Springfield* (*Springfield House*), with some romantic scenery on the Black River, which falls 110 ft. in 600 ft., with one sheer fall of 50 ft. The deep, narrow ravines and cañons cut by this river in the slate rocks are very picturesque.

Station, *Claremont Junction*, soon after leaving which the line crosses *Sugar River* by a bridge 600 ft. long and 105 ft. above the water. The rich intervalles of the Conn. are now crossed, with Ascutney Mt. on the L., and the train passes over the river on a bridge whose predecessor was carried away by ice in 1866. Station, *Windsor* (*Windsor House*), a pretty village on highlands over the river and near the foot of Ascutney. It is a flourishing town, with some manufactures and a large country trade. It has 4 churches, a bank, 2 weekly papers, a fine Government building used for U. S. Courts and Post Office, and the Vermont State Prison (which usually has 70-90 prisoners). At Windsor, during a fearful

thunder-storm, and with the appalling news of the fall of Fort Ticonderoga ringing in their ears, the deputies of the Vermont towns adopted the constitution of the State, July 2, 1777.

Ascutney Mt. lies S. E. of the village. A road has been constructed to the summit (5 M.), and a small house has been built there for a shelter. Horses and guides from the Windsor House. A fine view is obtained from this isolated peak, which is 3,320 ft. above the sea. In the W. and N. W. are Shrewsbury and Killington Peaks, near Rutland, while the Green Mt. chain runs off to the N. in a long line of rounded summits. The hill towns of Windham Co. are seen in the N., and the Conn. River and valley close at hand in the E. stretch away to the N. and S. through a pleasant farming country. Croydon, Sunapee, and Kearsarge Mts. are seen in the E., the latter being dimly outlined on the horizon. The Indian name Ascutney means "Three Brothers," and is supposed to refer to three singular valleys which run down the W. slope of the Mt. There are marks of volcanic action here, and the early settlers often saw a lurid light hanging over the summit on winter nights. Daily stages run to Cornish and Plainfield, N. H.; also to W. Windsor, Reading (12 M.), and Proctorsville (22 M.).

Salmon P. Chase was born at Cornish in 1808. His father was a prominent Portland lawyer; his uncle, Dudley Chase, was U. S. Senator, 1813-17, and 1825-31; and his uncle, Philander Chase, was Prot.-Epis. Bishop of Ohio, 1819-31, and of Illinois in 1835-52. (These three, together with their brothers, Baruch and Heber Chase, were born at Cornish, and graduated from Dartmouth College.) He settled in Ohio about 1830 in the practice of law, became a leader in the anti-slavery movement, and was U. S. Senator, 1849-55, and Governor of Ohio, 1855-59. In 1861 he became Secretary of the U. S. Treasury, and rendered great service to the Union by his skilful financial policy during the Rebellion. He resigned in 1864, and late in the same year was made Chief Justice of the United States. On May 7, 1873, Mr. Chase died in New York City.

Stations beyond Windsor, *Hartland*, *N. Hartland*, and *White River Junction* (see Route 29).

Just after leaving the Junction, the train crosses White River, and passes to *Norwich*, where a large military school called the Norwich University was established from 1834 to 1866, when its buildings were burnt and the school was removed to Northfield. The village (*Union House*) is about 1 M. W. of the station. Stages from Norwich station run to *Hanover*, about $\frac{3}{4}$ M. S. E., across the Connecticut River. Hanover (*Dartmouth House*) is the seat of **Dartmouth College**, which ranks among the first of American educational institutions.

This college was founded here in 1770 by Rev. Eleazer Wheelock, as a school for missionaries to the Indians, and for Christian Indians, and had at first 24 students, domiciled in huts built of green logs, situated in the midst of a vast wilderness. 44,000 acres of land were granted to it by the State, which also raised a building 150 by 50 ft. for its use, while money was sent to its aid by English patrons. The project of educating the Indians was rendered subordinate after a careful trial, several Masters of Arts having returned to savage life. The College (named for the Earl of Dartmouth, President of its board of trustees) had 150 students in the year 1790. In 1871 it had 27 instructors and 382 students. Between 1771 and 1867 it graduated 3,550 men, 3 of whom have been U. S. Cabinet Ministers; 15 have been U. S. Senators, and 61 Representatives; 31 Judges of the U. S. and State Supreme Courts; 15 Governors; 4 Ambassadors; 25 Presidents of Colleges; 104 Professors; and 800 Clergymen. The degree of LL. D. has been conferred on 24 alumni, and that of D. D. on 106. "Not to enlarge, with few exceptions, her (*Dartmouth's*) influence in religion has been emphatically conservative, and her sympathies in a national point of view eminently patriotick. She has been the nursery of sound divines, devoted missionaries, profound jurists, skilful physicians, brilliant statesmen, accomplished scholars, classical and learned writers. Such are the worthies she has given to the Union, and on these rest her claims to a nation's gratitude." (CHAPMAN.)

Among the most distinguished alumni of Dartmouth were John Wheelock, its second President, 1779-1815; Asa Burton; President Porter, of Andover Seminary; Heman Allen; Gen. Ripley, the hero of Niagara and Chippewa; Alvan Hyde, D. D., LL. D.; Amos Kendall; Senator Levi Woodbury; Daniel Poor, the Ceylon missionary; Judge Joel Parker; J. B. Felt, the annalist; B. Greenleaf, the arithmetician; T. C. Upham, D. D., the metaphysician; Alpheus Crosby, the philologist; Nathan Lord, D. D., the 6th President; and Asa D. Smith, D. D., the 7th and present President of Dartmouth; J. H. Noyes, the founder of the Oneida Community; C. E. Potter, the author; John Lord, the historical essayist; R. B. Kimball, the author; Gen. Shepley; G. P. Marsh, the philologist and diplomatist; Bishops Chase and Dorr; George Ticknor, the historian of Spanish literature; Senator Rufus Choate, the lawyer and orator; Salmon P. Chase, the statesman and jurist; and Daniel Webster.

The famous Dartmouth College case was opened early in the present century by the State of N. H. attempting to infringe on the vested rights of the College. After much litigation, the case was decided by the State Supreme Court against the College. It was then carried by appeal to the Supreme Court of the United States, where, after long arguments by the leading lawyers of America, — Daniel Webster defending Dartmouth, — the State judgment was reversed, and the College was restored to its ancient privileges and independence.

The college fronts on a fine campus, in the centre of Hanover village, and on an upland plain near the Conn. River. Dartmouth Hall is the long central building (in which is the chapel), while in line with it are Wentworth and Thornton Halls. In front of the line is Reed Hall, containing the college library of about 40,000 volumes (difficult of access). These buildings are old and plain, contrasting with Culver Hall, a handsome new structure E. of the line, in which there are fine lecture-rooms, a small natural history collection, and the State museum of minerals. Bissel Hall is a new gymnasium, fronting on the campus. N. of the college is the Chandler Scientific School, while the Medical College and the observatory are in the vicinity. An Alumni Hall is to be erected. The scenery about this quiet academic village is fine, embracing tall hills to the E. and S., and upland plains along the Conn. River.

After leaving Norwich, the train crosses the Ompompanoosuc River, and stops at *Pompanoosuc*, whence large quantities of copperas are shipped away, to be made into sulphuric acid. The mines are at Copperas Hill, 10 M. N. W., and the copperas is separated from other elements by a long and difficult process, and precipitated in green crystals. Nearly 400 tons a year are converted into vitriol in chemical works near Boston, while a great quantity of the copperas is used as a mordant in dye-factories.

Distant views of Moosilauke and Bald Mts. are obtained as the train approaches *Thetford* (two small inns). Thetford village is 1 M. W. of the station, and on the E. is the large farming town of *Lyme*, N. H., to which stages run 4 times daily (Perkins House).

Daily stages run N. W. to *W. Fairlee* (9 M.) and *Vershire* (15 M.) with its extensive copper-mines, also to *Chelsea*, the shire-town. Vershire had 1,054 inhabitants in 1860, of whom 113 men joined the Union army. Nearly 11 per cent of her population was at the front.

Station *N. Thetford*, whence much copper ore from Corinth is sent to

Baltimore (by water from Portsmouth) and smelted. Station, *Fairlee and Orford*, the former being a hilly town abounding in lakes, one of which is nearly 3 M. long. Pickerel are found in these waters. Just across the river from Fairlee is the N. H. town of *Orford* (stage to Orford Hotel), with a beautifully located village which has become a favorite summer-home for lovers of tranquillity and rural life. *Cube Mt.* and *Mt. Sunday* are near the centre of the town, and there are several large ponds. *Cube Mt.*, in the W., is 2,273 ft. high, and has a chain of 5 lakes on its W. side. *Cube Falls* and the perpendicular cliffs of gray granite on *Sawyer's Mt.* are worthy of notice.

Station, *Bradford* (Trotter House), a prosperous manufacturing village on Wait's River. In the N. W. is Wright's Mt., where one Wright, who claimed to be a prophet, had a hermitage in a dismal rocky cleft, now called the Devil's Den. The town has a scientific association, an academy, a weekly newspaper, and a savings-bank.

Stages run to *Corinth, Topsham* (13 M. N. W.), *Orange* (17 M.), and *Montpelier* (30 M.); also to Washington and Barre, and to the N. H. farming town of Piermont, beyond the Conn. River.

Stations, *S. Newbury* and **Newbury** (the *Spring Hotel*, closed in 1869-72, will probably be reopened in 1873; *Newbury House*). This beautiful village stands on a terrace above the rich Ox Bow intervalles, where a great bend of the river nearly insulates a tract of fertile alluvial meadow-land. *Mt. Pulaski* is near Newbury, and commands a noble view, embracing the fruitful and carpet-like Ox Bow meadows, the village of Haverhill, and the winding river, with Moosilauke in the S. E., and the Pemigewasset and Franconia Mts. in the E. $\frac{1}{2}$ M. from the Hotel are the *Newbury Sulphur Springs* (bath-houses, &c.), in a little glen near the verge of the intervalle, and a charming twilight walk is that along the borders of these level meadows, with the sombre mountains beyond.

This town was founded about 1764 by Gen. Bailey, of Newbury, Mass. During the Revolution a detachment of British soldiers came here to take Bailey, but a friend went over to the field where he was ploughing and dropped in the furrow a note saying, "The Philistines be upon thee, Samson!" On returning down the long furrow Bailey saw the note, took the hint, and fled to securer regions. The meadows of Coös about Newbury were the home of a large tribe of Indians, who tilled the adjacent lands, caught salmon and trout in the rivers, and chased wild game through the mountains. These pleasant lands were abandoned in terror after Lovewell's battle in Pequawket.

The beautiful scenery along the Passumpsic line changes to grandeur as the train runs N. Station, **Wells River** (*Coosuck House*), where the Boston, Concord, and Montreal and White Mts. R. R. touches this line on its W. angle (20 M. to Littleton. See Route 30).

The Montpelier and Wells River R. R. will probably be completed from this point to the capital of the State (about 25 M. N. of W.) in the summer of 1873. Stages now run to *Ryegate*, 5 M. N. W. (*Blue Mountain House*), a Presbyterian town settled in 1774 by a colony of farmers from the Scottish shires of Renfrew and Lanark. *Blue Mt.* is a high granite ridge in the N. W. The stage-road fol-

flows up Wells River to *Groton* (small inn). In the N. W. part of Groton is *Long Pond*, 4 M. long and 1 M. wide, with a hotel (the Lake House) on its S. shore, which affords good facilities for boating and fishing. This pond is 1,100 ft. above the sea, and near it is the pretty Little Pond, 1 M. by $\frac{1}{2}$ M.

Beyond Wells River, the train stops at *McIndoe's Falls*, with large lumber-mills, and *Barnet*, a Scotch Presbyterian town, settled in 1775. Stages run to *Peacham*. Soon after leaving Barnet, the line passes near the mouth of the *Passumpsic River*, where Rogers' Rangers, returning from their raid on the St. Francis Indians, failed to find an expected depot of provisions. Many of the famishing men died there, while others made a cannibal feast on the flesh of a slain Indian. In his disastrous retreat from St. Francis to Charlestown, Rogers lost nearly half of his command, and it is said that 36 of his men died in 18 hours here on the Passumpsic meadows.

Just beyond Barnet (famed for its butter) begin the 15-Mile Falls on the Conn. River. Stations, *McLeran's* and *Passumpsic*, with falls on the Passumpsic River, which here rolls between black, rocky banks. Station, **St. Johnsbury** (*St. Johnsbury House*, on the hill; *Avenue House*, near the station), a busy town of nearly 5,000 inhabitants, with many neat villas and large manufactories. It was settled in 1786, and named in honor of St. John de Crevecoeur, French Consul at New York, and a benefactor of Vermont. The *Court House* of Caledonia County is a fine building, on the hill, directly in front of which is a *Soldiers' Monument, consisting of a statue of America (by Mead), on a pedestal inscribed with the names of 6 officers and 74 men from this town, who died in the Secession War. Near the monument is the *Athenæum*, with 9,000 volumes in a good library building. There is also a reading-room with papers and magazines, and an art-gallery is projected. The St. Johnsbury Academy is a large and well-attended school, and the other schools of the village occupy neat buildings. There are several churches here, the best of which is the Catholic Church of Our Lady of Victories. The village has also 2 banks and 2 weekly newspapers.

There are manufactures of mowing and threshing machines and other things, but the reason of being for St. Johnsbury is the extensive scale factory of E. & T. Fairbanks & Co. The works of this company are in a glen on Sleeper's River, and occupy 10 acres of ground. 5-600 men are employed and 300 varieties of scales are made, from the most delicate letter-scales to those huge machines which weigh loaded cars and canal-boats (500 tons capacity). In 1830, during the excitement about hemp culture, the Fairbanks brothers established a hemp-dressing factory, and Thaddeus invented the platform scale. It was patented in America and England, and up to 1861 the company sold 96,658 portable scales, 8,872 hay and track scales, and 94,712 counter and even balances. Since 1861 the sales have been much greater, proportionally, and in 1869 the yearly sales were stated as 50,000 small scales, and several hundred hay and platform scales. 125 men are engaged in the Fairbanks' service in other towns and cities; while the works consume 18 tons of iron daily, in three cupola furnaces. The scales which have been made in large quantities for Oriental States are curious, being marked with Chinese and Turkish numerals, according to their peculiar systems of weights. The works use yearly 3,000 tons of American iron, 1,000 tons of Scotch iron, and 3,000,000 ft. of lumber.

After leaving St. Johnsbury the line passes through the town of Lyndon, which has three villages, and within whose borders are the Great Falls of the Passumpsic. The soil of the town is rich and valuable. At *Lyndonville* (Walker's Hotel) are the offices and repair-shops of the Passumpsic R. R.

Stages run to *Sheffield*, 7 M. N. W., and to *Wheelock*, 6 M. W. The Caledonia Springs (small hotel) are at the latter place.

Station, *W. Burke*, before reaching which a fine view is afforded of the bold Burke Mt. Carriages may be taken from Trull's Hotel (inferior) near the station, for * **Willoughby Lake**, 6 M. N. The road affords a continual view of the two singular mountains between which the lake is situated. The Willoughby Lake House was closed in 1872, but it is thought that it will open in the summer of 1873. This lake is one of the most remarkable on the continent, being situated between two immense mountains, whose bases meet far below its waters. The lake is 6 M. long, and in places 2 M. wide, while its depth is very great, and not yet known, a line of 100 fathoms having run out without finding bottom.

A carriage road along the E. shore, or a boat on the quiet waters, gives opportunity to see the beauties of the lake and the grandeur of its surrounding walls. The mountain on the W. shore is called Mt. Hor, and is somewhat more than 1,500 ft. above the water. The E. shore mountain is called Mt. Willoughby, Pisgah, or Annanance, in different books and maps. As Mr. Eastman remarks, Annanance seems more appropriate, since that was the name of a brave chief of the St. Francis Indians who once lived here. A vast precipice of granite, 2 M. long and 600 ft. sheer down, runs along the side of *Mount Annanance*, while the long slope below is rocky and steep. The peak is 2,638 ft. above the lake, and 3,800 ft. above the sea. From the hotel to the summit of Annanance it is a pleasant forest walk of about 2 M. A vast * view over the Conn. valley is obtained from this point, extending to the Franconia and White Mts. on the S. E., and it is said that the hotels on Mt. Washington may be seen with a strong glass. On the N. W. are Owl's Head (in Canada) and Jay Peak, from which the stately line of the Green Mts. runs S., with the peaks of Mansfield, Camel's Hump, and Killington (near Rutland) all visible. From the verge of the cliffs on the W. *Mt. Hor* is seen close at hand, and the observer can look down on and far into the lake, so transparent are its waters. Geologists think that the chasm between these mountains was caused by the rush of a northern current during the drift period, which eat away the decomposed limestone between the two granite peaks. Very rare plants and flowers are found on Mt. Annanance, especially at the "Flower Garden," at the foot of the cliffs, 600 ft. above the Devil's Den, on the lakeside road. The Silver Cascade and the Point of Rocks are found farther out on the same road. Trout

and muscalonge abound in the cool crystal waters of the lake. Excursions are made from the hotel to *Burke Mt.* (10 M. S.), *Barton* (11 M. W.), *Plunket Falls* (12 M.), and *Newark* (6 M. S. E.), famed for its production of sugar from vast forests of sugar-maples.

Near the flag station at *S. Barton* the summit is passed, and the watershed of the St. Lawrence is entered. Jay Peak is seen in the N. W. Station, *Barton* (Crystal Lake House), a manufacturing village in a town named for its first proprietor, Gen. Barton. *Crystal Lake* (by which the track passes) is a pretty sheet of water containing about 2 square miles. About $1\frac{1}{2}$ M. distant on the E. is the *Flume*, where a brook flows through a natural passage in the granite rock, 140 ft. long, 10 ft. wide, and 20-30 ft. deep. The granite walls are smooth and perpendicular.

In 1810, the people determined to deepen Barton River by turning Long Pond (the source of the Lamoille) into it. They had barely completed a channel from Long Pond to the pond-reservoir of the Barton River, when its waters burst through with tremendous force, and swept down to Lake Memphremagog, wrecking everything in their path, and causing immense damage. The bed of Long Pond is now dry, and is called Runaway Pond.

Stages run from Barton to *Montpelier*, 36 M. S. W. through the towns of *Glover*, *Greensboro'*, *Hardwick*, *Woodbury*, and *Calais*. Also to *Craftsbury* and *Albany*.

Station, *Barton Landing* (Valley House), which was much resorted to by smugglers in 1812-15. Stages run 4 M. W. to *Irassburgh* (Irassburgh House, large and good), a beautiful rural village, and the shire-town of Orleans County.

Stations, *Coventry* and *Newport* (*Memphremagog House, \$ 4.00 a day, 300 guests, a large, first-class hotel on the lake shore; *Newport House*; *Lake House*).

Lake Memphremagog.

The village of *Newport* is at the upper (S.) end of this lake, and is 365 M. from New York, 230 M. from Boston, and 164 M. from Quebec. It is built upon Pickerel Point, and from the edge of the village rises Prospect Hill, whence fine lake views are gained, and the Mts. Owl's Head, Elephantis, Orford, Jay Peak, and Annanance are seen. Other excursions from *Newport* are to *Clyde River Falls* (2 M.), *Mt. Morrill* (2 M.), *Bear Mt.* (7 M.), and *Bolton Springs* (in Canada, 14 M.). Steamers leave every morning from the quay near the great hotel, for *Magog*, returning in the evening.

The original Indian name of this lake was Memphremagog, or Memplowbowque (names possibly used by different tribes), which is said to mean Beautiful Water. Some see in it a resemblance to Loch Lomond, others to Lake George, while still others call it the Geneva of Canada. The lake is 30 M. long and 2-4 M. wide, and two-thirds of it lies in Canada. The waters are cold and clear, abounding in trout and muscalonge, the shores are romantically uneven and rock-bound, and tall, wooded mountains rise on either hand. The voyage to *Magog*, at the N. end of the lake, usually takes 3-4 hours, nearly 50 M. being traversed. By leaving *Magog* on the afternoon boat (about 4.30 P. M.), a fine sunset on the mountains may be seen.

The steamer passes out by Indian Point, on the E., and a distant view of *Stanstead* village is soon obtained, between the evergreen-covered islets known as the *Twin Sisters* (on the E.). Soon after *Province Island*

is passed, and the steamer crosses into Canada. The boundary is marked by clearings in the forests on either side. Next, on the E., is the small, cedar-covered Tea Table Island, and beyond it the Canadian village of *Cedarville*. Bear Mt. looms up on the W. shore, and the scattered farms of the town of Potton, while Fitch's Bay stretches far in shore to the N. E. The round summit of Owl's Head is now approached on the W. Magoon's Point (on the E.) is near a large cavern, where the treasures of a cathedral are said to have been hidden. The legend is probably derived from the fact that Rogers' Rangers retreated down the E. shore of Lake Memphremagog, after sacking and destroying the church and village of the St. Francis Indians. Besides the rich plate of the church, they secured two golden candlesticks, and a silver image weighing 10 pounds. The candlesticks were hidden near the lake (no mention is made of the disposal of the other articles), and were found in 1816. The steamer stops at the *Mountain House*, 12 M. from Newport, in a sequestered position at the foot of **Owl's Head**, and near the best fishing-grounds on the lake.

The mountain is ascended by a foot-path (in 2 hours) which passes through forests and fields, and by numerous curious rock-formations. The summit is 2,743 ft. above the lake, and commands a broad view, including the greater part of the lake and its islands. On the S. is Newport village and part of the Clyde valley, with the nearer summits of Bear Mt. and Hawk Mt., also Jay Peak and part of the Missisquoi valley. In the W. are the tall foot-hills of the Green Mts., while Brome Lake is seen in the N. W., and far beyond it the city of Montreal is visible on a clear day. Nearer, in the same direction, are the Hog's Back and Elephant's Mts. Orford Mt. looms at the head of the lake on the N., and in the N. W. are the pretty lakes of Little Magog and Massawippi. In the E. are several villages in Stanstead and Derby. Mt. Annanance is seen in the S. E. over Willoughby Lake, and, far beyond, the dim blue peaks of the White Mts. rise on the horizon-line. The contrast between the rugged country towards Lake Champlain and the vast plains to the N., traversed by the glittering rivers St. Lawrence and St. Francis, is very great, and an element of rare beauty is added by the extensive view over the lake below. Amid these sublime scenes, in a glen near the summit, the Golden Rule Lodge of Masons, from Stanstead, celebrate the mysteries of their order on the 24th of June of each year.

$\frac{1}{2}$ M. from the Mountain House is *Round Island*, which resembles Dome Island, on Lake George, or Ellen's Isle, on Loch Katrine. Farther E. is Minnow Island, near which trout abound. *Skinner's Island* is also E. of the hotel, and has on its N. W. side a cavern in the rock, 30 ft. long, 10 ft. wide (at the entrance), and 12-14 ft. high. The legend is that a celebrated smuggler named Skinner (in 1812) always eluded the closest pursuit of the customs officers, by disappearing near this point. One night, after a long chase, the officers found his boat on this island, and turned it adrift on the lake. Some years afterward a fisherman, lying under the lee of the island to escape a squall, discovered the cave, hidden under heavy foliage.

"And what do you think the fisherman found?
Neither a golden nor a silver prize,
But a skull with sockets where once were eyes;

Also some bones of arms and thighs,
 And a vertebral column of giant size;
 How they got there, he could n't devise,
 For he'd only been used to commonplace graves,
 And knew naught of "organic remains" in caves;
 On matters like those his wits were dull,
 So he dropped the subject as well as the skull.

'T is needless to say

In this later day,

'T was the smuggler's bones in the cave that lay :

All I've to add is — the bones in a grave

Were placed, and the cavern was called ' Skinner's Cave.' "

N. of this point is *Long Island*, with palisades on its N. W. side, and an immense rocking-stone called Balance Rock on the S. shore. On *Molson's Island*, still farther N., is the mansion of a wealthy Montreal gentleman. On the W. shore, 1 M. above the hotel, are cliffs 700 ft. high, and as the steamer goes N. the sharper outlines of Owl's Head become prominent. *Mt. Elephantis*, or Sugar Loaf, is above Owl's Head on the W. shore, and is thought to resemble an elephant's head and back. Far up on the W. slope of Elephantis is a beautiful mountain tarn, 2 M. long by $\frac{1}{2}$ M. wide, and abounding in trout. The steamer touches at *Georgeville* (Camperdown House), a pretty village on the E. shore, where many Canadians pass the summer. The lake is now crossed (3 M.) to *Knowlton's Landing* (16 M. from Newport), at the mouth of Sergeant's Bay. This crossing has long been the main route to Montreal from the Eastern Townships (Stanstead County), as stages run from Knowlton's to the railroad station at Waterloo (20 M.). The steamer crosses the mouth of the Bay, passes the rocky Gibraltar Point on the l., and leaves the more mountainous part of the lake, heading towards Orford Mt., which is seen in the N. A comparatively narrow strait is passed, and then the lake widens into a broad expanse, at the end of which is the village of **Magog** (Parks House), a small Canadian settlement, with fine trout-fishing in the rapids of Magog River. The latter stream flows through Little Magog Lake, and empties the Memphremagog waters into the St. Francis River, a noble tributary of the St. Lawrence. 5 M. from Magog (carriage-road to the summit) is *Orford Mt.*, the highest peak in the Eastern Townships. Its view embraces Memphremagog and its mts. on the S., Shefford Mt. on the W., much of the valley of the St. Francis on the N. E., and the waters of 18 lakes. A vast pine forest covers much of the country to the N. and W., and Orford Lake, at the base of the mt., has a weirdly dark and solitary appearance.

Daily stages run from Magog to Sherbrooke (16 M. N. E.), an important station on the Grand Trunk Railway, 101 M. from Montreal and 196 M. from Portland.

Newport to Quebec.

Distance, 161 M. The time has usually been 10-12 hours, as trains on the Grand Trunk Railway do not make close connections with the Massawippi line at Sherbrooke and Richmond.

The train crosses an arm of the lake after leaving Newport, and enters the rich farming town of Derby. Station, *N. Derby* (Derby Line Hotel), soon after passing which the Anglo-Canadian frontier is crossed. The line now enters the **Eastern Townships**, of which the riverward parts were early settled by the French, while the forest-towns were occupied by pioneers from New England between 1790 and 1800.

The Canadian Hand-Book calls this "as beautiful a tract of country as perhaps any on the continent, both with regard to mountain and lake scenery, beautiful rivers, and fertile valleys. The mountains, wooded generally from base to summit, repose in majesty; and as the mists, with which their summits are not unfrequently crowned, withdraw themselves in folds along their sides, they reveal still more of the beautiful and sublime. Chasms, ravines, and precipices are there, and among their solitudes sublimity reigns. Beautiful lakes lie scattered over the surface of the country, bordered here by gentle slopes, there by precipitous cliffs; cultivated fields and wide-spread pastures, with woods interspersed; valleys and plains adorned with farmhouses, single or in groups, and beautiful villages."

The first Canadian station is *Stanstead Junction*, whence a short branch line runs to *Stanstead Plain* (4 trains daily), a large and thriving village situated on fertile lowlands. 10 M. E. is *Pinnacle Lake and Mountain*, the latter being a remarkable precipitous peak which rises sheer from the lake. After passing some minor stations, the train reaches *Massawippi*, a village in Hatley town, near which is the beautiful **Lake Massawippi**. This lake is 9 M. long by 1-1½ M. wide, and swarms with many kinds of fish, among which are maskinonge, trout, pike, pickerel, bass, and mullet. Blackberry Mt. on the E. shore, abounds in blackberries during their season. The train now follows the Massawippi River for 16 M. to its confluence with the St. Francis, at *Lennoxville* (two inns). This is the seat of **Bishops' College**, an institute of high reputation, under the care of the Episcopal Church, with preparatory schools attached, and a staff of able professors. This college has been called "the Eton and the Oxford of Young Canada." Productive copper and lead mines are worked in the vicinity of Lennoxville.

Station, **Sherbrooke** (*Sherbrooke House; Magog House*), a manufacturing village prettily situated at the confluence of the Magog and St. Francis Rivers. There are long rapids in the St. Francis near the village, and other fine scenery in the vicinity. Sherbrooke is the metropolis of the Eastern Townships, and is the most important station between Montreal and Portland. It contains the Stanstead County buildings, which are well situated on a commanding site.

Stages run daily to *Magog*, 16 M. S. W. on Lake Memphremagog, passing Little Magog Lake.

At Sherbrooke the traveller changes cars, and proceeds by the Grand Trunk Railway to **Quebec** (121 M.), or to **Montreal** (101 M.). - See Route 40.

25. Boston to the Hoosac Tunnel.

Via Fitchburg R. R. and Vt. and Mass. R. R., in 136 M. Stages cross the Hoosac Mt. to N. Adams, whence a railroad line runs to Troy and Albany. Saratoga is sometimes visited by this route, but several changes are necessary. The favorite route to Saratoga is by way of Fitchburg, Bellows Falls, Rutland, and Whitehall (express trains in 9-11 hrs., without change of cars).

The train leaves the fine castellated granite station of the Fitchburg Railroad (Pl. 1) on Causeway St., near the Warren Bridge to Charlestown, and soon crosses the tracks of the Boston and Maine, Eastern, and Boston and Lowell Railroads, on their long trestles over Charles River. Charlestown Heights on the r. and the long hills of populous Boston on the l. are in sight for a few minutes, then the train runs past the stations, *Prospect St.*, *Somerville*, *Cambridge*, *Belmont*, and *Waverley*. Near the latter station is the finest grove of oaks in New England (see Flagg's "Woods and By-ways").

Waltham (*Central House* ; *Prospect House*) comes next, and is an active town of about 9,000 inhabitants. Here, in 1814, was erected the first large cotton-mill in America, and extensive mills are still in operation here. The Waltham Watch Company's works are the largest in the world, engaged in making watches ; upwards of 700,000 of these timekeepers have been sold in America, their reputation being very high. Every part of these popular and justly-celebrated watches is made by machine-work, while the works of Swiss watches are formed by hand. The extensive buildings of this company are on the banks of the Charles River.

At Waltham, the track of the Watertown Branch rejoins the main line, after passing several petty stations between Waltham and its divergent point at Brickyard Junction. *Watertown* is the most important of these points, while Mount Auburn and Fresh Pond are also frequently visited by this route.

N. P. Banks was born at Waltham in 1816. His parents were factory-hands, and he himself was for some time a "bobbin boy." Applying himself to study, journalism, law, and politics, he rose rapidly, and was Member of Congress in 1853-72 and 1865-7, Governor of Mass. 1858-61. During the Secession War he was a Maj.-Gen., and was defeated by Stonewall Jackson in the Shenandoah Valley, after which his army was only saved by its superior fleetness. While commanding in Louisiana he took Opelousas and Alexandria, inflicting severe losses on the enemy, and then, after a long siege, the Mississippi River fortress of Port Hudson was surrendered to his army. In 1864 he advanced far up the Red River, but after several sharp, sudden attacks by the Confederate General Dick Taylor, he was forced to make a rapid and disastrous retreat with his unwieldy expeditionary force. In the Presidential contest of 1872, he joined the Liberal party, and consequently failed to secure a re-election to Congress in that year.

After leaving Waltham, Prospect Hill is seen on the r., from whose summit (480 ft. high) a fine view is obtained of Boston and its western suburbs. The line soon passes into the valley of Stony Brook, and beyond the station of that name, stops at *Weston*, 1 M. N. from the bright upland village of Weston. *Lincoln* is $1\frac{1}{2}$ M. S. W. of the village in the centre of the town of Lincoln, near which are two large ponds well stocked with

fish. The train soon gains the W. border of the forest-surrounded *Walden Pond*, on whose banks lived Thoreau (see page 28).

At *Concord Junction* the Framingham and Lowell Railroad is crossed, and then the train passes the stations, *S. Acton*, *W. Acton*, and *Littleton* (the Indian Nashoba). From *S. Acton* a branch road runs to *Marlboro'* (13 M.), crossing the Pompscitticut district of the Indians, and stopping at *Maynard*, *Rockbottom*, and *Hudson*.

Beyond *Littleton* is *Ayer Junction* (formerly *Groton Junction*), a flourishing village and railroad centre.

The Stony Brook Railroad runs to Lowell (13 M.) down the valley of the Stony Brook, passing through the towns of *Groton*, *Westford*, and *Chelmsford*. *Westford* has a quiet village situated on far-viewing heights.

The Peterboro and Shirley Branch runs to *Greenville* or *Mason Village* (N. H.), passing through the towns of *Groton*, *Townsend*, and *Mason*. *Townsend Harbor* is a village on the Squamicook River, and *Centre & W. Townsend* are small villages of no importance. *Mason Village* was set off under the name of *Greenville* in July, 1872, amid general jubilations and a salute of 40 guns. It is a manufacturing place, situated on the Souhegan River, which has here a fall of 80 ft. in a distance of 80 rods.

The Worcester and Nashua Railroad crosses the present route at *Ayer Junction*.

After leaving *Ayer Junction*, the Fitchburg Railroad crosses the towns of *Shirley*, *Lunenburg*, and *Leominster*, with occasional views of *Wachusett* to the l. as the train approaches Fitchburg. **Fitchburg** (*American Hotel*; *Central House*) is a small city (incorporated 1872) of about 12,000 inhabitants. It was known in the colonial days as Turkey Hills, from the great number of wild turkeys found here. It is a busy, plain, wide-awake place, which has quadrupled its population within 28 years by its encouragement of manufactures and by its being a centre of railroads. The city is built along the banks of a stream which affords a fine water-power. Many small factories are ranged along this stream, which is the life of Fitchburg. 1,000 men are engaged in the manufacture of machinery and agricultural tools; 500 men are in the chair-making business; 10 paper-mills, with 200 hands, turn out \$1,000,000 worth of goods yearly; while two or three cotton-mills are well worked and busy.

The views from *Rollstone Hill* (the seat of large quarries) and *Pearl Hill* are of interest. In memory of her soldiers who fell in the Secession War, the city has erected a fine monument from designs by Milmore. It represents the Goddess of Liberty, a soldier, and a sailor, all of heroic size, and cast in bronze at Chicopee, in this State. These statues stand on a high, inscribed pedestal.

In 1793, Fitchburg maintained a semi-weekly stage to Boston. At present it has 7 trains a day running over 50 M. of track to Boston, by the Fitchburg Railroad, and 4 trains daily to Boston by way of *S. Framingham* (58 M.). The *Cheshire R. R.* runs hence N. W. to Keene and Bellows Falls (see *Route 26*); the *Vt. and Mass.* runs W. to Hoosac Tunnel; and the *Worcester and Fitchburg R. R.* runs S. to Worcester.

After leaving Fitchburg, the Vt. and Mass. track is entered upon. Stations, *W. Fitchburg* and Wachusett, from which a line of stages runs from the trains S. to Princeton and **Wachusett Mountain** (*Prospect House, Wachusett House, Mountain House*). The mountain is easily ascended from the lofty village, and presents a remarkable view from the ocean to the farthest Hoosac Mts., and from Monadnock in the N. over the extensive lines of the lower Green Mts. Princeton is a favorite summer-resort on account of its high location, its pure, cool air, and its quiet ruralness.

Station, *Westminster* (Westminster Hotel), a town granted to the veterans of the Narragansett War, and settled as Narragansett No. 2. The village is 3 M. from the station on the highlands which form the watershed between the Connecticut and Merrimack Rivers. Station, *Ashburnham*, which in the colonial time was called Dorchester Canada, having been granted to men of the former place (in 1690) for campaigning against the latter. This is also a hill town on the watershed highlands. Station, *Gardner* (named for an officer who fell at Bunker Hill), near a village which is extensively engaged in chair-making. The line now enters Miller's River valley, and stops at *Templeton* (Grove Hotel) in a town granted to the old veterans as Narragansett No. 6. The soil of Templeton is fertile, and it abounds in manufactories. Occasional fine views are gained from the elevated line of the track, especially of Monadnock and other mountains in the N. The road passes through the quiet hill-towns of *Royalston, Athol, Orange, Wendell, and Erving*, to *Grout's Corner*, where it is crossed by the New London Northern Railroad (Route 12). At Grout's Corner the line leaves the valley of Miller's River and crosses the town of Montague to the Connecticut. This broad and beautiful river is crossed on an open bridge (a rare thing on the New England railroads), from which fine views are afforded on both sides. After passing over a narrow intervalle, the road crosses the Deerfield River not far from its junction with the Connecticut, and follows its valley up to Greenfield.

Greenfield (*Mansion House, American House*) is a beautiful village situated on broad intervalles near Green River, and not far from the union of the Deerfield and Connecticut Rivers. It bears a pleasing air of rural simplicity, and is a favorite summer-resort on account of its attractive environs. Fronting the public Square is a handsome sandstone church, the Town Hall, Post Office, and Court House. The soldiers' monument occupies the centre of the Square.

The *Russell Manufacturing Co.* has its works near this village. Here 5-600 men are employed in the manufacture of table-cutlery, which is superior to that of Sheffield. The works turn out annually about 300,000 dozen table-knives, and 100,000 dozen of miscellaneous cutlery, using up 500 tons of steel; 150 tons of cocoa and granadilla wood; 30 tons of rosewood; 50 tons of ebony (from Mada-

gascar); 20 tons of elephant's tusks; 25 tons of emery (from Smyrna); 200 tons of grindstones (Nova Scotia); 15 tons of brass wire; 2,000 tons of coal; 25,000 bushels of charcoal; and $1\frac{1}{2}$ tons of wax. The admirable and ingenious mechanism used in these works is worthy of note. There are also manufactures of woollen goods, carpenters' tools, &c., in the town.

The *Bear's Den* is a dark ravine with a small cave, a short distance S. E. of the village, and at the S. end of Rocky Mt. The *Poet's Seat* is on Rocky Mt., and commands a pleasing view, embracing the villages of Greenfield and Deerfield, the fair intervalles of the two rivers, and a great circle of hills surrounding all. *Arthur's Seat* is a lofty hill S. W. of the village, commanding a view of the villages and rich intervalles of Deerfield and Greenfield.

Deerfield (see *Route 24* is about 5 M. S. of Greenfield. The *Coleraine* and *Shelburne Gorges* are much visited, and in *Leyden* there is a remarkable water-worn cut in the slate-rock, 10–15 ft. wide, and 30–50 ft. deep, known as the *Leyden Gorge*. Pretty cascades are found near this place, and formidable hills tower over it. The *Coleraine Gorge* is a deep and romantic defile cut by the waters of the North River. The Stillwater Road, to the S. W., over the level meadows of the Deerfield River, and through the ancient village of Deerfield, is a popular and pleasant drive.

4–5 M. N. E. of Greenfield are *Turner's Falls*. At daybreak, on a May morning of 1676, Capt. Turner and 180 colonial soldiers, after a long forced march by night, attacked a powerful force of King Philip's insurgent Indians, who were encamping here and rioting on the spoils of the captured English towns. Turner surprised the enemy sleeping in their wigwams, and in the ensuing panic 140 of them sprang into their canoes, and were carried over the Falls and lost. 100 were shot or cut to pieces on the shore, and then Turner, having lost but one man, marched off. But the dispersed Indians rallied in swarms and hung on the line of retreat, and a rumor spread through the ranks of the colonials that King Philip and 1,000 men had reinforced the enemy. The command now broke up in panic, and Capt. Turner and 38 men were killed, besides many wounded and stragglers who were cut off. The Rev. Hope Atherton, who was present in full canonicals, was made prisoner, but the Indians were struck with such awe at his presence that they speedily let him go. Capt. Holyoke led the remnant of the force back to Hatfield. After this blow, says the old historian, "the enemy went down the wind apace." Many years later the town of Bernardston was granted to the veterans of the "Falls Fight."

In 1792, a dam and canal (3 M. long) were built here, to aid in the navigation of the river. In 1866, the Turner's Falls Co. bought 700 acres near the Falls, laid out a city, and built a curved dam 1,000 ft. long. The fall is 36 ft., and a water-power equal to 10,000 horse-power has been developed by two canals. Several manufactories have already been started here, and prophecies are heard of a second Lowell. "During high water the roar of Turner's Falls is heard from six to ten miles." Dr. Hitchcock calls this Fall a miniature Niagara. "They are by far the most interesting waterfalls in this State, and I think I may safely say in New England."

After leaving Greenfield the railroad closely follows the Deerfield River, running far S. to flank Arthur's Seat, which looms up on the r. The *Deerfield Gorge* is soon entered. "As to the defile through which Deerfield River runs between Shelburne and Conway, it is so narrow that it is difficult even on foot, to find a passage, though full of romantic and sublime objects

to the man who has the strength and courage to pass through it." (DR. HITCHCOCK). The track lies through this defile, and reveals its beauties.

Station, *Shelburne Falls* (Woodward's Hotel). "Here the river, in a distance of a few hundred yards, makes a descent of about 150 ft. over a prodigious bed of rock. The river roars through a channel which it has worn in the stone, leaping in two or three distinct falls, and rushes downward, as from flight to flight of a broken and irregular staircase; the rocks seem to have been hewn away, as when mortals make a road." (HAWTHORNE). A large cutlery manufactory is located here, and the famous Yale locks are made here. There are limestone caverns in the town. Leaving Bald Mt. on the r., the line soon crosses the river. Station, *Buckland*, in the town which gave birth (1797) to Mary Lyon, the educationist, and founder of Mt. Holyoke Seminary. The train now passes out from the defile, and runs across the long town of Charlemont (14 M.). *Centre Charlemont* (Dalrymple's Tavern) is under the shadow of Bald Mt. (not the same one as at Shelburne Falls; there are many scores of Bald Mts., so called, in New England). Charlemont was a strongly fortified frontier-town during the first half of the 18th century. The line now passes Mt. Peak on the l., crosses the river four times, and stops at *Zoar*, N. of which is the town of Rowe, with the ruins of old Fort Pelham (1744). After passing through some romantic glens, the line stops, at present, at **Hoosac Tunnel**. Large stages are in waiting, which carry passengers over the Hoosac Mt. to N. Adams.

N. Adams to Troy, see Route 23. Troy to Saratoga, by Rensselaer and Saratoga R. R., see Route 53.

26. Boston to Burlington and Montreal.

The train leaves the Fitchburg R. R. terminal station, on Causeway Street, Boston, (Pl. 1). Boston to **Fitchburg**, see Route 25. The train passes on to the rails of the Cheshire R. R. at Fitchburg, and then runs by the stations of *W. Fitchburg*, *Westminster*, *S.* and *N. Ashburnham*, and *Winchendon*. The latter is a manufacturing town on Miller's River (American House).

Fitchburg to Peterboro.

From Winchendon the Monadnock R. R. runs N. 17 M. to **Peterboro**, N. H., passing across the lake-studded town of *Rindge*, the birthplace of Edward Payson, D. D., and Marshall P. Wilder. Station, *Jaffrey*, in the town of the same name, which has an ancient church (now secularized) whose frame was raised on the day of the battle of Bunker Hill (1775). The workmen claimed to have heard the cannonading. In the N. W. part of Jaffrey is **Monadnock Mountain**, with its smooth, round top rising 3,450 ft. above the sea. An extensive view is enjoyed from the

summit, embracing many famous mts. on the N. and W., and the lake-strewn towns of Cheshire and Hillsborough Counties. No less than 30 lakes are visible, together with numerous villages, and it is said that Bunker Hill Monument may be seen on a clear day. A good summer hotel has been erected on the slope of the mt., and is much frequented by lovers of picturesque scenery. On the pretty *Contoocook Lake* a small steamer has been placed, and makes pleasant trips in summer. The lake is $1\frac{1}{4}$ M. long, and has one island of 10 acres. About $1\frac{1}{2}$ M. S. E. from Monadnock is a mineral spring containing carbonate of iron and sulphate of soda.

Station, *Peterboro* (two inns), a pretty village with some few manufactures. Stages run from this point to Dublin, Keene, Wilton, Mason, and Harrisville.

The train on the main line, after leaving *Winchendon*, passes State Line, and enters New Hampshire, stopping at *Fitzwilliam* (Monadnock Mt. House; Cheshire House; and others), a picturesque hill-town with many ponds. This town was named in 1773 for the Earl of Fitzwilliam, and its present industry is mainly centred on quarrying granite. Stations *Troy* (Monadnock House), a thinly settled upland town, with a stage-line in summer to Monadnock Mt.; *Marlboro* (Marlboro House), a rugged and unproductive town; and **Keene** (*Cheshire House*; *American House*; *Eagle House*). Keene, the shire-town of Cheshire Co., is a beautiful village on a meadow near the Ashuelot River. It has broad and pleasant streets abounding in trees, and has numerous stores on Central Square, its large trade with the surrounding country being a constant source of wealth. There are here 3 banks, 7 churches, a high school, some manufactures, and the county buildings of Cheshire.

The town has 6,000 inhabitants. Near S. Keene the R. R. passes over a fine granite viaduct 75 ft. wide and 45 ft. high. The *Beaver Brook Falls* are about 2 M. N. of the village, and are much visited. The brook falls over a stair-like succession of ledges 40 ft. into a deep basin which is a haunt of large trout.

"Keene is a proud little spot," which was settled under the name of Upper Ashuelot ("collection of many waters"), about 1735. In 1746 its fort was attacked by a large Indian force, and the villagers who were outside were cut off by the enemy. A reinforcement from Swanzey drove off the assailants. In 1753 the town was named in honor of Sir Benjamin Keene, a friend of Governor Wentworth, and at that time British minister to Spain. It was among the first to resist the British aggressions on the liberties of New England.

Stages run to *Chesterfield*, which has a lovely lake 8 M. in circumference; to *Surry* and *Gilsum*; to *Sullivan* and *Marlow*; to *Stoddard*, *Roxbury*, and *Nelson*.

The Ashuelot R. R. runs S. W. to S. Vernon. (See Route 12.)

Beyond Keene the main line passes the stations *E. Westmoreland*, *Westmoreland*, and **Walpole** (Wentworth House).

Walpole was settled in 1749-52 by John Kilburn and Col. Bellows. A strong fort was erected near Cold River, and in 1755 the garrison of Kilburn was attacked

by 400 Frenchmen and Indians. From noon till sunset the battle was carried on, the little handful of heroes within keeping up an incessant fire. The women loaded the guns, and run the bullets, and when ammunition began to fail, picked up the Indian shot which had entered the house and melted them over for their husbands' guns. Several attacks on the heavy outer doors were met by deadly volleys, and the enemy finally grew discouraged and retired to the N. It is thought that the valley towns were saved by this brave defence.

Henry W. Bellows, D. D., the great-grandson of Col. Bellows, was born at Walpole in 1814. He has been pastor of All Souls' Church (New York) for 35 years, and is one of the foremost divines of the Unitarian Church. He is an eloquent and powerful orator, and is a leader in social reforms and philanthropic movements.

Walpole is a pleasant village near the foot of Mt. Kilburn, and on the verge of broad intervalles. It has wide streets lined with trees, a neat Common, and several boarding-houses for summer guests, with whom this is a favorite resort. *Ravine Falls*, *Blanchard Falls*, and the *Abenakis Spring* are near the village, while Derry Hill commands an extensive view, including the Green Mts., Ascutney, Greylock, Monadnock, and the valley of the Connecticut.

The line now crosses the river, and stops at **Bellows Falls** (see page 164), where Route 29 crosses the present route. (Restaurant in the station.) Beyond Bellows Falls the line runs along Williams River valley, and soon begins the ascent of the E. slope of the Green Mts. Stations, *Rockingham*, *Bartonsville*, *Chester* (Chester House). From the latter station stages run to Windham, 10 M. S. W.; Londonderry (Green Mt. House), 15 M. S. W.; Weston, 12 M. W.; and Andover, 6 M. W.

Station, *Gassetts*, from which stages run to Baltimore (3 M.) and to Springfield (7 M.), a village at Black River Falls. Stations, *Cavendish*, and *Proctorsville* (Eagle Hotel), a neat village with two churches and a bank. There are fine cascades on Black River, in this vicinity, and 1 M. N. of the village is a valuable quarry of serpentine marble which is equal to the best African stone, and is largely used for decorative purposes in Boston and New York.

Station, *Ludlow* (Ludlow House), where the line passes over the Hogback, which is thought to have been an island in some primeval lake, long since drained by the break-down of the eastern serpentine ridge. Daily stage to Plymouth. The train now ascends heavy grades by *Healdville* to *Summit*, the highest point on the line, beyond which the train starts on a down grade which includes 1,000 ft. of descent in 18 M. Stations, *Mt. Holly*, *E. Wallingford*, and *Cuttingsville* (small inn), which is near Shrewsbury Peak, a commanding mt. 4,086 ft. high. Stations, *Clarendon*, *N. Clarendon*, and **Rutland** (* Bates House, \$ 2.50 - 3.00 ; Bardwell House ; Stevens House). Rutland is a well-situated and prosperous town of 10,000 inhabitants, having a large country trade and being widely known for its marble-works. There are some fine commercial buildings, others pertaining to the town, and several notable churches. St. Peter's

Catholic Church is a fine new building of stone, in the English Gothic style, while the Episcopal Church is a solid and massive stone structure. Near the twin spires which are seen on the hill is the handsome *Court House* of Rutland County, opposite which is a neat Government building. The town has a daily and 2 weekly papers, 7 churches, 3 banks, and numerous manufactories, prominent among which are the marble-works. The principal quarries and sawing-mills are at *W. Rutland*, whence immense quantities of white marble are shipped to all parts of America and Europe. It sells at the quarries for a higher price than does Italian marble delivered in New York. Large gangs of saws (without teeth, and cutting by means of sand poured in from above) are constantly running, to separate the marble into slabs.

Rutland was settled about 1770, and fortified in 1775 as a station on the great northern military road. In 1777, St. Clair's routed army retreated through the town.

Numerous pleasant excursions may be made from Rutland. **Clarendon Springs** are about 6 M. distant (stages connect with trains at W. Rutland station). These springs are of great efficacy, "containing in one gallon, or 235 inches, 46 cubic inches of carbonic acid gas, 9.63 cubic inches of nitrogen gas, 3 grains of carbonate of lime, and traces of other alkalies." In a sequestered location near the springs is a large hotel, which has been a favorite resort for many years (250 guests; \$2.50 a day, \$10 - 15.00 a week). The drives in this vicinity are very pleasant, and Clarendon Cave is often visited from the hotel.

Killington Peak is 7 M. E. of Rutland (9 M. to the summit). The road to its foot passes over the high, cold, and sterile town of Mendon, with the lofty and symmetrical peak towering in advance. The ascent of Killington is very arduous, but not dangerous, and a broad and noble view is revealed from its summit, which is 3,924 ft. above the sea. *Pico* and *Shrewsbury* are other prominent peaks in this vicinity, whose tops are rarely visited. Excursions are also made to *Sutherland Falls*, 6 M. N., one of the prettiest waterfalls in Vermont. Near the Falls are large marble-quarries from one of which a statuary marble is obtained which is said to be as fine as that of Paros or Carrara. There is a railroad station close to the Falls.

After leaving Rutland, the main line runs N. by Sutherland Falls to *Pittsford*. The village (Otter Creek House) is prettily situated, $\frac{3}{4}$ M. E. of the station, near fertile intervalles on Otter Creek. There are marble quarries in the vicinity. Station, **Brandon** (*Brandon House*, *Douglass House*), a prosperous manufacturing village on the Neshobe River, with 3,571 inhabitants, 5 churches, and 2 banks. In this and the village of Forestdale are 4 mineral paint companies, producing large quantities of paint from kaolin, which is mined in the vicinity. There are also marble

quarries, producing common and fine statuary marble and lime. Vast quantities of bog iron ore are found, which is easily melted, and yields 45 per cent of soft gray iron, adapted for cannon, car-wheels, and other castings requiring great strength. 200 tons of manganese are sent hence to market, principally to Europe. In view of this mineral wealth, and also of the rich crops on the intervalles and the abundant timber on the hills, Sir Charles Lyell said of Brandon, "I have yet to see, either in Europe or America, a spot containing such a variety of unique and valuable substances placed by nature in juxtaposition." At Brandon the Howe scales are made. Two curious caves are in the limestone ledges $1\frac{1}{2}$ M. E. of the village.

Stephen A. Douglas was born at Brandon, April 23, 1813. He became a lawyer in the State of Illinois, and arose rapidly to high honors. He was a Congressman, 1843-7, and from 1847 until his death in 1861 he was a U. S. Senator. He was candidate of the Democratic party for the Presidency in 1860, and was defeated, though receiving a large popular vote. He was the author of the "Popular Sovereignty" doctrine (that the people of the Territories should decide as to the admission of negro slavery, without the interference of Congress). He favored the peaceable annexation of Texas and Cuba, was actively conservative in the slavery question, and supported the Government against the rebellion of the Southern States.

Stages run from Brandon to *Sudbury*, 8 M. W., and to *Lake Dunmore*, 9 M. N.

From *Leicester Junction* a branch railroad runs W. across the farming towns of *Whiting*, *Shoreham*, and *Orwell* to **Ticonderoga** (17 M), **Crown Point**, and *Port Henry* (see Route 53). This road crosses Lake Champlain on a long bridge near Fort Ticonderoga.

Station, *Salisbury*, 3-4 M. W. of which is the beautiful **Lake Dunmore**, which is about 5 M. long and is environed by hills. Its clear waters are 60 ft. deep, and abound in fish. *Moosalamoo Peak* towers on its shore to a height of nearly 2,000 ft. and overlooks the lake and the surrounding country, while there are rich lake-views from *Rattlesnake Point*. *Warner's Cave* (on Moosalamoo) and the *Lana Cascade*, E. of the lake, are often visited. Lord Dunmore visited this lake (about the year 1770) and, wading into its crystal waters, poured a libation of wine into it, saying, "Ever after, this body of water shall be called Lake Dunmore, in honor of the Earl of Dunmore." The scenes of the romance, "The Green Mountain Boys," are laid in this vicinity. On the W. shore is the * *Lake Dunmore House*, which, with its cottages, can accommodate 200 guests.

Middlebury (*Addison House*, 80 guests, \$10.00-12.00 a week) is a handsome village, situated near a considerable fall in Otter Creek. It has some manufactures, but its principal product is marble, of fine quality. The Portland (Me.) Post Office is built of this marble. Besides 4 churches and a bank, the village contains the Addison County Court House, and is the seat of **Middlebury College**. This institution was incorporated in 1800, and had, in 1871, 7 instructors, 65 students, and a library of 11,000 volumes. It has three large stone buildings on an eminence near the village, and is under the care of the Congregational Church. The favorite

drives from Middlebury are to *Belden's Falls* (2 M.), *Lake Dunmore* (8 M.), and *Elgin Springs* (sulphur), 16 M.

Stages run to Cornwall (4 M.), Bridport (8 M.), and Weybridge (4 M.); also to Ripton (Bread Loaf Inn), $8\frac{1}{2}$ M. E., which is under the Green Mts., and has a few summer visitors.

Stations, *Brookville* and *New Haven* (New Haven Hotel), near New Haven River and large marble quarries. Stages run to Bristol (good inn), 5 M. E., a pretty little hamlet on a high plateau, from which the Adirondacks and Green Mts. are seen. Stages also to Lincoln, among the mts.

Station, **Vergennes** (*Stevens House* ; *Franklin House*) the smallest city in the Union (1,570 inhabitants). The site was chosen by Ethan Allen, and is on a hill at the head of navigation on Otter Creek, 8 M. from the lake. It received its city charter in 1788, and was named in honor of the Count de Vergennes, French minister of foreign affairs, 1774-83. Otter Creek has deep water, and is navigable for 300 ton vessels to the Falls at Vergennes, which have a descent of 37 ft., and are improved for water-power. The country in the vicinity is rich and productive, and commands views of the great mountain-chains on the E. and W., "a scene of grandeur and sublimity rarely paralleled on this side of the Atlantic." The *Champlain Arsenal* is located here, and covers 28 acres of ground. It is well stored with ordnance and munitions of war belonging to the United States, as well as the military supplies of the State of Vermont. Commodore MacDonough's fleet, which won the naval victory off Plattsburg, was fitted out at Vergennes in 1814.

Stages run to *Addison*, 6 M. S., a famous old border-town, in whose S. W. corner is Chimney Point, opposite Crown Point (see Route 53). It is now an agricultural town, widely known for its fine horses. The road to Addison passes through *Bridport*, a broad, quiet farming town. About 3 M. S. of Vergennes are fine cascades in Otter Creek, near which is the *Elgin Spring* (small hotel), containing sulphates of magnesia, iron, and soda, and carbonates of soda and lime. A few miles W. of Vergennes, on the lake shore, is the *Fort Cassin House*.

Beyond Vergennes the line passes through *Ferrisburgh*, *Charlotte*, and *Shelburne*, to Burlington. These are quiet farming towns with frequent glimpses of Lake Champlain and the Adirondacks on the W., and the Green Mts. on the E. Stages run from N. Ferrisburgh to Monkton, which has two pretty lakes.

Burlington, see Route 53.

27. Rutland to Bennington.

Via the Western Vermont or Harlem Extension R. R. in 55 M.

Three trains daily leave the union station at Rutland, but that which leaves at about 9 A. M. is recommended, as the others are slow and carry freight-cars, occupying over 5 hours in going 55 M.

Station, *Clarendon*, which is separated from the Clarendon Springs valley by a mountain. The line then crosses the town of *Wallingford* (2

stations) near the lofty ridge called the White Rocks. Station, *Mt. Tabor and Danby*, between two rugged hill-towns, so-named, the former of which has less than 300 inhabitants on 23,376 acres of land, much of which is on the summits of the Green Mts.

Stations, *N. Dorset* (Curtis House) and *E. Dorset* (E. Dorset House). The line runs through a valley between the Green Mts. on the E. and the marble hills of the Taconic system on the W. *Mt. Æolus*, the highest peak of the latter chain, has large marble quarries on its E. slope.

Marble was first quarried here in 1785, and now there are 62 gangs of saws running here and in Manchester, sawing 750,000 ft. yearly. Over 300 quarrymen are employed, and the Dorset marble is sent to every part of the U. S. and Canada. One quarry produces the Italian marble, so called from its resemblance to that of Carrara. The supply is inexhaustible, and the stone is found in parallel strata 1-6 ft. thick, separated by thin seams of other rock. Sometimes 20 of these strata are found, one above the other. On the S. of *Mt. Æolus* (formerly called Dorset Mt.) is a remarkable cave containing 5 chambers and several long passages in the rock. Its innermost room is 50 ft. high, and has many stalactites.

The line now follows the valley of the Battenkill to **Manchester** (**Equinox House*, open June to Dec., a large and first-class hotel; *Elm House*; *Vanderlip House*). This is a quiet and beautiful village at the base of Mount Equinox, and is much visited in summer on account of its pure air, picturesque environs, and fine fishing. The village sidewalks are of marble from the inexhaustible quarries on the mts., and the principal buildings are Burr Seminary and the Bennington County Court House. *Mt. Æolus* is 5 M. N. and *Stratton Mt.* lies to the S. E., near which is *Stratton Gap*, a romantic pass which has been reproduced in one of Durand's best paintings. A road has been constructed to the house on the summit of **Mt. Equinox**, which is 3,706 ft. above the sea. From this peak a fine *view is gained, which includes Greylock, chief of the Berkshire Hills, on the S., and the remote Catskills on the S. W. On the S. W. is Saratoga, with parts of the Hudson Valley running N. to Lakes George and Champlain, long reaches of which are visible. *Mt. Æolus*, Killington and Shrewsbury Peaks loom up in the N.; Ascutney is in the N. W., and far beyond Stratton Mt. (S. of E.) is the dim blue cone of Monadnock. Skinner Hollow is a deep amphitheatrical gulf on the S. of Equinox Mt., which has a cave so profound that snow remains there all the year. There are also marble quarries in the Hollow.

The first meeting of the Vermont Council of Safety took place at Manchester, July 15, 1777, and ordered the assembly of the militia to meet Burgoyne, who was marching on Albany. 1,400 men gathered here under Stark and Warner, and encamped until the Hessians advanced on Bennington, when they marched down and beat them. (Among the best New England historical romances are "The Green Mountain Boys" and "The Rangers," by Hon. D. P. Thompson. Their scenes are laid in this part of the State during the Revolutionary era.)

Stages run E. to the mountain-towns of *Peru* and *Winhall*.

Station, *Arlington* (two inns), a diversified town in which are West and Red Mts., several small caves, and a blowing spring. The State seal of

Vermont had its origin here. A young English lieutenant was courting an Arlington girl, and one day, while there, he engraved on one of Gov. Chittenden's horn-cups a picture of a cow and pine-tree and harvested grain, being a view from the W. window of the Governor's house. Ira Allen saw this engraving, and adopted the device for the seal of the State.

7 M. N. of Arlington is *Sandgate Notch*, a remarkable passage through the solid rock, 30 ft. high, 800 ft. long, and less than 12 ft. wide. This pass is used by a highway. Stages run from Arlington to Sandgate.

Stations, *Shaftsbury, S. Shaftsbury* (stages to Glastenbury), *N. Bennington*, and **Bennington** (* Mount Anthony House, accommodating 200 guests; Stark House; Putnam House). Bennington is a pretty village situated 800 ft. above the sea and overlooking the surrounding country. It has 4 churches, a seminary, a bank, and two weekly papers, while the population of the town is nearly 6,000. 1 M. from this village is *Old Bennington Centre*, of Revolutionary fame; a quiet hamlet with the county buildings on its main street. Here stands the old Catamount Tavern, whose sign was a stuffed wild-cat on a pole, grinning fiercely towards New York. The State Council of Safety used to meet here, and make plans to defend the State against the claims of New York and the armies of the king. Ethan Allen's house is also preserved, and stands next to the Tavern.

Mount Anthony is 2 M. by foot-path from Bennington ($4\frac{1}{2}$ M. by road). From the tower on its summit a beautiful view is afforded, including most of S. W. Vermont, Mt. Equinox, Mt. Æolus, the broad valley of the Walloomsack, Greylock in Berkshire, and peaks of the Catskills. Prospect Mt. and the pickerel ponds of Woodford, in the E., are much visited.

Stages run on the great southern highway across the State to Brattleboro. Bennington was settled in 1761 by Mass. people, and was named in honor of Benning Wentworth, Governor of N. H. For 60 years it was the most populous place in Vermont, of which it now is the fourth town. Soon after its settlement the territory now occupied by Vermont was transferred, by royal edict, from the jurisdiction of New Hampshire to that of New York. The titles of the settlers to their lands were rendered null and void, and it became evident that they must either repurchase, abandon, or defend them against New York and the king. The sturdy pioneers determined on the latter course, and their well-organized resistance left the territory in a state of anarchy until the outbreak of the Revolution. The headquarters of the anti-New-York party was at Bennington, and here, in 1777, was established a depot of military supplies. Fort Ticonderoga was taken by an expedition from this place (1775), and when Burgoyne's royal army was marching on Albany, he sent Col. Baume with the Brunswick Dragoons and a motley swarm of Canadians, Tories, and Indians, to capture Bennington. This force (about 600 men) met Lieut.-Col. Gregg and 200 Vermonters, and drove them back until Gen. Stark's brigade moved up from Bennington (5 M. distant). Baume now halted and threw up entrenchments on a commanding hill, and Stark encamped near by. After two days' skirmishing, Stark was joined by a regiment from Berkshire, which, with the 3 N. H. regiments and Herriek's Rangers, gave him a force of 1,800 men. On the day before the battle, Parson Allen, of Berkshire, said to Stark, "General, the people have been too often called out to no purpose. If you don't give them a chance to fight now, they'll never turn out again." "You would n't turn out now while it's dark and rainy, would you?"

said Stark. "Well, no, not just now," answered the Parson. "Well," answered Stark, "if the Lord should once more give us sunshine, if I don't give you fighting enough, I'll never ask you to turn out again." On the morning of Aug. 16, 1777, the American militia were drawn out, and three detachments were sent to attack the Hessian right, and right and left rear. "See there, men! there are the red-coats. Before night they are ours, or Molly Stark will be a widow," cried Stark, as he led his men to the attack. The Indians fled between the converging columns, and the Tories soon gave way, but the German soldiers fought with their swords when their ammunition had given out, and only surrendered when enveloped by superior numbers. The action lasted for two hours, "like one continued clap of thunder," and scarcely had the victors begun to rest when Col. Breyman came near the field with a large reinforcement for Baume. Fortunately Warner's Vermont regiment had just arrived on the field, and the valiant Warner (who had been among the foremost in the battle) led them against the enemy. The other corps were soon hurried to their support, and Breyman retreated at sunset. 237 of the enemy were killed and wounded, 700 were made prisoners, and 4 cannon were taken. The Americans lost about 200 (or, according to Stark's report, 70 killed and wounded). The 16th of August has been observed as a holiday at Bennington ever since the battle.

From Bennington to New York, the trains run in 9-12 hours, by Lebanon Springs (see Route 23), Chatham Four Corners, Croton Falls, and White Plains. Trains to Albany in $4\frac{1}{2}$ -6 hours.

28. Rutland to Albany.

Via the Rensselaer and Saratoga R. R. in 101 M. Fare, \$3.65.

Stations, *Centre Rutland* (near which the river is crossed at Gookin's Falls), and *W. Rutland*, with its great marble-works. Stages run hence to Clarendon Springs (see page 182) in 4 M. ; fare, 75 c. Station, **Castleton** (*Sanford House*), a pretty village on a plain near Castleton River, which has a State Normal School and five churches. There are marble and slate quarries in this vicinity, also works for preparing marbleized slate, an excellent imitation of marble. 100 men are engaged here in making white soapstone slate-pencils, 300,000,000 of which are made yearly. At W. Castleton, 1,000 billiard beds and 2,000 mantels of slate are made yearly.

Excursions may be made from Castleton to *Lake Bomaseen*, 4 M. N. W. This Lake is 8 M. long and $1-2\frac{1}{2}$ M. wide, and is lined on its W. shore with marble-mills and slate-quarries.

7 M. N. of Castleton is *Hubbardton*, where, near the Baptist church, is an obelisk near a flagstaff, which marks the battle-field of July 7, 1777. As soon as the British knew that St. Clair had evacuated Ticonderoga, Gen. Frazer was sent in pursuit of him with a small force of light infantry. The American rear-guard was composed of 3 thin regiments, one of which retreated as soon as the action commenced. Frazer attacked the regiments of Warner and Francis with 700 men. The numbers were about equal, and the fight was long and desperate. At last the Baron Riedesel arrived on the field with his Brunswickers, and the American lines were broken. They lost 324 men, including Col. Francis, who fell at the head of his regiment, while the British loss was 183. The bones of the slain bleached on the battle-field in the deserted town for 7 years, when they were buried near the site of the monument.

Rutland and Washington Line.

Poultney (*Poultney House ; Beaman's*) is 7 M. S. of Castleton, on the Rutland and Washington Railroad. The line passes through a region

abounding in slate-quarries, the chief of which are the Eagle, Copcland, and Snowdon. Poultney is a handsome village, where Horace Greeley learned the printer's trade, 1826-30, and Jared Sparks mastered the carpenter's trade. At one end of the village is the large building formerly occupied as the Ripley Female College. This fine old building is situated in pleasant grounds, and is now used as a summer boarding-house (250 guests, \$10-12.00 a week). Among the principal points frequented by visitors are the Gorge, the Bowl, Carter's Falls, Lake Bomaseen, on the N., and **Lake St. Catharine** (or Austin) on the S. The latter is about 6 M. from Poultney, and is over 5 M. long. Near the foot of the lake is a promontory on which stands St. Catharine's Hotel, with the quiet waters nearly surrounding it, and the Haystack, Moosehorn, and St. Catharine Mts. near by.

Middletown Springs are 8 M. E. of Poultney (stages daily, 75 c.). These springs are mainly impregnated with iron, and have become a very popular resort. The Montvert Hotel accommodates 300 guests; \$3.00 a day, \$15.00 a week. The Valley House is a smaller hotel in the vicinity.

Beyond Poultney the Rutland and Washington Division runs along the border to Eagle Bridge and Troy, 68 M. from Poultney, stopping at the Vermont stations of Pawlet and Rupert.

Beyond Castleton the next main line station is at *Hydeville* (Lake House), at the foot of Lake Bomaseen. Station, *Fairhaven* (Vermont House), with a neat oval park, from which the streets radiate. Vast amounts of slate for roofing and other purposes are quarried in this town.

Daily stages run N. to the farming towns of *Westhaven* and *Benson* (10 M.), on the shore of Lake Champlain. Beyond Fairhaven the line reaches **Whitehall** (N. Y.), whence the Champlain steamers start for Ticonderoga, Burlington, and Rouse's Point. For a description of the Lake, and of the railroad from Albany to Whitehall, see Route 53.

29. Boston to Lowell, Concord, and Montreal.

Via the Boston and Lowell, Northern, and Vermont Central Railroads. Distance, to Lowell, 26 M.; to Concord, 75 M.; to Montreal, 334 M.

(The other routes to Montreal are (1) by way of Fitchburg and Rutland, 344 M.; and (2) by way of Portland and the Grand Trunk Railway, 405 M.)

By the Lowell route, Pullman and passenger cars run through to Montreal, without change, in 14-16 hours. Through express trains usually leave the Boston and Lowell depot, in Boston, at 8 o'clock, A. M., and at 6 P. M., arriving in Montreal, respectively, at about 10 o'clock in the evening, and 10 in the morning. The line passes through the populous cities of Lowell, Nashua, Manchester, and Concord, and then runs N. W. through the pleasing rural scenery of New Hampshire and Vermont.

The train leaves the superb terminal depot of the Boston and Lowell R. R., in Boston, and crosses Charles River, with the city of Charlestown resting on hills to the r. After passing seven suburban stations, the train reaches *West Medford* (2 hotels), on the Mystic River, the seat of **Tufts**

College. The handsome buildings of the College are on Walnut Hill, some distance S., and near the College Hill station. Tufts College is a well-conducted institution, founded in 1852, and having (in 1871) 15 instructors and 62 students, with 10,000 volumes in the library. It is under the care of the Universalist Church, and its president is Dr. A. A. Miner, a leader in that sect. "Meadford" was settled about 1633, on the Indian lands called Missituck, and soon won a fame for its shipbuilding which it still preserves.

John Brooks, who was born here in 1752, fought through the Revolution, commanding in succession the 19th, 8th, and 7th Mass. regiments of the Continental army. He was Governor of Mass. 1816-23.

Maria G. Brooks, born here in 1795, was called by Robert Southey "the most impassioned and most imaginative of all poetesses."

The line passes along Mystic Pond and stops at *Winchester*. On a hill near this pond, lived Nanepashemet, "the Moon-God," an early sachem of the Mass. Indians. He was killed in battle about 1619, and buried in his fortress here. Station, *Winchester*, whence a branch track runs to *Woburn* (2 M.), a large village engaged in manufacturing (pianos, tanneries, &c.). The pretty lakelet called Horn Pond is close to the village. Station, *E. Woburn*, whence a branch track runs to *Stoneham*, a busy shoemaking town, near which on the S. is the romantic **Spot Pond**, surrounded by hills, and 143 ft. above the sea, studded with islands, and covering 283 acres. It was found and named by Gov. Winthrop, in 1632, and has become a favorite resort for Bostonians.

Stations, *N. Woburn*, *Wilmington*, *Billerica*. The latter station is in an extensive farming town. *Tewksbury*, 2 M. N. of the station, is the seat of a large institution for the State's paupers. Shortly after leaving *N. Billerica* the line crosses the Concord River and enters Lowell.

Lowell.

Hotels.—There is need of a good hotel in this city. The American, City, and Lovejoy's are the principal houses now in the city.

Pawtucket Falls was a favorite fishing-place of the Indians until their extinction, and was often visited by Eliot and Gookin. In 1826 a town was set off here, and named Lowell, in honor of a Newburyport gentleman, who introduced the cotton-manufacture into the United States. The Pawtucket Canal extends from the head of the Falls to the Concord River below the city, and furnishes an immense water-power, having a fall of 33 ft. To obviate the trouble caused by an occasional decrease of water in the Merrimac River, a large canal has been built from the outlet of Lake Winnepesaukee (commenced in 1846). The Pawtucket Canal was cut late in the last century, for purposes of navigation, but did not pay, and was bought in 1821 by Bostonians, who established a factory here. There were then 12 houses here, and in 1828 the population had

risen to 3,532. The Merrimac Mills were started in 1823, and at present their enormous works turn out 12,000 miles of cotton cloth yearly.

Beginning up-stream, the first line of factories belongs to the Lawrence Mills Co., while on the canal, parallel with Suffolk St., are the Tremont and Suffolk Mills. Below the Lawrence Mills are the immense **Merrimac Mills** and Print Works (foot of Prince St.), which are succeeded along the river-front by the Boot and the Massachusetts Mills. The Middlesex, Prescott, Appleton, Hamilton, and Lowell Carpet Mills are on the canal, S. of Merrimac St., and are best seen from the bridge on Gorham St.

In 1871, there were at Lowell 69 mills, with a capital of \$14,000,000, employing 9,404 women and 5,413 men, and running 570,586 spindles and 13,466 looms. 41,036 tons of coal, 18,200 bushels of charcoal, and 1,855 cords of wood were used yearly for the engines (of 5,320 horse-power), and 105,776 gallons of oil, 1,000 tons of starch, 2,662 tons of wool, and 16,740 tons of cotton were consumed yearly. The chief annual products were 2,530,000 yards of woollen stuffs; 1,924,000 yards of carpeting; 130,000 shawls; 9,000,000 pairs of hose; 51,691,200 yards of cloth, dyed and printed; and 122,096,000 yards of cotton fabrics. In addition to the steam horse-power (5,320), there is about 10,000 horse-power derived from the canals. Besides the long line of factories on the canal, another great line is built along the Concord River, which here joins the Merrimac.

When the factory system was first inaugurated, the operatives were mostly Americans, but now the mills are worked almost entirely by Irish, Nova Scotians, and French Canadians. So, with the 15,000 operatives, mostly foreign, Lowell possesses but little of the aspect of a New England city. The French have a large and handsome church (Catholic), near which is the great hospital of St. John, conducted by the Sisters of Charity. The city has 42,000 inhabitants, with 26 churches, 62 schools, about 6,000 dwelling-houses, 10 lodges of Masons, and 4 of Odd Fellows.

Merrimac St. is the main thoroughfare of the city, and contains long lines of shops. On this street is the Post Office, City Hall, and a venerable-looking Episcopal Church and rectory. On S. Common is St. John's Church, also the buildings of Middlesex County (which was organized in 1643, together with Essex, Suffolk, and Norfolk Counties). On Merrimac St. is a large public library, and the Y. M. Christian Association has pleasant reading-rooms near the corner of Merrimac and Gorham Sts.

Lowell has been visited by many of the distinguished foreigners who have travelled in America. Sir Charles Lyell came here, also Charles Dickens, who devoted a chapter (IV., *American Notes*) to it, and Fredrika Bremer, who speaks of the "glorious view from Drewcroft's Hill on a cold winter evening, of the manufactories of Lowell lying below in a half-circle, glittering with a thousand lights, like a magic castle on the snow-covered earth."

By going to the upper end of Merrimac St., and turning to the l., one comes to the bridge over the Merrimac, from which a view of Pawtucket

Falls and the canal entrance may be gained. On a little enrailed green on Merrimac St. the city has erected a monument to two of her young men, Ladd and Whitney, who belonged to the 6th Mass. Militia Reg., and were killed during the murderous attack on that corps by the roughs of Baltimore, April 19, 1861. Near this monument is a * bronze statue of Victory, by the celebrated German sculptor, Rauch, which has been erected as a memorial to the men of Lowell who fell in fighting against the Rebellion.

After leaving Lowell, the line follows the Merrimac River to Concord. A seat on the r. is preferable. Stations, *Middlesex*, and *N. Chelmsford*. Middlesex is at the N. end of the old Middlesex Canal, running from this point to Boston, 27 M. It was completed in 1808, at a cost of \$ 528,000, and had 20 locks in a fall of 136 ft., but since the era of railroads began, it has been neglected, and is not used. At *N. Chelmsford* the Stony Brook Railroad comes in from Groton (Ayer) Junction. The line soon regains the banks of the Merrimac near Wicassie Falls, and stops at *Tyngsboro'*, soon after which it crosses the State line and enters New Hampshire.

Nashua.

Hotels, * Indian Head, corner Main and Pearl Sts. ; Tremont ; Merrimac, opposite the station.

The town of Dunstable (in which Nashua was included) was settled before King Philip's War, and was bravely defended through that and the succeeding conflicts. So late as 1803, the present site of the city was a sandy plain covered with pine-trees. The Nashua Manufacturing Co. was chartered in 1823, and factories were erected along the canals, while the new village grew in importance, until in 1853 it became a city.

Nashua is a pleasant city (10,541 inhabitants), situated on hilly ground at the confluence of the Merrimac and Nashua Rivers. It has 11 churches, 6 bodies of Masons, 3 of Odd Fellows, and 1 daily and 2 weekly newspapers. The streets are broad and well-lighted, and lined with trees, while some of the churches and private residences are of pleasing appearance. "By the wondrous alchemy of skill and enterprise, out of the waters of the Nashua and the sands of this pine plain, from some half a dozen dwellings have been raised up these thronged and beautiful villages."

The water-power is taken from Mine Falls on the Nashua River, from which a canal has been cut 3 M. long, 60 ft. wide, and 8 ft. deep, with a head and fall of 36 ft. The Nashua Manufacturing Co. and other cotton mills have over 2,000 operatives. 110 men are engaged in making cards and glazed paper ; 150 men make locks ; 75 make fans ; 40 make hoop-skirts ; 70 are engaged on soapstone work ; and 160 make shuttles and bobbins. The Underhill Edge Tool Co. uses 100 tons of iron and steel

annually; the Vale Mills consume 500 bales of cotton; and the immense Nashua Iron Works consume 3,000 tons of iron, 800 tons of steel, and 4,000 tons of coal each year. Besides the goods already mentioned, Nashua produces yearly 30,000 yards of ingrain carpets, and 16,000 bedsteads.

The station of the through line is 1 M. E. of the centre of Nashua. The Worcester and Nashua station is on the main street, and the Boston station is $\frac{1}{2}$ M. N. of it, in the centre of the city.

Nashua to Wilton.

From the latter station the Wilton Branch R. R. runs 16 M. N. W. to **Wilton**. This line passes through a pleasant and retired hill-country, much frequented by city people in summer.

Stations, *S. Merrimac* and *Amherst*. The main village of Amherst town is some distance N. of the station, and the popular Amherst Spring (good hotel) is about 3 M. from the station (stages to the village and springs). The village is on a high plain, $\frac{1}{2}$ M. square, and abounds in shade-trees.

This town was granted to Essex Co. veterans of the Narragansett War, and was named in 1760, in honor of Gen. Amherst, the commander in the Conquest of Canada. It sent 120 men to the Continental Army, although its population in 1775 was larger than in 1870. In a small farmhouse, 5 M. from Amherst village, Horace Greeley was born, Feb. 3, 1811. He learned the printer's trade in Poultney, Vt., between his 15th and 19th year, and soon after went to New York, where he started several papers (the *Morning Post*, *New-Yorker*, *Jeffersonian*, *Log-Cabin*). In 1841 he founded the *New York Tribune*, which became one of the most powerful and spirited of the New York newspapers, and advocated the abolition of slavery, the elevation of the laboring classes, and the protection (by tariff) of American manufactures. Mr. Greeley generally supported the measures of the Republican party from its origin until 1872 although favoring a more extended amnesty for the Southern States. In 1872 he joined the Liberal party, which seceded from the Republicans on account of dissatisfaction with President Grant's administration. He was nominated as candidate for the Presidency by the Liberal Convention at Cincinnati, and by the Democratic Convention at Baltimore. After a long and bitter campaign, Grant was re-elected, and soon after, worn out by toil, Mr. Greeley died near New York. He was eccentric in many of his ways, and loved a quiet, rural life, while his powerful and pungent editorials made him the leading journalist in America.

Station, *Milford* (Union House; Milford Springs House), a manufacturing village on the broad meadows of the Souhegan River. Stages run daily to *Mount Vernon*, with its "beautiful prospect of towns and villages in the Merrimac and Souhegan valleys. Sunrise in summer brings to view a vast expanse, including the beautiful villages of Massachusetts; while from the spire of the church can be seen the snow-white sails upon the distant ocean. The name is a fit emblem of the spot; for, clustering around this eminence, are numerous farms, in the mild seasons clad in the richest verdure." The large summer-hotel was partially burned in 1872, but is in process of reconstruction.

A daily stage runs from Milford to Frankestown (small inn), the birthplace of Senator Levi Woodbury. The town has one mountain and two lakes, also a quarry of fine gray freestone.

Station, *Wilton* (Whiting House), a manufacturing village in a glen on the Souhegan River. 2,000 gallons of milk, besides other dairy products, are sent to Boston daily from this town. This is a popular summer resort (2 $\frac{1}{2}$ hours from Boston), being rich in hill-scenery and falling waters. Barnes' Cascade, Pack Monadnock Mt., and Lyndeborough are often visited. A daily stage runs from Wilton to *Lyndeborough* (Mountain House).

Nashua to Concord. 35 M.

Stations (on the main line), *Thornton's Ferry*, *Merrimac*, *Reed's Ferry*, *Goff's Falls*, and *Manchester*.

Manchester.

Hotels. Manchester House, Elm St. ; City Hotel ; Stearns House ; Amoskeag House.

This city was settled early in the last century by conflicting colonies of Scotch Presbyterians and Massachusetts Puritans. For 75 years from its settlement, Derryfield (as it was then called) had neither a minister nor a lawyer, nor did it send any of its youth to college. The large fisheries at the Falls attracted the settlers here.

"From the eels they formed their food in chief,
And eels were called the 'Derryfield beef' !
And the marks of eels were so plain to trace,
That the children looked like eels in the face."

Manchester (23,509 inhabitants) is the most populous city in New Hampshire, and is built on a broad plain near the Merrimac River. Elm Street is its principal thoroughfare, and is 100 ft. wide and over a mile long. Public squares, with ponds enclosed in their limits, have been laid out in different parts of the city, and among the churches may be noticed the Unitarian, on Beech St., the Catholic and the Episcopal on Lowell St., and the Convent and Church of St. Ann, on Merrimac St. The City Library contains about 16,000 volumes, and there are 2 daily and 2 weekly newspapers. The compact lines of tenement-houses, near the factories, were built for the operatives, and are both commodious and substantial. The growth of this city has been very rapid, and its river-front is now lined with great brick factories, a striking view of which is obtained from the W. bank of the river (in Goffstown).

The water-power of Manchester is furnished by the Blodget Canal, built in 1816 around the Amoskeag Falls on the Merrimac River. These Falls have a descent of 47 feet, with rapids above, and in high water they afford, even now, a grand sight. The Amoskeag, Stark, and Langdon Mills, and the Manchester Print Works are located along the canal. The Amoskeag Co. has 6 mills, with 105,000 spindles, employing 3,000 hands; and 38-40,000 bales of cotton are consumed yearly in the factories of the city. The Print Works have a capital of \$1,800,000, and employ 3,200 hands and 16 printing-machines, with 3,000 horse-power, printing 20,000,000 yards of cloth yearly. The Manchester Locomotive Works employ 325 men, and make 50 locomotives yearly, besides much other heavy work, while the Amoskeag Manufacturing Co. turns out many steam fire-engines. There are also made here yearly 150,000 axes ; 3,750 Novelty sewing-machines ; 22,000 barrels of ale ; many thousand dozen files ; and several hundred tons of paper.

Lake Massabesic (* *Massabesic House*, 100 guests, \$ 2.50 a day, \$10.00 a week) is 4 M. E. from the city, on the Candia road. The Portsmouth Railroad has a station near the hotel. The Lake is 4 M. long, and is very irregular in outline, having 31 M. of shore, with some beaches of white sand, while numerous picturesque islets dot its surface. The Fairy Grotto and a curious sulphur cave (Devil's Den) are often visited.

The Manchester and N. Weare R. R. runs N. W. 19 M., passing the stations, Bedford, Goffstown, Parker's, Oil Mills, Raymond, and E. Weare, to N. Weare, in a busy manufacturing town. The Concord and Portsmouth R. R. runs from Manchester to Portsmouth in 18 M.; and a railroad runs S. E. to Lawrence in 26 M.

After leaving Manchester, on the main line, the train passes Martin's Ferry, and stops at **Hookset** (*Ayer House; Stearns House*). Just before reaching the station, the Merrimac is crossed by a bridge 550 ft. long. This village is the seat of cotton factories and extensive brickyards (making 4,000,000 bricks a year), and derives considerable water-power from 16 ft. falls in the river. In the W. of the town is a lofty and ragged pile of rocks called *Pinnacle Mt.*, from whose summit a good view of the valley is gained. At its base is a deep, clear pond which has no visible outlet. This town is on the reservation given by Massachusetts to Passaconoway, the great Sachem of the Pennacooks. His son and successor, Wonnolancet, was converted by the apostle Eliot, and when King Philip's ardent eloquence had persuaded the Pennacooks to enter the anti-English Confederation, he resigned the sachemdom, and went to Canada with his family.

A branch road (over which some through trains pass) crosses the river at Hookset Falls, and runs through Suncook and Pembroke to Concord. *Suncook* (*Suncook House*) has a water-power from the falls in the Suncook River, near its confluence with the Merrimac.

The Suncook Valley R. R. runs from Hookset N. E. to *Pittsfield* (20 M.), passing the stations, Suncook, Allenstown, Short Falls, Chichester, and Webster's Mills.

The main line passes through the town of Bow, and the W. bank of the river, and enters

Concord.

Hotels. *Eagle Hotel; Phenix House.

The territory now covered by Concord was granted by Massachusetts in 1725, and occupied soon after, the Pennacook Indians giving way. It was named Rumford in 1733, and 8 years later was confirmed as a part of New Hampshire, to the great regret of the settlers, who petitioned the king to give the territory back to Mass. At the breaking out of war with France, seven timber forts were built, in which the 96 men of the town, with their families, lived in state of siege. Several of the townsmen were killed or captured. For many years a litigation was carried on between the proprietors of the town of Bow and the Rumfordites, the former claiming that the grant from Mass. under which Rumford was settled was illegal and void. The N. H. courts decided that the Mass. grant was valueless, and then the vexed colonists sent two commissioners with an appeal to the king. He decided in favor of the Rumford people, and by an order in council confirmed them in their rights. As late as 1772, negroes were bought and sold here, and bears and wolves were very troublesome to the farmers. The name Concord was adopted in 1765, and in 1805 the town was made the State capital.

Concord, the capital of the State of New Hampshire, is a handsome city of 12,241 inhabitants, situated on the W. side of the Merrimac River, equally distant from the ocean and from the Connecticut River. Main and State Streets run parallel with the river, and are broad and pleasant avenues. The abundance of shade-trees on these and the cross-streets

gives the city a pleasant, embowered appearance. The **State Capitol** is a fine structure, fronting across a small park on Main St. It is built of Concord granite, and the projecting portico is sustained by eight pairs of coupled columns. The State Library is in a hall opening off the first lobby, which is richly decorated with the colors of the N. H. regiments in the Secession War. The halls of the Senate and House of Representatives are neat and commodious. The building is surmounted by a lofty and graceful dome, from which a pleasant view is obtained.

The *City Hall* and *Court House* is on Main St., N. of the Capitol, and is a neat brick building, surmounted by a round dome.

The *State Prison* is on State St., and covers 2 acres of ground. It was established here in 1812, and on May 1, 1871, had 91 convicts. It is carried on with profit to the State, as the convicts are kept busily at work, so that in the year from May, 1870, - May, 1871, its cost was \$17,328, and its earnings amounted to \$22,954.

The *State Asylum for the Insane* has fine buildings in the W. part of the city. It was founded in 1842, since which it has treated over 3,000 patients. Its present capacity is nearly 400 patients, and many are discharged yearly as perfectly cured.

Benjamin Thompson, Count Rumford, born at Woburn, Mass., 1753, was long a resident of Concord (then called Rumford). At the time of the Revolution (being then a school-teacher at Rumford), he was unjustly suspected of disloyalty to the American cause, and was annoyed until he took refuge in the British lines. He became an under-secretary in Lord Germaine's cabinet at London, and afterwards raised the "King's American Dragoons" in New York, with which he surprised and dispersed Marion's men (1782). He was knighted by King George, and in 1784 became chamberlain and aid-de-camp to the Elector of Bavaria. Here he reorganized the army, suppressed beggary, made the Park at Munich, and kept the Electorate neutral during the Franco-Austrian War. He was made State councillor, lieut.-gen., minister of war, count (taking the title from his old home), and head of the regency. He founded the Royal Institution at London, married the widow of Lavoisier, and became one of the leading scientists of Europe. He discovered that heat is only a mode of motion, and wrote extensively on light, heat, and other scientific subjects. He endowed a professorship in Harvard University, and passed the last 16 years of his life in scientific experiments. His daughter, the Countess of Rumford, lived in Concord until her death, in 1852. A fine bronze statue of the Count has been erected in one of the principal promenades of Munich (near the Hotel des Quatre Saisons).

Abbot, Downing, & Co.'s coach and express-wagon works at Concord are the largest in the world, and their wagons are sent to Japan, Australia, and California, besides being in high repute throughout the Atlantic States. Hill's harnesses (75 men in the works) are also sent to all parts of the world. The Prescott Melodeons have been made here since 1837, and a furniture company uses \$1,000,000 worth of lumber yearly. 75,000 mackerel kits and 22,000 lasts are made here yearly. At Fisherville are large furniture factories, making 12-15,000 chamber-sets yearly, much of which is sent to California. Near the city are inexhaustible quarries of fine granite, which is sent to the Eastern cities and used in some of the finest of their public buildings.

The *Birchdale Springs* (small hotel) are near the city, and should be visited for the sake of the pleasant drive. Most of the roads about Concord are level and smooth, and afford very interesting rides.

A beautiful ante-colonial tradition of this locality is preserved by Whittier in "The Bridal of Pennacook," one of his longest poems. It gives a charming picture of the Merrimac valley centuries ago, when

"In their sheltered repose, looking out from the wood
The bark-built wigwams of Pennacook stood,
There glided the corn-dance, the council-fire shone,
And against the red war-post the hatchet was thrown.

There the old smoked in silence their pipes, and the young
To the pike and the white-perch their baited lines flung;
There the boy shaped his arrow, and there the shy maid
Wove her many-hued baskets and bright wampum braid."

Concord to Claremont. 56½ M.

Concord and Claremont, and Sugar River Railroads.

Soon after leaving Concord the line passes W. Concord and stops at Contoocook, whence a branch road runs up the valley of the Contoocook River to *Hillsborough Bridge* (15 M. S. E.). In this village is the mansion of Gov. Pierce, where Franklin Pierce was born in 1804. He practised law in Concord for some years, was U. S. Senator, 1837-42, and brig.-gen. in the Mexican War. At the Democratic Convention of 1852 he was nominated (on the 40th ballot) for the Presidency, and defeated Gen. Scott, the Whig candidate, by 254 electoral votes out of 296. During his administration, Arizona was annexed, Kansas and Nebraska were opened to slavery, and the Ostend Manifesto (to Spain) was issued. Mr. Pierce favored the pro-slavery party, and sympathized with the Secessionists in the war of 1861-5.

From Hillsborough Bridge, stages run to the thinly-populated towns to the S. and W.

Beyond Contoocook the main line follows Warner River through the town of *Warner*, in which there are four stations.

Station, *Bradford* (Bradford House, Presby House, good), a pleasant village near Bradford Pond, which is 1½ M. long, and contains several islands. Many summer visitors stay here in the pleasant hotels, and explore the mountainous district in the vicinity. Lovewell's Mt. and Sunapee Mt. are near Bradford, and Mt. Kearsarge is but 10 M. distant (N. E.). 5 M. from the village are the popular *Bradford Springs* (good hotel), near the lake-studded town of Washington. Stages run daily from Bradford to *Hillsborough Bridge* (10 M. S.) Between Bradford and Sunapee, the railroad passes through a cutting (at Newbury Summit) through 400 ft. of intensely hard, slag-like rock. This cutting was one of the most difficult and costly in the United States. It should be seen from the rear of the train.

The line now passes along the S. shore of *Sunapee Lake* for nearly 2 M., with Sunapee Mt. on the l. Station, *Sunapee*, N. of which is the village of Sunapee Harbor (Young's Lake House). Lake Sunapee is a beautiful sheet of water 9 M. long, and averaging 2½ M. wide. It abounds in fish, and is surrounded by romantic scenery. The adjacent towns have many sequestered lakelets, and from Sunapee Mt. is gained a pretty view of the lake and hill-country, with Mt. Kearsarge to the E.

Station, *Newport* (Newport House; Phenix House), the shire-town of Sullivan Co., a pleasant village enwalled by hills, and situated on the Sugar River. Several small mountains are situated in this town, and there are romantic glens along the Sugar River and its branches. Sunapee Lake is 6 M. distant, and Croydon Mt., the highest summit in the county,

is 9-10 M. N. in the bleak and granite-strewn highland town of Croydon. Beyond Newport the line follows the impetuous Sugar River through its glens and gorges to **Claremont** (*Tremont House*; *Sullivan House*). This town was settled in 1767 by Connecticut men, and was named for Lord Clive's summer mansion. There is much rich alluvial land in the town, and the valley is bounded by a great range of hills. Claremont village is at the rapids on Sugar River, where a fall of 150 ft. in less than a mile gives a great water-power. The Monadnock Mills, the Sugar River Paper Mills, the Claremont Manufacturing Co., the Claremont Linen Co., and other corporations have their works here. Immense quantities of rags are consumed in the manufacture of paper, 500 tons of which are turned out yearly. Over 3,500,000 yards of cotton cloths, 70,000 yards of doeskins, 70,000 yards of flannels, are made here yearly. Claremont village has 5 churches and a fine high school, which was endowed by Paran Stevens, the American hotel-king. Flat Rock, Twist Back, and Bible Hill are visited by those who summer here, while from Green Mt. a fine view of the Conn. valley is enjoyed. Ascutney is 10 M. N.

2 M. from Claremont the railroad connects with the Vermont Central, 56½ M. from Concord (see Route 24).

The Boston, Concord, and Montréal and White Mountains R. R. runs N. from Concord (see Route 30). A railroad is being built to Rochester, 40 M. E. of Concord. From Concord to Portsmouth, see Route 37.

The train on the Montreal line now passes on the rails of the Northern (N. H.) R. R., and runs N. from Concord on the r. bank of the Merrimac. Just after passing the manufacturing village of *Fisherville*, at the confluence of the Merrimac and Contoocook Rivers, the train crosses a bridge to Duston's Island, and thence by another bridge to the shore. On this island Mrs. Duston, of Haverhill, killed her Indian captors and escaped. The line now runs along the broad intervalles of *Boscawen* (two stations).

In this town were born C. G. Greene, who founded the "Boston Post" in 1831; W. P. Fessenden, the eminent and powerful U. S. Senator from Maine (1854-69); and John A. Dix, an officer in the army, 1812-28, U. S. Senator from New York, 1845-9, Major-Gen. in the army which crushed the Rebellion of 1861-5, and Minister to France, 1867-9. He was nominated as candidate for Gov. of New York by the Free Soil Democrats in 1848, but was defeated, and in 1872 he was elected Governor, which office he now occupies.

Stations, *Webster Place* and *Franklin* (Webster House; Franklin House). 2 M. S. W. of Franklin village Daniel Webster was born, in 1782. The family moved to a new home near Webster Place, and he afterwards bought this latter estate, and used to retire there to rest. Franklin village is near the confluence of the Winnepesaukee and Pemigewasset Rivers, which form the Merrimac. It is a thriving mechanical village, situated in the valley below the railroad, and makes yearly 150,000 pairs of socks, 120,000 yards of flannel, and 600 tons of paper.

A branch road runs from this point up the Pemigewasset valley 18 M. to **Bristol**. Near the station at Hill Village (Seriatic House) Periwig Mt. is seen on the l. Bristol (Bristol House) is a pretty village surrounded by hills, at the confluence of the Newfound and the Pemigewasset Rivers. In the last 80 rods of its course the Newfound River falls 100 ft., affording a good water-power. About 2 M. N. of Bristol is the beautiful *Newfound Lake*, 7 M. long and 2-3 M. wide. Sugar Loaf Mt. is on the W. shore, and Crosby Mt. is on the E. A daily stage runs from Bristol, on a road which gives frequent glimpses of the lake, to *Hebron* (Union House), near its N. end.

After leaving Franklin, the main line passes Webster Pond and the bleak and precipitous range of Ragged Mt. on the r., and stops at the quiet little village of *E. Andover* (Lake House), near its long, bright lake. The next station is *Potter Place* (Kearsarge House), named for the magician Potter. Stages run from this station to **Mount Kearsarge** (4 M. S.), an isolated peak, with a rocky summit 2,461 ft. above the sea. It affords a noble * view in a clear day, including, on the W., Sunapee and Lovewell's Mt., and the blue Sunapee Lake, and Croydon and Ascutney, with the vast range of the Green Mts. closing the horizon behind them. In the N. is Cardigan Mt., with the Pemigewasset Mts. in the distance, and swinging around to the r. are the Franconia and the White Mts., with Lake Winnepesaukee in the N. E. In the nearer E. is the thronged and prosperous valley of the Merrimac, while countless villages dot the landscape on every side. Far up on the sloping side of the Mt. is the Winslow House, a far-viewing summer-hotel.

The American frigate "Kearsarge," which sank the rebel cruiser "Alabama" off Cherbourg in 1864, was built on the N. H. coast, and named for this mountain. Her captain was John A. Winslow, in whose honor the hotel is named.

Stations, *W. Andover*, *S. Danbury*, and *Grafton* (Pleasant Valley House). Grafton is S. of Cardigan Mt., and at Glass Hill great quantities of mica are mined. The Pinnacle, on this hill, has a sharp precipice 150 ft. high on its N. side. Beyond *Grafton Centre* the line passes Isinglass Mt. and Tewksbury Pond on the l., and stops at *Canaan* (two small inns in the town). In the 43 M. between Concord and Grafton the railway has ascended over 800 ft. It now takes a slight down grade, following the valley of the Mascomy to the Conn. River. The pretty village of *Canaan Street* lies on the shore of Heart Pond, a lakelet which is surrounded by a naturally formed dike of earth. From Canaan a much-travelled highway runs N. across Dorchester to W. Rumney on the B. C. & M. R. R.

The line now enters Enfield, and skirts *Mascomy Lake* (or Enfield Pond), a beautiful sheet of water 4 M. long, on whose S. W. shore is a community of Shakers. These industrious people furnish much fine wool

to the market, also wooden-ware and garden seeds. In this town are the Granite State and Mount Calm Hotels, with some quiet and romantic scenery around Crystal Lake and Mount Calm.

Stations, *E. Lebanon* and *Lebanon* (Hamilton House), a manufacturing village on an elevated plain near the Falls on the Mascomy (Nov-Anglicé for the Indian Mascoma). Elastic sponge, scythes, flour, and machines are made here. Station, *W. Lebanon* (small hotel), the seat of Tilden Ladies' Seminary, whose fine buildings are seen on a commanding hill to the l. The line now crosses the *Connecticut River* on an open bridge, affording good views up and down stream, and stops at **White River Junction** (*Junction House*, good). This is an important point in the northern railway systems, the roads which converge here being the Northern (N. H.) R. R., the southern and central divisions of the Vermont Central R. R., and the Connecticut and Passumpsic and Massawippi Valley R. R. By the nearest routes this Junction is distant from Boston 142 M.; from New York, 260 M.; from Concord, 69 M.; from Springfield, 124 M.; from Burlington, Vt., 104 M.; from Montreal, 184 M.; from Quebec, 266 M. (These figures are from the Official Guide, published at Philadelphia. Of the seven other books which allude to the subject no two agree.)

There is a good restaurant in the station, and trains usually stop long enough for a dinner to be obtained. The train passes now on to the rails of the Vermont Central R. R., which runs through a pleasant rural district, and achieves the passage of the Green Mts. by some fine engineering works. The picturesque White River is followed for 25 M. Stations, *White River Village* (on the r.) and *Woodstock*, whence a daily stage runs to Bridgewater, 15 M. S. E., the road passing up the valley of the Otta Quechee River. *Woodstock* village (Eagle Hotel), the shire town of Windsor Co., is on this road, 10 M. from the railway, and is a beautiful rural hamlet with an elm-adorned park in the valley of the Otta Quechee. From Mt. Tom (near the village) a pleasing view is obtained down the long valley of the river. The village has two weekly journals, a bank, and a large country trade, besides some manufactures.

George P. Marsh, U. S. Minister to Turkey, 1849-53, and to Italy, 1861-73, was born here in 1801. He is distinguished as a philologist, in connection with the Norse language. Hiram Powers was born here in 1805. He was a farmer's son, and after many vicissitudes he learned the art of modelling in plaster, and opened a studio in Florence about 1837. Since then he has executed some of the finest sculptures of modern times. His "Eve" was highly commended by Thorwaldsen, and the "Greek Slave" was a noble work, of which copies have been multiplied. "Il Penseroso," "California," "America," "Proserpine," and numerous other renowned works, including portrait-statues, have given him the highest rank among sculptors.

Beyond Woodstock station the line crosses the crystal-clear river, and passes through the pretty scenery about W. Hartford to *Sharon* station. The village is seen high up on the opposite shore.

In 1805, Joseph Smith, the founder of Mormonism, was born at Sharon. In 1830 he published (at Palmyra, N. Y.) the Book of Mormon, which he claimed to have translated from metallic plates found by him while under the guidance of angels. He went West with his converts, and founded Nauvoo, in Illinois, where he exercised despotic authority until 1844, when the wrath of the "Gentiles" in the neighboring towns was aroused by his unjust acts. He was imprisoned at Carthage, and soon after the jail was stormed by a mob, and he was killed. Brigham Young succeeded him as "President of the Church," and still maintains the title. (Rev. Solomon Spalding, of Conn., wrote a romance, "The Manuscript Found" (in 1809). He allowed Sidney Rigdon and others to read his MS., which was soon after stolen from his widow, and those who had read the romance afterward declared that the Mormon Bible was but a corrupt version of it. Rigdon became a prominent Mormon).

Station, *S. Royalton* (S. Royalton House, good), with the station on one side of its main square, on which front the hotel, church, and stores. The river is now crossed by a bridge 600 ft. long, and the train stops at *Royalton*, where occurred, in October, 1780, the last Indian attack on New England. The attack was made by 210 Indians, who plundered and burnt the village (and also Sharon), killing and capturing 27 of its people.

Daily stages N. to *Chelsea* (Orange Co. House), the shire-town of Orange County, passing through Tunbridge (13 M.). Also N. W. through E. Bethel and E. Randolph, to E. Brookfield (16 M.).

Station, *Bethel* (Bethel House), a busy manufacturing village, in a glen among high hills. Daily stages to Barnard (Silver Lake House), 8 M. distant, and to *Woodstock*. Also to Stockbridge (10 M.), Pittsfield (13 M.), Rochester (17 M.), and Hancock, four thinly populated towns (with small inns), under the shadow of the Green Mts.

Station, *Randolph* (Cottage House ; Chadwick House), a busy village on the third branch of White River, which the railroad follows from Bethel to Roxbury. Stages run to *Chelsea*, *Brookfield*, and *Randolph Centre* (3 M. N. E.). The country now grows wilder and more thinly inhabited. Station, *Braintree*, a rude village surrounded by rugged hills. To the W. is *Granville*, with a road crossing the mountain-pass, 2,340 ft. above the sea. At *Roxbury* station (Summit House), the train reaches the summit of the pass, 1,000 ft. above the sea. Near the village are inexhaustible quarries of the best verd-antique marble. Crossing a bridge 400 ft. long and 70 ft. high, the train passes on to *Northfield* (Northfield House), in a populous town which has several quarries of dark blue slate. The so-called Norwich University (Vt. Military Institute) is situated here, in large buildings on a hill to the r. of the track.

10 M. from Northfield is *Montpelier Junction*, whence a short branch road diverges to **Montpelier** (Pavilion Hotel, opposite the station, a good house and moderate charges ; Bishop's Hotel). Montpelier, the capital of the State of Vermont, is a beautiful village of about 3,000 inhabitants. It is situated on a plain near the Winooski River, and is surrounded by a highly cultivated hill-country. 10 M. to the S. W. is the

geographical centre of the State. The village is compactly built, and has 2 banks, 3 insurance cos. (the Vt. Mutual has \$ 37,000,000 of risks), 4 weekly newspapers, and 7 churches, one of which is a noble piece of architecture. There are several flour-mills, lumber-mills, and tanneries, besides which the village has an extensive country trade. The * **State House** is a noble edifice of light-colored granite, on the site of the old State House, which was burnt in 1857. It stands on a slight eminence approached from a verdant Common by granite steps in terraces. The portico is supported by six massive fluted Doric columns, and under it stands a fine statue in Vermont marble of Vermont's hero, Ethan Allen. It was executed by Larkin G. Mead, of Brattleboro' (now living in Italy).

Ethan Allen was born at Litchfield, Conn., in 1737. He moved to Vermont in 1766, and was outlawed by New York for his bold and defiant action in the border feuds. In 1775 he took Fort Ticonderoga from the British. Later in the year he attacked Montreal with 110 men, and was captured, with his whole command. He was confined in Pendennis Castle, in England, for a short time, but was exchanged in 1778, and took command of the Vermont militia. A royal decree of 1764 had constituted the Connecticut River the E. boundary of New York (N. of Mass.), and Mass. and N. H. also claimed parts of its territory. But a convention at Westminster, in 1777, declared Vermont a free State. The Continental Congress would not ratify this voice of the people, and all its troops were withdrawn from the territory. Vermont, thus left alone, was unable to resist attacks from the British in the N., and Allen skilfully conducted feigned negotiations with the royal generals, looking towards annexation to Canada, and securing neutrality for his State. It was only in 1791, after 26 years of controversy, that Vermont was admitted into the Union,—to offset Kentucky. After an eventful life, Ethan Allen died at Burlington in 1789.

Under the portico of the State House are kept two cannon taken from Breyman's Hessians at the battle of Bennington (1777), after a desperate struggle. The British got them back when Gen. Hull surrendered the Army of the N. W. at Detroit (August, 1812), and they were again taken by the Americans during the Canada campaign. They were sent to Washington, and afterwards were presented by Congress to the State of Vermont. The main building of the State House is 72 ft. long, and each of the wings is 52 ft., making a total length of 176 ft. The dome is 124 ft. high, and is surmounted by a graceful statue of Ceres, the goddess of agriculture. The marble-paved lower floor is devoted to committee-rooms, and a small collection of historical, and mineral curiosities. In large niches at the ends of the neat lobby on the second floor are preserved the battle-flags and pennons of the Vermont regiments in the Secession War. What with storm, forest-march, and many battles, these veteran standards have lost their pristine brightness and wholeness, and with the names of the battles in which they were borne written on them in golden letters, they are carefully kept behind plate-glass. The gallery of the Senate is entered from the third floor. The halls of the Senate and House are well worth visiting, being graceful in form and well ornamented. A substantial stone bridge crosses the Winooski River at Montpelier, and

the country about the village affords many pleasant objective points for a summer day's ride or ramble.

Daily stages to *Worcester*, 7 M. N. (Worcester House), and tri-weekly to *Elmore*, 20 M. N. Daily stages to *Hardwick*, 20 M. N. E., on the Portland and Ogdensburg R. R., passing through *Calais* (12 M.; Moscow House) and *Woodbury*, thinly populated towns with scores of small lakes abounding in trout and other fish. Daily stages to *Marshfield*, 15 M. N. E., on the Great Falls of the Winooski, where that stream falls 500 ft. in 30 rods. Also to *Plainfield*, 9 M. E. (Plainfield House), with a medicinal spring (Spring House) of some repute; to *Washington* (Washington House, Lake House), 15 M. S. E.; to *Orange*, 13 M. S. E.; to *Williamstown*, and to *Barre* (Barre House), 6 M. S. E.

Beyond Montpelier Junction the main line passes on to *Middlesex* (Washington House), near which (on the l.) the Winooski River passes through the Middlesex Narrows, a cutting in the rock, 30 ft. deep, 60 ft. wide, and 1,300 ft. long, which has been worn by the action of the water. Stages run S. to *Moretown* (7 M.), *Waitsfield* (12 M.), and *Warren*. Beyond Middlesex the train reaches **Waterbury** (* Waterbury House), a highland town abounding in pleasant rambles and rides, with frequent glimpses of Camel's Hump (in the S. W.). *Camel's Hump Mt.* is 8 M. distant, and *Bolton Falls* are but 3 M. to the N. W., and both are approached by good roads. N. E. of Waterbury, 10 M. (semi-daily stage in summer) is the rich farming town of **Stow** (* Mansfield House, opened in 1865, accommodates 3-400 guests, at \$3.50 a day; considerable reductions for a long stay. 100 horses are kept in the stables). Stow, "the Saratoga of Vermont," is charmingly situated in a quiet valley in full sight of lofty mountains, and when filled with summer guests it presents a lively appearance. "Stow is unrivalled in the beauty, picturesqueness, and luxuriant magnificence of its mountain scenery." From Sunset Hill, near the hotel, a fine view of the village is obtained, and also of Mt. Mansfield and Camel's Hump. 3-4 M. N. E. of Stow, on the slope of Worcester Mt., are the *Moss Glen Falls*, in a narrow, rock-walled ravine which contains three picturesque basins. This bit of Tyrolese scenery has been greatly damaged by the erection of a saw-mill, for whose benefit the falls are dammed above. The *Smugglers' Notch* is a romantic pass between the Nose Peak of Mt. Mansfield and Sterling Mt. (3,500 ft. high). It is 9 M. from Stow, and a good road leads to a small hotel in the Notch, near the great spring which is the source of the Waterbury River. A horse-path beyond the hotel leads in $\frac{1}{2}$ M. to Berton's Rock, a boulder weighing about 100 tons, which fell from the abrupt cliffs that tower on each side to the height of 1,000 ft. A little way beyond, the path begins to descend to the plains of Cambridge. This pass was used during the War of 1812 for smuggling goods between Central Vermont and Canada. A few miles N. is Daniel's Notch, between Sterling Mt. and the lofty White Face. Bingham's Falls, 5 M. from Stow, Morrisville Falls, 8 M., West Hill, 2 M., and Gold Brook, 3 M., are often visited.

Mount Mansfield.

This is the loftiest of the Green Mts., and its highest peak is 4,348 ft. above the sea. As seen from above Stow it presents the appearance of the profile of a human face, the S. peak being the forehead, the middle peak the nose, and the N. peak the chin.

After leaving Stow, the highway is followed for 5 M., and then a mountain road turns to the l., ascending through the forest, $2\frac{1}{2}$ M., to the Half-Way House, from which a pretty valley view is gained. Here begins the long and arduous ascent to the Summit House. The forest dwindles away until the path reaches the Nose, whence a view is given into the profound depths of the Smugglers' Notch. The *Summit House* is a commodious hotel (for 100 guests ; \$ 3.50 a day) situated at the base of the *Nose*, which is climbed by a steep path on its W. slope (2-300 ft. high). On the E. side of this peak is the rock-profile called the "Old Man of the Mt." About 2 M. of steady, though not fatiguing ascent leads from the house to the *Chin*, passing over ledges marked by long scratches once received from rocks fixed in drifting icebergs, which passed over the silent waves of some shoreless primeval sea. The *Chin* is 340 ft. higher than the *Nose*, and is 3,800 ft. above Stow, and 4,348 ft. above the sea. This peak offers a more extensive northern view than that from the *Nose* (with an impressive view down the Notch), and is easily visited, although parties who go out to it usually stop over night at the Summit House, thereby gaining the superb effects of sunset and sunrise.

The ** view from the *Nose* is very similar to that from the *Chin*, and is, perhaps, the noblest (though not the most extensive) in New England. On the S. are seen *Camel's Hump* (15 M.) and *Killington Peak* (65 M.), with a great number of nameless peaks and ridges of the Green Mts. The great Lake Champlain fills the horizon from S. W. to N. W., being visible through the greater part of its extent, with the ancient blue Adirondacks lifting their cloud-like summits beyond. The apparently level lowlands of the Champlain valley are spread out like a map below, dotted with numerous white villages (beyond which is Burlington), and crossed by many streams. The great grazing district of the Lamoille valley stretches away to the N. W. and glimpses of the sparkling rivers, the Lamoille and the Winooski, are caught through the forests and foot-hills of the Green Mts. Far in the N. is the St. Lawrence River, with its valley dotted with Norman villages, and on the N. W., with a powerful glass and on a clear day, it is said that visitors have seen Mount Royal and the shining tin roofs of Montreal. E. of N., Jay Peak and Owl's Head Mts. are seen, the latter rising from Lake Memphremagog, while still farther to the E. are Hor and Annanance, the mountains about Willoughby Lake. Farther to the r. are the Percy Peaks, and a little S. of E. the Franconia and White Mts. are seen low-lying on the horizon, 60 M. distant.

5 M. beyond Waterbury, on the main line, is *Ridley's Station* (Green Mt. House) whence carriages run to *Camel's Hump*, 6 M. S. The road has been built 3 M. up the mountain, and the remainder of the ascent is made on foot or horseback. A small house for shelter and refreshments is kept open all summer, 1 M. from the summit. The mountain is 4,083 ft. high, and from its isolated position commands an extensive view, whose

general features are much like those of the prospect from Mt. Mansfield. The name Camel's Hump is derived from a supposed resemblance of the outline of the mountain to that of the back of a camel.

Near Ridley's, and seen from the track (to the N.), are the *Bolton Falls*, amid some wild rock-scenery in a deep ravine nearly 4,000 ft. below the peak of Mt. Mansfield. The line now follows the picturesque valley of the Winooski to *Jonesville*, whence stages run to Hinesburg, Starksboro, and the rugged towns of Huntington (under Camel's Hump) and Underhill (under Mt. Mansfield). Station, *Richmond* (Richmond House), a bright village in the widenings of the Winooski valley, with an extensive trade in butter and cheese. The mountain-ravines open out here on the Champlain valley, and the country becomes more thickly settled. A bridge, 600 ft. long, over the Winooski, is now passed, and the train enters the farming town of *Williston*. For several miles, running N. W. from this station, fine views are afforded from the train, — the Green Mts. with their two loftiest peaks looming up boldly on the r., while the distant Adirondacks are seen on the l. **Essex Junction** is soon reached, whence trains run to *Burlington* (see Route 26) in 8 M., passing the remarkable gorges on the Winooski River.

5 M. N. of Essex is *Colchester*, to the W. of which is a tall-spired village (Mallet's Bay Hotel), and still farther W. is Mallet's Bay, which is nearly land-locked, has numerous islets, and affords good bass and pike fishing. Frequent views of Lake Champlain, the Adirondacks, and the Green Mts. are obtained from the cars as they pass N. to *Milton* (three inns in the town). This village is near the Great Falls of the Lamoille, 7 M. from the river's mouth. The river descends here 150 ft. in 800 ft., and affords a water-power for the Milton lumber-mills. The train crosses the Lamoille River on a high bridge 450 ft. long, and stops at the station, *Georgia and Fairfax*. Georgia village (Franklin House), is $3\frac{1}{2}$ M. from the station, and Fairfax (Fairfax House) is 4 M. E. of the station, to which it has a tri-daily stage. A small Baptist Theological School is located at Fairfax.

St. Albans (* *Weldon House*, first-class; *American House*; *Tremont House*) is a pretty village of about 6,000 inhabitants, situated on an elevated plain 3 M. from Lake Champlain. Main Street is the principal thoroughfare, and has several good commercial buildings. There is a neat park of 4 acres in the centre of the village, on whose sides are the hotels, the Franklin County buildings, the High School, and several churches, the best of which is a Norman-towered Episcopal Church built of red sandstone. Back of this is the large Catholic Church and the Convent of Notre Dame. The offices of the Vermont Central R. R. occupy the spacious and imposing building at the station. In this vicinity are the immense repair and car-shops of the Vermont Central,

occupying over half a mile of buildings, and employing several hundred skilful workmen. These works are the largest of the kind in New England, and have turned out many locomotives and cars. The village has 3 banks, 2 weeklies and a daily newspaper (besides a weekly French paper), and 5 churches. Tuesday is its market day, when the farmers from Franklin Co. congregate in the streets, and great quantities of dairy products are sold. The quotations of butter and cheese at St. Albans affect the market throughout the Eastern States, and vast quantities of these products are shipped in ice-cars to the N. Atlantic cities (mostly to Boston). Between 1850 and 1865 St. Albans sent away 33,603,044 pounds of butter, and 16,628,097 pounds of cheese, having a value of nearly \$12,000,000. N. of St. Albans are quarries of calico-stone and variegated marble, while a good sulphur-spring (appertaining to the Weldon House) is in the environs.

"St. Albans is a place in the midst of greater variety of scenic beauty than any other that I remember in America." (BEECHER.) *Bellevue Hill*, 2 M. S. W. from the station, and *Aldis Hill*, 1 M. N. E. of the village, are easy of ascent, and command lovely views. * *Bellevue* is 1,300 ft. above the lake, and about 900 ft. above the village. It overlooks the village and the rich plains of Franklin Co., strewn with villages, while a broad expanse of Lake Champlain is spread out in the W., the view extending over Grand Isle to the New York shore. In the S. W. the Adirondacks rise, "not in chains or single peaks, but in vast broods, a promiscuous multitude of forest-clothed mountains. In the N. is scooped out, in mighty lines, the valley of St. Lawrence; and in clear days, the eye may spy the faint glimmer of Montreal." (H. W. BEECHER.) The Missisquoi valley is near, in the N., and Jay Peak lies to the E., from which the great line of the Green Mts. stretches away to the S., and Mount Mansfield is plainly visible. To the S. is the fertile Lamoille valley, running through Fairfax and Milton. *Aldis Hill* is only 500 ft. high, and is easily ascended. Its view, though less extensive than that from *Bellevue*, is of rare beauty.

3 M. W. of the village is *St. Albans Bay* (Lake View House), a small shore hamlet, from which steamers run across the Lake to *Plattsburg*, starting early in the morning, 4 times weekly. (Fare, \$1.00.)

Stages run E. to *Fairfield* (7 M.) and *Bakersfield* (16 M.).

St. Albans was the scene of great excitement during the Canadian rebellion in 1837, and several raiding parties (of refugees) crossed the border from this vicinity. In October, 1864, several strangers boarded at the hotels for a few days, and learned the habits of the people. When the bells rang at 3 o'clock, on the 19th of Oct., these men entered the banks in parties, and robbed them of their funds, while others of the band arrested every citizen on the street. The robbers were 22 in number, dressed in plain clothing and armed with revolvers, and, having secured what money they could, they stole a number of horses and fled, closely pursued by the citizens. During the firing which took place in the streets, one citizen was killed and several wounded. The plundering party (which was composed of escaped rebel prisoners) reached Canada with \$208,000 in money, \$80,000 of which was returned to the banks by the British government. In June, 1866,

1,200 Fenians from the cities of the coast marched from this place into Canada, and plundered a village. The provisions of this party soon gave out, and they returned to St. Albans, where they were disarmed by 1,000 U. S. troops, who were encamped on the village Park for 2 weeks.

St. Albans to Richford.

The East Division of the Vermont Central R. R. runs N. E. to *Richford* in $1\frac{1}{2}$ - 2 hours. Near the station **Sheldon Springs** (about 10 M. out) are several mineral springs. The famous *Missisquoi Spring* (* *Missisquoi Hotel*) is alkaline in character, and has no distinctive taste, but has proved very efficacious in cutaneous diseases. Within the space of an acre, near the palatial hotel, are 13 mineral springs, of varying properties, arising through a vein of fine fuller's earth. One of these springs is cathartic, and is used in cases of dyspepsia and liver complaints. In the year 1868, 354,000 quart bottles of Missisquoi water were sent away, and in 4 months of the same year 40,000 bottles were sent from the Vermont Spring. *Dunton's Hill* is a favorite resort, 2 M. from the Missisquoi House, the Sheldon Spring is 1 M. S. W., and the Central Spring (in Sheldon village) is 2 - 3 M. to the E.

The *Vermont Spring* waters are mostly bottled and sent away, for the cure of diseases of the skin, cancer, &c. It is about 2 M. from the Missisquoi, and there are numerous other mineral springs, differing in their properties, about the village. The Continental, Central, and Excelsior are among the most noted, while *Sheldon Spring*, near the Missisquoi Falls, has long been visited. The * *Congress Hall Hotel*, located near the latter spring, is a large and first-class house. The water flows at the rate of 14,000 gallons a day, and contains a large amount of carbonate of soda with potash. "It is a very unusual alkaline, saline water, containing more silicic acid in solution than any on record. The presence of so much crenic acid is also remarkable, and, with the iron and magnesia, adds to the valuable constituents." (DR. HAYES.) The hot and cold baths (in convenient bath-houses) work wonderful cures in cases of rheumatism, erysipelas and skin diseases, cancers and chronic ailments. From *Dunton's Hill* (1 M. from Congress Hall) a vast panoramic view of the Green Mts. is obtained, while the silver waters of Lake Champlain, in the W., are overlooked by the blue Adirondacks. Considerable tracts of Lower Canada are included in this view, which is terminated on the N. by the spires of Montreal. The Missisquoi River falls 119 ft. near Sheldon Spring. At **Sheldon** village (Central House), 2 M. E., there are many hotels and boarding-houses. Here is the *Central Spring*, which, besides carbonates of lime, magnesia, iron, soda, and potassa, and sulphate of lime, contains the valuable element of phosphoric acid. It cures cutaneous and pulmonary affections, dyspepsia, rheumatism, &c.

The Portland and Ogdensburg R. R. will cross the Missisquoi Valley R. R. at Sheldon.

The line follows the rich valley through several farming and dairy towns, passing the stations, *E. Franklin*, *Enosburg Falls*, *Enosburg*, and *E. Berkshire*, to **Richford** (American House), a thinly populated town, on whose S. E. corner Jay Peak rises to an altitude of over 4,000 ft.

A railroad is to be built from Richford N. W. through St. Armand, Dunham, and Notre Dame des Anges, to W. Farnham, in the Province of Quebec, and on the N. Division of the Vermont Central R. R.

Soon after leaving St. Albans, the main line passes *Swanton Junction*, where a railroad diverges to Rouse's Point and Ogdensburg.

This line passes through *Swanton* (Central House), a pretty village with a Soldiers' Monument on its Green, consisting of a statue (in Vermont marble) of the Goddess of Liberty on a pedestal of gray Isle La Motte marble. Swanton was settled by the French in 1750, but they were crowded out within a half-century. Much marble, black, white, and red variegated, is quarried in this town. After crossing Missisquoi Bay on a trestle-bridge, the train stops at **Alburgh Springs** (**Alburgh Springs House*), whose mineral waters are much used for cutaneous complaints. The drives on the lake shore are very pleasant, and fishing and boating are favorite summer amusements. The peninsula of Alburgh was granted by the King of France, as a feudal seignior, to Councillor Foucault, under whose orders it was settled in 1731. It was occupied by loyalist refugees late in the Revolutionary Era, and in 1837 was one of the frontier towns from which the insurgents in the "Patriot War" made their raids into Canada.

Passing the stations, Alburgh and W. Alburgh, the line crosses Lake Champlain at its N. end on a long trestle-bridge. *Fort Montgomery* is seen on the r., commanding the Richelieu River. After the works on this fort had gone on for some time, it was discovered to be in British territory, but a generous change of boundary gave the land to the United States, and the work was completed. On the l. *Isle La Motte* may be seen far down the lake.

Rouse's Point (New York) is now reached. From this point the line runs W. through the Chateaugay Woods, passing Malone and Potsdam, to Ogdensburg, 406 M. from Boston and 141 M. from St. Albans. Another railroad runs N. on the l. bank of the Richelieu River, to St. John's (23 M.). The great Lake Champlain steamers leave Rouse's Point twice daily (in summer) for Whitehall.

After passing Swanton Junction and E. Swanton, the train on the main line stops at **Highgate Springs** (**Franklin House*). The hotel is on one side of the track, and the spring-house on the other. The spring is alkaline, containing chloride of sodium, carbonate of soda, and sulphate of soda. E. of the Springs is the broad and beautiful Missisquoi Bay (Missisquoi — much water-fowl), which is nearly land-locked, and abounds in fish. The Franklin House accommodates 160 guests, at \$3.00 a day. 2-3 M. S. E. is a considerable village at *Highgate Falls*, on the Missisquoi River. The alkaline Champlain Spring is located here (Champlain House, Green Mt. House, both fronting on the village park), and is considered a specific for dyspepsia, cutaneous eruptions, cancer, and consumption. Alburgh Springs on the W. and Missisquoi Springs on the S. E., are within easy distance of Highgate. Highgate was the birthplace

of John G. Saxe, whose poems of humor and pathos are widely known and read.

About 3 M. beyond Highgate, the train leaves the United States, and enters Missisquoi County, in the Anglo-Canadian Province of Quebec. Stations, *St. Armand*, *Moore's*, and *Stanbridge*, on the plains of the Richelieu River. Stanbridge is a neat village, from which stages run to E. Stanbridge (3 M.) and Bradford. As the line passes farther out on the plains, the great, isolated mountains of *Rougemont* and *Belœil* are seen on the r. On Belœil the Bishop of Nancy had an immense cross erected in 1843, which was visible for many leagues. It was demolished by a storm in 1847. Stations, *Des Rivières*, *St. Alexandre*, beyond which the train passes the junction of the Stanstead, Shefford, and Chambly Railroad, running from St. Johns E. to Waterloo, 43 M. Stages from Waterloo to Lake Memphremagog in 20 M. The line now crosses the Richelieu River to **St. Johns**, a quaint, old-fashioned, Norman-French village near the head of the Chambly Rapids. The town is situated on a level plain, and is connected with the suburb of *St. Athanase* by a fine bridge over the Richelieu. There is good fishing by boat near St. Johns, and the few visitors who stop at this quiet old town usually ride to **Chambly**, a pleasant village near the confluence of the Richelieu and Montreal Rivers. It is 12 M. N. of St. Johns by the river-road, and is on a lake-like expansion of the river, called Chambly Basin. The Richelieu flows toward the N. E. almost parallel with the St. Lawrence which it joins at Lake St. Peter, 70 M. distant.

Chambly was fortified by the French in 1711, and in 1775 it had a strong stone fort built by the British, with massive towers at its angles. Large supplies were stored here; but the commander was so careless that the fort was easily taken by the Americans in October, 1775. It was abandoned on the advance of Burgoyne, having first been stripped of its stores, and has since served (until the English military evacuation of Canada) as an exercising-ground for the Montreal garrison. In the crypt of the Catholic Church is buried De Salaberry, Seigneur of Chambly, who commanded the Canadians in the battle of Chateaugay (War of 1812), when a large invading force of Americans was resisted with such valor and success that De Salaberry ever after bore the title of "the Canadian Leonidas." 12 M. from Chambly is *Belœil Mt.*

Other excursions from St. Johns are to *Scotch Mt.* (6 M. over a good road), which commands a fine view of the Green Mts. and the border Townships; and to the *Chambly Rapids* on the Richelieu.

The Marquis of Montcalm built a fort at St. Johns, which was strengthened by Gov. Carleton. Benedict Arnold's American fleet was repulsed in an attack in 1775, but the fort was besieged by Gen. Montgomery in September of the same year, and, after six weeks of blockade and cannonade, it surrendered, with 600 British regulars and 48 heavy cannon. The American garrison evacuated the post on the advance of Gen. Burgoyne.

At St. Johns the train moves on to the rails of the Grand Trunk Railway (Montreal and Rouse's Point Division), and passes through the fair and fertile plains of the Parish of *La Prairie* to *St. Lambert*, opposite Montreal. The St. Lawrence River is crossed by the wonderful * **Victoria Bridge**, and the train stops at **Montreal** (see Route 54).

30. Boston to the Franconia Mts.

By the Boston and Lowell and Boston, Concord, and Montreal Railroads. Parlor cars run from Boston without change to Plymouth. Boston to Plymouth (123 M.) in 5 hrs. ; to the Twin Mt. House (205 M.) in about 8 hrs. The branch road which runs from Wing Road station to Bethlehem will be completed to the Twin Mt. House by July 1, 1873.

The train leaves the Boston and Lowell station (Pl. 3) at 8, or 8.30 A. M., and passes to Concord by Route 29, through Lowell, Nashua, and Manchester. (Trains leaving the Boston and Maine station, at 7.30, or 8, make a connection with this route by way of Manchester.)

After leaving Concord, the line crosses the Merrimac, and passes the stations, *E. Concord*, *N. Concord*, *Canterbury* (with a large Shaker village 4 M. from the station), *Northfield*, and *Tilton* (Dexter House). Tilton was formerly called Sanbornton Bridge, and is the seat of the N. H. Seminary and Female College, which has good buildings near the railroad.

Stages run from Tilton to Gilmanton Centre and to *New Hampton* (Waukeneto House), 12 M. N., the seat of a Free Will Baptist Theological School. At the head of Little Bay, near Tilton, was the largest Indian fortress in New England, consisting of several lines of intrenchments faced with stone, and evidently once palisaded. Some remnants of these works remain.

The line now passes along the shores of Winnepesaukee River, Little Bay, and Great Bay. Stations, *Union Village* and *Laconia* (Willard Hotel), whose factories turn out yearly 1,500,000 yards of fancy cloths, 275,000 dozen hose, and 3-400 railroad cars. From this point an interesting excursion may be made to the summit of **Mt. Belknap** ($4\frac{1}{2}$ M. distant), on the shore of the lake. From this commanding peak the lake may be seen throughout nearly its entire extent, and views of the mts. beyond and of the pretty village of Wolfboro are obtained. Laconia is on the shore of Lake Winnesquam (Great Bay), a picturesque sheet of water on the l. of the line. After leaving Laconia, the line passes along Sanbornton Bay to *Lake Village* (Lake House), which has several large lumber-mills. A small steamer runs daily (in summer) to Alton Bay. The quiet waters of Long Bay are now skirted, on the r. bank, with the peaks of Belknap Mt. beyond. Station, **Weirs**, with a fine view out over Lake Winnepesaukee. Steamers leave this point for the villages on the lake (see Route 32), and N. Conway may be reached by crossing to Wolfboro, and taking the cars on Route 31. Near Weirs, on the N. shore of the outlet, is the Endicott Rock, which is about 20 ft. around, and is carved with the initials of the chiefs of the colonial survey of 1632, and with the words, "John Endicut, Gov." The train passes N., with the lake on the r., to *Meredith* (Elm House). Stages run daily from Meredith to Sandwich, and a railroad route has been surveyed, and is to be constructed to Conway.

The train now passes Waukawan Lake, on the r., which is 4 M. long

and 1-2 M. broad. Waukawan is a name given to this lake by the Indians, and now used by summer visitors, though the rustics who live in the vicinity call it Measley Pond. Long Pond is now passed, and the train stops at *Ashland* (Squam Lake House), a small factory-village near the confluence of the Squam and Pemigewasset Rivers, and 1 M. from the lovely Squam Lake (see Route 32). This is in the ancient Episcopal town of Holderness, and the road along Squam Lake exhibits some of the richest scenery in the country. The Pemigewasset is now crossed near Bridgewater station, and its valley is followed to **Plymouth** (*Pemigewasset House, 150 rooms, a first-class summer hotel, where the midday trains stop 30 minutes for passengers to dine; Plymouth House). Plymouth, the shire-town of Grafton County, is a beautiful village in the midst of attractive scenery, near the confluence of the Pemigewasset and Baker's Rivers. It has a large country trade, and is noted for its manufacture of fine buckskin gloves. Walker's Hill overlooks the village and valley, while *Mt. Prospect* (4 M. N. E.; carriage-road to the summit) commands an extensive prospect. On the S. is the valley of the Pemigewasset ("Place of crooked pines"), with its broad, rich intervalles, while numerous well-known peaks extend between Monadnock in the S. W. and Moosilauke in the N. W. The N. is filled with the lofty summits of the Franconia and the White Mts., prominent among which is Mt. Lafayette. Osceola and White Face are in the N. E., and just below the Squam Range in the E. is the beautiful, island-dotted Squam Lake. To the S. E. are the bright waters of Winnepesaukee, with Mt. Belknap looking over them. Mt. Prospect is 2,963 ft. above the sea, and possesses several other objects of interest, — the Miser's Cave, the Avalanche, and the Cold and Boiling Springs.

The drive around *Plymouth Mt.* is a favorite excursion, and the view from its summit is pleasant, embracing many of the features of the view from Mt. Prospect, with the addition of Newfound Lake. 2 M. N. of Plymouth are the romantic *Livermore Falls*, bearing traces of volcanic agencies. From Plymouth to Squam Lake it is 6 M.; to Newfound Lake, 9 M.; to Centre Harbor, 12 M.

Capt. Baker, of Newbury, with a company of Mass. Rangers, attacked an Indian village near the confluence of the river which now bears his name with the Pemigewasset River. After killing many of the villagers, the Rangers plundered the place, and then retreated, being vainly attacked afterwards on the plains of Bridgewater. Plymouth was settled in 1764. The house still stands here (now a carriage-shop near the hotel) in which Daniel Webster made his first plea before a jury. Nathaniel Hawthorne died in this village May 19, 1864. A remarkable balloon voyage was commenced at Plymouth in September, 1872, by an aeronaut and a journalist, who ascended into mid-air, passed over the White Mts. at the rate of 50 M. an hour, and landed at Sayabec, on the Gulf of St. Lawrence, having travelled over 500 M. in 13 hrs.

The finest avenue of approach to the Franconia Mts. is by stage from Plymouth to the Profile House (29 M.; fare \$4.00). The road runs up the Pemigewasset valley, and commands fine views as the mts. are approached. Campton and Thornton lie on this stage-road (see Route 34, *ad finem*).

After leaving Plymouth, the railroad follows the valley of Baker's River for 20 M. Station, *Rumney* (Stinson House), S. of Stinson's Mt. and Pond, which were named in memory of a hunter who was killed here by the Indians. The village is nearly 1 M. from the station. Saw-mills, tanneries, and charcoal-works abound in the town. Stations, *W. Rumney* and *Wentworth* (Union Hotel), a village on fair intervals, and surrounded by high hills. Carr's Mt. is on the E., and Cuba Mt. on the W. Station, **Warren** (Moosilauke House, \$2 - 2.50 a day, \$10 - 15.00 a week). *Moosilauke Mt.* is 5 M. from this village (9 M. to the summit by a good carriage-road), and on its top is the Summit House (\$4.00 a day).

During the summer, when carriages run frequently from the village hotel to the Summit House, the fare for each passenger (including tolls) is \$4.50. From its isolated position and great height (4,600 ft.), this peak commands a grand and unique * view. In the S. are the hill towns of Grafton County, with numerous prominent and well-known peaks rising over them. Beyond Owl's Head, on the W., considerable portions of the Green Mts. may be seen on a clear day. In the N. W. is part of the Connecticut valley, and one or two Canadian peaks are seen in the remote N., while nearer at hand are the Pemigewasset Mts. A noble panorama of mts. extends from Sugar Loaf (W. of N.) to the white peak of Chocorua (S. of E.), embracing the chief summits of the White and Franconia Ranges. On the S. E. is the shining surface of Lake Winnepesaukee, and in the same direction some portion of the State of Maine is visible.

From Peaked Hill, near the village hotel, a good view of Moosilauke is obtained. Carr's Mt., Webster's Slide, and Owl's Head are also in Warren, while on Hurricane Brook are numerous picturesque cascades, known as Fairy, Rocky, Oak, Wolf Head, Watenome, and Hurricane Falls. Diana's Wash-Bowl is a sequestered basin on the same creek.

Station, *E. Haverhill*, beyond which the line traverses the glen of the Oliverian Brook, with Webster's Slide Mt. on the l. and the precipitous sides of Owl's Head on the r. Station, *Haverhill* (Exchange House), a pretty village on a hill near the track, with the Grafton County buildings. Just across the river is the village of Newbury (see Route 24), which may be seen from the l. as the train skirts the rich intervals, and passes to N. Haverhill, a small village near the Ox Bow Bend of the river. Stations, *Woodsville*, and **Wells River** (Coosuck House), where the train crosses the Connecticut, and makes a connection with the Conn. and Passumpsic Railroad (Route 24). The river is recrossed on the same bridge, and the line now runs by Woodsville up the valley of the Ammonoosuc River. Stations, *Bath*, a small village on the Connecticut, E. of which the Wild Ammonoosuc joins the Ammonoosuc; *Lisbon* (small inn); *N. Lisbon*, and **Littleton** (Thayer's Hotel; Union House; and several boarding-

houses, the best of which is the * Oak Hill House, on the high hill over the village, accommodating 70 guests, at \$10-15.00 a week). Littleton was chartered in 1764, under the name of Chiswick, and has 15 M. of territory on the Connecticut River. It has 2,400 inhabitants, 2 banks, 3 churches, several manufactories, and a weekly paper called "The White Mountain Republic." From the hills in the vicinity, fine panoramic views of the White and Franconia Mts. may be obtained. Stages leave semidaily for the Profile House (see Route 34), 11 M. distant.

Stations, **Wing Road**, where trains connect on a branch railroad to Bethlehem and the Twin Mt. House (12 M. distant); *Whitefield* (Whitefield House), a lumber-working town; and *Dalton* (Sumner House), a pleasant village near the Connecticut. Stations, *S. Lancaster*, and **Lancaster** (* Lancaster House, 120-130 guests, at \$3-3.50 a day; American House), a beautiful village on a broad plain near the river. It has about 2,200 inhabitants, 2 weekly papers, and 5 churches. This is a favorite summer-resort, "and in the combined charm, for walks or rides, of meadow and river, — the charm, not of wildness, but of cheerful brightness and beneficence, — Lancaster is unrivalled." (STARR KING.) *Stebbins' Hill*, near the village, commands an extensive view; while the drive around *Mt. Prospect* (2-3 hrs.) is much esteemed. The rapids on the Connecticut are reached by a fine road over the intervalles (6 M.). The riverward roads are level and smooth, revealing fine distant views, the best of which is obtained from the Lunenburg Hills, beyond the river in Vermont. To the E. and N. E. of Lancaster are the dark and unexplored Pilot Mts., whose main peak is sometimes ascended by a path leading from the hamlet of Lost Nation, yielding a broad view over the upper Coös country and the mountain-walls to the S. and S. E. Israel's River unites with the Connecticut near the village, after flowing down a picturesque valley from its source near Mt. Madison. Sir Charles Dilke says that "the world can show few scenes more winning than Israel's River valley, in the White Mts. of N. H., or N. Conway, in the S. slopes of the same chain." The stream is named for an old hunter who was one of the pioneers of the Coös country, but the melodious Indian name is preferable, — Singrawack, "the foaming stream of the white rock." "Grand combinations of the river and its meadows with the Franconia Range and the vast White Mt. wall are to be had in short drives beyond the river, upon the Lunenburg Hills." Stages run from Lancaster twice daily (7 M.) to the *Waumbek House*, on Jefferson Hill, famed for its panoramic view of the White, Franconia, and Green Mts. (see Route 33).

Beyond Lancaster the railroad follows the Connecticut River for 10 M., and connects with the Grand Trunk Railway (Route 40) at **Northumberland**.

31. Boston to the White Mountains.

By the Eastern Railroad to N. Conway (137 M.) in 5 hrs., fare, \$5.00; to the Crawford House (162 M.) in 12 hrs., fare, \$8.50; to the Glen House (157 M.) in 11 hrs., fare \$7.00. This is the quickest and nearest route to the White Mts., and runs two Pullman express trains daily in summer.

The train leaves the Eastern station in Boston (on Causeway, at the foot of Friend St.), and passes out over the Charles River. Boston to *Conway Junction*, see Route 37 (the principal stations are Chelsea, Lynn, Salem, Ipswich, Newburyport, Hampton, and Portsmouth). Beyond Conway Junction the train passes the stations, *S. Berwick*, *Salmon Falls*, and *Great Falls*. At the latter village are extensive cotton-factories, employing 3,000 hands, and consuming 7,700 bales of cotton yearly. Station, **Rochester** (*Dodge's Hotel*; *Mansion House*), a village on Norway Plains, with several factories near the falls on the Cocheco River. The town has 3 banks, 7 churches, and over 4,000 inhabitants. Over 2,000,000 yards of flannel are made here yearly, with 400,000 pairs of shoes, 100,000 pairs of blankets, and 2,000,000 bricks. Rochester was settled in 1728, and its people kept constant vigil for nearly half a century, being often attacked by the Indians. John P. Hale, a prominent leader in the antislavery movement, and U. S. Senator for 16 years, was born here in 1806.

The *Portland and Rochester Railroad* runs from this village across the centre of York County to Portland (52 M.; fare, \$1.55). Stations, *E. Rochester*, *E. Lebanon*, and *Springvale*, a village in Sanford, which was bought of the Sagamore Fluellen in 1661. Stages run from Springvale to Shapleigh, and to Newfield, where the Mt. Eagle Tripoli is made, and large carriage-factories are located. Station, **Alfred** (*Central House*; *County House*), a pleasant village on a level plain, containing the York County buildings, and named in honor of King Alfred of England. The line next crosses the towns of Waterborough and Hollis, and the Saco River. Station, *Buxton* (*Berry's Hotel*), the old Narragansett, No. 1, which was named in compliment to Paul Coffin, its pastor for 40 years, whose ancestors came from Buxton in England. This town was one of the 7 granted by Mass. to the victorious soldiers of King Philip's War, and 9 more were granted to the veterans of the Canada War of 1695. The soldiers were thus compensated for their labors, and at the same time the distressed and war-swept settlements on the Maine coast were shielded by a double tier of towns inhabited by hardy and fearless veterans. Buxton has 4 villages, with extensive lumber-mills. Stages run to Cornish and Limington. Station, *Gorham* (*Clement House*), the 7th town granted to the veterans of 1675, and named for Capt. Gorham, whose company lost 36 killed and 41 wounded at the Narragansett Fort Fight. Station, *Sacarappa*, a manufacturing village which for 50 years sent vast amounts of lumber to Portland and Havana. The Cumberland Mills turn out \$1,000,000 worth of paper annually. After running across the populous town of Westbrook, the train approaches Bramhall Hill, and passes into the terminal station at Portland.

After leaving Rochester, the White Mt. train passes the stations, Hayes' Crossing and S. Milton, and stops at *Milton* (*Franklin House*), a quiet farming town near the Salmon Falls River. Mt. Teneriffe is seen on the l. Station, *Union* (*Union House*), beyond which Copple Crown Mt. is seen in the W.

From **Wolfboro Junction** a branch railroad runs (in 12 M.) to Wolfboro, on Lake Winnepesaukee (see Route 32), in the latter part of its course skirting Smith's Pond, and stopping near the wharf of the Lake steamers.

Stations, *Wakefield*, *E. Wakefield*, and *N. Wakefield*, to the E. of which is Lake Newichawanuock (East Pond), which is 3 M. long and 1 M. wide. Stations, *Ossipee* and *Ossipee Centre* (two inns), the shire-town of Carroll County. A glimpse of Ossipee Lake is gained on the r., beyond this station, with Green Mt. on its farther shore. Running N. with Ossipee Mt. on the l., the train reaches W. Ossipee (* **Banks' Hotel**), from which fine excursions may be made to Ossipee Lake, Sandwich Notch, and Mt. Chocorua (see page 220). Madison Plains are next traversed, with the broad sheet of Six Mile Pond glittering among the forests on the r. and Legion Mt. far beyond. On the l. is the weird peak of **Chocorua**, to which Starr King has applied the adjectives, "gallant, haughty, rugged, torn, proud-peaked, desolate, proud and lonely, tired."

Stations, *Madison* and *Conway* (* **Conway House**; **Pequawket House**; **Grove House**). This village is situated on rich level land, and has many charming rural scenes along the winding Saco. From its air of tranquillity and pastoral seclusion, this hamlet of *Chatauque* is preferred to N. Conway by those who seek quiet and rest, and are regardless of brilliant society. Excursions are made from this point to * **Chocorua Lake**, 8-9 M. distant, under the mt. of the same name; to **Conway Centre** and **Fryeburg** (see Route 39), in the N. E.; to **Chatham**, by the long, straggling village of **Conway Street**, between the Green Hills and the Maine border; to **Champney's Falls**, ascending the Swift River valley to the W.; and to the **Cathedral**, **Echo Lake**, and **Diana's Bath**. The last-named places are as near to **Chatauque** as to N. Conway, and the fording of the river is avoided. There are fine views of the White Mts. from this village, with the Mote Mts. looming in the N. W. Beyond Conway the train runs N. for 5 M., much of the way being over embankments and trestles on the Saco intervals. The Mote Mts. are approached on the l., and **Kiarsarge** appears on the r. Soon after crossing the Saco, a white village is seen on the hillside, the tower of the **Kiarsarge House** is approached on the r., and the train stops at the new and elegant station building at **N. Conway** (see Route 33).

THE SWITZERLAND OF AMERICA.

ROUTE 32. — LAKE WINNEPESAUKEE AND THE SANDWICH MOUNTAINS.

33. — THE WHITE MOUNTAINS AND NORTH CONWAY.

34. — THE FRANCONIA MOUNTAINS AND THE PEMIGEWASSET VALLEY.

35. — THE PERCY PEAKS, DIXVILLE, AND LAKE UMBAGOG.

32 Lake Winnepesaukee and the Sandwich Mountains.

From Boston to the Lake : (a) By Routes 29 and 30, through Lowell and Concord to Weirs, whence the steamer "Lady of the Lake" runs to Centre Harbor and Wolfboro. Boston to Weirs, 105 M.

(b) By Route 38, through Lawrence and Dover to Alton Bay, whence the steamer "Mt. Washington" runs to Wolfboro, Centre Harbor, and Meredith. Boston to Alton Bay, 96 M.

(c) By Routes 31 and 37, through Salem and Portsmouth to Wolfboro, where both the steamers touch, and from which all the lake-villages may be visited. Boston to Wolfboro, 106 M. (in $4\frac{1}{2}$ hrs. by the Pullman express train in the morning).

Lake Winnepesaukee is in the counties of Carroll and Belknap, in the State of N. H., and is 25 M. long by 1-7 M. wide, containing 69 square miles. It is 472 ft. above the sea, and its waters of crystalline purity reflect the shadows of several bold mountains, and surround nearly 300 islands, great and small. 8 towns rest around it, having (in 1870) an aggregate population of 14,000 on about 200 square miles of territory; and but few and small are the villages along the curiously indented shores. The waters of the lake are discharged by the Winnepesaukee River, which unites with the Pemigewasset to form the Merrimac, and passes into the ocean at Newburyport. Winnepesaukee is an ancient Indian word which is popularly supposed to mean "The Smile of the Great Spirit," although some interpret it as "Pleasant Water in a High Place."

"There may be lakes in Tyrol and Switzerland which, in particular respects, exceed the charms of any in the Western world. But in that wedding of the land with the water, in which one is perpetually approaching and retreating from the other, and each transforms itself into a thousand figures for an endless dance of grace and beauty, till a countless multitude of shapes are arranged into perfect ease and freedom, of almost musical motion, nothing can be held to surpass, if to match, our Winnepesaukee." (BARTOL.)

"I have been something of a traveller in our own country, — though far less than I could wish, — and in Europe have seen all that is most attractive, from the Highlands of Scotland to the Golden Horn of Constantinople, from the summit of the Hartz Mountains to the Fountain of Vaucluse; but my eye has yet to rest on a lovelier scene than that which smiles around you as you sail from Weirs Landing to Centre Harbor." (EDWARD EVERETT.)

"Looking up to the broken sides of the Ossipee Mts. that are rooted in the lake, over which huge shadows loiter; or back to the twin Belknap hills, which appeal to softer sensibilities with their verdured symmetry; or farther down, upon the charming succession of mounds that hem the shores near Wolfboro; or northward, where distant Chocorua lifts his bleached head, so tenderly touched now with gray and gold, to defy the hottest sunlight, as he has defied for ages the lightning and the storm, — does it not seem as though the passage of the Psalms is fulfilled before our eyes, — 'Out of the perfection of beauty God hath shined'?" (THOMAS STARR KING.)

The poetry of Percival and of Whittier has often been inspired by Winnepesaukee. (See Whittier's poems, "The Lake-side," "Summer by the Lake," and others.)

The steamer runs E. from Weirs, with Meredith Bay opening to the N. Mount Belknap is seen to the S., and Ossipee Mt. looms up across the lake in front. After passing Governor's Island on the S., the boat turns to the N. through a strait between Bear Island (3 M. from Weirs) and the

mainland. Just after passing this island, and when within 3 M. of Centre Harbor, the finest * view on the lake is obtained. The whole line of the Sandwich Mts. is seen in the N., between Ossipee on the r. and Red Hill on the l., with Whiteface looming foremost, and "the haughty Chocorua" leagues away to the N. E.

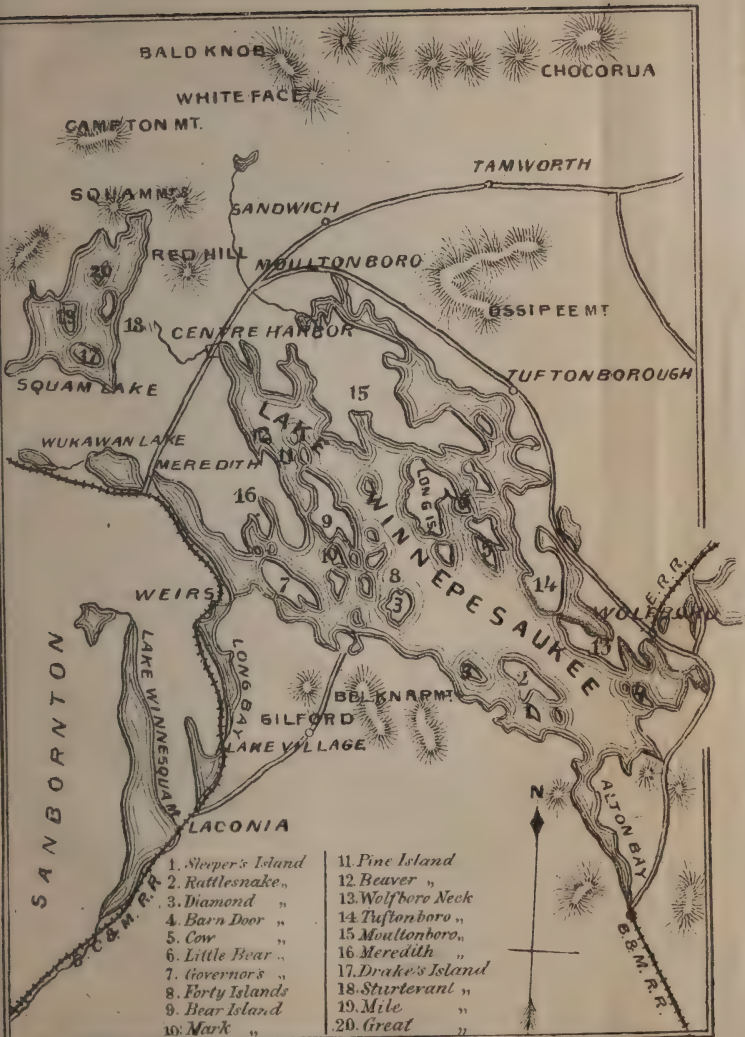

Centre Harbor is 10 M. from Weirs. It has the * Senter House, \$3.00 a day; the Moulton House, \$10-14.00 a week; and numerous pleasant boarding-houses, among which are those of R. L. Coe, A. M. Graves, the Wentworths, and Rev. Almon Benson. The prices at these houses range from \$7.00 to \$14.00 a week. Kelsea's is on the far-viewing Centre Harbor Hill, over a mile from the village, while under Red Hill and near Squam Lake is Sturtevant's (accommodating about 30).

Steamers (time-table of 1872) leave Centre Harbor 4 times daily. The "Lady of the Lake" leaves at 7.30 A. M., and at 1 P. M. Fare to Wolfboro, 75 c.

Stages leave daily (in summer) for Moultonboro, Sandwich, Tamworth, Madison, and W. Ossipee.

Centre Harbor is a small hamlet at the head of one of the 3 northern bays of the lake. It was settled by Col. Senter in 1757, and was named in his honor, but the improvement of the town has been slow, and in 1870 it had only 446 inhabitants. There are pleasant drives from this village to Moultonboro, to Sandwich, and * "around the ring," the latter being by a series of roads 4 M. long, passing by Red Hill and within sight of Squam Lake, and returning to the village. *Centre Harbor Hill*, 1 M. from the hotels, affords a fine lake prospect, recommended for its sunset views. But the main attraction of the place is the * ascent of **Red Hill** (2,000 ft. high). By the highway it is 4 M. to the foot of the hill, from which a bridle-path nearly 2 M. long reaches the summit. A road 2 M. shorter is available to the pedestrian, by passing out on the Sandwich road, taking the first farm-lane to the r. beyond the cemetery and cross-roads, and crossing straight to Red Hill by means of quiet, rural field-roads. The mountain-path soon turns to the r. from the highway (which is followed to the l. after it is gained). The hill is ascended to the first cottage, around whose upper corner the path bears sharply to the l. The reddish sienite ledges of the summit are gained by a long climb through the forest, and here is seen the luxuriant *uva ursæ*, whose flame-red autumnal tints probably gave name to the mountain. The ** view from the summit vies in beauty with that from Mount Holyoke, though of far different character and devoid of historic charm. Lake Winnepesaukee is outstretched in the S. with leagues of bright waters and hundreds of islets, while the twin summits of Mt. Belknap are seen over Centre Harbor, about 15 M. away. In the S. W. is Mt. Kearsarge, full 30 M. distant, while it is claimed that Monadnock (70 M. S. W.) may be seen in a clear day. In the W. is the lovely Squam Lake, winding like Windermere, among the hills, with numerous islands and white, sandy beaches, while beyond are the Squam Mts. and Mt. Prospect, near Plymouth.

"The Mt. Washington range is not visible, being barred from sight by the dark

Sandwich Range, which in the afternoon, untouched by the light, wears a savage frown that contrasts most effectively with the placid beauty of the lake below. Here is the place to study its borders, to admire the fleet of islands that ride at anchor on its bosom, — from little shallows to grand three-deckers, — and to enjoy the exquisite lines by which its bays are infolded, in which its coves retreat, and with which its low capes cut the azure water, and hang over it an emerald fringe.” (STARR KING.)

“Far to the south
Thy slumbering waters floated, one long sheet
Of burnished gold, — between thy nearer shores
Softly embraced, and melting distantly
Into a yellow haze, embosomed low
Mid shadowy hills and misty mountains, all
Covered with showery light, as with a veil
Of airy gauze.” — PERCIVAL.

In the N. E. the weird peak of Chocorua is seen, and nearer at hand in the E. is the heavy, dark mass of Ossipee. The central peak of the Sandwich Range is White Face, while Black Peak holds the left, and the right extends from Passaconaway to Chocorua. The white village in the plain below is Sandwich, while the Bear Camp and Red Hill Ponds are seen in its vicinity. “Whoever misses the view from Red Hill loses the most fascinating and thoroughly enjoyable view, from a moderate mountain-height, that can be gained from any eminence that lies near the tourist’s path.” The afternoon is the best time for the excursion.

* **Squam Lake** is 3-4 M. from Centre Harbor, and should be visited for the sake of its sequestered loveliness, its romantic islets, and its white strand. The waters of Squam are of rare purity, and abound in fish.

Plymouth is 12 M. N. W. of Centre Harbor, and is approached by a smooth but hilly road, passing through the romantically beautiful district formerly inhabited by the Squamscott Indians. This road skirts the shores of Squam and Little Squam Lakes, and at about 5 M. from Centre Harbor, has a superb * view of Chocorua, 15 M. away, over the broadest part of Squam Lake. The road passes across the broad, rich intervalles of Holderness and Plymouth, with the Squam Mts. and Mt. Prospect on the r.

On leaving Centre Harbor for *Wolfboro*, the steamer keeps a S. E. course, with Ossipee Mt. on the E. over the low shores of Moultonboro Neck. A great archipelago of islands is passed, — islands which shall here be nameless, they being worse than nameless in the poverty of their homely Saxon titles. About midway of the lake “the unmistakable majesty of Washington is revealed. There he rises, 40 M. away, towering from a plateau built for his throne, dim green in the distance, except the dome that is crowned with winter, and the strange figures that are scrawled around his waist in snow.” Fredrika Bremer speaks of “the Olympian majesty of Mt. Washington” from this point. “Farther on, the summit of Chocorua is seen moving swiftly over lower ranges, and soon the whole mountain sweeps into view, startling you with its ghost-like pallor and haggard crest.” On Long Island, nearly half-way down the lake, is a small hotel, while the Island Hotel on Diamond Island is W. of the course, and is a favorite resort for excursion parties. The mountains in the N. change their relative positions with kaleidoscopic

rapidity, and the imposing peaks of Mt. Belknap (whence is obtained the finest lake-view) loom up ahead. After passing these peaks the steamer rounds into Wolfboro Bay, with Copple Crown Mt. on the r. 20 M. from Centre Harbor is the village of **Wolfboro**.

Hotels. * Pavilion, the best hotel on the lake; Bellevue House, \$8-12.00 a week; Lake House. There are also many pleasant and retired boarding-houses in and near the village.

Steamers leave for Alton Bay, Centre Harbor, and Weirs, two or three times daily.

Stages run daily to *Tuftonboro*, a stock-raising town 7 M. N. W., and to *Moultonboro*, over a pleasant road on the E. shore of the lake.

Wolfboro was settled in 1770, and was the site of the fine mansion of Gov. Sir John Wentworth. It is now a pleasant village in a thriving town of about 2,000 inhabitants, with 3 banks and 3 churches. Its situation on two long hills near the lake is very beautiful, and fine views are enjoyed of the Belknap Mts. across the water. Good lake-views may be had from the hills about the village, and also from Tumble-Down Dick, a high eminence near the large Smith's Pond, E. of Wolfboro. But the best excursion is to *Copple Crown Mt.*, about 5 M. S. E., by a road passing to S. Wolfboro. The carriage-road runs nearly to the summit (fare, \$2.00 from the hotel for each person of a party). Copple Crown is 2,100 ft. high, and furnishes from its summit a view of nearly the whole length of the lake, with Mt. Belknap near at hand in the N. W., and the heavy range of Sandwich looming above the head of the lake. Chocorua and Ossipee are close together, a little W. of N., and on a clear day Mt. Washington may be seen beyond all, while the ocean is visible in the opposite direction. 30 lakes and ponds are seen from Copple Crown, of which Ossipee, in the N., is one of the finest.

The Wolfboro Branch of the Eastern Railroad runs to the N. Conway main line in 12 M. Two express trains leave for Boston daily, making the distance (103 M.) in 4-5 hrs.

After leaving Wolfboro the steamer follows a southerly course to Fort Point, where it turns by Little Mark Island into Alton Bay. This is a narrow estuary, 4-5 M. long, and bordered by high wooded hills of Trosach-like boldness. The steamer follows the sinuosities of this curious inlet, and sometimes seems to be walled in, as neither way of ingress nor egress is seen. Mt. Major is passed on the W. shore, and after many turns and bendings the last bluff is passed, and the hotel and station at the S. extremity of the lake are reached. Here is situated the *Bay View House* (\$10-14.00 a week), a quiet summer-hotel with pleasant drives and good fishing in the vicinity.

Alton Bay was formerly called Merry-Meeting Bay, since it was a famous gathering-place for the Indians. Several Indian raids on the N. H. coast passed down this bay, and in 1722 the province built a military road to it, and commenced fortifications. The cost was found to be too heavy for the little colony, and the position was given up. Atkinson's regiment, which was covering the frontiers during the French war, built a fort and encamped here through the winter of 1746-7.

The hotel is about 30 M. from Centre Harbor. Mt. Major and Prospect Hill are near the hotel, and command beautiful lake-views, while the ocean may be seen (in clear weather) from the top of Prospect. Sharp's Hill also gives a neat lake-view.

Among the longer excursions is that to Lougee Pond, near a cluster of lakelets from which flows the Suncook River. Gilmanton Iron Works village is a little way S. of these ponds, which are about 6 M. from Alton Bay. 6-8 M. to the eastward lies Merrymeeting Lake, an irregular, picturesque, and sequestered pond 10 M. in circumference, N. of which is Copple-Crown Mt. The favorite excursion from Alton Bay is to Mt. Belknap, 10 M. N. W. on the shores of, and overlooking, Lake Winnepesaukee. Seats in the carriage which runs to the mt. whenever a party is formed cost \$1.50 each, and the noble view of lakes and mts. more than repays for the time and trouble of the journey.

Three trains daily (during the season) leave Alton Bay for Boston. Distance, 96 M.; time about 4 hrs. (see Route 38.)

Centre Harbor to Conway.

A railroad line has been surveyed from Meredith through Centre Harbor to W. Ossipee. Daily stages now pass over the road between these points. After leaving the Harbor, Red Hill is approached and passed, and a village of Moultonboro is reached in 5 M. from the Senter House. Moultonboro has a small inn and two or three boarding-houses, and abounds in pleasant scenery which is rarely visited. Red Hill is here, and Ossipee Mt., also the long and sequestered Moultonboro Bay with its great archipelago of picturesque islets, and with plenty of fish in its waters.

The Ossipee Indians had their home near this bay, and many relics of them have been found, chief among which is a great monumental mound at the mouth of Melvin River.

"Where the Great Lake's sunny smiles
Dimple round its hundred isles,
And the mountain's granite ledge
Cleaves the water like a wedge,
Ringed about with smooth, gray stones,
Rest the giant's mighty bones.

Close beside, in shade and gleam,
Laughs and ripples Melvin stream,
Melvin water, mountain-born,
All fair flowers its banks adorn;
All the woodland's voices meet,
Mingling with its murmurs sweet.

Over lowlands forest-grown
Over waters island-strown,
Over silver-sanded beach,
Leaf-locked bay and misty reach,
Melvin stream and burial-heap.
Watch and ward the mountains keep.

Who that Titan cromlech fills?
Forest-kaiser, lord o' the hills?
Knight who on the birchen tree
Carved his savage heraldry?
Priest o' the pine wood temples dim,
Prophet, sage, or wizard grim?"

See Whittier's poem, "The Grave by the Lake."

On the S. side of Ossipee Mt. is a mineral spring, about 1 M. from which is a noble fountain, 16 ft. around, whose waters gush forth with great force and copiousness. Following the stream which is born here, a fine water-fall, 70 ft. deep, is found in the forest, on the l. of which is a cavern.

The stage-road, after some pleasant views of Squam Lake, enters the pretty village of **Sandwich** (*Red Hill House*; boarding-houses of *Beede*,

Wiggin, and others), which is in a narrow valley nearly surrounded by mountains. The scenery is noble, embracing Ossipee on the S. E., Red Hill, the Squam Mts. on the W., and the dark and storm-worn Sandwich Range on the N. Squam Lake is on the S. W. border of the town, and a charming road leads from the village to *Plymouth*, passing for several miles along the N. and W. shores of the lake, with the Squam Mts. on the r. Another road (somewhat arduous) leads across a high mountain-pass to *Thornton*, in the Pemigewasset Valley, while a bridle-path leads through Greeley's Gap to *Waterville*. Beyond Sandwich the stage passes near Bearcamp Pond, and follows the Bearcamp River down through Sandwich Notch to the lowlands of Tamworth and Ossipee towns.

Whittier's poem, "Among the Hills," has its scene laid in this vicinity where

"Through Sandwich notch the west-wind sang
Good morrow to the cotta;
And once again Chocorua's horn
Of shadow pierced the water.

Above his broad lake Ossipee
Once more the sunshine wearing,
Stooped, tracing on that silver shield
His grim armorial bearing."

And many are the weary ones who still come here

"To drink the wine of mountain air
Beside the Bearcamp Water."

Whiteface (4,100 ft. high) is the most imposing of the Sandwich Mts., and is sometimes ascended from Sandwich, although the excursion is arduous and fatiguing. The view is said to be magnificent, embracing Winnepesaukee on the S. with the loftier peaks of the White Mts. on the N. On the N. E. is Passaconaway, a noble peak, 4,200 ft. high, which was named after the great sagamore of Pennacook, the most powerful Indian prince in northern New England, early in the 17th century. He governed a large confederacy of tribes from his seat at Pennacook (Concord), and although he strove to annihilate the English by necromantic arts, he never put his warriors in arms against them (see page 222).

Chocorua and Ossipee.

The road through Sandwich Notch passes out by *Banks' Hotel*, near W. Ossipee station, on the Eastern R. R. (Route 31). This is a pleasant old country hotel, with good accommodations at a moderate price, and stands in a fine position either for viewing or visiting the surrounding scenery. Banks' is 18 M. from Centre Harbor, by way of Sandwich. Pleasant excursions are made along Bear River and into the Sandwich Notch. Ossipee Mt. is close to the hotel, and the highest peak is but 2-3 M. distant. A grand view of Lake Winnepesaukee is obtained from this point, while Chocorua looms up in the N. and Ossipee Lake is in the S. W.

Ossipee Lake is about 4 M. S. E. of the hotel. The road follows down the Bear Camp valley to the vicinity of the lake. In the field near Daniel Smith's farm-house (l. of the road) is an Indian mound, nearly 50 ft. in diameter, from which several skeletons and other relics have been taken.

In the same field and nearer the lake are the remains of Lovewell's fort, built in the spring of 1725, and abandoned after the battle at Pequawket (Fryeburg). Just beyond this point are the shores of Ossipee Lake, a sequestered sheet of water embracing about 10 square miles, with Green Mt. rising boldly on the further shore.

* **Mt. Chocorua** is best visited from this point. It is 8 M. to the foot of the mt. and little more than half-way the beautiful Chocorua Lake (*Lake House*, finely situated) is passed. From this point the summits of the mountain are seen, of which "one is a rocky, desolate, craggy-peaked substance, crouching in shape not unlike a monstrous walrus (though the summit suggests more the half-turned head and beak of an eagle on the watch against some danger); the other is the wraith of the proud and lonely shape above." The ascent requires 5 M. from the foot of the mountain, and is very arduous, — no path having yet been made.

"How rich and sonorous that word Chocorua is! Does not its rhythm suggest the wildness and loneliness of the great hills? To our ears it always brings with it the sigh of the winds through mountain-pines. It is invested with traditional and poetic interest. In form it is massive and symmetrical. The forests of its lower slopes are crowned with rock that is sculptured into a peak with lines full of haughty energy, in whose gorges huge shadows are entrapped, and whose cliffs blaze with morning gold. On one side of its jagged peak a charming lowland prospect stretches E. and S. of the Sandwich Range, indented by the emerald shores of Winnepesaukee, which lies in queenly beauty upon the soft, far-stretching landscapes. Pass around a huge rock to the other side of the steep pyramid, and you have turned to another chapter in the book of nature. Nothing but mountains running in long parallels, or bending, ridge behind ridge, are visible, here brilliant in sunlight, there gloomy with shadow, and all related to the towering mass of the imperial Washington. . . . There is no summit from which the precipices are so sheer, and sweep down with such cycloidal curves. It is so related to the plains on one side and the mountain-gorges on the other, that no grander watch-tower, except Mt. Washington, can be scaled to study and enjoy cloud scenery." (STARR KING.)

Chocorua, the blameless prophet-chief of the Sokokis Indians, was pursued to this lofty peak by a white hunter, who was determined to kill him for the sake of the scalp-money (the colonies gave large bounties for Indian scalps). The chief pleaded for quarter, speaking of his quiet life in which he had never harmed the colonists; but when his pursuer refused to hear, and drew near to put him to death, the noble Chocorua cast one long, lingering look over the fair lands of his hunted people, and lifting up his arms invoked a solemn and terrible curse upon the country in which the English were swarming. He then leaped boldly over the tremendous precipice, and was dashed in pieces on the rocks below. Malignant and fatal diseases among the cattle, and other fell signs long troubled the towns about the mountain, while strange legends arose, and the baleful effects were for many years attributed to the merited curse of Chocorua.

33. The White Mountains and North Conway.

New York to the White Mts. (a.) By Route 24, through New Haven, Springfield, and Wells River, to Littleton (whence stages run to the Profile House, 341 M. from N. Y.), and the Twin Mt. House (338 M. by R. R. from N. Y.). Stages from the Twin Mt. House to the Crawford House (9 M.)

(b.) By steamer to New London, thence by Route 12 to Amherst, Brattleboro, and Wells River, — thence to the Mts, as in (a).

(c.) By New London, Norwich, Worcester, and Nashua (Route 13), to Concord, and thence by Route 30. Or by the preceding way as far as Weirs, whence Lake

Winnepesaukee (Route 32) is crossed to Wolfboro', and Route 31 is followed to N. Conway. Many tourists prefer to take the night train or boat to Boston, and make their way thence to the White Mts. by a morning train.

Boston to the White Mts. (d.) By route 31, through Lynn, Salem, Newburyport, and Portsmouth, to N. Conway. By this route the distance from Boston to N. Conway is 137 M.; to the Crawford House, 162 M.; to the Glen House, 157 M.

(e.) By Routes 29 and 30, through Lowell, Nashua, Manchester, and Concord to Weirs, Plymouth, and the Twin Mt. House. Or by crossing Lake Winnepesaukee from Weirs to Wolfboro, reach N. Conway by Route 31 (or by the stage route from Centre Harbor).

(f.) By Route 31 to Wolfboro, thence crossing Lake Winnepesaukee to Weirs, and following Route 30 to Plymouth, Littleton, and the Franconia Mts., or to the Twin Mt. and Crawford House.

(g.) By Route 38 to Alton Bay, and thence by steamer to Wolfboro and Route 31 to N. Conway; or to Centre Harbor, and Route 32 (*ad finem*); or to Weirs, and thence by Route 30, as in (f).

Portland and the East to the White Mts. (h.) By Route 89 to N. Conway (60 M.), and thence by stage to the Crawford and Glen Houses.

(i.) By Route 40, to the village of Gorham (91 M.); and thence by stage to the Glen House and Crawford House.

Montreal and Quebec to the White Mts. (j.) By Route 40 (Grand Trunk Railway to Gorham, 206 M. from Montreal, and 226 M. from Quebec).

Albany and Saratoga to the White Mts. (k.) By Routes 53 and 28 to Rutland, thence by Route 26 to Bellows Falls, and thence by White River Junction and Wells River to Littleton and the Twin Mt. House.

Pedestrianism has never obtained much favor in America, but when the present *post bellum* era of prodigality and pretence has passed away, we may hope to see these mountain peaks and gorges enlivened by parties of summer ramblers who will gain health and strength from inspiring walks in the pure, sweet air. The gentry of Old England, with their ladies, are fond of passing thus through the Swiss Alps or the Scottish Highlands, and when the people here shall adopt this mode of summer travel, the physical culture of New England will reach a higher standard. Many admirable pedestrian routes may be made through the White Mts., but the tourist should have plenty of time, and be well and lightly equipped (see Introduction, IV.) A good field-glass will be found of essential service.

The White Mts. were called Agiochook ("Mts. of the Snowy Forehead and Home of the Great Spirit") by some of the Indian tribes, and Kan Ran Vugarty ("the continued likeness of a gull") by others. The Algonquins called them Waumbek (White Rock) or Waumbeket-Methna, and the natives had the utmost reverence for these mts., believing them to be the home and throne of the Great Spirit. But rarely did the Indians ascend the higher peaks, since it was reported among the tribes that no intruder upon these sacred heights was ever known to return to his people. There was a legend that the Great Spirit once bore a blameless chief and his wife in a mighty whirlwind to the summit of Agiochook, while the world below was overspread by a flood which destroyed all the people. A wilder and more recent tradition is to the effect that the great Passaconaway, the wizard-king of the wide-spread Pennacook confederation (who ruled from about 1620 to 1660), was wont to commune with celestial messengers on the summit of Agiochook, whence he was finally borne to heaven in a flaming chariot. Some authorities claim that a party of Englishmen visited these mts. in 1631-2, but the latest historians credit their discovery to Darby Field, who came up from the coast in 1642. The Indian villagers at Pequawket (Fryeburg) earnestly endeavored to dissuade him from the ascent, telling him that he would never return alive. But he pressed on with his two sea-shore Indians, passing through cloud-banks and storms until he reached the last peak, whence he saw "the sea by Saco, the gulf of Canada, and the great lake Canada River came out of." He found many crystals here, which he thought were diamonds, and from which the chain long bore the name of "the Chrystall Hills." Tradition says that in 1765 a party of 9 of Rogers' Rangers, retreating from St. Francis, were led up Israel's River into these defiles by a treacherous Indian guide, and all of them died except one, who reached the settlements with his knapsack filled with human flesh. It was said

that this party bore the great silver image taken from the church at St. Francis, and several of the early hunters made earnest quest after this sacred relic. A short legendary era followed, and then the pioneer colonists began to move into the outlying glens. In 1771 the Notch was discovered; in 1792 Abel Crawford lived on the Giant's Grave; in 1803 a small tavern was built there; and in July, 1820, a party of seven gentlemen slept on the summit of Mt. Washington, and gave the names which the principal peaks still bear. In 1819 the first bridle-path to the summit was cut, and a small stone hut was erected near that point. The Summit House was built in 1852, and the Tip-Top House was completed shortly after. In September, 1855, a small party started one afternoon to walk to the summit, and being without a guide became bewildered and lost, and one young lady died at midnight from cold and weariness. In the next August, a Delaware gentleman started from the Glen without a guide, in the afternoon, and died near the summit from exposure to a cold night storm. Late in October, 1851, a young English gentleman ascended alone from Crawford's to the summit, and fell from a great precipice into the Ammonoosuc Valley, where his mangled corpse was found. For some years the summit has been occupied during the winter as a station of the meteorological department of the U. S. Army, and the men on duty have experienced the most intense cold and watched terrific storms. The thermometer (Fahrenheit) has descended to 59 below zero, and the winds have attained a velocity of 100 M. an hour.

"The geological features of Mt. Washington possess but little interest. The rocks in place consist of a coarse variety of mica slate, passing into gneiss, which contains a few crystals of black tourmaline and quartz." The cone is covered with blocks of mica slate. The flora of the upper region is nearly identical with that of Labrador and Lapland. "The period when the White Mts. ceased to be a group of islands, or when, by the emergence of the surrounding low land, they first became connected with the continent, is of very modern date, geologically speaking." (SIR CHARLES LYELL.) Below the broken and distorted stratum of mica slate, the vast mass of the mountains is of granite.

North Conway.

Hotels. * Kiarsarge House, 350 - 400 guests, \$4.00 a day, — a fine structure, with extensive parlors and dining-room, and a broad view from the central tower; * Sunset Pavilion, opposite the Episcopal church; McMillan House, S. of the village; Washington House; Eastman House; N. Conway House, in the village; Intervale House, about 2 M. N., near Mt. Kiarsarge. There are over 20 large summer boarding-houses in and around N. Conway, most of which are comfortable and quiet. Their prices range from \$7.00 to \$12.00 a week.

Railroads. The Eastern Railroad (see Route 31) runs two express trains each way daily (through the summer) between Boston and N. Conway, in 5 hours. Distance, 137 M.; fare, \$5.00. The trains leave Boston (time-table of 1872) at 8.10 A. M. and 2.40 P. M., and are provided with Pullman parlor-cars. The Portland and Ogdensburg Railroad runs three trains daily each way (through the summer) between Portland and N. Conway. Distance 60 M., time $2\frac{1}{2}$ - 3 hours (see Route 39). This line connects at Portland with steamers for Boston, and trains run W. from N. Conway for 12 M., to Sawyer's Rock, on the road to the White Mt. Notch.

Stages leave N. Conway for the Crawford House and the Glen House (connecting for Franconia and Gorham) at 8 A. M. and 2 P. M. To the Glen House, 20 M., in 5 hours; fare, \$3.00; to the Crawford House, 25 M., in 6-7 hours; fare, \$3.50. Daily stages leave W. Ossipee for Centre Harbor, on Lake Winnepesaukee. Fare, \$3.50.

Post Office and telegraph facilities are found in the village; carriages may be obtained at various livery-stables; there are several stores where most necessary articles may be obtained; and there are three churches, Bapt., Cong., and Epis.

North Conway is a pretty village, largely composed of hotels and summer boarding-houses, situated on a natural terrace 30 ft. above the inter-
vales of the Saco River, which is about $\frac{1}{2}$ M. distant. "On the W., the long and noble Mote Mt. guards it; on the E., the rough, less lofty, and bending Rattlesnake Ridge helps to wall it in, — unattractive enough in the

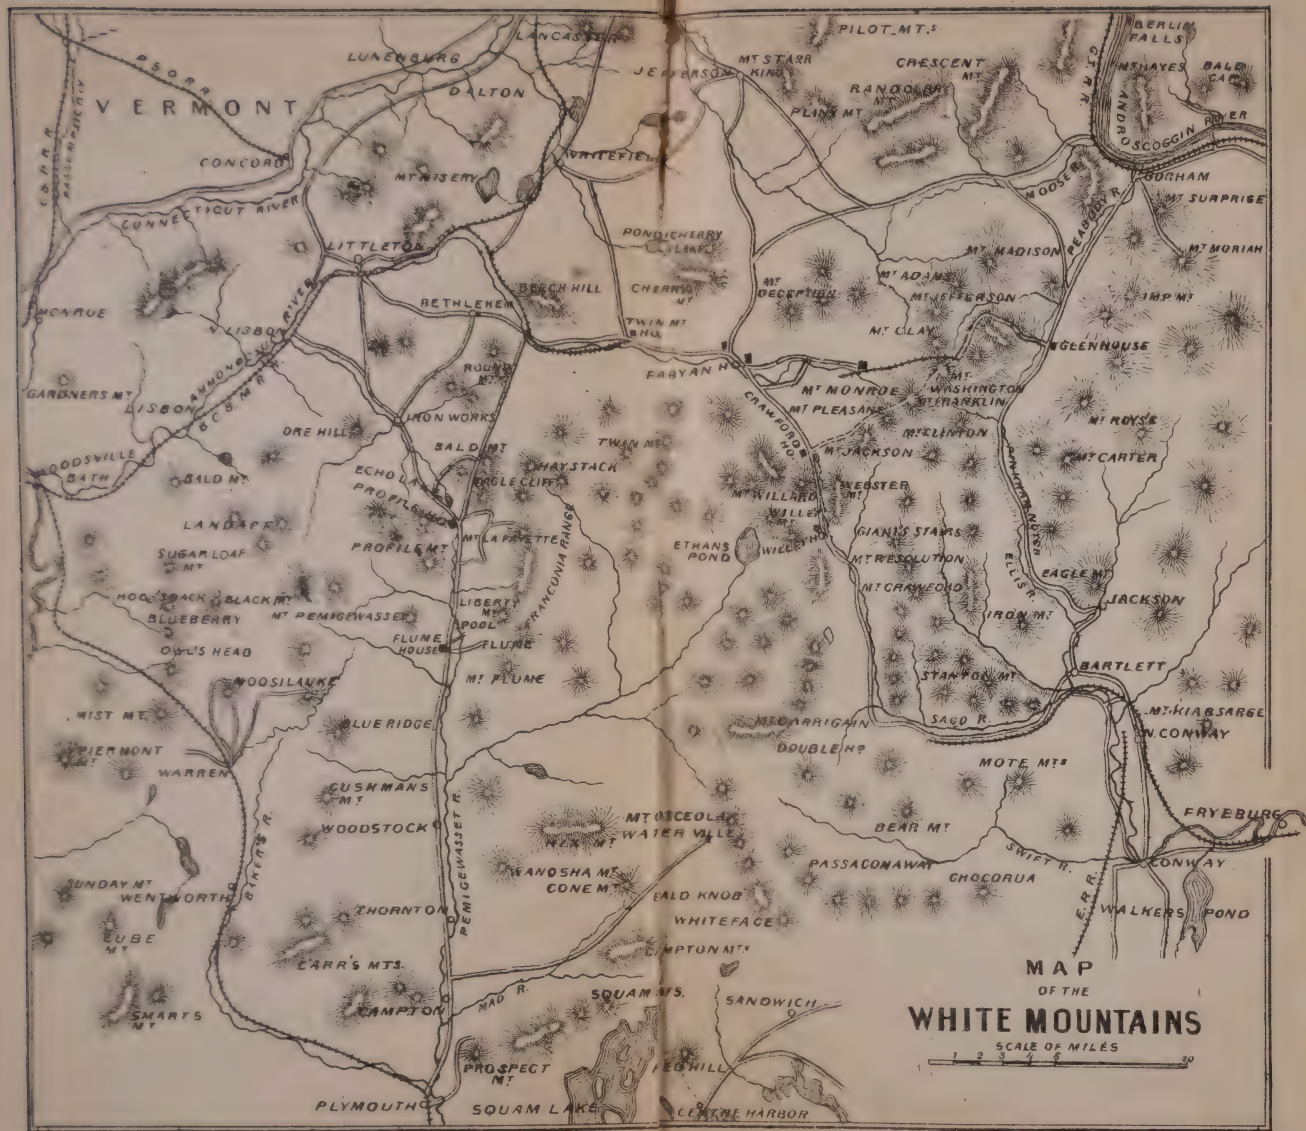

ordinary daylight, but a great favorite of the setting sun, which delights to glorify it with Tyrian drapery. On the S. W., Chocorua manages to get a peep of its lovely meadows. Almost the whole line of the White Mts. proper, crowned in the centre by the dome of Mt. Washington, closes the view on the N. W. and N., — only 12 or 15 M. distant by the air. Mt. Washington does not seem so much to stand up, as to lie out at ease along the North. The leonine grandeur is there, but it is the lion not erect, but couchant, a little sleepy, stretching out his paws and enjoying the sun.

“The distinction of N. Conway is, that it is a large natural poem in landscape, — a quotation from Arcadia, or a suburb of Paradise. And then the sunsets of N. Conway! Coleridge asked Mont Blanc if he had ‘a charm to stay the morning star in his steep course.’ It is time for some poet to put the question to those bewitching, elm-sprinkled acres that border the Saco, by what sorcery they evoke, evening after evening, upon the heavens that watch them, such lavish and Italian bloom. Nay, it is not Italian, for the basis of its beauty is pure blue, and the skies of Italy are not nearly so blue as those of New England. One sees more clear sky in eight summer weeks in Conway, probably, than in the compass of an Italian year.” (STARR KING.)

Mount Kiarsarge, or *Pequawket*, is 3 M. from the village, and attains a height of 3,367 ft. above the sea. A bridle-path (horses \$ 2.00 and guides \$ 2.00 each) has been made to the summit, on which there is a small hotel. The view from this point embraces the village and the valley of the Saco, with the great range of the Mote Mts. beyond, “its wooded wall upreared as if for the walk of some angel sentinel.” In the N. and W. is a vast throng of mountains, grouped “in relation to the two great centres, — the notched summit of Lafayette and the noble dome of Washington.” Lafayette is N. of W., 28 - 30 M. distant, and is the loftiest of the Franconia Mts. The view of Mt. Washington from Kiarsarge is one of the best attainable, while in the opposite direction, 100 M. S. W. it is claimed that “the filmy outline of Monadnock gleams like a sail just fading out upon a vast sea.” Sebago Lake, Pleasant Mt., Fryeburg village, and Lovewell’s Pond are seen in the S. E. and E., together with a vast area of eastern Maine. It is worth while to remain over night at the hotel (\$ 4.00 a day), to enjoy the gorgeous sunrise and sunset.

The Ledges are 3 M. from the village, beyond the Saco, where Mote Mt. terminates in cliffs ranging from 100 to 960 ft. in height, and extending nearly 5 M. The river is shallow and must be forded, as the fierce spring floods render bridges impossible. A curious formation of white rock (looking like a horse dashing up) which was once visible on the cliffs (parts of it are still seen from N. Conway), has caused the name of *White Horse Ledge* to be applied to a part of these cliffs. The **Cathedral** is a singular cavity in the rock (100 ft. above the river and easily reached) 20

MAP

WHITE MOUNTAINS
SCALE OF MILES

1 2 3 4 5 6 7 8 9 10

ft. wide, 40 ft. long, and 60 ft. high, where the ledge bends over in an arch above, and several tall trees form the outer wall. "And truly the waters, frosts, and storms that scooped and grooved its curves and niches, seem to have combined in frolic mimicry of Gothic art. The whole front of the recess is shaded by trees, which kindly stand apart just enough to frame off Kiarsarge in lovely symmetry, — so that a more romantic resting-place for an hour or two in a warm afternoon can hardly be imagined." Below the Cathedral is ***Echo Lake**, a beautiful little loch under the shadow of the cliffs, which throw back an echo over its tranquil waters. A little way N. of the Cathedral is a fine double fall, above and below which are several deep basins in the solid rock, filled with sparkling water, one of which is known as *Diana's Bath*.

The *Artists' Falls* are in the forest $1\frac{1}{2}$ M. E. of the village, and, though insignificant in themselves, are in combination with beautiful groupings of rock and woodland scenery. The *Artists' Ledge* is some distance S. of N. Conway, and commands noble *views of the village and valley with Mt. Washington looming far above and beyond them. Chocorua is seen in the S. E. across the level and luxuriant valley in which glimpses are gained of the Swift and the Saco Rivers.

Excursions are made from N. Conway to Thorn Hill, 8 M. ; Dundee, 10 M. ; Sligo, 13 M. ; Jockey Cap Mt. and Lovewell's Pond, in Fryeburg, 1–13 M. ; Mount Chocorua, 18 M. ; Goodrich and Jackson Falls, 6–9 M. ; "around the square," a favorite drive near Mt. Kiarsarge, 5 M. ; and up the narrow western valley to Swift River Falls, 18 M., with Chocorua on the l., Mote and Bear Mts. on the r., and Passaconaway in front. *Champney's Falls* are visited by this road, and are very beautiful in high water.

N. Conway to the Glen House and Gorham.

Soon after leaving the village, the Cathedral Woods and Mr. Bigelow's elegant cottage are passed on the r. and fine views are afforded of the upper intervalles undisfigured by railway trestles and embankments. Mt. Kiarsarge, on the r., appears in constantly changing forms, as the Interlake and Pequawket Houses are passed, and opposite the Kenison House is a foot-path by which this "charming pyramid" is sometimes ascended. After the road crosses the East Branch of the Saco it bends to the W. and affords a comprehensive view of the Conway valley. Shortly after passing Stilphen's (under Cedar Mt.) a fine retrospective view of Kiarsarge is afforded. *Thorn Mt.* is now seen on the r. and *Iron Mt.* on the l. (in advance), and the road passes over **Goodrich Falls**, which may be viewed from the rocks on the r. bank, or, better still, from the shore below (short but steep path). These falls are on the Ellis River, and are the heaviest in the mts. As the stage now passes along the Ellis River frequent glimpses of the mts. appear, and *Jackson City* is soon reached.

This "city" has two hotels, the *Jackson House* and *Thorn Mt. House* (\$10.00 a week), with four or five dwellings and a Baptist church.

The Jackson people became discontented during the Secession War, on account of crushing taxes, and after some acts of violence on their part, it was found necessary to occupy the place with U. S. troops, who were quartered in the church. The town was settled in 1778, and in 1790 came Capt. Pinkham and five families on snow-shoes and sledges. Shortly after, Daniel Pinkham built a rude road through the notch which still bears his name, and the little settlement was called New Madbury. In 1800 this name was changed to Adams, and in 1829, when Adams and Jackson were candidates for the Presidency, and the latter received every vote (except one) in the town, it took the name of Jackson.

Many rare minerals are found here, and tin-mines have been worked on one of the hills. This central plaza in the city of hills is much frequented in summer by artists, trout-fishers, and lovers of quiet and sequestered scenery. The *Jackson Falls* are close to the village (seen from the bridge over Wildcat Brook on the r.), and are very beautiful in high water. Iron Mt. is 2,900 ft. high and looms up on the l., while Tin Mt. is on the r. Eagle Mt. on the N. is rounded on the r. after leaving the village. The road now ascends through the thickening forest with the Ellis River on the l., while occasional glimpses of the Carter Mt. are obtained on the r. No houses are seen in this desolate pass, and 7 M. beyond Jackson the path to the Glen Ellis Fall is seen on the r. 4-5 M. beyond (with occasional glimpses of Tuckerman's Ravine and the slopes of Mt. Washington), the spacious * **Glen House** is reached. This hotel accommodates 500 guests (\$ 4.50 a day), keeps a band of music through the summer, and has a parlor and dining-room, each of which is 100 by 45 ft. in dimensions. "The Glen House is at the very base of the monarch, and Adams, Jefferson, Clay, and Madison bend around towards the E. with no lower hills to obstruct the impression of their height." The Glen is 1,632 ft. above the sea, and 830 ft. above Gorham, and is watered by Peabody River and surrounded by lofty peaks. On the E. is the long dark ridge of the forest-covered Carter Mt., and on the W. is the noble brotherhood of the five chief peaks of New England. Mt. Madison (5,361 ft.) is 4 M. N. W. in an air-line, and next in the majestic group comes the sharp and symmetrical pyramid of Mt. Adams (5,800 ft.). The massive crest of Mt. Jefferson (5,700 ft.) comes next, then Mt. Clay (5,400 ft.), and S. E. of the hotel the summit of Mt. Washington (6,285 ft.) is seen peering over lofty spurs and secondary peaks. "MAJ. Clay Washington" is a formula which fixes in the mind the order of these mountains. A better view is obtained by ascending for a few hundred feet the mt. behind the hotel.

Thompson's Falls are about 2 M. S. W. of the Glen House, and a guide-board on the l. shows the point where the N. Conway road is quitted, and a forest-path is entered. The falls are $\frac{1}{4}$ M. from the road, and the brook may be followed up for a considerable distance, the walk affording grand retrospective views of Mt. Washington and Tuckerman's

Ravine. Not far from these falls is the quiet and secluded basin called the *Emerald Pool*.

The * **Crystal Cascade** is gained by a path leading from the road into the forest to the l., about 1 M. beyond Thompson's Falls. There is about $\frac{1}{2}$ hour of continuous ascent to the fall, which is near the mouth of Tuckerman's Ravine, and is best seen from a high and moss-covered ledge opposite.

"Down it comes, leaping, sliding, tripping, widening its pure tide, and then gathering its thin sheet to gush through a narrowing pass in the rocks, — all the way thus, from under the sheer walls of Tuckerman's Ravine, some miles above, till it reaches the curve opposite the point on which we stand, and winding around it, sweeps down the bending stairway, shattering its substance into exquisite crystal, but sending off enough water to the right side of its path to slip and trickle over the lovely, dark-green mosses that cling to the gray and purple rocks. We never look at the Crystal Cascade without revering and rejoicing over the poetry with which nature invests the birth of so common a thing as water."

A long and difficult ascent along the brook-bank leads into Tuckerman's Ravine. The Cascade falls about 80 ft.

The * **Glen Ellis Fall** is about 4 M. from the Glen House, and is gained by a plank-walk turning to the l. from the N. Conway road into the forest. This is the finest fall in the mts., and the Ellis River here plunges down 60 ft. in one thick white mass, half sunk in a deep channel which it has cut in the cliff. The steep fall of 60 ft. is prefaced by a descent of 20 ft. at a sharp angle. From the top of the cliff one sees "the slide and foam of the narrow and concentrated cataract to where it splashes into the dark green pool, 100 ft. below." A better view of this "heart of mt. wildness" is gained by descending a long series of rude steps to the edge of the pool below the fall. "It is feminine and maidenly grace that is illustrated by the Crystal Cascade; it is masculine youth, the spirit of heroic adventure, that is suggested by this stream."

The *Garnet Pools* are 1 M. N. of the Glen House, near the Gorham road, and show some curious rock-carving in the bed of the Peabody River. About $1\frac{1}{2}$ M. beyond, by crossing the bridge to the l., the point is reached (near a farmhouse) where the singular appearance of a distorted human face is seen on a peak of *Imp Mt.* Gorham is 8 M. N. E. of the Glen House, with which it is connected by semi-daily stages (fare, \$1.50) running down the valley of the Peabody River, with *Imp Mt.* and *Mts. Moriah* and *Surprise* on the r.

Gorham.

Hotels. Gorham House; Eagle House; the great Alpine House was burned, in October, 1872.

Stages to the Glen House semi-daily. Mountain wagons run frequently, but irregularly, by the Cherry Mt. road to the Crawford and Mt. Washington Houses.

Railroad. The Grand Trunk Railway runs to Portland (91 M.) in $4\frac{1}{2}$ – 5 hours. By taking the train to Northumberland (31 M. N. W.), a connection is made with the B. C. & M. and White Mts. R. R., running to Lancaster and Littleton (Route 30).

Gorham is a thriving village at the confluence of the Peabody and Androscoggin Rivers, on the N. side of the White Mts. and 800 ft. above the sea. It has been almost entirely created by the Grand Trunk Railway, which has its repair-shops here. "For river scenery combined with impressive mt. forms, the immediate vicinity of Gorham surpasses all the other districts from which the highest peaks are visible."

* **Mt. Hayes** is just N. E. of Gorham, and attains a height of 2,500 ft. The Androscoggin is crossed near the hotels by a suspension foot-bridge, 225 ft. long, remarkable as the work of one man (a hard-working villager), who conceived the work and executed it alone. He has also made a path to the summit of the mt. (the ascent requires 2 hours). The view is thus described :—

"The rich upland of Randolph, over which the ridges of Madison and Adams heave towards the S., first holds the eye. Next the singular curve in the blue Androscoggin around the Lary farm, arching like a bow drawn taut. Down the valley Shelburne, Gilead, W. Bethel, and Bethel, were laid into the landscape with rich mosaics of grove and grass and ripening grain,—needing a brush dipped in molten opal to paint their wavy, tremulous beauty. Directly opposite, seemingly only an arrow-shot's distance, were the russet ravines of Moriah and the shadow-cooled stairways of Carter." Mt. Washington is seen to best advantage from this point,— "Mt. Hayes is the chair set by the Creator at the proper distance and angle to appreciate and enjoy his kingly prominence."

* **Mt. Surprise** is a peak of Moriah about 1,200 ft. above Gorham, lying S. E. of the village, with a bridle-path leading through a fine forest to its summit (2½ M. from the hotels.) Horses are easily obtained, but good walkers can make the ascent on foot in 90 minutes. This peak sustains the same relation to the Pinkham Notch as Mt. Willard does to the Crawford Notch. Looking up the pass, Mt. Carter is seen on the l., and the five presidential peaks on the r., with Madison, "the Apollo of the highlands," boldly advanced. On the N., in strongest contrast, are the sweet and fertile lowlands of the Androscoggin, with their peaceful farms and pastoral beauty. An almost obliterated old bridle-path leads from this crest to the summit of Mt. Moriah, 4,700 ft. above the sea. This peak is rarely visited, but is said to command a noble view.

Randolph Hill is 5 M. W. of the village, and its summit is gained by a road that rises 600 ft. on the way. From the road and the hill-top are gained the noblest *prospects of the northern slopes, lines, and peaks of the presidential group, especially of Madison and Adams.

Gilead is 10–12 M. from Gorham, and the drive thither is very pleasant, being alongside the river, with ever-changing hill-scenery on either hand. The *Lead-Mine Bridge* is 4 M. E. of Gorham, near an abandoned mine, and is celebrated for its afternoon and sunset views. This point should be visited between 5 and 7 P. M. Madison, Adams, and Washington at that hour become "volcano-pictures," while the nearer summits of Moriah, Hayes, and Baldcap form their heavily outlined framework.

* **Berlin Falls** are 6 M. N. of Gorham by a pleasant river-road (or by the railway). The Androscoggin River here pours the waters of the distant Umbagog and Rangeley Lakes in "a clean and powerful tide through a narrow granite pass, descending nearly 200 ft. in the course of a mile. We do not think that in New England there is any passage of river passion that will compare with the Berlin Falls. How madly it hurls the deep transparent amber down the pass and over the boulders, — flying and roaring like a drove of young lions, crowding each other in furious rush after prey in sight." The best view is from the rocks near the stream below the falls, while the cataract is seen in mid-career from a bridge over the gorge. Near this point is the *Berlin Falls House*.

From Gorham to the Notch,

by way of the Waumbek House, is 32 – 34 M., and the road is richer in scenery than any other in the mts. No stages run on this route, but wagons and drivers can be obtained at Gorham. The vast and un concealed ranges of the five great mts. are seen for mile after mile in their most imposing forms. "First Madison and Adams come into view, and we drive directly by their base and under their summits in passing over Randolph Hill." Beyond the deep ravine in the side of Adams the castellated peak of Jefferson is seen, and soon after Mts. Pleasant, Franklin, and Monroe come into view. From Martin's, 13 M. from Gorham, Mt. Clay is visible, and just beyond is the majestic head of Washington. Near a little red school-house in this vicinity, George L. Brown painted his masterpiece, "The Crown of New England," now owned by the Prince of Wales. 16 – 18 M. from Gorham is *Jefferson Hill*, "the *ultima thule* of grandeur in an artist's pilgrimage among the N. H. Mts., for at no other point can be seen the White Mts. in such array and force." The * *Waumbek House* is situated here, and commands superb views of the great peaks in the S. E. "For grandeur and for opportunities of studying the wildness and majesty of the sovereign range, the Cherry Mountain route is without a rival in New Hampshire," said Thomas Starr King, the gifted Unitarian divine, who wrote the admirable book called "The White Hills." Mr. King died at San Francisco in 1864, and his noblest (visible) monument is Mt. Starr King, E. of Jefferson. From the hotel or village the bold and majestic White Mts. loom up in the S. E., and a field-glass shows the trains moving up Mt. Washington, and the hotels on its summit. Cherry Mt. fills the S., while in the S. W. is the Franconia Range, with Lafayette proudly pre-eminent. In the W. are the pleasant meadows which border the Connecticut River, and beyond them some of the Vermont hills are seen. Jefferson Hill is 7 M. from Lancaster, 10 M. from Whitefield; 15 M. from Dalton; and 33 M. from the Profile House.

The road to the Notch (16 M. distant) runs S. from the Waumbek

House, and "for 5 M. from this point over the Jefferson meadows, in travelling towards the Notch, we ride in full view of every summit of the chain, seeing Washington in the centre dominant over all." The passage of Cherry Mt. is effected by a rough and tedious road, and the *White Mt. House* is reached, after which the new *Fabyan House* is passed, the Ammonoosuc River is crossed, and the carriage reaches the *Crawford House*.

There is a shorter road than this, between Gorham and the Notch, and travellers who wish to go by Jefferson Hill should have the fact understood. This route can be taken from the Glen House, without going to Gorham, by turning to the l. from the Gorham road about $2\frac{1}{2}$ M. N. of the Glen House, passing around the base of Madison, and entering the Cherry Mt. road near Randolph Hill.

N. Conway to the Notch.

The route is the same as that to the Glen House as far as Bartlett Corner, where the Notch road diverges to the W., and crosses in succession the Ellis River, the Rocky Branch, and the Saco River. The latter stream is followed up to its birthplace, leading, at first, through a glen between the Mote Mts. on the l. and Stanton Mt. on the r. After crossing the Rocky Branch, the White Ledge is rounded on the r. at the E. end of Stanton Mt. Mt. Carrigain looms up far ahead with its triple peaks (the highest of which rises 4,800 ft.), and the road passes over narrow intervalles, with a fine retrospect of Kiarsarge. The Chapel of the Hills (a neat little church dedicated in 1854) is passed on the l., and then the *Upper Bartlett House*, where passengers by the morning stages take dinner. This rude glen was settled in 1777, and in 1790 was named in honor of Josiah Bartlett, a signer of the Declaration of Independence, and at that time President of N. H. The Portland and Ogdensburg Railroad is now being built through the Notch, and will, at no distant day, meet the section of track which is being laid from St. Johnsbury (Vermont) towards the mts. Trains will run in the summer of 1873, from Portland and N. Conway to Upper Bartlett. Its temporary terminus is near the great ledge running out to the road (on the l.), known as *Sawyer's Rock*.

A solitary hunter named Nash, while chasing a moose on Cherry Mt., saw the Notch opening through the mts., and entered and explored it. He conceived that a road could be made through this pass to connect the upper Coös country with the coast, with which its communication was then made by a long detour around the mts. He reported his discovery to Gov. Wentworth (in 1773), who told him that if he would get a horse through the pass, he would give him a large grant of land. Nash then secured the aid of another hunter named Sawyer, and they hauled a horse through, lowering him over cliffs and driving him through the river, until they emerged here. Then Sawyer drained the rum from his bottle, and broke it against the ledge, which he named Sawyer's Rock. A road was built "with the neat proceeds of a confiscated estate," and the first article of Coös produce sent down through the Notch was a barrel of tobacco, while the first merchandise sent up from the coast was a barrel of rum.

Rounding *Hart's Ledge* the road now turns to the N. and crosses Sawyer's River, which has its source in Bemis Pond, 4-5 M. distant, a locality famous for trout. Soon after, *Nancy's Brook* is crossed by a bridge thrown over a remarkable ravine 200 ft. long, 20 ft. wide, and 35 ft. deep. This pretty brook rises in a lonely mountain tarn about $2\frac{1}{2}$ M. from the road, and is named for a luckless maiden who walked one cold afternoon or night from Lancaster to this point in pursuit of a faithless lover. Wet, chilled, and deathly weary, she sat down by a tree near this brook, and was there found frozen to death. Just beyond this place, on the l., is seen the grave of Abel Crawford, "the patriarch of the mountains," a pioneer and mountain-guide of many years ago. After passing the *Mt. Crawford House*, Mts. Crawford and Resolution and the Giant's Stairs are seen on the r., the latter towering in broken masses to the height of 5,500 ft. The forest now closes in on the road, which crosses the Saco near the foot of the Giant's Stairs, and recrosses it about a mile beyond, with a fine view up the long, deep gorge to the r. Turning now to the N. W. the road enters the **Notch**, with the vast mass of Mt. Webster on the r., towering to a height of 4,000 ft., and Willey Mt. on the l. Passing over the tree-grown fragments of the mt. which have fallen in long-past avalanches, the Willey House is reached.

The great amount of travel through the Notch in winter, caused by the Coös farmers carrying their produce to the eastern towns, rendered a hotel here very desirable. So this house was built about 1820 (Spaulding says in 1793), and was occupied in 1825 by Mr. Willey. In August, 1826, after a long drought the mts. were assailed by a furious storm, which caused the river to rise rapidly, and during the night an enormous mass of earth, rocks, and trees slid from Mt. Willey into the valley. This avalanche was split by a sharp ledge back of the house, and flowed on both sides without harming it. But the family had left the house (probably fearing the swelling torrent of the Saco), and, being somewhere in the track of the slide, every person was killed. Mr. and Mrs. Willey and their 5 children, with 2 hired men, died on that fatal night, and 6 of the bodies were found, sadly mutilated. The house has been occupied since 1827, and is shown to visitors for a small fee. During storms rocks are sometimes seen plunging down from the opposite cliffs of Mt. Webster. In 1746, when a party of Rangers were marching through a valley near the more southerly of the White Mts. they were alarmed by sounds like volleys of musketry among the defiles. Skirmishing parties of scouts were sent in, who discovered that the noise was caused by falling rocks.

After leaving the Willey House, the road ascends slowly for 3 M., passes through the narrow Gate of the Notch, and stops at the * **Crawford House**. This is a large and elegant summer hotel, with accommodations for 250 guests, at \$ 4.50 a day. It is situated on a plateau 2,000 ft. above the sea, and faces the Notch. Near the house are two springs within stone's-throw of each other, the waters of one of which pass to the sea by the Connecticut River, while the other empties into the Saco, and reaches the ocean on the coast of Maine. There is a pretty lakelet near the Gate of the Notch, whence flows the young Saco River.

Mt. Willard is easily ascended from this point by a carriage-road 2 M. long, and the walk upward through this forest avenue is full of pleasure.

The ** view down the Notch is wonderful, embracing two Titanic mt. walls, beginning with Webster on the l. and Willey on the r., and running S. for leagues, with haughty Chocorua, 18-20 M. away, closing the vista. The highway down this wild pass is marked by a slender line through the forest, and the Willey House is a mere dot on its ruin-swept lowlands. Bayard Taylor says of this view, "As a simple picture of a mountain-pass, seen from above, it cannot be surpassed in all Switzerland." Looking off to the N. E., the great peaks of the Mt. Washington group are seen, with Clinton first and nearest, and Jackson on the upper end of Mt. Webster. "And let us again advise visitors to ascend Mt. Willard, if possible, late in the afternoon. They will then see one long wall of the Notch in shadow, and can watch it move slowly up the curves of the opposite side, displacing the yellow splendor, while the dim green dome of Washington is gilded by the sinking sun 'with heavenly alchemy.'" (STARR KING.)

The *Flume* and the *Silver Cascade* are visited by passing through the narrow and ragged-walled Gate of the Notch, and about $\frac{3}{4}$ M. from the hotel turning into the forest to the l. by a little brook. A series of long cascades lies along the slope above, and near the road is a deep and narrow cleft in the rock, through which the waters flow. A long scramble over rocky ledges and up the course of the laughing water leads to the base of the * **Silver Cascade**, the finest fall on the W. of the mts. The brook falls 800 ft. within a mile, and after a heavy rain exhibits a magnificent effect. Near the bridge it flows through a narrow flume, and soon enters the Saco.

The * *Sylvan Glade Cataract* is 6-7 M. from the hotel, and is gained by following up Avalanche Brook (the second which the road crosses S. of the Willey House). About 2 M. from the road, in a granite-walled ravine, the brook falls 25-30 ft. in 4 leaps, and then forms a cascade 150 ft. long, slipping over inclined ledges of granite into a deep pool below. About 1 M. higher is the *Sparkling Cascade*. These falls were discovered in 1858.

Gibbs's Falls are near the hotel, and are found by following up the aqueduct from the stables, and then the brook to which it leads. 10-15 minutes' walk up stream brings one to a pretty fall of about 30 ft., with pleasing forest accessories.

Beecher's Falls are on the slope of Mt. Lincoln, to the r. of the hotel, and are gained by a good forest-path. The Falls extend for a long distance up the brook, and from the uppermost of them a fine view of Mt. Washington is disclosed. The *Devil's Den* is a dark cavern seen from the Notch road, near the summit of Mt. Willard. *Pulpit Rock* is on the r. of the road, near the Gate of the Notch, and several rock-profiles have been seen on the adjacent cliffs.

Stages from the Crawford House to Bethlehem, \$2.50; to N. Conway, \$3.50; to the mountain-railway, \$2.50; and to the Glen House, \$5.00. The latter route runs to Bartlett on the road to N. Conway, and at that point enters the road from N. Conway to the Glen House. Fare to Boston, by stage to N. Conway and railroad to Boston, \$8.50.

The Crawford House to the Profile House.

Daily stages in 26½ M. Fare, \$4.00. After leaving the hotel, the road enters a dense forest, where it is "more pleasantly bordered with foliage than any other among the hills." On leaving this forest, a broad upland plain is entered, and the stage approaches the great new hotel on the *Giant's Grave*.

The new ***Fabyan House** is 5 M. N. of the Notch, and accommodates 500 guests. It was built in 1872, and is 4 stories high, with a frontage of 330 ft. This imposing structure is built on the Giant's Grave, a tall mound near the Ammonoosuc River. According to tradition, an Indian once stood here at night, and swinging a torch lit from a lightning-struck tree, cried, "No pale-face shall take deep root here; this the Great Spirit whispered in my ear." A tavern was opened here about 1803, and in 1819 it was burnt, while the same fate befell another erected on its site, and Fabyan's large hotel, at the foot of the mound, was also burnt. The new hotel is larger, stronger, and better protected than its predecessors, and will probably remain. Ethan Allen Crawford, "Ethan of the Hills," a gigantic hunter and guide, lived on the Giant's Grave many years ago, and waged war on the wolves, wild-cats, bears, sables, and otters that dwelt among the surrounding hills and brooks.

The view from this point is very fine, and embraces all the presidential peaks save one, the summit of Mt. Washington being 7½ M. distant in an air-line. The other summits stretch toward the hotel in a long and rugged chain. From this point the ascent of Mt. Washington by rail is easily made. The *Upper Ammonoosuc Falls* are 3-4 M. from the hotel, by the road to Marshfield, and exhibit a beautiful scene, where white waters dash down between gray granite walls, and the vast mts. tower beyond. The *Lower Ammonoosuc Falls* are somewhat more than 1 M. distant, on the Bethlehem road. The river descends here in full stream over 30 ft. of step-like ledges, but the natural beauty of the scene has been marred by the intrusion of a large lumber-mill.

The *White Mt. House* (\$2.50 a day) is an old and well-famed hotel at the junction of the Cherry Mt. and Bethlehem roads, less than 1 M. N. W. of the great Fabyan House. The vicinity abounds in pleasant walks, especially those along the Ammonoosuc, while the sunset views from the hills are of famed attractiveness.

The ***Twin Mt. House** is 5 M. westward from the Fabyan House, and is a favorite new hotel, under the care of the Messrs. Barron, proprietors of the White River Junction and Crawford Houses. It is pleasantly

situated on the heights above the Ammonoosuc River, and looks across the valley to the bold peaks of Twin Mt. The branch railroad which leaves the B., C., & M. R. R. (Route 30) at *Wing Road*, has its present terminus at this hotel (it is to be extended, eventually, to the Ammonoosuc station of the Mt. Washington Railway). The Twin Mt. House is 9 M. from the Crawford House; 10 M. from the mt. railway; 11 M. from the Waumbek House; and 17 M. from the Profile House. Stages run to all these points, except the Waumbek House.

Beyond the Twin Mt. House the road follows the Ammonoosuc River, and in about 5 M. ascends the rolling ridges of Bethlehem, from which fine prospects of the loftier mts. are given. Between Bethlehem station (on the branch track) and the village, the stage passes the neat little *Maplewood Hotel* (\$3.00 a day, \$14.00 a week). **Bethlehem** (**Sinclair House*, and several large boarding-houses) is a pretty highland village, which commands, down the Ammonoosuc valley, one of the finest distant views of the White Mts. This town was settled in 1790, and the first comers suffered great hardships, being obliged for months to subsist on herbs and roots from the forests and fields. Bethlehem is 5 M. from Littleton; 17 M. from the White Mt. Notch; 10 M. from the Profile House; and 22½ M. from Mt. Washington.

Beyond Bethlehem, the road (a very bad one) ascends a long hill, affording fine retrospects, and when its summit is gained the great ***Franconia Range** is seen in front. A deep valley is now crossed, the new *Lafayette House* is passed (about 5 M. from Bethlehem), and after a long ascent the stage reaches the *Profile House* (see Route 34).

Mount Washington.

Travellers who design to ascend this mt. should be careful to carry sufficient warm clothing (shawls, overcoats, &c.), for the air on the summit is often extremely cold, even in August. Daniel Webster said here, "Mt. Washington, I have come a long distance, have toiled hard to arrive at your summit, and now you seem to give me a cold reception." There are many who will echo these words. If the ascent from the Crawford House or from Randolph Hill is undertaken, a reliable guide must be secured, and an early start should be made. The view from the summit cannot be confidently counted upon, since the mt. is often enveloped in suddenly rising fogs, and the days when the remote points of view are visible are very few. A powerful field-glass will be found of material assistance.

The older hotels (the Summit and the Tip-Top Houses) still remain on the narrow crest, and the railway company has recently erected a new hotel of considerable capacity and with good accommodations.

The ascent by railway. The terminal station on the plain is at Ammonoosuc station (small hotel), to which morning and afternoon stages run from the Crawford House (10 M.; fare, \$2.50, there and back, \$4.00); from the Twin Mt. House (11 M.; fare, \$2.50, there and back, \$4.00); and from the new Fabyan House (5-6 M.). From the opening of the season until July 20th, trains leave Ammonoosuc at 10.30 A. M., returning at 2 P. M. From July 20th, until the close of the season, an additional train is put on, leaving at 5.30 P. M., and returning at 8 the following morning (time-table of 1872). The fare is \$3.00 for the ascent or descent, and \$4.00 for both. Trunks must be paid for as freight.

This railway was built in 1866-9, on the plans of Sylvester Marsh, who has since constructed a similar road up Mount Rhigi, by the Lake of Lucerne. Ammonoosuc Station is 2,668 ft. above the sea, and the track ascends 3,625 ft. in 3 M., with an average grade of 1 ft. in $4\frac{1}{3}$, and a maximum grade of 1 ft. in $2\frac{2}{3}$, or 1,980 ft. to the M. The chief peculiarity of the track is a heavy notched iron centre-rail, into which plays a centre cog-wheel on the locomotive. The steam-power is not used during the descent, but the powerful atmospheric brakes regulate the speed of the train. The cars are very comfortable, and the ascent is made in 90 minutes, during which time it is pleasant to think that, though these trains have been running for 5 years, not a single passenger has been injured. As the train slowly ascends over the trestles, pushed by the grotesque little engine, the retrospect becomes more and more beautiful, and a profound and gloomy chasm is passed on the r. The ridge between Clay and Washington is now attained, and an immense mt. amphitheatre is passed on the l., soon after which the train crawls up Jacob's Ladder, and stops at the new station and hotel on the summit of Mt. Washington.

The ascent from the Glen House. Mountain carriages leave the Glen House morning and afternoon for the summit, which is 8 M. distant. The fare (including tolls) is \$5.00, and the time of ascent 3 hrs., while the descent is made in $1\frac{1}{2}$ hrs. The road (built 1855-61) is a noble piece of engineering, winding on galleries and long curves, with an average grade of 12 ft. in 100.

Most of the route to the Ledge (4 M. up) is enclosed by forests, but beyond this point the road passes along the verge of the profound hollow called the Great Gulf. From this point the *view is superb, embracing the Peabody Glen, with the hotel lying like a snow-flake at the base of the heavy, green mass of Carter Mt. "Yet the glory of the view is, after all, the four highest companion mts. of the range, Clay, Jefferson, Adams, and Madison, that show themselves in a bending line beyond the tremendous gorge, and are visible from their roots to their summits." With one exception "there is no such view to be had, east of the Mississippi, of mountain architecture and sublimity." The road now passes along the verge of the Great Gulf, with the lofty gray peaks on the r., winds and twists over dreary slopes covered with the skeletons of dead trees and the flora of Labrador, surmounts shoulder after shoulder of the storm-eaten mt., climbs the sharp, steep, supreme cone, and then the panting horses stop "on the main-top of New England."

The ascent from the Crawford House. The old bridle-path (9 M. long) offers peculiar attractions, as passing over several noble summits, and horses may be procured at the hotel. The ascent should never be made without a guide, since sudden storms or the descending of fog-banks might cause the traveller to lose his way and become fatally confused among the ravines.

Upon leaving the hotel the ascent of Mt. Clinton is commenced, and after passing over a rude forest-path for nearly 3 M. the mossy summit is

reached (4,200 ft. above the sea). A great expanse of blue peaks is seen from this point, with bright lakes on the S. E., and Kiarsarge, "the queenly mt.," lifting its pyramidal cone in the same direction. The path now descends into a dense forest, crosses two or three bridged ravines, and passes around the S. side of the dome-like peak of Mt. Pleasant. A path diverges to the summit (4,800 ft. high), whence the old and disused Fabyan trail leads down to the Ammonoosuc valley. The round and grassy summit of Pleasant overlooks the whole extent of the valley. The tracks of formidable slides are seen as the path descends to another plateau, and, passing Red Pond, clambers up Mt. Franklin. The summit (4,900 ft. high) is near the path, and commands a vast prospect terminated by Chocorua, almost due S. and 20 M. distant. Between Franklin and Monroe the path passes over a narrow ridge which is the water-shed of the Connecticut and Saco Rivers. There are one or two dangerous places on this thin and lofty escarpment, and on the r. is the deep and terrible chasm of Oakes' Gulf, while the Ammonoosuc valley stretches away on the other hand. This is one of the most remarkable points of view in the mts. Monroe is now rounded on the S. side, and the rough scramble to its E. peak (5,300 ft. high) is rewarded by another vast prospect. Mt. Washington now looms ahead as the path descends to the plateau on which are the Lake of the Clouds and Star Lake, two deep and crystalline tarns where the Ammonoosuc is born. $1\frac{1}{2}$ M. from the lakes is the bleak crest of Washington, and from the E. verge of the plateau is afforded a remarkable view down Tuckerman's Ravine. There remains a sharp ascent among the rocks on the S. W. side of the peak, with a rise equal to 1,200 ft. perpendicular, and then the summit is gained.

The ascent from Randolph Hill is only practicable for strong and practised pedestrians, accompanied by reliable guides. A few such parties have accomplished this feat with very satisfactory results. Guides may be heard of at the Gorham hotels, — Calhaine is one of the best, — and arrangements should be made to encamp over night on the ridge, although the ascent may be crowded into a single day. Riding to Randolph Hill at early morning, Mt. Madison is ascended in 4–5 hrs. by the old Gordon path, leading along a brook which flows into Moose River. The ravine through which this brook flows is full of gloomy grandeur, and is surrounded by stupendous walls of rock. The path leads out on the ridge between Adams and Madison. The latter is rarely visited on this excursion, since it lies off the route, but the noble pyramid of Adams is crossed, opening a striking *view. On the N. the mts. of Kilkenny, Randolph, and Gorham, with the long valley of the Androscoggin, and in the remote distance the lakes of Umbagog and Rangeley. The Glen and the green wall of Carter Mt. are on the E., while the vast dome of Washington is uplifted in the S. Crossing now the bending ridge to Mt. Jeffer-

son, a continual front view of Washington is afforded, and after passing over Jefferson the Great Gulf is seen bending around on the l. Mt. Clay is now ascended, and, after a short descent, the long slope of Washington is climbed to the summit.

The Fabyan path from the Giant's Grave to the top of Mt. Pleasant, and thence over Franklin and Monroe to Mt. Washington, is now disused; while the old bridle-path from the W. slope, and the Davis path from the Mt. Crawford House, are but rarely traversed. The railway and carriage routes are the favorites, the first being easier and cheaper, and the last being richer in scenery.

The * * view from **Mt. Washington** is the most grand and extensive in New England. In the S. is the Giant Stairs Mt. and the round top of Mt. Crawford, with Chocorua farther away, and Ossipee near the gleam of Lake Winnepesaukee, 35 M. distant. S. of W. is Mt. Carrigain, and the noble peaks of the Sandwich Range are beyond, while 100 M. away is Monadnock, "a filmy angle in the base of the sky." To the S. W. the peaks of Monroe, Franklin, Pleasant, and Clinton stretch off in a straight line, while the dark crests of Franconia fill the W., overlooked by the bald cone of Lafayette. Across the Connecticut are remote blue summits of the Green Mts., with Mt. Mansfield and the Camel's Hump, 70 M. away. Stretching toward the N. W., only a few miles distant, are Cherry Mt., Mt. Starr King, and the hills of Kilkenny, over which the graceful Percy Peaks (Stratford) are seen, "as near alike in size and shape as two Dromios." Clay, Jefferson, Adams, and Madison loom across the Great Gulf in the N. and N. W. Glimpses of the Androscoggin are next obtained, and 35-50 M. W. of N. Lake Umbagog and the Rangeley Lakes are seen, with the dim Canadian highlands far to the N. A vast area of the State of Maine is outspread in the E., and it is claimed that Mt. Katahdin may be seen "looming out of the central wilderness of Maine, cutting the yellowish horizon with the hue of Damascus steel." But Katahdin is 150 M. distant. Mts. Hayes, Moriah, and Carter are seen more surely in the N. E. The lofty hills over Chatham fill the nearer E., and the eye follows down Pinkham Notch to N. Conway on its fair meadows, with Kiarsarge impending above. Beyond are seen Lovewell's Pond, by Fryeburg, and the bright Sebago Lake, while the ocean is sometimes visible in the remote S. E., merging with the weary horizon.

* **Tuckerman's Ravine** is usually visited from the summit, and is $1\frac{1}{2}$ M. distant by a difficult path (guide necessary). It is also visited from the Glen House (5 M. away), and by a path which leaves the mt. road 2 M. from the Glen, and runs for $2\frac{1}{2}$ M. through the forest to Hermit Lake. This is in the vast *Mountain Coliseum* (so called), whose lofty curving precipice-walls reach an altitude of 1,000 ft. or more. Immense masses of snow are piled up here, and usually remain until August. The Crystal

Stream flows down under this incipient glacier and cuts a long arch under the hardened snow, through which one can walk for hundreds of feet. The cliffs back of the ravine are striped, after rains, with falling waters, called the "Fall of a Thousand Streams." After exploring this wonderful abyss, parties sometimes pass to the Glen House by following the Crystal Stream, with its many cascades, to the N. Conway road.

34. The Franconia Mountains and Pemigewasset Valley.

From New York to Franconia by Hartford, Springfield, Wells River, and Littleton; by Albany, Rutland, Bellows Falls, and Littleton; by Springfield, Nashua, and Concord; or by boat to New London, and thence to Brattleboro, Wells River, and Littleton. The connections are frequently changed, and the tourist should get a late time-table and railway-guide before choosing his route.

From Boston to Franconia by Route 33 (stages through the mts.) and Route 31 to N. Conway; or by Route 30 to Plymouth (123 M.), and thence by stage (29 M.) to the Profile House; by Route 30 to Littleton (185 M.), and thence by stage (11 M.) to the Profile House. By either of the latter routes, tourists may leave Boston at 8 A. M. and arrive at the Profile House early in the evening. By Route 31 to Wolfboro, or by Route 38 to Alton Bay, and thence traversing Lake Winnepesaukee by steamer, the tourist can take Route 30 (to Plymouth or Littleton) at Weirs.

Daily stages leave for the Profile House, from Littleton (11 M. N. ; fare, \$2.00); from the Crawford House (26½ M. E. ; fare, \$4.00); and from Plymouth (29 M. S. ; fare, \$4.00).

The * **Profile House** (1,974 ft. above the sea) accommodates 4-500 guests, and is one of the best of the mt. hotels. Its corridors are crowded during the summer with visitors from the coast-cities, and its dining-hall is said to be the finest in New England. This hotel is open from June 1st until the middle of October; its terms are \$4.50 a day, with reductions for a long sojourn.

The * **Franconia Notch** is about 5 M. long, and less than ½ M. wide, and is on the western verge of the Franconia Range proper. "The narrow district thus enclosed contains more objects of interest to the mass of travellers than any other region of equal extent within the compass of the usual White Mt. tour. In the way of rock-sculpture and waterfalls it is a huge museum of curiosities." (STARR KING.) "The scenery of Franconia is more fantastic and beautiful than Dalecarlia or Norsland." (FREDRIKA BREMER.)

* **Echo Lake** is a short distance N. of the hotel, on the r. of the Littleton road, and is a calm, deep, and lovely sheet of transparent water, encircled by rare scenery. During the day it reflects vividly the surrounding objects, but the later hours of the afternoon are the pleasantest, when the visitor can be transported over the quiet waters and see the forest-shores and mts. in the flush of evening. Remarkable echoes are awakened here by the bugle, voice, or pistol-shots. "Franconia is more fortunate in its little tarn that is rimmed by the undisturbed wilderness, and watched by the grizzled peak of Lafayette, than in the Old Stone Face from which it has gained so much celebrity."

Bald Mt. is ascended by a neglected carriage-road, which diverges to the r. from the road about 1 M. N. of the hotel. The view from the summit is pleasing, especially just before sunset, when, besides the noble hills to the N. and the huge, conical Haystack Mt. to the E., a fine southerly prospect is given, embracing the narrow notch, with Lafayette towering on the l. and Mt. Profile on the r. Echo Lake is seen in the nearer foreground.

Profile Mt., or Mt. Cannon, is ascended by a steep foot-path S. of the hotel, in 2-3 hrs. The *view is of great beauty, including the Bethlehem heights on the N., with Haystack, Lafayette, and the Mt. Washington group on the E. and N. E. On the S., between Mts. Pemigewasset and Liberty, stretches far into the distance the fair and fruitful valley of the Pemigewasset River. On the summit is a rock which is supposed to resemble a cannon, and visitors often descend thence to the vicinity of the ledges which form the Profile. On the slope of this mt. (and reached by following the aqueduct into the woods back of the old Lafayette House) is a lively brook which exhibits some fine cascades after heavy rains. Good views of Echo Lake and Eagle Cliff, with the highland valleys to the N., may be obtained from the brookside.

* * **The Profile** is best seen from a point by the roadside (marked by a guide-board) a few rods S. of the hotel. 1,500 ft. above the road, three enormous masses of rock project from the side of the mt., in the exact resemblance of the profile of an old man's face, with firmly drawn chin, lips slightly parted, and a well-proportioned nose surmounted by a massive brow. It is "a mountain which breaks into human expression, a piece of sculpture older than the Sphinx, an intimation of the human countenance, which is the crown of all beauty, that was pushed out from the coarse strata of New England thousands of years before Adam. The legend of "The Great Stone Face," as told by Hawthorne, belongs to this place. Directly below the Profile (which is 60 ft. long) and near the road, is the crystal tarn called **Profile Lake**, or the Old Man's Wash-bowl, a sequestered and beautiful sheet of water, from whose bosom is obtained a pleasing sunset view of the majestic *Eagle Cliff*. This is the best point from which to see that lofty and remarkable cliff (1,500 ft. high) which projects from the mt. opposite the Profile House. Near Profile Lake is the Trout-house, containing many tame breeding-trout.

Mt. Lafayette, "the Duke of Western Coös," is 5,200 ft. high, and is ascended by a bridle-path diverging to the l. from the road, midway between the Profile and Flume Houses ($2\frac{1}{2}$ M. from each). The path is steep and arduous, but the ascent may easily be accomplished in 3-4 hrs., with horses and guides from the Profile House. After a long ascent through the dense forest which covers the lower slopes, the path emerges (near the bright Lake of the Storm King) upon a bare and rugged tract

which affords an extensive off-look. The *view from the summit is broad and beautiful, with the Pemigewasset valley as its most pleasing feature, stretching S. to Plymouth (20 M. distant). The clustering Pemigewasset Mts. are seen in the S. W.; "but the lowlands are the glory of the spectacle which Lafayette shows his guests. The valleys of the Connecticut and Merrimac are spread W. and S. W. and S. With what pomp of color are their growing harvests inlaid upon the floor of New England!" Mts. Monadnock (90 M.) and Kearsarge (over 50 M.) are W. of S., while certain peaks of the Green Mts. of Vermont are in the distant W. In the N. W. and N. are the bright villages of Littleton and Lancaster, with the rural districts of upper Coös, while the Profile and Echo Lakes are close below in the glen over which Profile Mt. towers. The Percy Peaks are nearly due N. beyond the Lunenburg Hills, and Haystack Mt. lifts its huge mass close at hand in the N. E. E. and N. E., 15 - 20 M. distant, is the great presidential group, with Mt. Washington nobly overlooking the rest.

The * **Flume House** is a small, but new and well-conducted hotel, 5 M. S. of (and pertaining to) the Profile House. Mt. Liberty is opposite the house, and Mt. Pemigewasset is behind it, while the rich southern valley is seen for leagues from this position. The last-named mt. is often ascended for a few hundred ft., toward the sunset hour, when "the spurs and hollows of Lafayette and his associates are lighted up by the splendor that pours into them from the west." About 2 M. N. of the Flume House a succession of pretty cascades may be found by ascending the course of a brook which crosses the road. 1 M. N. of the house, by the roadside, is the *Basin*, a granite bowl 60 ft. in circumference and 10 ft. deep, filled with clear water. "The best way to enjoy the beauty of the Basin is to ascend to the highest of the cascades that slide along a mile of the mountain at the W. Then follow down by their pathways, as they make the rocks now white with foam, now glassy with thin, smooth, transparent sheets, till they mingle their water with the Pemigewasset at the foot, and, pouring their common treasury around the groove worn in the rocky roof, fall with musical splash into the shadowed reservoir beneath."

The **Pool** is gained in 20 minutes by a path leading into the forest opposite the house. It is a basin cut in the solid rock, 150 ft. wide and over 100 ft. below the level of the path, with 40 ft. depth of dark, cold water. Visitors can descend to the level of the water, where an eccentric hermit dwells in a rude boat. A rough path leads thence to the Flume; but if there are ladies in the party, it is best to return to the road.

* **The Flume** is reached by a road diverging to the l. a short distance S. of the hotel, which runs to the foot of the lower cascade. From that point a path ascends by the smooth ledges over which the cascades glide

musically to the entrance of the Flume. After passing the miserable hut which stands at the mouth of this wonderful ravine, the full power of the scene is felt. A substantial plank-walk has been built along the course of the stream, which it often crosses. The ravine is about 600 ft. long, and its precipitous rock-walls are 60-70 ft. high. The walls are about 20 ft. apart for most of the distance, but approach each other more closely near the upper end, where the gorge is narrowed to 10 ft. in width, and holds suspended a huge granite boulder. This massive rock seems to be held between the cliffs by a most frail tenure, and is "as unpleasant to look at, if the nerves are irresolute, as the sword of Damocles, and yet held by a grasp out of which it will not slip for centuries." By clambering along the musical cascade to the upper end of the ravine, one can reach the edge of the cliffs above and look down into the Flume.

Georgeanna (or *Harvard*) *Falls* are S. W. of the hotel, and are reached by a forest-path that leaves the Plymouth road 2 M. S. of the hotel (guide at the farmhouse). After a long ascent which follows the stream through the forest, the falls are seen, "making two leaps of 80 ft. each, one immediately after the other, which, as we climb towards them, gleam as one splendid line of light through the trees and shrubbery that fringe the lofty cleft." From the ledge above these falls is gained "the stalwartest prospect in all Franconia."

The Profile House to Plymouth.

(Stages leave early in the morning. Distance, 29 M. ; fare, \$ 4.00). The road leads through the narrow glen for 5 M., passes the Flume House between Mts. Pemigewasset and Liberty, and then descends to a more open country. The front view is fine, "so soft and delicate are the general features of the outlook over the widening Pemigewasset valley, so rich the gradation of the lights over the miles of gently sloping forest that sweep down towards Campton!" 4 M. beyond the Flume House the rugged town of *Lincoln* is left, with its 32,456 acres of land barely supporting a resident population of 71 persons. *Woodstock* is now traversed, with Black, Blue, and Cushman's Mts. on the W., and Wanosha on the E., beyond which are glimpses of the peaks toward the White Mt. Notch. This town has 8 or 10 boarding-houses, whose prices range from \$ 7.00 to \$ 10.00 a week.

Beyond *Woodstock* a fine *retrospect is afforded, where "the arrangement of the principal Franconia Mts. in half-sexagon — so that we get a strong impression of their mass, and yet see their separate steely edges, gleaming with different lights, running down to the valley — is one of the rare pictures in N. H. What a noble combination, — those keen contours of the Haystack pyramids, and the knotted muscles of Mt. Lafayette beyond!"

As *Thornton* (two inns and several boarding-houses) is entered, the river exhibits broader intervals, which become beautiful in **Campton**. The latter village has two inns and many summer boarding-houses, and is a favorite resort for artists, on account of its rich meadows, its forests and hills, and the distant mt. views. It is still an unsettled question whether Campton or N. Conway is the most beautiful of the mt. villages. Welch Mt. is a prominent object in the landscape; the Sandwich Mts. are seen on the E.; and Mt. Prospect and Livermore Falls are in the vicinity (S. E. and S.) The Devil's Den is a deep cave at Campton Hollow; the Campton Fall is near the village; and the views of the Franconia Range from Durgin's Hill, and of the broad valley from the School House Hill, are much admired. Following now the Pemigewasset River, with Mt. Prospect on the E., the stage reaches **Plymouth**, 6 M. S. of Campton.

Waterville (*Greeley's Mountain House*) is 12 M. N. E. of Campton, and 18 M. from Plymouth, by a road leading up the Mad River valley. There is good trout-fishing in this rugged town (which has but 33 inhabitants), and some very romantic scenery. Portions of the Sandwich Range lie in Waterville, forming bold and picturesque mt. groups, while the lofty peak of **Osceola** (4,200 ft. high) is in the N. E. There is a path to the summit of Osceola, and the view thence is said to be grand.

On the S. are the principal peaks of the Sandwich Range, Black Mt., White Face, and Bald Knob, with distant views of Lakes Squam and Winnepesaukee, the former being about S. W. Looking across the Pemigewasset valley the western hills and the distant Green Mts. are seen. In the N. W. are the Franconia Mts., with Lafayette's conical peak most conspicuous. The heavy mass of Mt. Carrigain is close at hand, and nearly N., while farther are the peaks around the Notch, with Mt. Washington and the presidential group far beyond. N. of E. are Bear and Double Head Mts., over Pinkham Notch, with Mote Mt. hiding N. Conway, and Kearsarge towering beyond, while the eye follows the Swift River valley for 18 M. to Conway. Below Conway, and nearly 40 M. distant, is Sebago Lake, and 25 M. beyond the ocean may be seen on clear days.

The Flume, on a brook $1\frac{1}{2}$ –2 M. from the hotel, with Horton's Cave and the falls on Cascade Brook, are frequently visited. Adventurous parties have penetrated the forests to the N. E. to the White Mt. Notch road, while a pass known as Greeley's Gap leads by a rude bridle-path to Sandwich (on the S.). The trail to the Notch (a guide should be taken) leads first to Greeley's Pond, under Mt. Osceola (5 M. from the hotel), and then, leaving Mt. Carrigain on the l., passes through the forest to the upper part of Sawyer's River. The course of this stream is followed until it reaches the Notch road, at a point about midway between the Upper Bartlett and Mt. Crawford Houses (3 M. from each), and about 15 M. from Greeley's.

35. The Percy Peaks, Dixville Notch, and Lake Umbagog.

The station and village of *Northumberland* (Percy Peaks Hotel; Melcher House) is 10 M. N. of Lancaster, and 31 M. N. of Gorham. It is near the confluence of the Upper Ammonoosuc and Connecticut Rivers, and is connected with Guildhall, the shire-town of Essex County, Vermont, by a bridge near the falls in the latter river. The town was settled in 1767, and fortified during the Revolution. Moose, Bellamy, and Cape Horn Mts. are in the vicinity, and from this point the ascent of the Percy (or Stratford) Peaks is usually undertaken. Passengers for Dixville and the North go from Northumberland by the Grand Trunk Railway.

The line passes N. along the Conn. valley with the Percy Peaks on the r., stops at *Stratford Hollow*, and then at *N. Stratford* (Willard House; American; Percy), whence the stage usually leaves in the evening for Colebrook, 13 M. N. E. The road follows the Conn. River closely, crossing the thinly populated forest-town of Columbia, and then, flanking the vast mass of Monadnock Mt., enters the pretty village of *Colebrook* (Parsons House, accommodating 100 guests, at \$7-10.00 a week; Monadnock House).

This town was named in honor of Sir George Colebrook, an English knight, to whom it was originally granted. It is the northern shire-town of Coös County, which has an area of 1,950 square miles, with a population of 15,580, and a valuation of \$4,946,910. Although New England is the stronghold of the Republican party, it is a curious fact that Coös and the other three mountain counties, Belknap, Carroll, and Grafton, usually go Democratic by fair majorities. Colebrook has 4 churches and 1,372 inhabitants. It is said that $\frac{1}{4}$ of the potato starch in America is made in this town (by 8 factories).

Excellent trout-fishing is found on the sequestered streams in this vicinity. *Mt. Monadnock* is near the village, and may be ascended by a path leading in 4-5 M. to its summit. The *Beaver Brook Falls* are about 4 M. distant, and are well worthy of a visit.

Dixville Notch

is 10 M. S. E. of Colebrook, and is reached by a road leading up the valley of the Mohawk River, a pretty stream which affords good trout-fishing. "The Dixville Notch is, briefly, picturesque,—a fine gorge between a crumbling conical crag and a scarped precipice, — a place easily defensible, except at the season when raspberries would distract sentinels." (THEODORE WINTHROP.) This pass is in the town of Dixville, which has 31,000 acres of land and 8 inhabitants, with a valuation of \$20,000. The Notch is not a mountain-pass, but a wonderful ravine among high hills, whose impending cliffs are worn and broken into strange forms of ruin and desolation. "At Dixville, all is decay, wreck; the hopeless submission of matter in the coil of its hungry foes." The first view of the Notch is

disappointing, since it is entered at a high level by the road which has been ascending all the way from Colebrook. No mountainous line is seen in front, and it is only after leaving the great forest and making a sharp turn to the r. and a short, steep ascent, that the high, columnar sides are seen frowning at each other across the narrow chasm. These cliffs of decaying mica slate present a scene of ruin, transitoriness, and shattered strength, that is mournful and almost repulsive.

* **Table Rock** is on the r. of the road, and is reached by a rude stairway of stone blocks called Jacob's Ladder, whose divergence from the road is marked by a guide-board near the top of the first steep rise. The Rock is 561 ft. above the road and 2,450 ft. above the sea, and is a narrow pinnacle only about 8 ft. wide at the top, with sharp, precipitous sides.

The view is very extensive from this point. Monadnock looms boldly in the W. with other and more distant summits in Vermont; the Canadian Hereford Mt. is in the N. W.; while Connecticut Lake and the Magalloway Mts. are in the N. To the E. are the broad plains of Errol and the upper Androscoggin valley. But the most impressive sight is the dreary pass below with its broken palisades seeming ready to fall at any moment. The rock-spires opposite, which are seen from the road as clearly outlined against the sky, from this point lose their sharpness of form against the dark background of a lofty hill which towers over them.

Above Table Rock a short path leads to the *Ice Cave*, a profound chasm where snow and ice may be found throughout the summer. The *Profile* is seen from a guide-board on the r. of the road, high up on the cliffs, while the Pulpit is pointed out on the l. Farther on, a board on the r. directs attention to the refreshing waters of Clear Spring, and another board on the l. points out Washington's Monument and the Pinnacle, remarkable rock-formations which have recently been developed by clearing away the forests. A sign on the l. shows the path leading to the *Flume*, where a brook runs through a gorge in the rock, which is spanned by a rustic bridge. The flume is 20 ft. deep and 10 ft. wide, and has been formed by the erosion of a trap-dike. At the foot of the Notch (which is $1\frac{1}{2}$ M. long), a board directs to the r. to the *Cascades*, before which is the grove where excursion-parties usually dine. Beyond the grove is a neat rustic bridge and seat, before a small cascade, and by following a rugged path up stream on the l. (15 minutes) a cliff-side seat is reached, from which a noble series of falls are seen, descending sheer from the precipice above.

The Clear Stream Meadows are below the E. side of the Notch and present a scene of pastoral beauty that strongly contrasts with the desolate region behind.

From this point the return is usually commenced, though parties of gentlemen prepared for a forest expedition sometimes go on to *Errol Dam* (Errol House; Akers House) 13 M. distant. A steamer leaves the Dam semi-weekly for the Upper Magalloway River, and also for the *Lake House*, in Upton, at the foot of Lake Umbagog. Winthrop tells ("Life

in the Open Air ") of his voyage in a small boat to the Rangeley Lakes, passing through Umbagog, then over a 3 M. portage, and thence traversing the Lakes Welocksebacook, Allegundabagog, Mollychunkamug, and Moosetocmaguntic to Rangeley (see Route 41). From the Lake House at the S. end of Umbagog, semi-weekly stages run to Bethel (see Route 40).

Connecticut Lake (*Conn. Lake House*) is 25 M. N. E. of Colebrook. It is $5\frac{1}{2}$ M. long by $2\frac{1}{2}$ M. wide, and abounds in fish. A small steamer plies over its waters. 4 M. N. E. through the forest is Second Lake, $2\frac{1}{2}$ M. long by 2 M. wide, while still farther N. is Third Lake, covering 200 acres, and on the border of Canada is Fourth Lake, the source of the Connecticut River. The latter lake covers 3 acres, and is 2,500 ft. above the sea. S. E. of Connecticut Lake the Magalloway Mts. are seen, while from its lower end the Connecticut River ("Quonektacut," meaning Long River, or River of Pines) flows down a long cascade. These lakes are in Pittsburg, a town of 200,000 acres, with but 400 inhabitants. Game abounds in the forests, and fish in the streams.

36. Boston to Cape Ann.

Trains on the Eastern Railroad from the station on Causeway St., Boston (Pl. 2).

From Boston to *Beverly*, see Route 37. At Beverly a branch railroad diverges to the N. E. and runs (in 18 M.) to Rockport, at the end of Cape Ann, and 36 M. from Boston. Between Beverly and Manchester the line lies near the sea, and affords frequent glimpses of the beach-cottages and tents which front on the outer harbor of Salem. Near Beverly Farms the Mingo Beach stretches around a broad cove. *Manchester* (Manchester House) is a quaint little village on the l. of the line, lying at the head of a narrow harbor, and noted for having produced more sea-captains and sailors than any other town of equal population in America. Between Manchester and Gloucester the line runs through a dreary succession of rocky hills.

Gloucester.

Hotels.—Atlantic House ; Webster House ; Pavilion (on the beach ; open only in summer).

Gloucester is an interesting city of 15,397 inhabitants, situated on a fine harbor opening to the S. W., at about the middle of the cape. It has 13 churches, 2 lodges of Masons and 2 of Odd Fellows, 8 temperance societies, and 4 banks. It has a curious nautical air, from the fact that most of its men are engaged in the deep-sea fisheries, and when the great fleets are in port the streets and harbor present a lively appearance. Extensive fires have devastated the place, and its fleets have often been overtaken with disasters, but still Gloucester has increased, and has recently attained the distinction of a city. There are some very neat church and school build-

ings, and the City Hall is a new and elegant structure of brick, in the modern French style of architecture. The inner harbor is guarded by Ten Pound Island, and presents a rare scene of bustle and activity, being the very home of schooners. The outer harbor is protected from the sea by *Eastern Point*, with its lighthouse and fort, while on the W. shore is the Stage Fort (erected during the Secession War) from which is obtained a pretty view of the harbor and town. Directly across the harbor from the city is *E. Gloucester*, from whose rugged hills the compact streets, with the church-spires and the Collins School and lofty City Hall, make a pretty scene (the best near views are from Rocky Neck). Several large summer boarding-houses are scattered over the E. Gloucester peninsula, which has wild and rugged scenery on the seaward side. On Little Good Harbor is a beach, at the S. end of which are the *Bass Rocks*, where the surf rolls in grandly after an easterly gale. The City Hall Tower overlooks the pretty suburbs of Brookbank and Steepbank, and views the open sea beyond E. Gloucester. Within 5 minutes' walk of the City Hall is Fort Point, a small, rocky promontory covered with fish-flakes, with the remains of an old fort on its highest point. Near by (and 3 minutes' walk from the Atlantic House) is Crescent Beach, facing the surf from the inner harbor and partly occupied by the *Pavilion House*, of which Lady E. S. Wortley said, "It is very much like being afloat in a line-of-battle ship, we are so close to the grand old Atlantic."

Beacon Pole Hill, close to the city on the Annisquam road, commands an extensive and interesting prospect of Gloucester, the bare, bleak hills of the cape, and the waters and shores to the N. and S. Beyond the hill is the hamlet of *Riverdale*, which has a church of the 17th century.

John Murray, the "Apostle of Universalism," planted that sect in America in 1770, and preached for several years in this church. A centennial celebration took place here, Sept. 20-24, 1870, during which many thousand Universalists encamped about the town. In the old Murray Meeting-house is a curious organ, which was captured during the Revolution by a privateer. It is 4 ft. high, and is played by turning a crank, its capacity being 30 tunes.

The pleasantest excursion about Gloucester is to *Norman's Woe* and *Rafe's Chasm*. About 2 M. from the city, a small road turns off to the l. from the Manchester road, and soon, losing all evidences of carriage-travel, runs into a sequestered path in the borders of the forest and by the edge of the sea. The dark and frowning mass of rocks soon seen, surrounded by the sea, is Norman's Woe, the scene of Longfellow's poem, "The Wreck of the Hesperus."

"It was the schooner Hesperus
That sailed the wintry sea.

"And fast through the midnight dark and drear,
Through the whistling sleet and snow,
Like a sheeted ghost the vessel swept
Tow'rd the reef of Norman's Woe."

Following the precipitous, rocky shore about 1 M. S. W. of the reef, one comes to * Rafe's Chasm, a remarkable fissure in the great cliff which fronts the sea. It is 6 ft. wide, 40-50 ft. deep, and 100 ft. long, and the roar of the waves is appalling when they sweep through it after a storm. Some distance beyond, on the same shore, is another curious cleft in the trap-rock. The ramble may be extended to Goldsmith's Point and its summer villas, with Kettle Island and Great Egg Rock off shore, and a large new hotel near the beach. A little to the N. (and near the Magnolia flag-station on the railroad) is a swamp containing the rare and beautiful magnolia-trees, whose flowers are out in July.

"Around the Cape" is a favorite excursion from Gloucester, and the distance is 12-14 M. From Gloucester to Rockport by highway or railroad, is about 4 M. By diverging to the r. from the main road a shore-road (inferior) is gained, which leads to Rockport by Whale and Loblolly Coves, passing near Thacher's and Straitsmouth Islands, with their tall lighthouses. *Thacher's Island* has two powerful Fresnel lights, in granite towers, 112 ft. high and $\frac{1}{3}$ M. apart. There is a tradition that a rebel cruiser hit one of these lanterns with a cannon-shot during a dark night of the Secession War.

Rockport (*Sheridan House*) is a well-named town of about 4,000 inhabitants, with 5 churches and 2 banks. From costly artificial harbors along this rock-bound coast, great quantities of granite are shipped to all parts of the Union. 2 M. N. of this village is the summer-resort at *Pigeon Cove* (stages from Rockport station), with the Pigeon Cove, Ocean View, and Glen Acre Hotels, and several boarding-houses. This was formerly a favorite resort of the great divines of the liberal sects,—Chapin, Starr King, Bartol, and others,—and has grown rapidly in popularity. The rocky shores furnish an endless variety of scenery, and the surf, after stormy weather, is grand in its power. Phillips Avenue and other streets have been graded on the heights by Pigeon Cove, and a large village of summer residences (called Ocean View) is to be built here.

From Ocean View, the road runs to Folly Cove, and near Folly Point, the N. limit of the cape, to *Lanesville*, looking across the northern waters to the shores of Essex North, New Hampshire, and lower Maine. There are summer boarding-houses here and at *Annisquam*, at the mouth of the Squam River. This tidal lagune is now followed to *Bay View*, with its large wharves, and a steam railroad running back into quarries which yield granite (of which the Boston Post Office is being built) of a lighter color than that of Quincy. On a sightly hill over Bay View is the elegant seaside cottage (of red and gray granite), which was presented by friends to the Hon. B. F. Butler, Congressman from Essex County. From Annisquam to Gloucester it is about 4 M., mostly by the side of Squam River, and passing Riverdale and Beacon Pole Hill.

Cape Ann was formerly inhabited by a small tribe of Indians, who called it Wingaersheek. It was rounded by Capt. Smith in 1614, who named it Cape Tragabigzanda in memory of a Turkish princess who had befriended him while he was wounded and a prisoner in Constantinople (1601). Prince Charles of England overruled Smith, and named the cape in honor of his royal mother. In 1625 the forest-covered promontory was settled by a colony under Roger Conant, who founded here the first Puritan church. Abandoned by Conant in favor of Salem, it was soon re-peopled by another swarm from the English hive, and incorporated in 1642 under the name of Gloucester, since most of its settlers came from the English town of that name. The colonists soon exterminated the "lyons" and drove off the Indians. 1692 was "a year memorable in the annals of mystery," and hundreds of French and Indian ghosts were thought to haunt the cape, and were often shot at but never hurt. So great was the panic that two regiments from the mainland occupied the cape. With the decline of the witchcraft delusion in Salem the superstitious mariners of Gloucester lost sight of their mysterious enemies, and the guards were withdrawn. In 1716 the first terrible marine disaster occurred, when 5 large fishing-vessels from this port were lost off the Banks with all on board. In 1774 Edmund Burke, speaking of the Massachusetts fishermen, said, "No sea but what is vexed by their fisheries, no climate that is not witness of their toils; neither the perseverance of Holland, nor the activity of France, nor the dexterous and firm sagacity of English enterprise, ever carried their most perilous mode of hardy industry to the extent to which it has been pursued by this recent people,—a people who are yet in the gristle, and not yet hardened into manhood." In 1775 Cape Ann sent 300 men to the American army besieging Boston, and in August of that year Gloucester was bombarded for 4 hours by the British sloop-of-war "Falcon." The minute-men held the town, and captured 4 boats, a tender, and a prize schooner with 40 men from the "Falcon." The ruined town was soon repaired, and with the close of the war, the cessation of privateering, and the reduction of the national navy, the fishing-fleets were once more manned and sent out. Gloucester had included the whole cape until 1840, when Rockport became an independent town. The canal from the harbor to Squam River (first cut in 1643) was long ago abandoned as useless. In 1873 Gloucester received a city charter.

William Winter, the poet, E. P. Whipple, the essayist, and Samuel Gilman, the Unitarian divine, were born here; also, Capt. Haraden, who, with the "Pickering," swept the Bay of Biscay and the North Atlantic, and took 1,000 cannon from the British on the sea, between 1775 and 1783. Epes Sargent, the author; Henry Sargent, the painter; and other notables of the same family, came from Gloucester.

The fisheries around Newfoundland have caused trouble ever since 1585, when Queen Elizabeth sent a fleet which swooped down on a swarm of Norman fishing-vessels on the Banks, and captured half of them. But the deep-sea and George's Bank fisheries are the noble pursuits of this maritime people, who man their fleets with 5,000 men, and lose on an average, 10 vessels and 100 men each year. In the winter of 1862, 13 vessels and 130 men from this port were lost in one night on George's Bank.

"Wild are the waves which lash the reefs along St. George's Bank,
Cold on the shore of Labrador the fog lies white and dank;
Through storm and wave and blinding mist, stout are the hearts which man
The fishing-smacks of Marblehead, the sea-boats of Cape Ann.

"The cold North light and wintry sun glare on their icy forms
Bent grimly o'er their straining lines, or wrestling with the storms;
Free as the winds they drive before, rough as the waves they roam,
They laugh to scorn the slaver's threat against their rocky home."

(JOHN G. WHITTIER.)

37. Boston to Portland and St. John.

This is the most interesting and easy of the routes to Maine and the Maritime Provinces. No change of cars is necessary between Boston and Bangor, since the Eastern Railroad cars pass on to the rails of the Maine Central Railway at Portland and are carried through to Bangor. At the latter city the traveller gets

on the train of the European and North American Railway, which passes through to St. John. Bos on to Salem, 16 M. ; to Newburyport, 36 M. ; to Portsmouth, 56 M. ; to Portland, 108 M. ; to Augusta, 171 M. ; to Bangor, 246 M. ; to St. John, 446 M. ; to Halifax, 636 M.

The rich and elegant cars of the Pullman Company are attached to every through train. This company has over 500 cars (costing \$18–22,000 each) running on 90 railroads. They are used throughout the United States, also between Bombay and Calcutta (1,800 M.), and are about to be introduced on the through route from Paris to Vienna. The chief advantage possessed by this line is that it runs through the large sea-cities of Massachusetts, with frequent views of the ocean and the northern bays. Numerous popular seaside resorts are near its track, while 9 connecting lines run landward from it. Fares, to Portland, \$3.00 ; to Bangor, \$6.00 ; to St. John, \$10.00 ; to Halifax, \$14.00.

The line nearly coincides with the route of the "Portsmouth Flying Coach Co.," established in 1762, to make weekly trips by way of the Newburyport road. The fare was 13s. 6d. to Portsmouth and 9s. to Newbury. President Dwight (of Yale) rode over this route in 1796, and wrote, "No part of the United States furnishes a tour equally pleasing. Nowhere is there in the same compass such a number of towns equally interesting, large, wealthy, and beautiful, or equally inhabited by intelligent, polished, and respectable people."

Two through express trains run daily each way between Boston and Bangor, 240 M., in 11 hours.

The train leaves the terminal station on Causeway St., at the foot of Friend St. (Pl. 2), and runs out over Charles River on a long trestle. On the l. is the track of the Boston and Lowell R. R., and on the r. are the Fitchburg and the Boston and Maine tracks. The heights of Charlestown, crowned by Bunker Hill Monument, rise on the r., and the manufactories of E. Cambridge are seen on the l. Off Prison Point (Charlestown) the Fitchburg R. R. is crossed, with the State Prison close at hand, and the *McLean Asylum for the Insane* on the l. This Asylum was opened in 1818, and has extensive buildings which cost over \$200,000, surrounded by pleasant grounds. It was named for a philanthropic Boston merchant, who gave \$150,000 for this object and to Harvard University. After running for nearly a mile over the waters of Charles River and Miller's Creek, the line gains the Somerville meadows, and crosses the Boston and Maine track just before reaching *Somerville* station. Soon after leaving this station, Mt. Benedict and the ruins of the Ursuline Convent (destroyed by a mob in 1834) are passed on the l. and the train crosses the Mystic River, — with Charlestown and E. Boston on the r.

Station, *Everett*, whence the Saugus Branch diverges to the N., and passes through the suburban villages of Malden, Maplewood, Linden, Cliftondale, Saugus, E. Saugus, and Lynn Common. Near the latter village it rejoins the main line. The town of Everett was incorporated in 1870, with a population of 2,222 and a valuation of \$2,000,000. From this point the track runs S. of E. to *Chelsea* station. From Boston to Chelsea the road describes a semicircle with the centre of the curve inclined to the N. W. The road formerly terminated at E. Boston, but a depot was built in the city, and a circuitous course was necessary in order to avoid the deep outer channels of the Charles and Mystic Rivers. Chelsea and Revere Beach are described in Route 2. The line soon crosses

Chelsea Creek and Saugus River, with the hotels on Chelsea (or Revere) Beach, on the r., skirts Lynn Harbor, passes W. Lynn, and stops at

Lynn.

Hotels. Sagamore House ; Central House ; Lynn Hotel. Horse-cars to Boston, half-hourly.

Lynn is a busy city of 28,231 inhabitants, situated near the N. end of Mass. Bay, on a harbor formed by the peninsula of Nahant. The greater part of the city is on a plain near the sea, while a chain of porphyritic hills on the N. is adorned with many neat villas. Market St. is the main thoroughfare, and is lined with large commercial buildings, mostly of brick, although by far the greater part of the city is constructed of wood. Skilled American labor is employed here to a larger extent than in the other manufacturing cities of New England (where foreign workmen are numerous), and its interests are protected and sometimes over-asserted by a powerful organization called the Knights of St. Crispin.

The city was founded in 1629, and named for Lynn Regis, in England, the home of its first pastor (1636-79). In 1810, it was the 7th town of Essex County ; in 1820, the 5th ; in 1830, the 4th ; in 1840, the 2d, which rank it still maintains (Lawrence being the largest city in the county). About 1750, the manufacture of ladies' shoes was commenced here by a Welchman named Dagyr, and it has since grown to vast proportions, Lynn now being the first city in the world in this branch of industry.

The shoe-manufacture is now the chief business of Massachusetts. Of \$555,000,000, the aggregate value of the manufactures in the State in the year 1870, \$88,399,583, was the value of the boots and shoes made ; \$33,685,055, of the leather ; \$59,299,423, of cotton goods and threads ; \$48,177,135, of the woolens and worsteds ; and \$26,767,485, of the iron-manufactures.

In 1767, Lynn made 80,000 pairs of shoes ; in 1810, 1,000,000 pairs ; in 1865, 5,360,000 pairs ; and in 1868, over 10,000,000 pairs, valued at \$18,000,000. In 1865, there were employed 6,984 men and 4,984 women, in this branch of industry.

The ***City Hall** is one of the finest municipal buildings in New England. It is some distance W. of the station, and is substantially and gracefully built of brick and brownstone, with a fine tower above it. It fronts on a long and narrow Common which extends nearly to the Lynn Common station. *High Rock* is N. of the City Hall, and commands a wide view of the city and the surrounding waters. Here was the home of Moll Pitcher, a reputed sorceress, and here also, in later years, have resided the Hutchinson family of singers. *Pine Grove Cemetery* is a beautiful rural burying-ground on the hills toward the "Lakes of Lynn."

Dungeon Rock is 3-4 M. from the city. Here, on one of the highest of a series of picturesque, forest-covered hills, it is said that certain pirates had their den and treasure-house, until an earthquake swallowed them up (in the 17th century). In 1852 a person came to this hill and began to dig for treasures under the inspiration of spiritualism and the guidance of clairvoyants. He worked here until his death in 1863, meanwhile cutting a passage into the iron-like porphyry rock, 135 ft. long, 7 ft. wide,

and 7 ft. high. Near this point is the Saugus River, where a forge and smelting-works for working iron were erected in 1643.

The pleasantest part of Lynn is the vicinity of Nahant St. and Sagamore Hill, where there are many fine villas belonging to Boston merchants. The bank building and the new Universalist Church are in this quarter, and are worthy of notice. Lynn Beach and Nahant (see page 21) are gained by way of Nahant St., while by following the shore toward the N. (a foot-path only) a line of elegant seaside villas is passed, and Swampscott is reached.

Soon after leaving Lynn, the train reaches **Swampscott** (Great Anawan House; Little Anawan House; Ocean House; Lincoln House), a fashionable watering-place, which, like Nahant, is much affected by the aristocracy of Boston. Their elegant carriages and trim yachts are easily brought here (13 M. from Boston), and make land and water lively through the summer months. Numerous boarding-houses, small hotels, and cottages receive their quotas of the guests. The beaches are short and limited, but afford safe bathing, while the greater part of the shore consists of high bluffs and ragged ledges. *Phillips' Beach*, about 3 M. E. of the station, faces the open sea, and is nearly insulated by Phillips' Pond. A large cluster of cottages is built on the prominent point over Dread Ledge, from which the shore trends W., and pretty views of Nahant Bay, the peninsula of Nahant, and the islanded Egg Rock, may be gained. The yachts and village fishing-smacks are usually anchored off Fisherman's Village and along the S. shore. Beyond Swampscott the train reaches

Salem.

Hotels. Essex House, on Essex St., \$3.00 a day; Derby House.

Horse-cars to Peabody and Beverly (on Essex St.). **Steamers** (in summer) to Lowell Island.

Salem, the mother-city of the Massachusetts colony, and a shire-town of Essex County, is favorably situated on a long peninsula between two inlets of the sea. It has 24,119 inhabitants, and while slowly gaining in wealth, it is losing its place among the cities of the State and County, by their more rapid increase. The marine aristocracy of the old East India merchants and captains still holds lines of stately old-time mansions, and the stillness and grave propriety of the city is generally noticed by the visitor. The wharves are now occupied by the few coasting-vessels which have taken the place of the great East Indiamen which formerly entered here. Boston has taken this trade away, and the city is now supported by its lately developed steam-mills and factories. There is a safe and commodious harbor before the city, which is defended by Fort Pickering, and good boating is found there. The State Normal School in Salem is situated on High St., and has 160 girls in attendance. Instruction of a

high order is given here without cost, on condition that each student shall teach (for a specified time) in the schools of the Commonwealth. The churches of the city are not remarkable for their architecture, although 3 of them are of stone. There are 3 Unitarian churches.

The *East India Marine Hall* is on Essex St., near the Essex House. Here are the scientific collections of the Essex Institute and the * ethnological collections of the E. I. Marine Society (organized in 1799 by the chief officers of Salem Indiamen). This hall was built in 1825, and in 1867 George Peabody gave \$ 140,000 for the promotion of knowledge in Essex County, with part of which the hall was purchased. The collections remain on permanent deposit (open daily, except Sunday and Monday, 9-12 A. M., and 1-5 P. M.).

Nearly every branch of natural science is represented in the extensive and well-arranged cabinets of the Essex Institute. The Marine Society's collection embraces a great number of curiosities brought from remote lands. There are musical instruments of every form used by the Oriental nations, and a curious array of their weapons of war. Clothing, utensils, and other appointments of Hindoo daily life are seen, and also a large and well-conceived tableau of court-life. In one part of the hall is a complete assortment of gods, Hindoo, Chinese, and Polynesian. The models of naval architecture are very numerous, and mark the progress from the rude Esquimau canoe to the model of the stately and heavily-armed Salem East Indiaman, the "Grand Turk." There are also cabinets filled with aboriginal American and Peruvian antiquities, mostly stone implements and pottery. The gem of the collections is a * piece of wood-carving attributed to an Italian monk of the 14th century. In the concavities of two hemispheres of box-wood, each $1\frac{1}{2}$ inches in diameter, he has carved 110 full-length figures, some of which are full of expression. One hemisphere represents Heaven, and the other Hell.

Plummer Hall is a fine building on Essex St., which was erected with funds left to the Salem Athenæum by Miss Plummer. In the second story is one of the most elegant halls in the State, with white Corinthian columns at the sides, and some old portraits, the chief of which is a large, full-length painting of Sir William Pepperell in his favorite red costume. Oliver Cromwell, Secretary Pickering, Governors Leverett, Bradstreet, and Endicott, several early divines and ladies of the colonial era, are represented in these old portraits. There are three libraries (Athenæum, Essex Institute, and S. Essex Medical Society) in the building, with an aggregate of 43,000 volumes, the larger part of which are in the hall. The original charter of Massachusetts Bay, given by King Charles I. in 1628, is preserved here, together with sundry other quaint old documents of State. Over the main stairway is a graphic painting representing a scene in the witchcraft days. Behind Plummer Hall, and reached by passing around the building, is the oldest church edifice in the Northern States. It was built in 1634 for the First Church, of which Roger Williams was pastor, and was used for 38 years. In 1672 a new church was built, and this edifice was abandoned. It is about half as large as an ordinary parlor, and has a gallery, a high-pointed roof, diamond-paned windows, and a few relics of the people who were contemporary with it.

The *Old Witch House* is on the corner of Essex and North Sts. (a one-story shop has been built in front of it). It dates from 1642, and certain of the suspected witches were tried in it. Gallows Hill is W. of the city, and commands a broad view over the harbor and surrounding country. Here 19 persons were put to death during the witchcraft delusion. In *Harmony Grove Cemetery*, W. of Salem, George Peabody is buried, while in the village of **Peabody** (2 M. distant; horse-cars from Salem) is shown the house where he was born. The library and collections of the *Peabody Institute* are worthy of a visit (open Wednesday and Saturday). The most notable object in this collection is the * portrait of Queen Victoria, given by her to George Peabody. It is 14 by 10 inches in size, painted on enamel, framed with blue and gold, and adorned with rich jewels. It is said to have cost \$30,000.

Derby Wharf is a long and well-constructed wharf on the S. of the city, near the great Naumkeag Cotton Mills. It was formerly the focal point of the E. India trade, and at its head stands the old *Custom House* where Hawthorne was employed (his birthplace was at No. 21 Union St.). The *Court House* and the *City Hall* are granite buildings near the tunnel, and Chestnut St. is an elm-lined, aristocratic street, which is called the finest in the city. In the E. is the broad Common known as Washington Square, with the brownstone East Church (Unitarian) fronting on it. In this vicinity is St. Peter's Episcopal Church, an old and massive stone building.

Salem Neck is a peninsula projecting from the city toward the sea, nearly uninhabited, and the seat of Fort Pickering and the Salem Almshouse. The old ruined batteries on the Neck were favorite haunts of Nathaniel Hawthorne (see "American Note-Books").

There are in Salem extensive works for the manufacture of railway cars; also for making gunny-bags; while the Naumkeag Cotton Mills employ a large number of workmen. Immense quantities of coal are handled here, being landed on Phillips' Wharf, and thence carried by rail into the interior. The city is abundantly supplied with water by an aqueduct leading from Wenham Pond.

In 1626 Roger Conant left the fishing colony on Cape Ann, and built the first house on the Indian domain of Naumkeag.* In 1627 the Plymouth Company granted to certain "knights and gentlemen of Dorchester, and their heirs, assigns, and associates forever, all that part of New England which lies between a great river called Merrimac, and a certain other river called Charles." John Endicott was sent over in 1628, and founded at Naumkeag the capital of this district. The colony was "called Salem from the peace which they had and hoped in it." In 1628 the First Church was formed, and in 1631 Philip Ratcliffe was scourged, had his ears cut off, and suffered banishment and confiscation of his property, "for blasphemy against the church of Salem, the mother-church of all this Holy Land." The militant disposition of the colonists was shown by the fact that during the first few years they imported £18,000 worth of furniture, building materials, &c., while £22,000 worth of arms and artillery was brought in during the same time. In 1629 there were 10 houses here, besides the governor's house, which was garnished with great ordnance, "and thus wee doubt not that God will be with us, and if God be with us, who can be against us." In midsummer, 1630, Gov. John

* Naumkeag is said to be an Indian word meaning "Eel land," but Cotton Mather (who is nothing if not Oriental) holds to its derivation from the Hebrew words, Nahum (comfort) and Keick (haven).

Winthrop arrived at Salem with 10 ships and a large number of colonists. The lovely Lady Arabella Johnson, the daughter of the Earl of Lincoln, and the wife of Isaac Johnson, the wealthiest of the colonists, was the pride of the settlement, and the flag-ship of the fleet was named for her. Before leaving England she insisted on accompanying her husband, — "Whithersoever your fatail destine shall dryve you, eyther by the furious waves of the great ocean, or by the many-folde and horrible dangers of the lande, I wyl surely not leave your company. There can no peryll chaunce to me so terrible, nor any kinde of death so cruell, that shall not be much easier for me to abyde than to live so farre separate from you." Within 3 months after the landing, this brave patrician lady died at Salem (and was buried near Bridge St.). Her husband survived her but a month.

Winthrop and Johnson moved S. to Charlestown, and thence to Boston, which soon became the chief town and capital of the colony (see page 7). Endicott, Peabody, and others remained at Salem, and built mansions near North River, and the former led the 1st Mass. Regiment (organized in Essex County, in 1636) in a bloodless and successful campaign against the turbulent Anglican colony at Merry Mount (Braintree). In 1661 the Quakers were persecuted at Salem, and in 1677 the Indians on the coast of Maine seized 20 vessels, mostly from this town, while 4 vessels escaped by battle and returned to the port, bearing 19 wounded men and several dead. The witchcraft delusion arose in 1692 in the family of Samuel Parris, pastor of the adjacent village of Danvers. His daughter and his niece accused Tituba, a slave of the household, of bewitching them, and Parris whipped her until she confessed it. Tituba's husband, under the influence of fear, charged certain other persons of the same crime, and Parris proclaimed that "the Devil hath been raized among us, and his rage is vehement and terrible, and when he shall be silenced the Lord only knows." The jail of Salem was crowded with Essex County people who had been denounced for diabolical communications. 19 persons were hung on Gallows Hill, and Giles Cory was pressed to death. Cotton Mather was a leader in these persecutions, which lasted for 16 months, until the government became aware of its error, and released the scores of prisoners from the jail. In partial extenuation of this strange delusion, it may be said that Lord Chief Justice Hale, Lord Bacon, Sir William Blackstone, Addison, Johnson, and other distinguished scholars believed in the reality of witchcraft and the propriety of its punishment by death. Quarter of the population of Salem left the town in panic, and after all was over, Parris acknowledged his error, and was dismissed by his church.

In 1774 Gov. Gage ordered the removal of the legislature from the closed port of Boston to Salem. In 1776 a British regiment landed here, designing to destroy some military stores in N. Salem, but they failed to do it. Four Essex County regiments were enrolled in the Continental army, while the fishermen of Salem armed their craft and became privateersmen, by whom 445 British vessels were taken during the Revolution. After the war, E. H. Derby built a fleet of fine ships, and opened the East India trade, which by 1818 engaged 53 Salem ships; and from this era most of the aristocracy of the city dates its origin.

Salem has given to the State, Senator Cabot, and Timothy Pickering, a Continental officer, who became successively U. S. Postmaster-General (1791-5), Secretary of War, and Secretary of State (1795-1800). He was also a U. S. Senator, 1803-11. Gov. Bradstreet, "the Nestor of New England," and Gov. Endicott, spent much of their lives in Salem. Gen. Israel Putnam, of the Continental Army; Gen. F. W. Lander, mortally wounded after leading in some brilliant actions of the War for the Union (1862); and F. T. Ward, commander of the armies of China until he was killed in the battle of Ningpo in 1862, were all natives of Salem. Also were born here, John Rogers, the sculptor; N. Bowditch, the mathematician, astronomer, and author of "The Practical Navigator"; N. I. Bowditch, the antiquarian; J. Prince and N. Adams, clergymen; Benjamin Pierce, the mathematician; the eminent merchants, Derby, Crowninshield, Phillips, and Gray; Maria S. Cummins, the novelist; John Pickering, the philologist; J. B. Felt, the annalist; and W. H. Prescott, born 1796, the author of histories of Ferdinand and Isabella, the Conquest of Mexico, the Conquest of Peru, and Philip II. of Spain, amounting to 11 octavo volumes, and translated into 5 European languages. Nathaniel Hawthorne, one of the sweetest and purest of American prose-writers, was born at Salem in 1804. After graduating from Bowdoin College (1825), he settled in Salem, and from 1838 to 1841 was in the Boston Custom House. In 1841 he joined the Brook Farm Community, and from 1843 to

1846 he lived at Concord. 1846-50 he was surveyor of the port of Salem, and 1853-57 he held the U. S. Consulate at Liverpool. He died at Plymouth, N. H., May 19, 1864. The most important of his works of romance and miscellanies are, "The Scarlet Letter,"—a weird and powerful romance of the early colonial days of Massachusetts,—and "The Marble Faun," whose scene is laid in Rome, Perugia, and the Appenines.

Four branch railroads run out from Salem.

A line crosses the towns of Peabody and Lynnfield, to Wakefield on the Boston and Maine R. R. 4 trains daily pass into Boston by this route, and over the rails of the last-named company.

The Salem and Lowell R. R. (pertaining to the Boston and Lowell R. R.) runs from the station near Salem Court House, to Lowell (24 M.). Fare, 80 c.; 3 trains daily each way. This line crosses Peabody to Ipswich River, which it follows for 6-7 M., and then passes through the towns of N. Reading, Wilmington, and Tewksbury, to Lowell.

The Lawrence Branch of the Eastern R. R. runs 3 trains daily each way between Salem and Lawrence, through the towns of Danvers, Middleton, and N. Andover.

Another branch runs to Marblehead (4 M.), passing the Forest River Lead Works.

Marblehead (*Eldridge House, Forsyth House*) is built on a peninsula of 3,700 acres, very rocky and uneven. It was incorporated in 1635, and a chronicler of that time calls it "Marmaracria, oppidum maritimum, saxis abundans." Whitefield gazed in astonishment upon its rocky hills and said, "Pray, where do they bury their dead?" The town has about 8,000 inhabitants, and is situated on the side of a narrow, deep harbor. It was formerly engaged in the fisheries, but has latterly turned its attention to the shoe-manufactory. A full regiment marched from this town to the Continental Army; the crew of the Constitution frigate was mostly enlisted here; and it is said that the town sent more men (in proportion to its population) to the Secession War than any other place in the Union. There are many quaint old colonial houses here, especially the bank building, which was raised in 1768 for an aristocratic mansion, and is but little altered. One of the churches was built in 1714, and is still used for services.

In June, 1813, there occurred a desperate naval battle off this coast, between the American frigate "Chesapeake" and the British frigate "Shannon." The vessels were of about equal size, and the "Chesapeake" had sailed from Boston (with a picked-up crew) in answer to a challenge from the "Shannon." The latter vessel was splendidly handled, and after a few close broadsides, she ran alongside the "Chesapeake" and carried her by boarding, after a sharp resistance on the decks. The American Capt., Lawrence, was mortally wounded and carried below, his last words being, "Don't give up the ship." The English Capt., Broke, was so badly wounded that he retired from the service, after carrying the "Chesapeake" into Halifax in triumph, and being knighted for his gallant achievement.

Eldridge Gerry was born at Marblehead in 1744. He was a Congressman, 1776-85, and 1789-93, and signed the Declaration of Independence, but refused to sign the U. S. Constitution (1787). In 1812 he was elected Vice-President of the U. S.

At this town is laid the scene of Whittier's poem, "Skipper Ireson's Ride." Many years ago Capt. Ireson refused to take off some of his townsmen from a drifting wreck, because of the expense of feeding them all the way home. On his return the citizens tarred and feathered him, and rode him, in one of his own boats, to Salem and back, he remaining silent and unresisting. Whence the refrain,

"Old Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a cart
By the women of Marblehead."

In 1775 this town was only second to Boston in population. The 14th Mass. Continental Reg., raised here and in Salem, was one of the *élite* corps of the army, and was called "the amphibious." It ferried the army across the East River by night after the defeat on Long Island, led the van in crossing the Delaware to the battle of Trenton, and escorted Burgoyne's captive army through New England. The Marblehead privateers did great service; one of them took a British ship off Boston, laden with 1,500 tons of powder and other stores. The "St. Helena," 10, while convoying a fleet to Havana, was attacked at night by the British brig, "Lively." At dawn, after a long fight, she found herself under the guns of the line-of-battle-ship "Jupiter." The captive Marbleheaders were put on board the "Lively," and 12 days later they rose and took her, and ran into Havana. The Embargo (1810) ruined the maritime business of Marblehead, and at the close of the War of 1812, 500 of her sailors were in British prisons.

Marblehead Neck is across the harbor (2 M. by road,) and is usually dotted with white tents during the summer. Tinker's Island (seen to the S.) is noted for its cunner-fishing. Massachusetts Bay was stocked with cunners (black fish) by some Bostonians, and these delicious fish have propagated rapidly.

Lowell Island is a small island 5 M. from Salem, which is occupied by a hotel accommodating 300 guests. The island covers but 25 rocky acres, and has good sea-air, with views of Cape Ann, Beverly, the Satan Rocks, and Marblehead with its trim little fort. A steamer runs out several times daily from Marblehead (2 M.).

After leaving Salem the main line passes through a tunnel 600 ft. long, and crosses North River on a long bridge, between which and the highway bridge, a few rods down the stream, a fleet of yachts is moored for 8 months of the year. Station, *Beverly*, an ancient village which was settled in 1630, but is now chiefly known for its extensive shoe-factories, which are concentrated about the public square near the station. Lathrop St. (named after Capt. Lathrop, a native of Beverly, who fell at the head of "the Flower of Essex," in battle near Deerfield, in 1675) affords a fine marine promenade, with an extensive view over the bay, and its forts and islands.

Nathan Dane, who resided here from 1775 to 1835, was an eminent jurist. In 1787 he introduced and fought through Congress a bill excluding slavery forever from the vast domain N. W. of the Ohio River. Robert Rantoul, Jr., a powerful and popular politician, of remarkable purity of life and principles, was born here in 1805. He filled the unexpired term of Senator Webster in 1851. Dr. A. P. Peabody, the eminent Unitarian divine, was also a native of Beverly.

Station, *Wenham and Hamilton*. Wenham was settled about 1636, and its foundation was celebrated by Rev. Hugh Peters, who preached on the borders of its lake, from the text, "At Enon, near to Salem, because there was much water there." The town was called Enon for many years. An English tourist of 1686 wrote, "Wenham is a delicious paradise; it abounds with rural pleasures, and I would choose it above all other towns in America to dwell in." Wenham Lake has a world-wide reputation for its ice, which is shipped to the remotest ports. The ice is kept free from snow, and is cut when a foot thick, an acre producing about 1,000 tons, which is stored in great buildings near the shore. These ice-houses (seen to the l. from the track) have double walls of wood, filled in with saw-

dust, and preserve the ice through the heats of summer. Side-tracks run to the ice-houses by which it is carried throughout this part of the country, or to the ships at Boston. Salem gets its water-supply from this lake (the large reservoir is seen on a hill to the S. E.), and the water must be good according to one writer's *à priori* reasoning, — "of the softness and purity of the waters of Essex County there can be no doubt, for its ladies are noted for their bloom and beauty." Gail Hamilton (Miss Mary A. Dodge) resides in the town of Hamilton (named after Alexander Hamilton), a quiet farming village about $1\frac{1}{2}$ M. N. E. of the station. A side-track leads here to the l. to a large and favorite Methodist camp-ground, where many thousands congregate in the month of August. It is 1 M. from the station, and its groves are filled with small cottages. 60 acres of land are included in this Asbury Camp-ground.)

A branch railroad runs from Wenham to **Essex**, a small shipbuilding village near the sea. Here was born, in 1799, Rufus Choate, a profound and skilful lawyer, and a brilliant and persuasive orator, who was U. S. Senator in 1841-5, and afterwards Attorney-General of the State.

The main line now crosses Ipswich River, and stops at **Ipswich** (*Agawam House*; restaurant in the station). John Norton, of whom Cotton Mather says "he spoke like Hortensius, and wrote like Abericus," was the pastor of this village from 1636 to 1652. His colleague was Nathaniel Ward, the author of the "Simple Cobbler of Agawam," who was rector of Stondon Marcy, Essex County, England, until silenced by Archbishop Laud for non-conformity. Capt. John Smith, in 1614, spoke of "the many cornfields and delightful groves of Agawam," but in 1632 a fleet of 100 canoes filled with fierce Tarratines from the Penobscot laid waste this fair Indian village and destroyed many of its people. So the coast was clear, and John Winthrop (afterwards founder of New London and first Gov. of Connecticut) bought the town of the Sagamore Masconomet for \$ 100, and settled here in 1633.

"The people are noted for their hospitality; in summer the sea-wind blows cool over its healthy hills; and take it for all in all, there is not a better preserved specimen of a Puritan town in the ancient Commonwealth." The chief village is situated on the r. of the track, on both sides of the Ipswich River, which is crossed by two stone bridges, one of which dates from 1764. The County House of Correction and Insane Asylum are located here, and the town has a fine public library, which was given by one of its citizens. There are about 3,700 inhabitants in the town, which has some manufactures and 3 neat churches. This is the seat of Ipswich Female Seminary, an old and famous school "where Andover theological students are wont to take unto themselves wives of the daughters of the Puritans."

A few miles to the E., down the river, is the North Ridge on Great

Neck, and Ipswich Bluff, a favorite summer camping-ground for fishing-parties.

Station, *Rowley* (the chief village is over a mile S. W.), a town largely composed of salt marsh. It was settled in 1638 by a nomadic church, led by Ezekiel Rogers, who had been rector of Rowley in Yorkshire, and was silenced for Puritanism (non-conformity.) In 1650 he died, leaving his library to Harvard College, and his estate to the Rowly Church. The first cloth made in America was turned out from works erected by these immigrants. The line now runs across a wide and desolate moor, crosses the Parker River, passes the Oldtown Hills on the r., crosses the Newburyport R. R. (Boston and Maine), and stops at

Newburyport.

Hotels.—* Merrimac House, \$2.50 a day; Ocean House. *Horse-Cars* to Amesbury by way of Merrimac St. *Stages* to Exeter (75 cts.), W. Amesbury, Haverhill, and (in summer) to Salisbury Beach and Plum Island Beach. *Steamers* to Salisbury Point in summer.

Newburyport is an ancient sea-city, beautifully situated on a declivity facing the Merrimac River, and within 3 M. of the ocean, which is seen from its wharves and house-tops. It has about 12,000 inhabitants, and a valuation (in 1870) of \$7,427,700. There are 16 churches, 4 banks, and a daily and two weekly newspapers. The chief retail trade is carried on in State St., while the wholesale trade is on the water-front, which is traversed by a marginal steam-railway connected with the Eastern Railroad track. Since the absorption of foreign commerce by Boston, Newburyport has been forced to adopt the policy of the other small cities of the coast, and sustain itself by manufactories, while the old marine aristocracy has isolated itself from the new *régime*. The decadence of the city is shown by its decrease in population between 1860 and 1870, which amounted to over 500. The streets are generally broad, straight, and quiet, while great numbers of shade-trees are found in every part of the place, being cared for under the provisions of a fund left for that purpose by a public-spirited citizen. The streets which run up from the river are short, and terminate at High St., a broad and umbrageous avenue which runs along the crest of the ridge and is lined with mansions of the olden time. One of these (near the head of Federal St.) is the home of Caleb Cushing, the eminent jurist and diplomatist. Near the head of Olive St. is the mansion formerly occupied by Lord Timothy Dexter, an eccentric merchant who made a large fortune by singular ventures (sending a cargo of warming-pans to the West Indies, and other speculations of a like nature). On High St., near State, is a pond covering six acres, and surrounded by a mall and terraced promenade, on which the Essex County Court House is situated. Nearly opposite is the Putnam Free School, a high school of wide reputation, and the Roman Catholic Church, while St.

Paul's Episcopal Church and the graceful Gothic Chapel of St. Anne are but a short distance beyond (on High, near Market St.). The City Hall is a large, plain building fronting on Brown Square, near which are the North Church, the 1st. Baptist, and the Unitarian (the latter having a tall and graceful spire).

The **Public Library** was founded by Josiah Little and well endowed by George Peabody. It occupies the old Tracy mansion (on State St.) where Washington, Lafayette, and other noble guests have been received in the palmy days of the place. The two upper stories are now formed into a hall, containing about 13,000 books, while on the lower story is a large public reading-room (magazines and newspapers). The Marine Museum (open daily; on State St.) contains a collection of curiosities brought in by the ships of Newburyport. Besides the usual mementoes of distant lands and peoples, there are shown some very elaborate and handsome models of ships.

Oak Hill Cemetery is a beautiful rural burying-ground on State St., beyond High. It is entered through a noble granite gateway, bearing the inscription, "Until the day break, and the shadows flee away." State St. runs out into the country, and is prolonged (under the name of the Newburyport Turnpike) through Salem and Lynn to Boston. It was formerly the road traversed by the great northern and eastern stage-lines. The Old South (Presbyterian) Church is on Federal St., and has long since entered upon its second century. In a vault under the pulpit of this church are the mortal remains of George Whitefield, the founder of the Calvinistic Methodists, who died in Newburyport in 1770. This church also has a fine whispering-gallery, only equalled by the one at St. Paul's, London (the sexton lives in the small house next to the church). The two-story wooden house back of the Old South was the birthplace of William Lloyd Garrison.

The river and harbor and neighboring sea afford fine opportunities for sailing and fishing, in the summer, which are utilized by a large fleet of pleasure-boats. A favorite drive is to the *Chain Bridge* (about 3 M. up river), a place of rare natural beauty, with the large stone mansion, "Hawkswood," on one bank, and on the other the castellated and far-viewing house occupied for several seasons by Sir Edward Thornton, the British Ambassador. Amesbury is but a short distance beyond the bridge, while the river-road to Haverhill passes through pleasing scenery. "*The Laurels*" are by the river-side above the bridge, and excursions are frequently made to their cool and sequestered groves.

The *Devil's Den* is an old excavation in the limestone ledges, about 2 M. S. of the city (by State St.). Asbestos, amianthus, and serpentine are found there. *Dummer Academy* is about 3 M. beyond this point, and is an ancient and famous school, which was founded and endowed by Gov. Dummer in 1756. Near the Academy is Dummer Avenue, with the finest lines of elm-trees in Essex County.

3-4 M. from the city is the ancient and picturesque Indian Hill mansion of Ben Perley Poore, the author and journalist. This broad and rambling old house may be called the Abbotsford of New England, so many are the historic curiosities which have been gathered here. The old Garrison House is near Oldtown Green, and is a well-preserved specimen of the massive defensive architecture of the early colonial days. It was built during the 17th century, and has suffered but little change.

The continuation of High Street by Oldtown Green to Pipe-Stave Hill (which commands a broad sea-view) and Parker River, affords a drive through a well-settled rural district, which has an English air, in the carefulness of its cultivation and the antiquity of its houses. *Plum Island* is 2-3 M. E. of Newburyport, and is "a wild and fantastic sand-beach, reaching to Ipswich, 10-12 M. distant, and thrown up, by the joint power of winds and waves, into the thousand wanton figures of a snow-drift." It is joined to the city by a causeway, and has a hotel and two lighthouses, near the N. end. The beach slopes rapidly, and having a strong undertow, is not used for bathing, but the breaking of the sea on this bold shore after a storm affords a grand sight.

Salisbury Beach (stages semi-daily in summer) is 4 M. from Newburyport, on the N. side of the Merrimac. The farming town of Salisbury is traversed, after crossing the river. This town was settled in 1638, and named (in 1640) in compliment to its first pastor, who came from Salisbury in England. Many ancient houses are to be seen here; among others the birthplaces of Caleb Cushing and of Abigail, the mother of Daniel Webster; also the audience-room of the royal commissioners of 1699, and the provincial boundary council in 1737. A long plank-road runs across the marshes to the beach (*Atlantic House*), which is 6 M. long, extending from the Merrimac to the Hampton River. The sand is hard, smooth, and gently sloping, and is well adapted for long drives, and for bathing (there is no undertow). The low ridge of sand above the high-tide line is taken up by a line of cottages which extends for over a mile along the shore. Many tents are pitched on the sands during the summer, and Whittier's poem, "The Tent on the Beach," well describes this mode of life and the scenery in the vicinity of the beach (where its scene was laid). $1\frac{1}{2}$ M. S. of the Atlantic House is the mouth of the Merrimac River, with the picturesque ruins of an abandoned fort (built to command the entrance), while the city of Newburyport is in full sight up the river. Plum Island and Cape Ann are seen on the S. from the beach, and Boar's Head, the Isles of Shoals, and Mt. Agamenticus on the N. and N. E. Following a custom which is now two centuries old, the people of the surrounding towns congregate here every year on a day late in August, and enjoy themselves. Sometimes more than 25,000 people assemble on those days.

Newbury was settled in 1635 by a colony, under the pastor Thomas Parker,¹ which entered the river since called Parker, in the ship "Hector." There are but few towns in New England whose annals are so peaceful as are those of Newbury, which in the 238 years of its history has not felt the tread of a hostile foot, nor seen the flash of a hostile gun. The interests of the maritime village at the mouth of the Merrimac were found to be so different from those of the farming town of Newbury, that Newburyport received a separate organization in 1764. In 1772, 90 vessels were built here, but the Revolution and the drain of men for the Essex County regiments checked the prosperity of the place, and in 1788 only 3 vessels were built. President Dwight says of the village in 1796, "Indeed, an air of

¹ Parker studied at Magdalen College, Oxford, and early distinguished himself by writing two wonderful Latin books, — "De Traductione Peccatoris" and "Methodus Divinae Gratiae." When old and blind, "the Homer of New England," he had a long controversy with President Chauncey. "He went unto the immortals, in April, 1677, in the 82nd year of his age."

wealth, taste, and elegance is spread over this beautiful spot, with a cheerfulness and brilliancy to which I know no rival." Washington, Lafayette, Talleyrand, Louis Philippe of France, and other famous men were entertained here by the aristocratic families. An extensive foreign commerce was firmly established, and in 1807 the tonnage of the port was over 30,000. The Embargo fell with crushing force upon this maritime industry, and the Great Fire of 1811, which swept away 16 acres from the most densely built quarter, checked the prosperity of the town, and reduced its population to 6,388. Its valuation in 1810 was about the same as in 1870. The town grew slowly, and its Merrimac-built ships were famous throughout the world for fleetness, strength, and symmetry, and were made in large numbers until the decline of American commerce. The cotton-manufacture was commenced here in 1836, and is now the leading business of the place, although considerable attention is paid to the coasting trade, and there is a large fishing fleet belonging to the port. The carriage bridge across the Merrimac was built in 1827, and the Chain Bridge, above the city, was the first suspension bridge in America, and the second in the world. The great turnpike running to Malden Bridge and Boston was finished in 1806, at an expense of \$ 420,000.

Among the natives of Newburyport were, the lawyers, Charles Jackson, Simon Greenleaf, John Lowell, Joseph Blunt, and Theophilus Parsons; the physicians, James Jackson and W. Ingalls; the inventors, Jacob Perkins and Edmund Blunt; the poets, Lucy Hooper and H. C. Knight; the authors, George Wood, George Lunt, S. L. Knapp, and Hannah F. Lee; the divines, J. Greenleaf, Bishop Clarke, Gardner Spring, G. R. Noyes, and Stephen H. Tyng; the generals, Michael Jackson (Revolutionary War, commander of the 8th Mass.), and N. T. Jackson (Secession War); and the senators, William Plumer and Tristram Dalton. Among those long resident here were Hannah F. Gould, the poetess; J. B. Gough, the temperance orator; Caleb Cushing, Rufus King, J. Q. Adams, and Harriet Prescott Spofford.

William Lloyd Garrison, "the leader of the emancipationist movement in the U. S." was born at Newburyport in 1804. He began to advocate the immediate abolition of slavery about 1830, and led the movement in that direction until it was accomplished, bravely enduring many persecutions.

A short branch railroad leads from Newburyport to Amesbury (two hotels), a large and prosperous manufacturing village.

John G. Whittier, "the Quaker Poet" (born at Haverhill in 1807) has lived in Amesbury since 1840. His earlier years were spent in farming and journalism, and he was a fearless pioneer of the cause of Antislavery, to whose advancement his life was devoted. He is peculiarly the poet of New England, and has written admirable descriptions of its rural life and society. The ancient towns of N. Essex and the surrounding seas have been illustrated by his legendary poems, especially by "Snow-Bound," "The Tent on the Beach," and the "Ballads of New England."

After leaving Newburyport, the Portland train crosses the Merrimac River at a high level, on a costly and massive new bridge, 1500 ft. long. Fine views are afforded (to the r.) of the city and river, with the ocean in the distance. Stations, *E. Salisbury* and *Seabrook*, a thinly settled town, whose territory is mostly covered with forests and salt marsh, and whose name is derived from the numerous brooks which flow through it to the sea. Many of the people are engaged in making whale-boats, and the inhabitants of the seaward part of the town (S. Seabrook) long bore an unenviable reputation. Their physiognomy, dialect, and clothing were so marked and unique that they were always recognized in the neighboring city and designated as "Algerines." A religious and educational mission was established here about 1866, and is now self-supporting and prolific in benefits. Seabrook was settled in 1638, and was often harried during the Indian wars.

Station, *Hampton Falls*, S. E. of the village of the same name, which

has a large monument erected by the State to Meshech Weare, the first President of N. H. (1776 - 85).

Dr. Langdon, chaplain of the N. H. regiment in the Louisburg expedition, received 10,000 acres of land in N. H. for "his services, fatigues, and dangers." He was President of Harvard University, 1774 - 80, and pastor at Hampton Falls, 1781 - 97, and at his death he left his fine library to the village church. In August, 1737, the Governor of Mass. rode to this little hamlet at the head of the Legislature and escorted by 5 troops of horse. Here, in the George Tavern, he had long conferences about the provincial boundaries, with the Governor and Legislature of N. H. The latter demanded the territory which now composes her two lower tiers of towns, which had been settled by Mass. men under Mass. charters. The Governors failed to agree, and an appeal was sent to the King, setting forth how "the vast, opulent, and overgrown province of Mass. was devouring the poor, little, loyal, distressed province of N. H." The royal heart was touched, and the King commanded Mass. to surrender two tiers of towns (28 in number) from the Conn. River to the sea.

The railroad now passes over long tracts of salt-meadow, on the E. of which is Hampton Beach and the ocean. Station, **Hampton**, an ancient village which was settled in 1633, on the Indian domain of Winnicummet, and near a block-house erected by Mass. in 1636 to mark its N. E. border. The first settlers were from Norfolk in England, and were long exposed to pitiless attacks from the Indians. The town is now a quiet and pleasant land of peace and plenty, abounding in gray old colonial mansions, and traversed by broad and level roads. The village near the station (*Union House*, good) has three churches in the old Puritan architecture. Stages run from the station to **Hampton Beach**, 3 M. to the S. E. (* Boar's Head Hotel, 300 guests; * Leavitt's Hampton Beach Hotel; Eagle House; and at the *Lower Beach*, the Ocean House, 160 guests; Couch House.) Besides the hotels, there are many small summer cottages on and near the beach. Boar's Head is a bold bluff 70 ft. high, which projects into the sea from a stony strand, and affords the best marine views on the N. H. coast. On the S. is the long and vague line of the beaches which front Essex North and stretch by Newburyport to Cape Ann, while Mt. Agamenticus is seen in the N. beyond Rye with its village of hotels, and the Isles of Shoals are off shore on the N. E. The Boar's Head Hotel is favorably situated on the little grassy plateau on the bluff, and has a fine sea-view. (See Whittier's poem, "Hampton Beach.")

From the vicinity of Boar's Head a sandy beach extends S. to Hampton River, where many vessels were made in the colonial days. The river forms a safe harbor for coasters, though its entrance is fringed with rocks and shoals. Its clams are famous, and water-fowl formerly abounded, while the settlement of Hampton was due to the abundance of salt hay on its marshes. Salisbury Beach begins on the S. shore of the river, and extends to the Merrimac. At half and low tide may be seen the rocks off shore, of which Whittier sings (in "The Wreck of Rivermouth") :—

"Rivermouth Rocks are fair to see,
By dawn or sunset shone across,
When the ebb of the sea has left them free
To dry their fringes of gold-green moss ;

" For there the river comes winding down
From salt sea-meadows and uplands brown,
And waves on the outer rocks afoam
Shout to its waters, ' Welcome Home.'

" Once, in the old Colonial days,
Two hundred years ago and more,
A boat sailed down the winding ways
Of Hampton River to that low shore."

North Beach lies to the N. of Boar's Head, and was formerly lined with fish-houses from which the hardy fishermen put out to sea in small boats. A road runs N. near this stony strand, to Little Boar's Head and Rye Beach. The beach at Hampton is composed, for the most part, of a gradual slope seaward of hard sand, affording fine facilities for surf-bathing and also for driving (at low tide). The favorite drives from Hampton, inland, are to Exeter, to the rich fruit-growing town of Greenland, to the ancient village of Hampton Falls, and to Stratham Hill.

The next railroad station is *N. Hampton*, in a sparsely populated farming town. Stages run throughout the summer to **Rye Beach** (the Ocean House was burnt in March, 1873; * Farragut House, by Mrs. Philbrick and Son, 250-300 guests, at \$3-3.50 a day; Sea View House, new, accommodating 150 guests; Washington House; the Surf House was burnt in October, 1872. There are also several first-class boarding-houses near the beach). Rye is the most fashionable of the N. H. beaches, and presents an agreeable alternation of sharp and storm-worn ledges with strips of sand on which bathing is safe and pleasant. On the S. is Little Boar's Head, a sea-beaten bluff on which several fine cottages have been built, together with a large private boarding-house. A long, sandy beach stretches N. E. from Jenness Beach to *Straw's Point*, which was bought a few years since by Gov. Straw, and is now occupied by the fine seaside cottages of several N. H. gentlemen. An extensive marine view is obtained from this point, from Boone Island Light on the N. E. to Cape Ann on the S., embracing nearly 40 M. of coast. The view of the Isles of Shoals on the E. is very satisfactory.

Drake is of the opinion that " the shore full of white sand, but very stony and rocky," near which Capt. Gosnold anchored (in 1602), was Rye Beach. The town of Rye was settled in 1635, and was named from the English home of some of the immigrants. In 1696 a flotilla of Indians attacked the people at Sandy Beach and killed or captured 21 of them. In the same year the colonists retaliated by attacking an Indian band while at breakfast. The hill where this action took place (to the r. of Greenland station) has ever since been called Breakfast Hill. The little town lost 38 men in the Revolutionary War. Large sea-walls of pebbles are seen near the Rye beaches, which were thrown up by the waves in the great storm which destroyed Minot's Ledge Lighthouse.

Beyond N. Hampton is *Greenland* station, in a small fruit-growing town. Station,

Portsmouth.

Hotels. * Rockingham House, a superbly frescoed and marble-paved hotel of the first class, accommodating 250-300 guests; American House; National House.

Railroads, to Saco and Portland ; to Newburyport, Salem, and Boston ; to N. Conway and the White Mts. ; to Manchester and Concord. *Stages* to Kittery and York. **Steamers** daily (in summer) in 1 hr. to the Isles of Shoals ; also to the Marshall House, at York ; a small steam ferry-boat plies between Portsmouth and the Navy Yard.

The site of Portsmouth was first visited by Capt. Pring in 1603, and afterwards by Capt. Smith in 1614. In 1623 it was settled (on Odiorne's Point) under the auspices of the Laconia Company. A small fort armed with several cannon was erected on Great Island in 1635. The town was called Strawberry Bank until 1653, on account of the abundance of strawberries which grew on its hills and around the "Great House" of the proprietor, Capt. Mason. The people chose Portsmouth as "a name most suitable for this place, it being the river's mouth, and as good as any in the land," although they probably accepted the idea from Capt. Mason, "the founder of N. H.," and proprietor of its islands, who had long been governor of the South Sea Castle, in the harbor of Portsmouth, England. The village was fortified with palisades which effectually guarded it from Indian marauders, who were repulsed by cannon in 1676. In 1696, a party landed near the Plains from a fleet of canoes and killed 14 Englishmen. In 1739, the town's-people firmly resisted the annexation of N. H. to Mass., and thus secured the provincial independence of the former. In 1746, a new 16-gun battery was built near Fort William and Mary, on Great Island, and a 9-gun battery was built at Little Harbor, to resist the expected French Armada. In Dec., 1774, Sullivan took Fort William and Mary by surprise (with Rockingham County volunteers), and carried away 100 barrels of powder and 15 cannon, and in 1775, the same gentleman led the 3d N. H. Regiment to the Continental camp at Cambridge. At the close of the Revolution, De Warville found here "a thin population, many houses in ruins, women and children in rags, and everything announcing decline." A brisk era of maritime prosperity soon carried the town to a higher level, and many fine mansions were built for the new families of consequence. But the Embargo, a succession of disastrous fires, and the decline of its commerce, fully checked this tide of prosperity, and the city (chartered in 1849) has long been losing ground. Between 1853 and 1870 it lost over 1,800 inhabitants.

Portsmouth, the capital of New Hampshire from 1712 to 1807, and its only seaport, is a quaint and pleasant old city (of 9,211 inhabitants), situated on a peninsula 3 M. from the mouth of the Piscataqua River. "There are more quaint houses and interesting traditions in Portsmouth than in any other town in New England." The Mansard mania has not reached these quiet and shaded streets, and the prevailing architecture seems to be that of the colonial days. There is a fine U. S. building here, also a few neat churches, while the Parade, or central square, exhibits two or three specimens of curious old architecture. The city has 4 banks, 9 churches, 2 daily and 3 weekly newspapers (of which the *N. H. Gazette* is the oldest American paper continuously published, having been established in 1756). There are also manufactories of shoes, carriages, furniture, cotton goods, &c. The quietness of the city, its salubrious sea-air, the pleasant drives in the vicinity, and the nearness of fine beaches, render Portsmouth a favorite and desirable summer-resort. The Athenæum (on Market Square) has about 12,000 volumes and a large reading-room. The old Church of St. John is worthy of a visit, and so is Gov. Wentworth's mansion at Little Harbor (2 M. distant). This is a large, irregular, and picturesque building (dating from 1750) which contains the old provincial council-chamber, and many quaint

relics of the past, among which some portraits by Copley will be noticed. George Washington paid a visit to this mansion while the Wentworths were still there (it passed out of their hands in 1817). Portsmouth Harbor is one of the best in New England, always free from ice, 70–80 ft. deep, and the river is $\frac{3}{4}$ M. wide opposite the city.

Portsmouth has given to American literature, T. B. Aldrich, J. T. Fields, B. P. Shillaber, and Eliza B. Lee; to the church, Dr. Nichols and Bishop Parker; to the bar, Judges Livermore and Langdon, and the Atkinsons; to the State, Gov. Benning Wentworth, Sir John Wentworth, and Senator John Langdon; and to the navy, Commodores Parrott and Long, and Commander Craven.

Opposite Portsmouth (steam-ferry frequently from the foot of Daniel St.) is the **U. S. Navy Yard**, on Continental Island, in the town of Kittery (Maine). It has extensive ship-houses, machine-shops, rigging-lofts, wharves, and barracks; also a dry-dock which cost \$ 800,000.

This city has ever been famed for its naval architecture. In 1690, the "Falkland," 54 guns, was built here; in 1696, the "Bedford," 32; in 1749, the "America," 40; in 1776, the "Raleigh," 32; in 1777, the "Ranger," 18; in 1784, the "America," a superb line-of-battle ship, which was presented by Congress to the King of France. During this century many war-vessels have been built here, chief among which is the frigate "Congress."

Kittery Point village, near the Navy Yard and Fort McClary, has the ancient Pepperell, Sparhawk, and Cutts mansions, fine old colonial houses, filled with the remnants of their quaint furniture. Pepperell's tomb is near the first-named.

Sir William Pepperell was born at Kittery Point in 1696. He rose rapidly in the colonial military service until 1745, when he commanded the expedition which took Louisburg, for which he was knighted. He occupied important positions in New England, was made a lieut.-gen. in the British army, and Gov. of Mass., and died in 1759. His grandson, Sir W. P. Sparhawk, assumed the Pepperell name and inherited the vast estates, which were sequestered in 1778, on account of his adherence to the British government in opposition to America.

The * **Isles of Shoals** are 10 M. from Portsmouth, and consist of 8 rocky islets (9 M. from the shore), the largest of which contains 350 acres. There is but little vegetation on these rugged ledges, which lift themselves out of deep water, and are surrounded by the purest and coolest sea-air.

The steamer leaves Portsmouth in the morning, and affords a fine retrospect of the city. The public works and national vessels at the Navy Yard are soon passed, and then the island-town of Newcastle (on the r.). This town was settled before 1630, and incorporated in 1693. It was the site of old Fort William and Mary, and now has the powerful Fort Constitution and the Portsmouth Light. On the l. Fort McClary is seen, on Kittery Point, and the Whale's Back Lighthouse is passed, with Frost's and Odiorne's Points on the r. As the steamer gains the open sea, the coast of Maine is seen on the N. W., trending away beyond Mt. Agameticus. The Isles are now rapidly approached. The * *Appledore House* is a great hotel on Appledore Island, accommodating 500 guests, at \$ 3.00 a day. An immense new hotel (the *Oceanic*, with 275 rooms) will be opened in the summer of 1873, on Star Island, the former site of the vil-

lage of Gosport. Several family cottages will be attached to the hotel, and leased by the season. On Star Island is a small cavern, where a woman once hid in a rocky recess while the Indians massacred the people of the settlement. It is said that she killed her two children to prevent them from discovering her to the Indians by their cries. Another point on the rocky shore was the favorite resort of a lady school-teacher, who was wont to read there, until Sept. 11, 1848, when a huge wave washed her away, to be seen no more. Fine trap-dikes are found on this island. 1 M. S. W. is *White Island*, with a powerful revolving light, 87 ft. above the water, and visible 15 M. away. Haley's (or Smutty Nose) Island is between Appledore and Star, and has the graves of 16 of the crew of the Spanish ship "*Sagunto*," which was lost here (in 1813) with all on board. *Duck Island* is 2 M. N. E. of Appledore, and is a rugged and dangerous mass of rock. Fine fishing may be enjoyed from boats about the islands, and yachts may be engaged at the hotels.

The Isles of Shoals were discovered by Champlain in 1605, and were visited by Argall in 1613, and by Smith in 1614. The last-named mariner named them Smith's Isles, but the present name was early adopted, and in 1623 "the Isles of Shoulds" are spoken of (derived probably from the shoaling or "schooling" of the fish around the islands).

The present Appledore Island was soon colonized, and in 1640 had a considerable village of fishermen, with a church and court-house. In 1661, it had 40 families, and in 1670 the people removed to Star Island for fear of the Indians, who nevertheless destroyed the colony in 1675. In 1647, "The humble petition of Richard Cutts and John Cutting; Sheweth — That contrary to an order or act of Court, which says that no woman shall live on the Isles of Shoals, John Reynolds hath brought his wife hither, also pigs and goats." The latter were removed by order of the Court, but the woman remained. Star Island was fortified, and an extensive fishing-business arose. The fish caught and cured by the islanders were sent mostly to Spain and to the West Indies, and by 1770, the town had over 500 inhabitants. In 1870, the population had dwindled to 94, and in 1872, Star Island was purchased and depopulated for the erection of a large hotel. Star, Londoner's, and White Island belong to New Hampshire, and the others pertain to Maine. On the night of March 5th, 1873, a fearful tragedy took place on Haley's Island (Smutty Nose). The men of the family residing there were in Portsmouth, and one Wagner (a Prussian) landed and murdered 2 of the 3 women then on the island. The third escaped in the darkness and hid among the rocks and snow.

York village is 9 M. N. E. of Portsmouth (daily stage; steamers run from Portsmouth to the Marshall House). It is a quiet and pleasant old maritime hamlet, with several ancient houses, and a slender-spired church which was built in 1748. 4 M. N. are two quaint old garrison-houses, — McIntire's and Junkin's, while the clayey valley of York River, being fertilized with sea-weed, has some fine farms, which are noted for their apples and cider. On a promontory between York Harbor and the ocean is the * *Marshall House*, a hotel accommodating 200 guests, with fine fishing in the vicinity. $1\frac{1}{2}$ M. from the village is **York Beach**, one of the best in New England, about $1\frac{1}{2}$ M. long and formed of gently sloping, hard, gray sand. The *Sea Foam Cottage* is a new hotel, accommodating about 100 guests, and there are 2 or 3 boarding-houses near the beach. At its

N. end Cape Neddick runs out into the sea, with a curious rocky islet called "The Nubble," off its point and separated from it by a deep, narrow, and tide-swept channel. The Bowden House is on the Cape, and is a favorite resort for gunners, while just beyond is the village of *Cape Neddick* (small tavern).

6-7 M. from York Beach (by a bad road through Cape Neddick) is *Mt. Agamenticus*, a lofty hill whence fine views of the ocean and of the White Mts. may be obtained. About 5 M. N. from the beach is * **Bald Head Cliff**, a remarkable rocky promontory, "second only to the Giant's Causeway in wild and majestic grandeur." The highly inclined strata of the ledges show long and regular stripes of vivid and variegated colors, while the action of storms and rolling surf has broken the cliff into curious shapes. The view from the *Pulpit* when a heavy sea is rolling is awe-inspiring, with such force do the great surges break on the rocks below. On its S. W. side the cliff falls sheer for 85 ft., to the water. Some years since, a new barque from Kennebunkport, being lightly ballasted, was driven in on Bald Head Cliff, and lost, with its crew of 14 men. *Boone Island* is seen off shore, with its lighthouse, 133 ft. above the sea. The Nottingham Galley, 10 guns, was wrecked on this island in 1710, and a horrid cannibalism sustained the life of the few men who were saved. The long *Ogunquit Beach* stretches from Bald Head Cliff to Wells.

York was settled about 1624, and in 1642 Sir Ferdinando Gorges established here the city of Gorgeana, with a full municipal government, and semi-yearly fairs, — to occur at the feasts of SS. James and Paul. Gorges was Lord Palatine of Maine, and vainly tried to establish a feudal system here. The death of Gorges and the rise of the English republic made it easy for Massachusetts to take possession of Gorgeana City in 1652, and 10 years later the province took away the city charter, and named the town York. It was then the chief place in Maine, and received a large addition to its population by the arrival of a detachment of exiled Scotchmen who had been captured by Cromwell at the battle of Dunbar. The Indians made frequent attacks on York, and in 1676 they destroyed Cape Neddick village and its people. Feb. 5, 1692, the town was attacked at dawn by 300 Indians and Frenchmen, who had marched from Canada on snow-shoes. Many of the villagers gained refuge in the garrison-houses, which were successfully defended while the remainder of the settlement was destroyed. After a bloody slaughter in the streets the assailants retired, leading 100 prisoners with them to Canada, after killing 75 of the people of York. Henceforth until 1744, the settlers kept guarded as if in a state of siege, and throughout Queen Anne's War (1702-1712), spy-boats patrolled the coast between Cape Neddick and Boar's Head. 3 companies from York went to the Louisburg campaigns, and on the morning after the battle of Lexington, 60 men marched thence to Cambridge. The town has retrograded during the past century, and has now a farming population of 2,654 persons.

Portsmouth to Concord.

Distance, 59 M.; fare, \$1.60; time, $2\frac{1}{2}$ - 3 hrs. The Concord trains leave their station near that of the Eastern Railroad, and pass out to the S. W., soon reaching the shore of Great Bay. Stations, *Greenland* and *Stratham*, a large fruit-producing town. From Stratham Hill a pretty view is afforded toward the White Mts. At *Newmarket Junction*, the line connects with the Boston and Maine Railroad (Route 38). The train then passes through the farming towns of

Epping, Raymond, Candia, and Auburn, to Manchester. From Manchester to Concord, see Route 29.

Beyond Portsmouth the train crosses the Piscataqua River, affording a pleasant view (to the r.) of the ancient city, and of the distant Navy Yard. Stations, *Kittery* (3 M. from Kittery Point), *Elliot* (a pretty farming-town), and **Conway Junction**, where trains diverge to N. Conway and the White Mts., 71 M. distant (see Route 31.). 3 M. beyond Conway Junction is *S. Berwick Junction*, where the Boston and Maine Railroad (Route 38) crosses the present route. S. Berwick village is 2 M. distant, and has considerable manufactures. Stations, *N. Berwick* and *Wells*.

Wells was founded in 1643 by Rev. John Wheelwright, who had been banished from Mass. for heresy. In 1676 the settlement was vainly attacked by Mogg Megone, and in 1692 a furious assault was made by 500 men, led by French officers. After a 48 hours' siege, the enemy, led by M. Burniffe, Gen. Labocre, and the Tarratine chiefs Madockawando and Egeremet, attempted to storm the fort, but were disastrously repulsed by the artillery and musketry of Capt. Converse's garrison. In 1703, 39 of the people of Wells were killed or captured.

Wells Village (*Ocean House*, 60-75 guests, \$10-12.00 a week) is about 4 M. S. E. of the station, and is finely situated on a high ridge overlooking the ocean. The houses are built along the old northern post-road, and are separated from the beach by Wells River. 1½ M. from the village (good road) is **Wells Beach** (*Island Ledge House*, \$3.00 a day; *Atlantic House*, 100 rooms, \$12-20.00 a week), a sandy strand, with rocky ledges off shore, furnishing good bathing and hunting. The view from the Atlantic House is grand, embracing Boone Island, Ogunquit Beach, and the trend of the coast from Bald Head Cliff to Cape Porpoise. A short distance S. of Wells is the ancient village of Ogunquit, with Bald Head Cliff beyond, while 4-5 M. N. is Kennebunk.

Stages run daily in summer from the station to the beach. The Boston and Maine R. R. has now a station within 1 M. of the Atlantic House.

Station, *Kennebunk* (restaurant), 3 M. from the village (*Mousam House*), which has several factories and shipyards, with 4 churches. 3-5 M. beyond are the maritime villages of *Kennebunkport* and *Cape Porpoise*. Large granite breakwaters are built out on each side of the mouth of the Kennebunk River, from which a beach runs W. 2-3 M. to the Mousam River. There are several small boarding-houses here (*Sea View, Beach*, and *Fairview Houses*). Near Cape Porpoise village (*Goose Rocks House*) is a group of small islands sheltering a good harbor.

This locality was first visited in 1602, and settled in 1629. In 1690 the provincial garrison on Stage Island was removed, and the Indians soon attacked the settlement, upon which the people withdrew to the fort. After a long siege by the Indians, a crippled man from the fort escaped by night in a leaky canoe to Portsmouth, whence aid was sent, and the people were taken off. The place was deserted for 9 years, and 3 years after its resettlement (1702) it was utterly destroyed by 500 Indians. In 1713 the town was again occupied, and in 1717 it was

incorporated by the Mass. Legislature, with the name of Arundel. After bearing this name for 104 years, the town discarded it for its present name.

Beyond Kennebunk the train reaches **Biddeford**, a city of over 10,000 inhabitants, with 4 banks (2 of deposit), 2 weekly papers, and 9 churches. Opposite Biddeford, and across the Saco River, is the city of **Saco** (Saco House), with 5,757 inhabitants, 4 banks (2 of deposit), and a weekly paper. The river has 55 ft. of falls between the cities, furnishing a fine water-power, which is utilized by the York, Pepperell, and Laconia cotton factories, running 175,000 spindles, with about \$3,000,000 capital, and employing over 3,000 operatives. Several hundred men are engaged in large machine shops, while great numbers are in the lumber-mills.

This district was first visited by De Monts in 1605, and Vines wintered here in 1617-18. Permanent settlements were made about 1630, and in 1675 the Sokokis Indians were repulsed with severe loss from the fort at the falls. In 1703, this fort was taken by another attack, led by French officers, and in 1708 Fort Mary was built. Biddeford was bought for £90 by Wm. Phillips, of Boston, and in 1718 received its separate incorporation, and was named for an English city whence came several of its settlers. It became a city in 1855. Saco was incorporated as Pepperellborough in 1762, and was named in honor of the knight who owned its territory. It was called Saco in 1805, and became a city in 1867. The celebrated Saco River regiment (5th Maine) was raised hereabouts in 1861, and served through the Secession War, being most distinguished for its brilliant bayonet-charge at Rappahannock Station, where it took hundreds of prisoners and the flags of the 8th Louisiana, and 6th, 7th, and 54th North Carolina regiments.

Saco Pool is about 9 M. from the station (7 M. for pedestrians, by Fort Hill and the ferry). The steamer "Augusta" runs twice daily from the pier below the falls, down the beautiful river to the Pool, touching at the *Ferry House*, a summer-hotel on the l. bank near the sea.

The * *Yates House* (200 guests, \$2.50 a day, \$12-20,00 a week) is at the Pool, together with several large boarding-houses (*Hussey's Ocean House*, *Holman's Highland House*, &c.). The village is on a peninsula opposite the hill on which are the ruins of Fort Mary (built in 1708). Near by is a quaint old house of the 17th century. The Pool is a broad and muddy-bottomed cove, which is very nearly land-locked, and is filled by each tide. There was formerly a popular belief that whosoever entered the Pool on the 22d of June would be cured of all disease. On the ocean-front near the hotels is a fine, sandy beach with good facilities for surf-bathing (rent of bathing-houses, \$1.00 a week), while a resounding rocky shore stretches around toward the harbor. N. E. of the Pool is *Stuge Island*, where a British frigate destroyed 5 vessels in 1814, and *Wood Island*, with a powerful revolving red light. Sojourners here often cross Saco Bay in small boats (in calm weather), to Old Orchard Beach, which is plainly visible.

The Boston and Maine Railroad (Route 38) crosses the present route at Biddeford, and tourists who wish to visit the Pool will find that route equally near.

After leaving Biddeford, the train crosses the Saco River and passes on to Saco station, with fine views of the sister cities on the r. 5 M. farther

on is W. Scarborough station, whence stages run in 3 M. to **Scarborough Beach** (Atlantic House, 50-60 guests; Kirkwood House, somewhat larger; both good houses; also several inexpensive boarding-houses). The beach is 2-3 M. long, hard, level, and safe for bathing, while the fishing offshore is very good. A fine piece of forest near the Atlantic House furnishes pleasant walks. Prout's or Libby's Neck (with two large summer boarding-houses) projects into the ocean from the S. end of the beach, while on the N. is Richmond's Island, off the mouth of Spurrink River, and Cape Elizabeth with its large hotels.

This town was settled about 1630, and in 1658 submitted to Mass. and adopted the English name, Scarborough, in place of its Indian name, Owascoag ("a place of much grass"). In King Philip's War it was defended by troops of Mass. against several Indian attacks, over 200 men being in garrison here. The troops were called away in 1676, and the enemy destroyed the town, and in 1677 240 Mass. soldiers were landed here. They were fiercely attacked, and defeated with the loss of 60 men and their commander, Capt. Swett. In 1681 a large fort (parts of which still remain) was built at Black Point, but the town was abandoned between 1690 and 1702. In 1703, the fort was attacked by 500 men under M. Beaubarin, but was defended by a brave little band from Lynn, while heavy rains caused the hostile mines to fall in. After over 100 English lives had been sacrificed by the Indians, Scarborough became firmly established, and in 1791 was as populous as Portland (2,235 inhabitants). The exodus from Maine has greatly weakened this town, which in 1870 had a population smaller by 544 souls than that of 1791.

6 M. beyond W. Scarborough (passing Scarborough and Cape Elizabeth stations) the train crosses Fore River, and stops at Portland.

Portland and its Environs.

Arrival. The Boston station is about 1 M. from the centre of the city, and a carriage should be taken, as the district to be traversed is unattractive.

Hotels. *Falmouth House, a fine structure on Middle St., \$3.50 a day; Preble House; United States Hotel. The *St. Julian is near the Falmouth, and is one of the best European-plan hotels, — rooms, \$1.00 a day, meals *a la carte*.

Horse-Cars on Congress St. from Vaughan St. to the Observatory every 15 minutes; from the Preble House, by Preble, Portland, and Green Sts., to Woodford's Corner (Westbrook); from Congress, by Spring, to Emery St.

Reading-rooms. The Y. M. C. Association, corner of Congress and Casco Sts.; the Portland Institute, in the City Hall, open 10-1, 2-6, 7-9 o'clock; the Athenæum, on Plum St.

Railroads. The Eastern R. R., to Portsmouth and Boston (Route 37); the Boston and Maine R. R., to Lawrence and Boston (Route 38); Maine Central (Portland and Kennebec) R. R., to Augusta and Bangor (Route 47); Maine Central (Lewiston Division) to Lewiston and Bangor (Route 46); Portland and Ogdensburg R. R., to N. Conway and Upper Bartlett (Route 39); cars of the Knox and Lincoln R. R., for Rockland (Route 44); Portland and Rochester R. R.; Grand Trunk Railway (Route 40).

Steamships. The Allan Mail Line runs between Portland and Liverpool from November to May, and from May to November between Quebec and Liverpool. Cabin-fares, \$65-80.00; third-class, \$30.00. Vessels of the International Steamship Co. run thrice weekly (Mondays, Wednesdays, and Fridays, at 5 P. M.) to Eastport and St. John, connecting with steamers for Annapolis and Halifax. Portland to St. John, \$5.00. A weekly steamer leaves for Halifax direct; fare, \$8.00. Semi-weekly steamers leave Brown's Wharf for New York; fare (including state-room), \$5.00. Daily steamers leave Atlantic Wharf at 7 P. M. for Boston; fare, \$1.50 (with state-room, \$2.00). Tri-weekly steamers leave for the Kennebec River, on Tuesdays, Thursdays, and Saturdays, at 7 A. M.; fare to Au-

gusta, \$1.50. Tri-weekly steamers also for the Penobscot River, stopping at the river-ports from Rockland to Bangor. The steamer "Lewiston" leaves Railroad Wharf semi-weekly for Mt. Desert and Machias (see Route 45). Smaller boats run semi-weekly to Boothbay, Pemaquid, Waldoboro, and Damariscotta (see Route 44); and several times daily to Peak's and Cushing's Islands. Excursion steamers frequently ascend Casco Bay to Harpswell.

Portland was settled in 1632, on the Indian domain of Machigonne, and was named Casco Neck until it passed under the Mass. government in 1658, when it received the name of Falmouth. In 1676, the settlement was destroyed by the Indians, and 35 of its people were killed and captured. The desolated village was repopulated in 1678, and received an accession of Huguenot immigrants from La Rochelle, but the Indians soon rose again, and in 1689 killed 14 of the town-guard on Munjoy's Hill. In the same year, the town was menaced by a large hostile force, but was delivered by the opportune arrival of Major Church, a skilful partisan officer, with troops from the Plymouth Colony. Church marched out to the vicinity of the Deering estate, and boldly engaged the enemy, who was put to flight after a sharp skirmish in which the Plymouth men lost 11 killed and many wounded. After Church had left the town (1690), the three main defences were attacked by 500 Frenchmen and Indians. One of them was evacuated and another was stormed. Fort Loyall, the largest fort on the coast (then on the present site of the Grand Trunk station), was fairly garrisoned and mounted 8 cannon. Having destroyed the village and most of its inhabitants, the fort was besieged for 5 days, and mined under the direction of the French officers. Ere the mine was sprung the fort surrendered, and the survivors of its garrison were taken to Quebec. Scores of the people were killed, and 100 were made prisoners. In 1703 the neighboring villages of Spurwink and Purpooduck were destroyed, and 55 people killed or captured. After the Peace of Utrecht, in 1713, the place was again occupied and grew slowly, the population of 720 souls in 1753 having increased to 2,000 by 1764. October 18, 1775, this prosperous town was bombarded by 4 British war-vessels (the Canseau, Cat, and others, under command of Capt. Mowatt, who had previously suffered some indignities here). Detachments of marines were landed, and between their incendiary labors and nine hours of cannonading from the fleet, 414 buildings were utterly destroyed, leaving but 100 standing. The rebuilding of Falmouth was commenced in 1783; in 1785, the "Falmouth Gazette" was started, "to advocate the independence of Maine" (then under the Mass. government); and in 1786 a town was incorporated here, with 2,000 inhabitants, under the name of Portland. In 1832 it became a city (population 13,000), and soon afterwards began the construction of great railway lines to the back country. An extensive foreign trade sprang up, principally with the West Indies, and the city grew rapidly in wealth and importance. On the night of July 4th, 1866, a disastrous fire swept away one half of the compact part of the city, causing a loss of \$10,000,000. Portions of the burnt district are still encumbered with ruins, but by far the greater part has been covered with new and elegant commercial buildings. Not satisfied with its connection with the West by the Grand Trunk Railway, Portland has contributed largely to the construction of the Portland and Ogdensburg Railroad, to secure part of the Western grain carriage, while a third grand route, called the Portland, Rutland, Oswego, and Chicago Railroad, has long been in contemplation.

Portland, the commercial metropolis of Maine (with 31,408 inhabitants and a valuation of \$30,000,000), is situated on a high peninsula in the S. W. end of Casco Bay. Its harbor is deep and well sheltered, and defended by three powerful forts, while several large islands beyond afford favorite resorts in the summer season. The peninsula on which the city is built is 3 M. long, and at the centre is little over $\frac{1}{2}$ M. wide. It is bounded by Portland Harbor and Fore River on the S. and W., and by Back Cove on the N. Bramhall's Hill, on the W. of the peninsula, is 175 ft. high; Munjoy's Hill, on the E., is 161 ft.; and the central part of the city is 57 ft. above the water. The Western Promenade looks down

on the rural environs from Bramhall's Hill, and from this point Congress St. runs down the length of the peninsula to the Eastern Promenade on Munjoy's Hill, from which fine views of the bay and islands may be obtained. Each of these promenades is 150 ft. wide, divided into sections, and planted with lines of trees.

The **City Hall** is a large and imposing building of light Nova Scotia stone, surmounted by a singular dome. Passing from this point up Congress St., with Lincoln Park on the r., the Roman Catholic Bishop's Palace is seen on the l., and the large Cathedral of the Immaculate Conception. Beyond St. Luke's Church (Epis.) on the l., a large building occupied by a graded city school is passed, and alongside of it the old Eastern Cemetery is seen.

Among those who are buried here are Commodore Preble and Captains Burroughs and Blythe. Edward Preble was born at Portland in 1761, and was an officer in the American Navy during the Revolution. He commanded the squadron which sailed to Tripoli in 1803, and humbled its piratical people by several bombardments of the city, at the same time averting the dangers of a war between the Emperor of Morocco and the United States. Burroughs and Blythe commanded respectively the American war-vessel, the "*Enterprise*," and the British brig, the "*Boxer*," which fought off Pemaquid in 1813. After a sharp action of 48 minutes, in which both captains were killed, the "*Boxer*" surrendered and was taken into Portland.

Just beyond the cemetery is the observatory on Munjoy's Hill, which should be ascended for the sake of its extensive * view (small fee to the keeper). To the S. W., on the heights beyond Fore River, is the fine castellated building of the *State Reform School*, with the plains of Scarborough and Saco beyond, and far down the coast is the blue cone of Mt. Agamenticus. Portland and its inner harbor lie to the S. and W., with Bramhall's Hill at the further end of the ridge. To the N. W. is the village of Gorham (Maine), over Back Cove and Deering's Oaks, and far beyond, 80 M. distant, the White Mts. may be seen in clear weather. N. E. are the numerous verdant islands in the blue waters of Casco Bay, with the bending shores of Falmouth and Cumberland. The lighthouse on Seguin Island, at the mouth of the Kennebec, 25 M. distant, is easily seen by the aid of the telescope suspended from the roof, while on the E. is the outer harbor, with Peak's and Cushing's Islands, and the massive fortifications. S. E. is Cape Elizabeth, with its summer hotels, and the Twin Sisters (Portland lighthouses). A short distance beyond the Observatory is the Eastern Promenade. The *Marine Hospital*, which may be seen from this point, is a fine building fronting on the Bay at Martin's Point.

The **U. S. Custom House** is an elegant granite building in the peculiar style which has been introduced by the architects of the present Administration. The inner hall, with its elaborate marble ornamentation, is worthy of a visit. A short distance N. E. of the Custom House are the

piers of the New York, Boston, and Liverpool lines of steamers, and the extensive terminal station of the Grand Trunk Railway.

The * **Post Office** is a beautiful structure of white Vermont marble, built in the mediæval Italian architecture, with an elegant upper portico supported by Corinthian columns. Though small, this is one of the richest and most pleasing of the national buildings in New England. In this vicinity are the stately buildings of the City Hall and the Falmouth Hotel, with many fine commercial buildings. Beyond the Mechanics' Hall a succession of fine residences are seen stretching up the slopes of Bramhall's Hill, on streets so thickly lined with shade-trees as to have given to Portland the name of "the Forest City." The trees in the central streets were destroyed during the great fire of 1866.

The Society of Natural History has good collections of shells, minerals, birds, &c. ; and the libraries of the Athenæum and Institute are often visited. There are several neat stone churches in the city.

The commercial facilities of Portland have been greatly increased by the construction of a marginal railway along the water-front of the city, with side-tracks running down the wharves. The chief naval visitor since 1775 was the leviathan steamship "Great Eastern," which is $\frac{1}{2}$ M. long and weighs 22,500 tons, yet it found ample depth of water here. The principal trade of Portland has been with Havana, vast amounts of shooks and sugar-barrels having been sent there, and repaid by return cargoes of sugar and molasses, which were worked over in large refineries in the city. Brown's sugar-house is the lofty building with many small windows, between the railroad station and the city. It was rebuilt within 60 days after the Great Fire. In 1870 there were received at Portland nearly 15,000 hogsheads of sugar and 45,000 hogsheads of molasses.

The city is supplied with water from Lake Sebago, 1 $\frac{1}{2}$ M. distant, which is 247 ft. above tide-water, and is said to have the purest lake-water in the world. 20 M. of pipes underlie the city and convey the water to all its parts. There are here 3 daily papers, 7 weeklies, and 3 monthlies.

Evergreen Cemetery is 2 $\frac{1}{2}$ M. from Portland (by stage or railway), and has pleasant woodland grounds covering 55 acres. There is a fine Gothic monument of Caen stone over the remains of William Pitt Fessenden, U. S. Senator from 1854 to 1869.

Portland was the birthplace of Henry W. Longfellow, the poet ; N. P. Willis, the poet and traveller ; Sara P. Parton (Willis's sister), who wrote popular essays under the pseudonym of "Fanny Fern" ; Erastus and James Brooks, the New York journalists and politicians ; Rear-Admiral Alden, who was distinguished in the naval battles at Vera Cruz, New Orleans, and Mobile ; Commodore Preble, who commanded in the Tripolitan War ; Capt. G. H. Preble, who fought in the Mexican and Secession wars ; John Neal, the poet and novelist ; and Neal Dow, the reformer.

Environs of Portland.

Cape Elizabeth is S. of the harbor, and stretches its rugged cliffs into the ocean. The drives over this surf-beaten promontory are very pleasant during the summer, and extend to the Twin Sisters lighthouses, at the end of the cape, 9 M. from the city. The *Cape Cottage* is 3 M. from Portland, and is a large and picturesque hotel, built of stone, and accommodating 100 guests (frequent stages to the city). The scenery is fine, embracing the shoreless ocean on one hand and the entrance to the harbor

on the other. 5 M. beyond this point is the *Ocean House*, a large hotel near a hard, sandy beach, with good facilities for surf-bathing. 10 M. from Portland is the *Atlantic House*, on Scarborough Beach. The *Portland Light* is $3\frac{1}{2}$ M. from the city, on a high bluff which commands broad sea-views. A steam-ferry runs from Custom House Wharf to Cape Elizabeth village, and $\frac{1}{2}$ M. from its pier is *Fort Preble*, a small but strong work on a commanding point. To the N. is the town of Cape Elizabeth, and $2\frac{1}{2}$ M. from Portland is the fine building of the *State Reform School*.

Steamers run several times daily (in summer) to the islands in Casco Bay. This is one of the pleasantest short marine excursions on the coast, and can be made in 3-4 hours, although it is better to go down on a forenoon boat, dine at the *Ottawa House*, spend the afternoon on Cushing's Island, and return on the afternoon boat.

The steamer leaves the pier and passes into the harbor, with Fort Preble on the low point to the r., and the more powerful works of Forts Scammel and Gorges on islands in front. Beautiful retrospects are afforded of Portland, rising in terraced lines along its hills. Casco Bay, over a small part of which the steamer passes, is one of the most picturesque of American bays, and some enthusiastic persons rank it next to the Italian Bay of Naples. It is popularly supposed to contain 365 islands (like Lake Winnepesaukee), and its green archipelago abounds in good fishing-places. Boats of all sizes, with experienced captains, may be hired in Portland. *Diamond Island*, about 5 M. from the city, is frequently visited by large parties, and has noble groves of old trees, with a bold, rocky shore opening occasionally in level strips of beach. Diamond, Pleasant, and Indian Coves are beautiful and sequestered inlets, bordered with beeches, maples, and oaks. *Peak's Island* is 4 M. from the city, and is a popular summer-resort for the people of Cumberland County. There are several small and inexpensive hotels here (*Casco House*, *Union House*, and others), and fine views of the city with its harbor and defences, the curving coast of Cape Elizabeth, and the shoreless ocean, are enjoyed.

* **Cushing's Island** is 3-4 M. from the city (frequent steamers), and is the outermost of the islands in this direction, facing the ocean. The * *Ottawa House* is the only one on the island, which covers 250 acres, and is composed of high bluffs. This hotel is a favorite resort for Canadians, who are usually in the majority here. The building is of brick, and accommodates 150 guests, at \$14-18.00 a week. The view from the cupola of the *Ottawa House* (for patrons only) is beautiful, including on one side the lovely islets of Casco Bay, then the level-horizoned ocean, the ship channel, and the bold shores of Cape Elizabeth. But the view over the harbor towards and including Portland is the most pleasing. The forts are seen in the foreground, Peak's Island on the r., and in the

remote N. W., if the day is clear, the White Mts. are visible. Sandy beaches for bathing, and rocks projecting in deep water, for fishing, lie along the shore. An embowered path leads along the ridge to the upper end of the island, passing through a fine cedar forest. The walk ends on the verge of a lofty precipice of storm-beaten rock (called White Head), commanding fine views of the ocean, the bay, and the city.

Steamers run occasionally in the summer up the length of Casco Bay, to Harpswell, a quiet old peninsular town rendered classic by Mrs. Stowe's romance, "The Pearl of Orr's Island," and by Whittier's poem, "The Dead Ship of Harpswell." Portland to Bangor and St. John, see Route 47 and 49.

38. Boston to Portland.

By the Boston and Maine Railroad. — Boston to Portland, 115 M. ; fare \$3.00.

After leaving the terminal station on Haymarket Square, Boston, the line crosses the Charles River, passes over Prison Point, in Charlestown, stops before the crossings of the Fitchburg and the Eastern Railroads, and reaches Somerville station. On Winter Hill, in this town, the captive army of Burgoyne was cantoned for many months. The city of Somerville was named in honor of Richard Somers, a brave naval officer, who was killed in the Tripolitan War. Leaving Charlestown Heights on the r., the line crosses the broad Mystic River, and stops at E. Medford, whence a branch line runs to Medford, a busy village interested in ship-building and other profitable industries. Tufts College, a flourishing institution under the care of the Universalist Church, is near Medford, and on Ship St. is a solid and low-windowed brick house that was built by Gov. Cradock's men in 1634.

Station, Malden (Malden House, Pratt's Hotel), the old "Mystic Side," and now an important manufacturing village near the clustering hills which were likened by President Dwight to "the sweeping flourishes of a graceful penman."

Adoniram Judson, the apostle of Burmah, was born at Malden in 1788. He spent 40 years in and near Rangoon, translated the Bible and other books into Burmese, and although he was at times chained and imprisoned, he succeeded in building up a powerful church with thousands of members.

Stations, Wyoming and Melrose, pleasant suburban villages of recent origin. Spot Pond, a favorite summer-day's resort, is less than 2 M. W. of Wyoming. Stoneham station is 2 M. E. of the village of Stoneham (Central House), to which it is joined by a horse-railroad. Stoneham has 22 shoe factories, and does a business of about \$3,000,000 a year. The main line next passes Greenwood, then runs along Crystal Lake (on the

l.), and stops at Wakefield Junction, whence a branch line diverges to the E., reaching Salem by way of Lynnfield and Peabody.

Wakefield to Newburyport.

A branch railroad runs from Wakefield Junction to Newburyport in 30 M. Leaving the elegant mansion and grounds of Cyrus Wakefield, and Wakefield Hall, his princely gift to the town, on the l., and the extensive rattan-works on the r., the branch line soon crosses the Saugus River, and enters Essex County. Stations, Lynnfield Centre, W. Danvers (where the Salem and Lowell Railroad is crossed), and Danvers. The latter is an ancient town, which was settled before the middle of the 17th century. The witchcraft delusion arose here in 1692, and in 1774 a strong British force was cantoned on Danvers Plains, in order to overawe Essex County. The town is now dependent on large shoe manufactories, with carpet-works and a rolling-mill. The train soon crosses the Salem and Lawrence Railroad, and runs N. through the thinly settled towns of Central Essex. Station, Topsfield (Topsfield House), settled in 1639, on the scanty intervals along the Ipswich River. Boxford, a sterile town, was incorporated in 1686, and has two box-factories. Station, Georgetown (Pentucket House), a bright and busy village E. of the railroad, with considerable manufactories of boots, shoes, and carriages. George Peabody, the eminent philanthropist, was employed in this town in his younger days (1812-13), and has evinced his pleasant memories of it by presenting to Georgetown a fine public library and fund. The Memorial Church is a monument of his filial regard. S. W. of the village is Bald Pate, the highest hill in Essex.

A branch railroad runs N. W. from Georgetown through the towns of Groveland and Bradford, to the city of Haverhill (7½ M.).

The train crosses the town of Newbury, and in 9 M. from Georgetown reaches Newburyport (see Route 37).

Wakefield was settled in 1639, and was for over two centuries known as S. Reading. In 1868 it assumed its present name in honor of a wealthy citizen who had greatly benefited it. Cyrus Wakefield introduced the rattan-working industry into this country, and has large factories here. His fine residence is seen near the track. The town has 4,135 inhabitants, and possesses several shoe factories.

Passing Lake Quana-powitt (on the r.), the train reaches *Reading*, devoted to the manufacture of shoes, cabinet-ware, organs, &c. Stations, Wilmington, Wilmington Junction (where the Salem and Lowell Railroad crosses the present route), Ballardvale (with factories making files, Bristol polish, and flannels), and **Andover** (*Elm House; Mansion House*). This ancient academic town was settled about 1643, on the Indian domain of Cochichewick, which was bought from the natives for \$26.64 and a

coat. Andover has some active manufactures, but is chiefly famed for its schools. The Punchard High School is a local institution of high standing. Phillips Academy occupies a fine building on the hill, and is of wide reputation. It was endowed by the Phillips family, in 1778, with \$85,000 and considerable landed estates, and has since occupied a prominent position. The Abbot Female Seminary is an old and famous school for young ladies. The **Theological Seminary** of the Congregational Church was founded about 1808, and soon after received liberal endowments (\$120,000 from Samuel Abbot and \$250,000 from William Bartlett). This institution has long been "the school of the prophets" for the sect to which it belongs, and has prepared its ablest divines for their work. Up to 1871 it had graduated 2,491 men, and in 1873 it had 7 professors and 81 students. It is under the Presidency of E. A. Park, D. D., a prominent divine, who is also the editor of the learned quarterly, the *Bibliotheca Sacra*, which is published here. Its buildings are very plain, causing the visitor to wonder "if orthodox angels have not lifted up old Harvard and Massachusetts Halls, and carried them by night from Cambridge to Andover Hill." But the situation is one of extreme beauty, and the grounds are quiet and abounding in trees. In front of the line of buildings is a long walk shaded by four lines of trees, near whose upper end is Brechin Hall, a handsome building of local stone, which contains a library of about 30,000 volumes, and a few curiosities. A copy of Eliot's Indian Bible, a superb copy of the Codex Sinaiticus, and various trophies from the mission fields are to be seen here.

John and Peter Smith came to Andover from Brechin, in Scotland, many years ago, and amassed large fortunes. They built and gave Brechin Hall to the Seminary, and erected noble schools in their native Brechin, on a hill which they caused to be named Andover Hill.

S. of the grounds, and near the Mansion House, is the old home of Leonard Woods, D. D., an eminent Calvinistic theologian, who taught in the Seminary, 1808 - 46, meanwhile holding controversies with the Unitarians on one side, the Episcopalians on the other, and the Baptists and Swedenborgians. The Printery and several dormitory buildings are on streets near by.

Andover was so named because its first settlers came from Andover in England. It supported 100 men in the Continental Army. Elizabeth Stuart Phelps, authoress of "Sunny Side," &c., and her daughter, E. S. Phelps, authoress of "Gates Ajar," &c., were born here.

There are pretty ponds in Andover, and the valley of the Shawshine River has some pleasant rural scenery, while the view from Andover Hill (at sunset especially) is highly praised. Many summer visitors stay here, partly attracted by the fine society.

After leaving Andover, the train arrives at S. Lawrence, opposite the city of Lawrence. Some of the through trains cross the river and enter

the city, while others do not, but proceed down the *r.* bank of the river to Haverhill. It is but a few minutes' walk over the Merrimac River, while from the bridge the traveller gets views of the great dam (on the *l.*) and of the long line of factories (on the *r.* and front).

Lawrence.

Hotels.—*Franklin House, a small but elegantly appointed hotel opposite the R. R. Station, \$2.50 a day; Lawrence Hotel; Essex Hotel.

This city was founded by the Essex Company in 1844, and contained, in 1845, 100, and in 1847, 3,000 inhabitants. A powerful stone dam was built across the river, giving a fall of 28 ft. and a water-power equal to 10,000 horse-power. A canal 1 M. long carries the water along the line of mills, parallel with the river and 400 ft. from it, and another long canal is cut on the *S.* bank. The principal factories are the Pemberton Mills, 28,000 spindles, 850 operatives; the Everett Mills, 31,000 spindles, 960 operatives; the Washington Mills, 62,000 spindles, 1,265 looms, and 2,900 operatives (using 1,300 tons of wool annually, making broadcloth, doeskins, shawls, cambrics, &c.); the Pacific Mills, 136,604 spindles, 3,762 looms, with a capital of \$2,500,000, employing 2,400 women and 1,200 men, making calicoes, lawns, dress-goods, &c.; the Atlantic Mills, 56,000 spindles, 1,538 looms, with \$1,500,000 capital, and 1,200 hands, making 16,640,000 yards of sheetings and shirtings; the Lawrence Woollen Co.; the Arlington Woollen Mills; the Russell Paper Co.; and several foundries.

Lawrence (28,932 inhabitants) is one of the three capitals of Essex Co., and is the most beautiful of the manufacturing cities of New England. The mills are separated from the city by the canal, and their great dependent boarding-houses are isolated by a wide green. The city has 18 churches, 5 Masonic lodges, 4 lodges of Odd Fellows, 3 weekly and 2 daily newspapers. The Common is a fine green square, with abundance of trees, having on its *N.* side the handsome Oliver High School and the Central Cong. Church. On the *E.* is the 1st Unitarian and Grace Church (Epis.), while on the *S.* are the elegant city and county buildings. In the base of the tower of the City Hall are two huge cannon-balls which were fired from the iron-clad fleet on the rebellious city of Charleston. The "Lawrence American," the leading daily paper of Essex Co., has a fine building. The city has good public libraries, several of which pertain to the cotton-mills. The valuation of Lawrence (1870) is \$17,500,000. On a street leading *W.* from the Common is the stately and elegant church of the Immaculate Conception (Roman Catholic) in the purest of the simpler forms of Gothic architecture. This church was six years in building, and is of a handsome gray stone, with interior arches, columns, and a lofty clere-story and spire of the same material. In its vicinity are several

Catholic institutions, which are powerful and highly beneficent in their workings among the factory populations.

The city was named from Abbot Lawrence, a wealthy and philanthropic Boston merchant, who was one of its founders. He was a member of Congress for 5 years, Minister to England 1849-1852, and endowed the Lawrence Scientific School (at Cambridge) with \$100,000. His son was Consul-General to Italy, 1862-9, and his brother Amos was eminent for his generosity, having given \$4-500,000 for charitable, educational, and religious works.

One of the most terrible accidents in American history took place here Jan. 10, 1860, when the Pemberton Mills fell, on account of thin walls and insufficient supports, and caught fire soon after, burning alive many who had been caught in the falling ruins. 525 persons were killed and wounded on that dreadful day.

The Lowell and Lawrence Division of the Boston and Lowell R. R. runs from Lawrence to Lowell, through the towns of Andover and Tewksbury. There are 4 trains each way daily, in 40 minutes. Distance, 13 M.; fare, 40 c.

The Manchester and Lawrence R. R. runs N. W. to Manchester, N. H., in 70 minutes. Distance, 26 M.; fare, 80 c. This line passes through *Methuen*, a flourishing highland village near the Falls of the Spigot River. About 3 M. beyond Lawrence the line enters the State of New Hampshire. Stations, Salem and Windham. The latter village is 2½ M. S. of the station. This town has a few large ponds, and Glebe Mt. (1,800 ft. high). Station, *Derry* (stages to village 2 M. E.), famous for apples. 200 city people spent the summer of 1872 among the quiet farms in this town.

Stations, *Wilson's* and *Londonderry* (stages to the village, 2 M. S.). This town was settled in 1719 by a colony of Scotch Presbyterians, from Ulster Co., Ireland, and was named for the old country Londonderry, in whose long and terrible siege several of the immigrants had been engaged. Before their settlement the district was called Nutfield, from the abundance of its nut-trees. On the first day of their arrival, the settlers collected under a great oak-tree, and heard a sermon from their pastor, after which they began to build their cabins. Although on the remote frontiers, the town was never molested by the Franco-Indian marauders, commands to that effect having been issued by the Marquis de Vaudreuil, Gov.-Gen. of Canada, who had been a classmate at college with McGregore, the Londonderry pastor. The first American resistance to Gen. Gage's troops was when a detachment marched from Boston to this place (46 M.) and captured several deserters from the British line regiments. The townsmen rose, and pursued the troops, and forced them to release their prisoners, who became residents of Londonderry. Colonels Reed, McCleary, and Gregg, and Gen. Stark (victor at Bennington), all of the Continental Army, were born here. The Scotch-Irish colonists introduced the potato, the foot-wheel, and the loom into New England. 6 M. beyond Londonderry Station the line enters the city of Manchester (see Route 29).

The *Lawrence Branch* (of the Eastern R. R.) runs from Lawrence S. E. to Salem.

The main line of the Boston and Maine Railroad follows (beyond Lawrence) the r. bank of the Merrimac River for 10 M., to the city of Haverhill, passing N. Andover and Bradford.

Haverhill (*Eagle House*; *American House*) is a handsome city, built on hills which slope down to the Merrimac River, which is navigable to this point (18 miles from the sea). In 1830, it had 3,912 inhabitants, and in 1870, 13,092. The principal business of the place is the manufacture of shoes, in which it is second only to Lynn. In 1869, 6,000 persons were here employed in this industry, and over 5,000,000 pairs of shoes were made.

Haverhill has 17 churches, two or three of which are quite handsome.

The new City Hall (on Main St.) is an imposing building, well adapted for the civic offices. From Golden Hill there is a fine view of the river and city, and of the ancient village of Bradford (famed for its academy for girls, now occupying extensive buildings on a far-viewing hill. This academy was founded in 1803, and was a nursery of missionaries' wives, — Harriet Newell, Mrs. Judson, and others). 1 M. N. E. of Haverhill, and in its rapidly extending suburbs, is the pretty *Lake Kenosha*, surrounded by hills. A neat stone club-house has been built on its banks by some Haverhill gentlemen. This lake was named, and has been written of, by the poet Whittier, who was born at Haverhill in 1807.

A fine *Soldiers' Monument*, with a statue of a U. S. soldier (heroic size) on a high pedestal, all in white marble, has been erected in the city, N. of the City Hall.

Gen. Moses Hazen, born at Haverhill in 1733, was an officer in the campaigns of Crown Point, Louisburg, and Quebec, and commanded the 2d Canadian Continental Reg. ("Congress's Own") from 1776 to 1781. He then moved to Vermont, and one of his descendants was Gen. W. B. Hazen, who long fought the Comanches, then commanded a brigade (1861–2) at the battles of Shiloh, Corinth, Stone River, Chickamauga, and Mission Ridge. In Sherman's march to the sea, he commanded the 2d division of the 15th corps, with which he stormed Fort McAllister, at Savannah, Dec. 13, 1864.

Haverhill was settled in 1641, on the Indian domain of Pentucket, by a colony led by Rev. John Ward, who came from Haverhill in England. The village church was scientifically fortified, but the town lost many men during Queen Anne's War. In 1698 the Indians took Mrs. Hannah Duston, with her nurse and her child (6 days old). The latter they murdered, and, after a long march through the forests, told the women that they were to be forced to run the gauntlet when they reached the village. That night Mrs. Duston, with the nurse and a young English boy, arose silently and killed 10 of the 12 Indians, scalped them, and dropped down the river in a bark canoe to Haverhill. In 1708 the village was attacked by 250 French and Indians, and 40 of its people were killed and captured.

The river-road to Newburyport runs by the side of the Merrimac, through a picturesque succession of hill-towns. Daily stages leave Haverhill for Newburyport, W. Amesbury, and Hampstead.

A railroad runs from Haverhill to Newburyport via Georgetown, in 16 M. 5 trains daily are run each way, in 40–60 minutes.

After leaving Haverhill the main line runs N. into New Hampshire. Stations, *Atkinson* (stage to Hampstead), *Plaistow* (stages to Sandown and Danville), *Newton*, and *E. Kingston* (stage to Kingston). These are all quiet farming towns in Rockingham County, N. H. Station, **Exeter** (good restaurant in the station; *Squamscott House*; *American House*), a pretty village of 3,437 inhabitants, at the head of navigation on Exeter River. Exeter was founded by Rev. John Wheelwright, who had been banished from Mass. for the heresy of Antimonianism. He bought this land in the wilderness from the Indians, but when it was annexed to Essex Co., Mass., in 1642, he was obliged to go into more distant exile. The Indians about Squamscott Falls migrated to the vicinity of Troy (on the Hudson) in 1672, but other and fiercer tribes menaced the village, and nearly 40 of the people were killed and captured during the later Indian wars. 38 men of Exeter died in the Continental Army. In 1781, Hon.

John Phillips founded Phillips Academy, and endowed it with \$ 134,000. Benjamin Abbot, LL. D., was preceptor of the Academy from 1788 to 1838, and Dr. Gideon L. Soule was preceptor from 1838 to 1873.

Among the distinguished men who have been prepared for college here are John Pickering, the jurist and philologist; Abiel Abbot; J. S. Buckminster, the popular divine; James Walker, the Unitarian theologian; Nathan Lord, D. D., President of Dartmouth College, 1828-63; A. H. Everett, LL. D., the accomplished diplomatist (to Belgium, Spain, and China); Nathan Hale, LL. D., the journalist; Leverett Saltonstall, LL. D.; J. G. Cogswell, LL. D., of the Astor Library; T. W. Dorr, the R. I. insurgent Governor; J. P. Cushing, President of Hampden-Sidney College, Va., 1821-35; Theodore Lyman, the philanthropist; Alpheus Felch, Senator from Michigan, 1847-53; Charles Paine, of Vt.; John P. Hale, one of the first antislavery senators (from N. H., 1847-53, and 1855-65); the eminent historians, Richard Hildreth, Jared Sparks, and George Bancroft; Edward Everett, the statesman and orator; Daniel Webster; and Lewis Cass, who was born at Exeter in 1782. An officer through the War of 1812, Governor of Michigan, 1813-31, Secretary of War under Jackson, Minister to France, 1836-42, Cass came near being elected President of the U. S. in 1848, receiving 137 electoral votes to 163 given for Gen. Taylor. He was U. S. Senator, 1845-8, and 1851-7, and from 1857 to Dec., 1860, was Secretary of State. His policy was steadily proslavery, but he favored the national government during the Rebellion. He died in 1866, at Detroit, where 54 years before he had been made prisoner by the British (with the whole Army of the Northwest) while a captain in the 3d Ohio Regiment.

The Academy buildings are pleasantly situated on an elm-shaded campus, and are mostly of the old-time architecture. The Robinson Female Seminary is also located in Exeter, and is of modern foundation and richly endowed.

Exeter is a farming town, and in the village are the Rockingham County buildings. The Squamscott Falls furnish a water-power which is utilized by works for the manufacture of cotton and woollen cloths, and carriages; also for large morocco tanneries, brass and machine works, and lumber-mills.

Stages run from Exeter to Kensington, Amesbury, Salisbury, and Newburyport (see Route 37); to Kingston, Sandown, Brentwood, Chester, and Fremont, tri-weekly; and to Hampton Beach (see Route 37) semi-daily in summer and September.

Stations, S. Newmarket, and *Newmarket Junction* (restaurant), where the Concord and Portsmouth track crosses the present route. Newmarket (*Washington House*; *Newmarket House*) is a village containing cotton and lumber-mills.

Tri-weekly stages run from Newmarket to Lee, Nottingham, Northwood, Epsom, Chichester, and Concord.

Station, *Durham*, the old Oyster River settlement, many of whose people were killed in various Indian raids during King Philip's War. In 1695, the village was carried by assault, though defended by 12 garrison-houses, and nearly 100 of its people were killed or captured. The town is now known for its excellent hay-crops, which are obtained from the deep argillaceous loam along the Oyster River. Over 1,000 tons are exported annually. Stations, Madbury, and **Dover** (*American House*; *New Hamp-*

shire House), a busy little manufacturing city at the lower falls of the Cocheco River. Dover has over 9,000 inhabitants, 3 banks, 11 churches, 4 weekly papers, and extensive manufactories. The Cocheco Mills employ 1,000 hands and 50,000 spindles, with a capital of \$1,300,000, and make 11,000,000 yards of cotton cloths yearly. The Cocheco Print Works, with 240 hands, print 16,000,000 yards yearly, and there are other branches of industry, the chief of which is the shoe business, in which 12 firms are engaged. Pretty views are obtained from the hills near the city, and the City Hall is a handsome structure.

Dover is the oldest place in the State, having been settled in the spring of 1623, on the point of land at the confluence of the Newichawannick and Belamy Rivers (4 M. S. E. of the city). The pioneer colony was composed of Episcopalians sent over by the Laconia Company, and they had much trouble with the Mass. Puritans. In 1641, Dover was annexed by Mass., and in 1679 was returned to N. H. The people had a man to "beate the drumme on Lord's days to give notice for the time of meeting" until 1665, when they built "a Terrett upon the meitting house for to hang the Bell." In 1657 they "chose by voet a Scoell-master," and in 1653 they built the meeting-house "40 foote longe and 26 foote wide." Major Walderne settled on the present site of the city, and built a strong garrison-house. Here he was visited in 1676, during a time when peace reigned in this region, by 400 Indians, two companies of troops being with him. He won the confidence of the Indians, and arranged a sham-fight between them and the colonial soldiers. When their guns were discharged the troops rushed in and disarmed them, after which 200 were sent to Boston as prisoners. Several of these were executed on Boston Common, and the remainder were sold into slavery in the West Indies. 13 years later a powerful Indian force seized Dover by night, and destroyed 4 garrisons, killing 23 and capturing 29 persons. Walderne, then 74 years old, and commander of the forces of N. H., they captured, and placed in a chair on a table within his own hall, where they slowly slashed him to death. The town was the object of other disastrous attacks during the Indian wars, but was never abandoned by its intrepid people.

Tri-weekly stages run from Dover to Barrington and Strafford (Bow Lake House), near Bow Lake (which covers 1,625 acres), and the Blue Hills.

Dover to Lake Winnepesaukee.

The Dover and Winnepesaukee Railroad runs to Alton Bay (28½ M). Stations, Pickering's, and Gonic (with stages running to Barrington, Strafford, and Barnstead). At Rochester (see page 213) connections are made with the Portsmouth, Great Falls, and Conway R. R., and with the Portland and Rochester R. R. Stations, Place's, and Farmington (*Elm House*), a shoe-manufacturing village near the Blue Hills, or Frost Mts. From the loftiest of these hills, Mt. Monadnock, the White Mts., and the ocean may be seen on a clear day.

Henry Wilson was born at Farmington in 1812. He was educated with money earned by his own labor, and settled at Natick (Mass.) in 1838, as a shoemaker. Declaring himself an uncompromising foe of negro slavery, his abilities soon won him honorable fame in the State politics, and after rising from one office to another for 15 years, he was chosen U. S. Senator in 1855. In 1872 he was elected Vice-President of the U. S. His most distinguished senatorial labors were in connection with the antislavery movement and the Kansas troubles, emancipation, reconstruction, and the conduct of the war.

After leaving Farmington the line passes three rural stations, and stops at Alton Bay, on Lake Winnepesaukee. The Bay View House is located here (\$10.00 a week and upwards), and has a large livery stable attached, with pleasant drives in the vicinity. (See page 218).

Stages run from Alton to the three villages (North, Centre, and Parade) of Barnstead; to Pittsfield, 15 M; to Lake Village and Laconia, 18-20 M.; and to Wolfboro, 10 M.

The fine iron steamer, "Mt. Washington," leaves Alton Bay on arrival of the trains, twice daily (in summer), for the villages on the lake. The distance to Centre Harbor is 30 M. (see Route 32).

The first station beyond Dover, on the main line, is *Rollinsford*, whence a branch track runs (in 3 M.) to the factories at Great Falls. Station, *Salmon Falls* (Franklin House), the seat of two cotton-mills at the falls on the Newichawannick River. At Salmon Falls the Boston and Maine Extension R. R. begins, and runs to Portland in 40 M., having been opened to travel in the spring of 1873. The Boston and Maine cars formerly ran from S. Berwick Junction to Portland over the rails of Route 37.

After passing N. Berwick, *Wells* is reached (in 14 M. from Salmon Falls). The station is about 1 M. from, and is the nearest route to, Wells Beach (Atlantic House; Island Ledge House), which is one of the best of the Maine beaches. Stations, *Kennebunk* (about $2\frac{1}{2}$ M. from the maritime hamlet of Kennebunkport), *Biddeford*, and *Saco* (see Route 37.) The train crosses the Saco River between the busy manufacturing cities of Biddeford and Saco, and bears away for 4 M. to **Old Orchard Beach** (* Old Orchard House, 400 guests, \$14-25.00 a week, -- telegraph, band, and ball and reading rooms in the house; * Ocean House, near the former, and of great extent; the Gorham and the Montreal Houses are less expensive). The track runs between the great hotels (on the l.) and the beach, and the station is very commodiously situated. Stages run from the beach to the Saco station on Route 37. This beach, which has been called the finest in New England, extends from the Saco River to Pine Point, at the mouth of Scarborough River, a distance of 10 M., with a breadth (at low water) of 300 ft. The sand is very hard and smooth, and affords an admirable drive-way, while from the absence of undertow, the surf-bathing is perfectly safe. Near the hotels is a beautiful forest-park of 30 acres, with pleasant paths, arbors, and rustic adornments. About 2 M. distant, on Foxwell's Brook, is a picturesque waterfall, 60 ft. high. The beach derives its name from an ancient orchard of apple-trees, the last of which died before the Revolution. Old Orchard is probably the most fashionable of the seaside resorts E. of Hampton and Rye, if not of all E. of Swampscott.

$5\frac{1}{2}$ M. from Old Orchard is *Scarborough* station, which is about 3 M. from Scarborough Beach. The train now runs over Cape Elizabeth, crosses Fore River on a long and costly bridge, and enters **Portland**, $6\frac{1}{2}$ M. from Scarborough, and 115 M. from Boston.

39. Portland to the White Mts.

Portland to N. Conway, 60 M., by the Portland and Ogdensburg Railroad. This line is now being pushed forward from N. Conway into the Crawford Notch. The company is constructing a through route from Portland to Montreal and Ogdensburg, for the transportation of passengers and of Western produce. It has already been built from Portland nearly to the Notch, from W. Concord through St. Johnsbury to Wolcott (in Vermont), and for some distance S. E. from Sheldon. Considerably more than half the track (in New England) has been laid, and the ends of the various sections are slowly approaching each other, the company being aided by liberal loans from the towns on the route.

The train leaves the union station in Portland under Bramhall Hill, and passes out to *Westbrook* (in a town of about 7,000 inhabitants), with several villages in which are manufactured cotton cloths, twine, wire, and iron goods, with large quantities of paper. Immense quantities of canned goods are prepared here, and the total manufactures of Westbrook amount to \$3,500,000 yearly. Station, *S. Windham*, in a town which was settled in 1737 and guarded by a Mass. fort. The Oriental Powder Works are located here, and the Mallison Falls on the Presumpscott River are S. of the village. Stations, *White Rock*, and *Sebago Lake*, whence steamers leave for Harrison.

Lake Sebago

is 14 M. long by 11 M. wide, and has a depth, in some parts, of 400 ft. 6 towns are on its shores, and others are located on the connecting lakes to the N. Fine steamers leave Pavilion Bay (at Lake Sebago station) and soon pass (on the r.) Indian Island, and Frye's Island, with 1,000 acres of forest. When the broader part of the lake is gained, "to the N. E., Rattlesnake Mt. is seen; and in the same direction, near the lake, is the boyhood home of Nathaniel Hawthorne. We also pass on our r. the 14 Dingley Islands. The scenery on the W. is wilder and more rugged. Saddleback Mt., in Baldwin, is plainly visible, from which the eye roams N. E., beyond the Great Bay, over the Sebago hills and farms and forests. Still farther N. is Peaked Mt., beyond which the view extends N. to Mt. Kiarsarge (Pequawket), so blue and cold in the hazy distance, while the White Hills may be distinctly seen if the day is tolerably clear." The passage across Sebago ("a stretch of water") occupies one hour, after which the steamer enters the rapid and devious Songo River. "It is but 2½ M., as the crow flies, to the head of the river, and yet we must sail 6 M. and make 27 turns." Picturesque contrasts of farm and forest, granite ledge and intervale, make the voyage on these narrow waters pleasant and novel. 5 M. from Sebago the steamer enters a lock at the confluence of Crooked or Pequawket River, which rises about 35 M. N. in the town of Albany. After rising several feet in the lock, the steamer passes N. into the Bay of Naples, near the head of which is Naples (*Elm House*), a small

village in a farming town. Before stopping at this place, the steamer passes through a drawbridge, and, after leaving it, it steams out on Long Lake. This is a river-like expanse of water 12-14 M. long and less than 2 M. wide. 9 M. from Naples the boat stops at Bridgton, whence a stage runs 1 M. W. to Bridgton Centre (*Bridgton House ; Cumberland House*). This is an important manufacturing village, with a weekly paper, a savings-bank, and three churches, in a town originally called Pondicherry, from the abundance of small ponds and wild cherries found there. This village has become somewhat of a summer resort in a quiet way, from its vicinity to the lake and to picturesque hill-scenery. The next stopping-place on the lake is N. Bridgton (*Lake House*), a small village on the stage line from Fryeburg to S. Paris. N. of this place is Waterford, (*Bear Mt. House ; Forest House*), a thinly settled town with 12 ponds and much picturesque scenery. The steamer now crosses the lake to Harrison (*Elm House*), a small hamlet at the end of the route. Daily stages run from Harrison to S. Paris on the Grand Trunk Railway (14 M. N. E.; fare \$ 1.00).

After leaving the Lake Sebago Station, the train passes the stations, *Richville* and *Steep Falls*, in the town of Standish, which was granted to and settled by veterans of the Louisburg campaigns, and named after the Pilgrim captain. Beyond Steep Falls, the line follows the valley of the Saco, and passes through the town of Baldwin (stations, *Baldwin* and *W. Baldwin*). The Great Falls of the Saco are seen from the train beyond W. Baldwin, near which the Ossipee River meets the Saco. The river falls 72 ft. in several successive pitches. The train now enters the town of Hiram, on narrow intervals along the Saco, and stops at Hiram Bridge (*Mt. Cutler House*). As the train crosses the old pine-plains of Hiram and enters Brownfield, occasional glimpses are caught of Mt. Pleasant, a few miles N. in Denmark. This is a lofty, isolated mountain, 8-10 M. around at the base, with a public house on its summit, from which the view is said to be fine, and by some it is held to be equal to that from Mt. Washington. The principal view is to the N. W. along the clustering peaks of the White Mts. Station, Brownfield (*Brownfield House*), whose farm-houses admit many summer visitors, Burnt Meadow and Frost Mts. being the principal objects of interest. Stages leave daily for Denmark, and for Bridgton, on Lake Sebago.

The plains along the river grow wider and more productive, as the train passes on to **Fryeburg** (*Oxford House*), a pretty village "on a broad, level plain, slightly elevated above the intervals of the Saco, which encloses it in one of its huge folds." Many summer visitors rest at the comfortable old hotel, while others are quartered in the boarding-

houses which are found in the village. The intervalles of Fryeburg are noted for their richness and beauty, and contain nearly 10,000 acres which are annually overflowed and fertilized by the Saco. On these meadows is the winter home of large droves of cattle who graze on the mountains during the summer. There are several thousand acres of forest in the town and it is claimed that Fryeburg has more standing timber now than it had 40 years ago. The principal points for excursions are Stark's Hill (500 ft. high), Jockey Cap, and Pine Hill, eminences near the village, which command panoramic views of the distant White Mts. and of Chocorua. Mt. Pleasant is 9 M. to the E., and is often visited for the sake of its noble over-view, and Lovewell's Pond is near the village (by the Pine Street road).

Capt. John Lovewell, the son of an ensign in Cromwell's Puritan army, was an able partisan officer of the colonies. In April, 1725, he led 46 men from the Mass. frontier towns by a long and arduous march into the heart of the Pequawket country. After marching over 100 M., they reached Saco (now Lovewell's) Pond with 34 men, and here they encamped for 36 hours, near the chief village of the Indians. On Saturday, May 6, while they were assembled around the chaplain on the beach, and ere the morning devotions had been finished, a gun was heard and an Indian was seen watching them. They left their packs near the pond, and advanced toward the intervalles, but met an Indian in the forest who shot and mortally wounded Lovewell, though his own death followed quickly. Meantime the Sachem Paugus and 80 warriors had found and counted the packs and laid an ambush near them, which completely entrapped the Americans on their return. The magnanimous Paugus ordered his men to fire over the heads of the invaders, and then to bind them with ropes. With horrid yells the Indians leaped forth and asked Lovewell if he would have quarter. "Only at the muzzles of your guns!" shouted the brave captain, and led his men against the unprepared enemy. They drove the Indians some rods, but were repulsed by a fierce counter-charge, in which Lovewell and 8 of his men were killed. Then the Americans retreated slowly, fighting inch by inch, to a position with the pond on their rear, Battle Creek on the r., and Rocky Point on the l. This sheltered position they maintained for eight hours against continual assaults, and at sundown the Indians retreated, leaving 39 killed and wounded, including Paugus, who fell late in the contest. Throughout the long day the yells of the Indians, the cheers of the Americans, and the pattering of musketry resounded through the forest, while Chaplain Frye, mortally wounded while fighting among the foremost, was often heard praying for victory. In the moonlit midnight hour the provincials retreated, leaving 15 of their number dead and dying on the field, while 10 of the 19 others were wounded. After suffering terribly on the retreat, the little band reached the settlements. The battle at Pequawket filled the northern tribes with fear, and caused some of them to move to Canada. A long and mournful ballad of 30 stanzas (like the old Scottish ballad of Chevy Chase) commemorates this forest-fight.

"What time the noble Lovewell came
With fifty men from Dunstable,
The cruel Pequot tribe to tame
With arms and bloodshed terrible.

"Ah! many a wife shall rend her hair,
And many a child cry 'Woe is me!'
When messengers the news shall bear
Of Lovewell's dear-bought victory.

"With footsteps low shall travellers go
Where Lovewell's Pond shines clear and bright,
And mark the place where those are laid
Who fell in Lovewell's bloody fight."

Fryeburg was granted to, settled by, and named for, Gen. Joseph Frye, of An-

dover, Mass., a veteran officer of the French wars. It was for many years the only town near the White Mts., and grew rapidly, having a weekly market-day which filled its streets with busy life. An academy was early established here (endowed by Mass.), and was taught in 1802 by Daniel Webster. Governor Enoch Lincoln lived here from 1811 to 1819, and wrote a long poem, entitled "The Village," which was "descriptive of the beautiful scenery of the fairest town on the stream of the Saco." A few Pequawket Indians lingered in this locality after the dispersal of the tribe, and did good service in the expedition of Rogers's Rangers against St. Francis, and in the Continental Army.

Stages run from Fryeburg to Paris, by way of Lovell, Sweden, Waterford, and Norway (30 M.); also by Bridgton, Harrison, and Norway (32 M.). These towns are all in the Pequawket country, and Lovell (2 small inns) has the beautiful Kezer Pond, which is 1 M. wide and 8 M. long.

After the train leaves Fryeburg, the mountain views in front and to the l. are fine. The line enters New Hampshire, and passes by Conway Centre to N. Conway (see page 223) and Upper Bartlett.

40. Portland to Quebec and Montreal.

Via the Grand Trunk Railway, which is owned and operated by an Anglo-Canadian corporation. This line is principally used for the transportation of freight, but it runs one through passenger train daily. Portland to Gorham, 91 M., in $4\frac{1}{2}$ - 6 hours; to Quebec, 317 M., in 19 - 20 hours; to Montreal, 297 M., in $17\frac{1}{2}$ - 19 hours.

The train leaves the spacious terminal station in Portland, near the Victoria Docks, and, passing around Munjoy's Hill, crosses the mouth of Back Cove. Thence it runs through the towns of Falmouth and Cumberland, near Casco Bay, and crosses the Maine Central Railway at *Yarmouth Junction*.

Station, *N. Yarmouth*, settled on the Indian domain of Wescustogo about 1640, and deserted in 1675 - 8, and 1688 - 1713, on account of the Indian wars. On returning in 1713, the settlers found a young forest covering their old fields and roads. Between 1725 and 1756 many of the colonists were killed or captured by the Indians. During the first half of the present century, the town grew and prospered, but during the past 20 years it has lost 16 per cent of its population. Stages run hence to Durham, on the Androscoggin.

Stations, *Pownal* and *New Gloucester*, the latter being a pretty and prosperous village which was founded by men of Gloucester, Mass., about 1735. At *Danville Junction* the Lewiston Division of the Maine Central Railway diverges N. E., and runs to Lewiston, Farmington, Waterville, and Bangor (see Route 46.)

Station, *Mechanic Falls*, near a small factory village, from which tri-weekly stages run to Sumner (18 M.; fare, 75 c.).

The Portland and Oxford Central Railway runs N. from Mechanic Falls, passing through the towns of Oxford, Hebron, Buckfield, Hartford, and Canton (three inns.). These towns were all settled in the latter years of the 18th century, and the last four named have been losing in population for 20 years. Canton was the

home of the Rockomeka Indians (who were exterminated by the small-pox in 1557), and was settled in 1792 under the name of Phipps-Canada. It is prettily situated near the Androscoggin River, and has some rich intervale lands.

The next station on the main line is *Oxford* (Lake House), from which tri-weekly stages run to E. Otisfield, Casco, and Naples.

Station, *S. Paris* (Andrews House), a busy village, with manufactures and a large country trade. Daily stages run hence to Fryeburg, 33 M. S. W. (fare, \$2.00), by way of Norway, Harrison, and Bridgton; also by way of Waterford. Stages run from every train to **Paris Hill** (*Hubbard House; Union House*), 3 M. N. E. This is a village on a hill 831 ft. high, where are located the Oxford County buildings. To the E. is Mt. Mica, where beautiful specimens of tourmaline are found, together with 15 other minerals. It is called "the most interesting locality of rare minerals in the State of Maine." Streaked Mt. is near by, and is nearly 1,800 ft. high. Stations, *W. Paris* and *Bryant's Pond* (small inn), from which tri-weekly stages run to Milton Plantation, Rumford, and Andover (21 M. N.; fare, \$1.50); also to Rumford, Mexico, Dixfield, and N. Jay (on the Androscoggin Railroad). Another line runs from Mexico through Roxbury to Byron. Rumford has some high hills, — White Cap, Glass-Face, and others, which yield thousands of bushels of blueberries annually. The **Rumford Falls** have been called "the grandest in New England," and have suffered but little from "improvement." The descent of the Androscoggin River is over 150 ft. in three or four plunges over ragged granite ledges. The third fall has a nearly perpendicular descent of 70–80 ft., and its roaring is heard at a great distance. There are three taverns in Rumford.

At Bryant's Pond station the track is 700 ft. above the sea, and the Pond itself is a pretty highland lake, from which flows the Little Androscoggin River. Station, **Bethel** (* *Chandler House*, accommodating 100 guests; *Chapman House*), a beautiful village in a town of about 2,200 inhabitants. The broad intervalles of the Androscoggin are outspread here in all their fertility and fairness, while noble views of the White Mts. in the W. are obtained from adjacent hills. There are also mineral springs (small hotel) in the town, and numerous summer boarding-houses, where comfort, quiet, and abundant country fare are given for the moderate price of \$6–10.00 a week.

Bethel has often been likened to N. Conway on account of its mountain-views and rich intervalles, and many city people spend their summers here to enjoy the air, the scenery, and the fine fishing in the vicinity. 12 M. S. of Bethel are the Albany Basins, where the Pequawket River has worn a wonderful series of reservoirs in the talcose rock, the largest of which is 70 ft. deep and 40 ft. in diameter. 18 M. N. E. of Bethel, by good roads and through pleasant river-scenery, are the Rumford Falls.

Bethel to Lake Umbagog.

Semi-weekly stage to Upton, at the foot of the lake, in 26 M. ; fare, \$2.50. The country traversed is mostly in a wild state and thinly populated, but affords some striking river and mountain scenery. The Androscoggin is followed for 6 M. to *S. Newry* (small inn), after which the road lies near the Bear River, and 6 M. beyond *S. Newry*, *Bartlett's Poplar Tavern* is passed. The Screw Auger Falls are about 3 M. from this point, and near Fanning's Mills. Beyond the Tavern the high hills of Grafton (chief among which are Speckled and Saddleback Mts.) appear to close across the road. But the Bear River is closely followed into **Grafton Notch**, a lonely pass among the frowning hills. The remarkable water-gorge known as *Moose Chasm* is situated in this notch. The small Cambridge River is now approached, and in its valley the road passes on to the lake. The township of Upton (formerly Letter B. Plantation, and made a town in 1860) is now entered, and the stage stops at the *Lake House*, on the shore of Umbagog. There are two other inns in this town, which has 180 inhabitants. A steamer leaves the Lake House on the arrival of the stage, and runs to *Errol Dam* (in N. H.), a rude lumbermen's village, with two inns. Dixville Notch is 10 M. N. W. of Errol, and the handsome village of Colebrook is 20 M. from Errol (by the Notch road). From Bethel to Colebrook (see page 243), the distance is about 60 M. (the excursion is not recommended for ladies).

The steamer ascends the Magalloway River from Errol Dam to Durfee's Landing (12 M.), whence adventurous parties of gentlemen have ascended to Parmachene Lake and Camel's Rump Mt., which overlooks a wide and desolate wilderness (see Harper's Magazine, Vol. XX.).

Bethel was settled in 1773, under the name of Sudbury-Canada, and here, in 1781, occurred the last Indian depredation in Maine, when a small war-party from St. Francis plundered the outlying houses, killed three men, and led three prisoners to Canada.

The next station beyond Bethel is *Gilead*, a small village on the fertile Androscoggin meadows, between two ranges of shaggy mountains. It was named for a great balm-of-Gilead tree within its borders, and in the early years was almost rendered untenable by bold raids of bears with which the hills were infested. On the night of the Willey slide in the White Mt. Notch (1826), immense avalanches fell from the mountains of Gilead, especially from Picked Hill. "The darkness was so intense as almost to be felt. The vivid lightnings and long streams of fire covering the sides of the mountains caused by the concussion of the rocks, only served to make the darkness more visible. The valley rocked as though an earthquake were shaking the earth."

Beyond Bethel the railway passes the village of W. Bethel and runs through the glens of Gilead to *Shelburne* (Winthrop House). From this point the mountain-views on the S. W. are fine, and the train runs down on the r. bank of the Androscoggin, with Mt. Moriah on the l. and Mt. Hayes on the r., to **Gorham** (see page 227). Station, *Berlin Falls* (small hotel), near the famous Falls on the river, and next to Berlin is *Milan*, "on the plains of Lumber-dy." The view down the river from Milan is very beautiful, including the vast forms of Mts. Washington, Adams, and Madison. E. of Milan is the town of Success, with 5 inhabitants, and N. of Stark, through which the train passes beyond Milan, is the town

of Odell, with about 25,000 acres and 1 inhabitant. The line now follows the Upper Ammonoosuc River, to *Northumberland*, and thence passes up the l. bank of the Connecticut River to Stratford and *N. Stratford*, with the Percy Peaks on the r. (see page 243). The line now crosses the river and runs through 15 M. of uninhabited forest in Vermont, to **Island Pond** (* *Island Pond Hotel*; *American*; *Green Mt.*); a village erected by the railway, which has spacious buildings here; this point being 149 M. from Portland and 148 M. from Montreal. The border custom-house is located here, and near the village and track is a pretty lake, 2 M. long and $\frac{1}{2}$ M. wide, surrounded by a hard, smooth beach of white quartz sand, with waters abounding in fish. About 12 M. beyond Island Pond, the train passes Norton Pond, and enters the Dominion of Canada. In the course of the next 33 M. the train passes 3 stations, and reaches *Lennoxville*, where the Connecticut and Passumpsic Rivers R. R. (Route 24) comes in from the S. 28 M. beyond Lennoxville is **Richmond** (on the St. Francis River), the seat of St. Francis College.

The *Quebec Branch* runs 76 M. N. E. from Richmond to Quebec. Station, *Danville*, a pretty rural village, with beautiful views from Claremont Hill and the Pinnacle (which is 3 M. from Danville, and rises 1,000 ft. from the plain). Kingsey Falls are 7 M. distant, and are often visited. Station, *Arthabaska*, whence a branch road runs 35 M. N. W. down the Becancour valley to Three Rivers, on the St. Lawrence. 10 M. E. of Arthabaska is *Rouillard Mt.*, whence a broad forest-view is gained, extending from the St. Lawrence 40 M. N. W. to the bright Lakes Aylmer and St. Francis, in the distant S. E. The train now passes on through a thinly populated country, and crosses the Chaudiere River about 8 M. from Quebec (2-3 M. from the Falls), and near the point where the Riviere du Loup Division (125 M. long) of the Grand Trunk Railway diverges to the N. E. The train stops at *Point Levi*, opposite Quebec, and passengers are carried across the St. Lawrence in ferry-boats.

Quebec, see Route 56.

From Richmond to Montreal the distance is 76 M. (almost due W.). After passing the copper-mining town of Acton, the train reaches **St. Hyacinthe**, 35 M. from Montreal. This is a curious old Franco-Canadian city, pleasantly situated on the plains on both sides of the Yamaska River. The Cathedral is a fine building, and the college is one of the best in America. "The course of studies here is said to be only equalled by the best Jesuit colleges in France." The *college building is an imposing structure of cut stone, 700 ft. long, and surmounted by a cupola. The fertile district between St. Hyacinthe and Montreal is inhabited by the descendants of the old French immigrants, preserving their language, customs, and religion intact. The railway stations on this tract are Soixante, St. Hilaire, St. Bruno, St. Hubert, and St. Lambert. The

singular mts. of Belceil, Yamaska, and Rougemont are passed, and at St. Lambert the train crosses the St. Lawrence on the * Victoria Bridge.

Montreal, see Route 54.

41. Portland to Farmington and the Western Maine Forest.

Portland to Farmington, 93 M., in 5 hours ; to the Rangeley Lakes, 133 M.

The train leaves the Portland and Kennebec station and runs over Route 47 to Brunswick, where it passes on to the rails of the Androscoggin Division of the Maine Central Railway. Stations, *Lisbon Falls* (a manufacturing village on the falls of the Androscoggin), *Lisbon*, *Crowley's* (whence a branch railroad diverges to Lewiston) *Sabbatisville*, and *Leeds Junction*. At this point the present route is crossed by Route 46, and close connections are made, so that passengers who prefer that route may avail themselves of it. For the next 12 M. the line runs through the town of Leeds, stopping at the stations, *Curtis Corner*, *Leeds Centre*, and *N. Leeds*.

Gen. O. O. Howard was born at Leeds in 1830. He graduated at West Point, and was an instructor there until the outbreak of the Rebellion in 1861. Leading the 3d Maine Volunteer Infantry into the field, he won distinction and a general's commission at Bull Run, and lost his right arm at the battle of Fair Oaks. He commanded the 11th corps of the Army of the Potomac at Fredericksburg, Chancellorsville, and Gettysburg, and then fought in the Georgia campaigns. He commanded the right wing of Sherman's army in the march to the sea, and since the war has been engaged in the work of bettering the condition of the negroes and Indians.

The next three stations (Strickland's Ferry, E. Livermore, and Livermore Falls) are in the long town of E. Livermore, where the train approaches the Androscoggin River. Livermore Falls is devoted to manufactures. This district was called Rockomeka, or "great corn land," by the Indians, and is distinguished for its fine breeds of cattle.

Just across the river is the town of Livermore, the birthplace of the brothers,—Israel Washburne, Congressman, 1851–61, and Gov. of Maine, 1861–3 ; E. B. Washburne, Congressman from Illinois, 1853–69, and Minister to France, 1869–73, an able statesman and skilful diplomatist ; and C. C. Washburne, Congressman from Wisconsin, 1856–62 and 1867–71, a successful general in the campaigns in the lower Mississippi valley, and chosen Gov. of Wisconsin in 1871.

Stations, *Jay Bridge* and *N. Jay* (stages to Dixfield and Bryant's Pond, on Route 40, in 37 M.), in the farming town of Jay, and *Wilton*, a manufacturing village, from which stages run W. 13 M. to *Weld* (Mondays and Fridays), a village (small inn) on the shore of a lake, with lofty mts. in the vicinity. Bear Mt. is on the S., Ben Nevis on the W., Metallic Mt. on the N., and Bald and Blue Mts. on the E., the latter being nearly 4,000 ft. above the sea, and 2,360 ft. above the village. Stages also run to Chesterville, on the E.

Beyond *E. Wilton*, the train crosses the Sandy River and its intervalles on a broad, curving trestle, and stops at **Farmington** (*Stoddard House* ;

Forest House ; Elm House). The town has 3,252 inhabitants, with 2 banks, a weekly paper, and 5 churches. This bright village is situated on the favorite grain-lands of the old Canibas Indians, and has also a lucrative lumber-trade. The Western State Normal School is located here; also the Little Blue School, the Willows (girls' school), and the Farmington Girls' School, so that this remote village on the edge of the Forest has somewhat of an academic air. The Franklin County buildings are also located here.

Stages run from Farmington to Temple; to Strong, Avon, and Phillips; to Strong, Freeman, and Salem; to New Vineyard, New Portland, and Kingfield; to Industry and Starks; to New Sharon, Rome, Belgrade, and Augusta.

New Portland and Kingfield (*Franklin House*) are picturesque but thinly populated mt. towns. Near Kingfield on the W. is the Mt. Abraham Range, 3,387 ft. high. The natural and civil histories of the Maine border towns are monotonously alike. They were mostly settled between 1775 and 1800, exhibited a slow growth until 1860, and then began to retrograde. The losses occasioned by the war, the great emigration westward, and the sterility of the New England race are the reasons generally assigned for this decadence, while the severity of the climate, the destruction of the forests, and the exhaustion of the soil, are self-evident natural causes of decline. Franklin County, through which the present route is laid, had nearly 2,000 more inhabitants in 1860 than in 1870, and in that same decade the State lost 7,872 in population. This has been Maine's loss, but the Union's gain, and natives of this State may be found in posts of trust and honor in nearly every large American community.

Farmington to the Rangeley Lakes.

The stage leaves on arrival of the Boston train, and follows up the Sandy River valley with Mt. Blue on the l., to Strong (*Farmer's Hotel*), whence another stage runs to Freeman and Salem. Mt. Blue is rounded on the l., and the stage passes through a thinly populated country to *Phillips* (*Barden House*). The village is situated in the valley, within an easy distance of Mt. Blue, and near some fine trout-streams. It is 18-20 M. from Farmington, and 20-22 M. from the lake. Travellers usually spend the night here, and take stage in the morning, passing through the town of *Madrid* (*Madrid House*). The Saddleback Mt., whose chief peak is nearly 4,000 ft. high, is seen on the r., and the stage reaches the *Indian Rock House* after passing through a dreary wilderness beyond. This forest tavern is on a favorite old Indian camp-ground, and is near the curiously bent and contorted strata of Indian Rock. Lake Oquossoc, or Rangeley, is 7 M. long, and its extreme width is 2 M. It is 1,511 ft. above the sea, and is surrounded by hills, prominent among which is Saddleback Mt., on the E. Moosetocmaguntic Lake is reached by boat, or by a rude forest-road from Indian Rock, and is 10 M. long by 2-4 M. wide. A chain of large lakes extends from Rangeley to Umbagog, embracing 80 square miles of water surface, and abounding with blue-back trout and other fish. Travelling in this remote wilderness is very difficult, and good guides should be obtained.

About 30 M. directly N. W. of Indian Rock, on a line which crosses the Ken-

nebago and Cupsuptic (famous trout-streams), is the iron post which marks the intersecting corners of Maine, New Hampshire, and Canada. A line of iron posts runs thence N. W. for over 80 M. to the Boundary Branch of the St. Francis River, marking the bounds between this part of the U. S. and Canada, as established in 1842.

42. Portland to the Upper Kennebec.

By either of the Routes 46 or 47 to Waterville, and thence by a branch railroad in 16 M. to Skowhegan. This line passes along the r. bank of the Kennebec, with the stations, Fairfield, Somerset Mills, and Pishon Ferry, all in the town of Fairfield.

The new Somerset Railroad is now in operation from W. Waterville (Route 46) to Norridgewock, a distance of 15 M., and is being pushed on to Solon.

Skowhegan (*Turner House*; the extensive Skowhegan Hotel was burnt in 1872) is a pleasant village in a prosperous town of about 4,000 inhabitants. It has 3 banks, a weekly paper, and 5 churches, and derives its importance from numerous manufactories situated on a large water-power. The Kennebec here falls 28 ft. perpendicularly over ragged ledges, with a picturesque island ending at the crest of the fall. The falls are best viewed from the point near the site of the Skowhegan Hotel, or from the carriage-bridge below. From the latter point there is a pleasant view down the river, the most prominent object being the graceful railway-bridge, while the stream near the Turner House is narrowed between high, rocky banks like a western cañon. It is said that the environs of Skowhegan furnish fine fishing in the line of trout and pickerel, while the rural scenery is bright and pleasing. The favorite drive is to Norridgewock (5 M.) by a fine river-road, returning by a river-road on the opposite bank, and affording beautiful views of the blue Kennebec.

Stages run from Skowhegan to Moosehead Lake, 50 M. (see Route 43); to Harmony, 20 M.; and to the remote forest-plantations of Flag-staff, Dead River, and the Forks.

Norridgewock (two inns) is a beautiful rural town, situated on both sides of the Kennebec, which separates its two villages. At the N. village, 5 M. from Skowhegan, are the old Somerset County buildings, with a broad river-side street on which stand some rare and immense old trees. The river is here crossed by a carriage-bridge and a fine railway-bridge. 5-6 M. above the village, and near the confluence of the Kennebec and the Sandy Rivers, is *Old Point*.

At Old Point was the chief town of the Canibas Indians, a powerful tribe of the Abenaki nation. As early as 1610 French missionaries from Quebec settled here, and in 1695 Sebastian Rale, a French Jesuit, came from Canada and became the spiritual and (practically) political chief of the tribe. Rale was a man of high culture, and had been Greek professor in the College of Nismes (in S. France). He prepared a complete dictionary (now at Harvard University) of the Abenaki language, which had diminutives and augmentatives like the Italian, and was "a powerful and flexible language, — the Greek of America." While the colonial government policy was generally equitable and fair toward the Indians, frequent gross injuries and cruelties were inflicted on them by irresponsible English adventurers. Hence a burning sense of wrongs endured and the

loss of their ancestral lands forced the Indians into a constant state of warlike fervor. It is said that Father Rale had a superb consecrated banner floating before his church, and emblazoned with the cross and a bow and sheaf of arrows. This was the crusading flag borne often and again over the smoking ruins of Maine and N. H. villages. In 1705 Norridgewock was destroyed by 270 colonial soldiers, who marched thither swiftly in winter by the aid of snow-shoes. At the close of Queen Anne's War (Peace of Utrecht) the Sachem of the tribe went to Boston, to demand workmen to rebuild the village-church, and an indemnity for the destruction of the houses. Mass. promised both, on condition that Norridgewock would accept a Puritan pastor, but the Sachem refused the condition. The Indians soon restored their homes, and suffered another plundering raid in 1722, for which the coast of Maine paid dearly. In 1724 it was seen that the tribe must be driven away before the coast-towns could be held securely, and in August of that year an atrocious attack was made on Norridgewock by 208 colonial soldiers from Fort Richmond. So carefully was the advance guarded by Harmon's Rangers and a company of Mohawks, that the village was surrounded, and the first intimation of the presence of the colonials was conveyed in a shower of bullets which swept through the streets. Some of the Indians escaped through the thin environing lines, but all who remained in the wigwams — men, women, and children — were massacred.

"The noise and tumult gave Père Rale notice of the danger his converts were in, and he fearlessly showed himself to the enemy, hoping to draw all their attention to himself, and to secure the safety of his flock at the peril of his life. He was not disappointed. As soon as he appeared, the English set up a great shout, which was followed by a shower of shot, when he fell dead near to the cross which he had erected in the midst of the village. Seven chiefs, who sheltered his body with their own, fell around him. Thus did this kind shepherd give his life for his sheep, after a painful mission of 37 years." (CHARLEVOIX.) When the fragment of the tribe re-entered the ruined village, they found Rale's body, horribly mutilated, at the foot of the mission cross. "After his converts had raised up and oftentimes kissed the precious remains, so tenderly and so justly beloved by them, they buried him in the same place where he had, the evening before, celebrated the sacred mysteries, namely, the spot where the altar stood before the church was burnt." (*Histoire Générale de Nouvelle France*.)¹ Bishop Fenwick, of Boston, erected a granite obelisk on the site of the church in 1833. After lying desolate for half a century, Norridgewock was settled by the whites in 1773.

Starks (Clifton House) is a farming town 10 M. N. W. of Norridgewock, with tri-weekly stages to Farmington, 13 M. W. (see Route 41). On the main stage-route (to the Forks) *Anson* is N. of Starks, and is a considerable, though failing village, with 3 small hotels and about 1,700 inhabitants. *Embsden* is a large but thinly settled town across the river from *Solon* (inn), a decadent town near Carritunk Falls, where the Kennebec narrows from 480 ft. wide to 40 ft., and falls about 20 ft. The stage-route passes through Solon, Bingham, Moscow, and Carritunk, to *The Forks*, a forest-village of about 150 inhabitants, 45 M. N. W. of Skowhegan.

Moosehead Lake is 25 – 30 M. N. E. of The Forks, up the Kennebec. The great Canada road (now but little used) runs N. W. from The Forks through the forest to Taschereau, a Canadian border-village, 50 – 60 M. distant. Thence the road follows the valleys of the Rivieres du Loup and Chaudiere, through Liniere, Aubert Callion, Vaudreuil, St. Joseph, St. Marie, St. Etienne, and Lauzon, to Quebec, more than 180 M. from The Forks.

There is a stage-route from Skowhegan to Dead River and Flag-staff Plantations to the E. and N. of Mt. Bigelow, about 40 M. N. W. of Skowhegan.

¹ See also Whittier's poem "Mogg Megone."

43. Boston or Portland to Moosehead Lake.

(a.) *By Skowhegan* (Route 42), whence daily stages run (in summer) to the Lake. Distance, 50 M. ; fare on the stage, \$3.50. This route passes through seven sparsely populated farming towns, with the aggregate number of 3,722 inhabitants.

(b.) *By Dexter* (see Route 46 or 47 to Newport, whence a branch railway runs N. in 15 M. to Dexter). **Dexter** (*Merchants' Exchange ; Dexter House*) is a prosperous village in a town of nearly 3,000 inhabitants, with woollen and other manufactories on the water-power given by the outlet of a large hill-pond. The town was settled in 1801, and has a savings-bank, a weekly paper, and 5 churches. The stage leaves Dexter in the morning, and passes through the thinly settled farming towns of Sangerville, Guilford, Abbott, Monson, and Shirley. The views of Monson Pond from Doughty's Hill, of Mt. Katahdin in the N. E., of the Lake from the heights above Greenville, and of the Mts. of Abbott and Monson, render this a very picturesque route. (Seats on the outside of the stage afford the best view.)

Tickets from Boston to Mt. Kineo and return (good for several weeks) by this route, may be bought for \$15.00, at 134 Washington St., Boston. Passengers leaving the Eastern R. R. station in Boston, at 8 P. M., or the Maine Central station in Portland at 12.30 A. M., arrive at Mt. Kineo at 6 o'clock next evening (time table of 1872).

(c.) *By Bangor*. By sleeping-car on the night-express to Bangor, arriving at 7 A. M. and breakfasting, then leaving for Guilford on the Bangor and Piscataquis R. R., at 8 A. M. .

(d.) *By steamer from Boston to Bangor* (Route 48), and thence as in (c). By this route 48 hrs. are required to get from Boston to the Lake. By either of the two last-named routes, the Bangor and Piscataquis R. R. is taken to Guilford. This line follows Route 49 to Oldtown, where it diverges to the N. W. and crosses the towns of Alton, Lagrange, Orneville, and Milo, to *S. Sebec*. Stages run thence (6 M. ; 50 c.) to Sebec, at the foot of Sebec Lake, a beautiful sheet of water 12 M. long. The steamer "*Rippling Wave*" runs daily down to the *Lake House*, a summer-hotel on a plateau near Granite Mt., in Bowerbank (leaving Sebec at 7.15 A. M., and the Lake House at 4 P. M. ; fare, 50 c.). There is good fishing from birch canoes and skiffs out on the lake, and picturesque mt. scenery on the shores. The Ebeme Mts. are N. of Sebec.

7 M. beyond S. Sebec is the station, *Dover* and *Foxcroft*, between two villages on the Piscataquis River. Dover (good inn) has nearly 2,000 inhabitants, and is the shire-town of the forest County of Piscataquis, which, with 3,780 square miles of territory, has but 14,397 inhabitants. Foxcroft (N. of the track) has 1,200 inhabitants, and a daily stage runs thence to Stedman's Landing (5 M.), connecting with the Sebec Lake steamer.

The train passes on 8 M. farther, to Guilford (*Turner House*) 61 M. from Bangor. The stage-route to Moosehead Lake leads thence for 23 M. over the same road as that from Dexter.

Moosehead Lake.

Greenville (*Lake House* ; *Eveleth House*) is a small farming village on the S. shore, and about 5 M. W. of Wilson Pond, which is famed for its trout. Here may be seen many lumbermen,—Americans, Indians, and Canadian and Acadian Frenchmen,—rude and stalwart foresters. “Maine has two classes of warriors among its sons,—fighters of forest and fighters of seas. Braves must join one or the other army. The two are close allies.”

Moosehead Lake is 35 M. long, from 4 to 12 M. wide, and contains 220 square miles. It is 1,023 ft. above the sea, to which its waters pass by the Kennebec River. The shores are monotonous and uncultivated, save where Mt. Kineo runs out into the lake, though distant mts. on either side give variety to the view. Except Greenville, at the S. end, there are no towns, plantations, or permanent settlements on these lonely shores. The fishing (trout, &c.) in these waters and in the neighboring streams is the grand attraction, though the moose-hunting has wellnigh passed away. In May, June, and early July the black fly is an unendurable annoyance, and city men should avoid the forest in that season.

Steamers leave Greenville daily for Mt. Kineo. Passing out of the long, deep cove in which the village is situated, the Squaw Mt. is seen on the l. and the steamer runs N. between Deer Island on the l. and Sugar Island on the r. E. of the latter is Lilly Cove, strewn with romantic islets and surrounded by mts. Beyond Sugar Island the great bay is seen to the S. W., through which the Kennebec flows outward toward the sea, while Spencer Bay opens to the N. E., with Spencer Mt. (4,000 ft. high) at its head. Katahdin may be seen to the N. E. on a clear day. The bold bluffs of Kineo are now seen ahead, and the steamer stops near its base and close by the hotel. The *Kineo House* is situated here (on a peninsula which runs from the E. shore to within 1 M. of the W. shore), and is a well-kept house, much frequented by Bostonians, and famed for its trout. The Blue Ridge lies W. of Kineo, and Brassua Lake, about 6 M. distant in that direction, is much visited by fishing-parties.

Mt. Kineo is very near the hotel, and is 6–700 ft. above the lake, with a vast, sheer precipice of purple flint running down to the water, and for over 1,000 ft. below. The mt. is quickly ascended (with a guide), and reveals a fine view of the Lake, with Squaw Mt. on the S., the Blue Ridge on the W., the Spencer and Lilly Cove Mts. on the S. E., and Katahdin on the N. E. The sandy beaches near the slopes of the mt. afford pleasant rambles.

At 16–18 M. N. of Mt. Kineo, over the desolate-shored North Bay, the end of the Lake is reached, and a well-travelled portage of 2 M. leads across to the Penobscot River. This river may be descended in a birch-canoe well guided (passing several rapids) to Chesuncook Lake, 20–30 M. N. E. Plain forest-fare and rude forest-life must be encountered here. Chesuncook is about 20 M. long and 1–3 M. wide,

and lies to the S. of the large Lakes, Caucomgomuc and Caucomgomosis, and the Allagash chain of lakes, the southernmost and largest of which is Apmogenagumook. Beyond Chesuncook (S. E.) Ripogenus Lake is traversed, then ensues a 3 M. portage, and then the river is descended for many leagues to Pemadumcook Lake, with Mt. Katahdin boldly prominent on the N. E. and N. This mt. is sometimes ascended to the canoe-guides, from the river, — a long and arduous journey. From Pemadumcook the widening river (more properly the W. branch of the Penobscot) may be followed to Mattawamkeag or Oldtown.

Good guides, a supply of provisions, and strong clothing are requisite for this tour, which requires 7–10 days, from Greenville to Oldtown. (See a vigorous account of this route by Theodore Winthrop, "Life in the Open Air," Chaps. VI. – XV. ; also Thoreau's "Maine Woods.")

44. Portland to Rockland.

By the Maine Central and Knox and Lincoln Railways, in 96 M. The train leaves the Portland and Kennebec station in Portland and passes over Route 47 to Brunswick. Stages run thence to Harpswell and Orr's Island. A few miles beyond Brunswick, the train reaches **Bath** (* *Sagadahoc House ; Bath Hotel*), a decadent old maritime city situated on the Kennebec River, 12 M. from the sea. Bath has 7,380 inhabitants, with a valuation of \$ 6,400,000, 7 banks, and a daily paper. It was formerly the fourth city in the republic in the shipbuilding business, and grew in wealth and prosperity until the decline of American commerce. This branch of industry was founded here in 1762, and was favored by the facility with which the best ship timber was floated down the Kennebec from the northern forests. In 1853 and 1854 the tonnage built here amounted to 107,854. The city has a fine harbor, rarely embarrassed with ice, and deep enough for the largest ships. The streets are irregular in their contour, and the settled district extends for over 3 M. along the W. bank of the river, being only about $\frac{1}{2}$ M. wide. The river at this point is over $\frac{1}{2}$ M. in width, and is rapid and deep. There is a neat Government building here, also the Sagadahoc County buildings.

The site of Bath was first visited by Capt. Weymouth in 1605. It was bought from Robin Hood, an Indian chief, by Rev. Robert Gutch, of Salem, who lived here from 1660 to 1679. The growth of the settlement was very slow until the close of the Revolutionary War, when an active lumber and shipping trade sprang up, which was but momentarily injured by the Embargo and the War of 1812. From causes which are national rather than local, Bath's leading industry has been checked, and the city is going quietly down hill with the other small maritime cities of New England.

Stages run daily to Arrowsic and Georgetown. Steamers run to Phippsburg, Georgetown, Arrowsic, Boothbay, Pemaquid, and Waldoboro.

The long peninsulas and narrow parallel islands which run into the salt water below Bath are very interesting in a historical point of view. *Arrowsic* is an island town with about 250 inhabitants, on 20,000 acres of land, much of which is salt-marsh. This island was settled and fortified in 1661, and its settlement was destroyed by an Indian raid in 1723. In another midnight attack, 50 houses were burnt, and 35 persons were killed and captured in the fort, which was stormed in the darkness. Months after, a detachment of soldiers landed to bury the dead, but were ambushed and rudely handled. *Georgetown* is an island town below Arrowsic, with similar annals of early adventure. *Phippsburg* is a long peninsula, stretching for about 12 M. from Bath to Bald Head Cape, bounded on the W. by

Quohog Bay, and on the E. by the widenings of the Kennebec. The Huguenot chief, De Monts, planted the cross here in 1604, and in 1607 Sir George Popham and Raleigh Gilbert (nephew of Sir Walter Raleigh) came here with 2 ships and 100 men. "They sayled up into the river neere 40 leagues, and found yt to be a very gallant river, very deepe," and then returned to this peninsula, where they landed and celebrated the service of the Episcopal Church, assembled around their chaplain. This is said to have been the first Christian service in New England. A line of cabins and a church were built, and Fort St. George was raised for their protection. After a quarrel between the colonists and Indians, the latter got possession of the fort, and plundered it; but having scattered around several barrels of powder (being ignorant of its qualities), it caught fire and exploded, destroying the fort and the Indians. The remaining aborigines, interpreting the fatal explosion as a Divine punishment, hastened to be reconciled with the colonists, whom they supplied with food all winter. The intense cold of the winter of 1607-8, the destruction of their stores, the dubious favor of the Indians, and the death of Popham and other leaders caused the colony to break up in the spring and return to England, having "found nothing but extreme extremity." The peninsula was resettled in 1716 by the Pejepscot proprietors, who erected here a stone fort 100 ft. square, made houses and roads, and established a line of communication by sea with Boston. A few years later it was destroyed by a sudden Indian attack, and the fort was demolished. The peninsula was again settled in 1737, and in 1814 was incorporated, and named in honor of Sir William Phips. The town has 1,344 inhabitants, largely engaged in fishing and shipbuilding, and its shores are rugged and irregular. Seguin Island lies off shore to the S. There are one or two small summer boarding-houses on the peninsula.

The 3d Maine Regiment, in the Secession War, was raised in the Kennebec Valley, between Phippsburg and Skowhegan. It was one of the bravest regiments in the army, was engaged in nearly all the great Virginian battles, and at Gettysburg alone lost 113 men. Howard was its first colonel.

At Bath the through cars for Rockland are taken across the Kennebec River on a large steam ferry-boat, and run on to the rails of the Knox and Lincoln Railroad at *Woolwich*, on the farther shore. This town was settled in 1638 on the Indian domain of Nequasset, and was depopulated by an attack in 1676. 50 years later it was resettled, and in 1759 was incorporated as Woolwich, so named from a resemblance of the Kennebec River at this point to the English Thames at Woolwich.

William Phips was born at Woolwich in 1651, and was a shepherd on its rocky hills. Learning how to read and write, and then acquiring the art of ship-carpentering, he rose in consideration and influence. In 1684 he sailed from London in a war vessel, to attempt the recovery of the gold from a sunken Spanish treasure-ship near the Bahamas. The quest was unsuccessful, but in 1687 he succeeded in recovering from the wreck \$1,500,000 in jewels and bars of gold and silver. He was knighted by the king, and received \$80,000 of the treasure. He commanded the expedition which took Port Royal from the French, and from 1692 to 1694 he was Gov. of Mass. In 1694 he died suddenly at London, where he had gone to render an account of his government. His activity, bravery, and enterprise enabled him to rise from the tasks of an unlettered shepherd on the Woolwich hills to the governorship of the chief British province in America.

Beyond Woolwich the train passes the country stations of Nequasset and Montsweag, and then stops at *Wiscasset* (Hilton House), a maritime town on the Sheepscot River, 12 M. from the sea. It has 1,978 inhabitants, 2 banks, and a weekly paper (the "Seaside Oracle"). The widenings of the river opposite Wiscasset afford a broad and capacious harbor, with 12-20 fathoms of water, and but rarely troubled with ice. It was

once talked of for a U. S. naval station. This town was laid under contribution by the British sloop-of-war "Rainbow," during the Revolution. Its palmiest days were between 1780 and 1806, when the maritime trade was very extensive, and many leagues of back country were dependent on it for supplies. This prosperity was ruined by the Embargo and the War of 1812, and Wiscasset is now only a pleasant village, fading slowly from its picturesque hills.

Daily stages run from Wiscasset to *Boothbay* (two inns), 9 M. S., another of the ancient peninsular towns. It was visited by Weymouth in 1605; settled in 1630; destroyed in 1688; and resettled in 1730. Its fine harbor was chosen for a naval station by the British government about 1770, but the outbreak of the Revolutionary War prevented national works from being constructed. The town has 3,200 inhabitants, who are mostly engaged in the fisheries, the coasting trade, and in shipbuilding. The village is very attractive, with islands in front guarding the noble harbor, in which, during long storms, 4-500 sail of fishing vessels sometimes take refuge. Many summer visitors rest at Boothbay, which is reached also by steamer from Bath. The steamer touches, *en route*, at *Southport* (Rosewood Cottage), an insular town inhabited by fishermen. The S. extremity of this island is Cape Newagen, whence the Damariscove Islands are seen on the E. *Westport* is another insular town, 11 M. long, to the W. of Boothbay, and inhabited by fishermen.

Beyond Wiscasset the train passes to the station, *Newcastle* and *Damariscotta*. A considerable settlement was made at Newcastle early in the 17th century, as is evinced by the traces still seen. It was probably destroyed by the French, and its memory has faded from history. Many years after this colony fell, another was established, which was destroyed in King Philip's War. A third settlement on the same site was destroyed in 1688, and the land lay desolate for 30 years. The town now contains 1,729 inhabitants, mostly engaged in manufacturing. *Damariscotta* (*Elm House*; *Maine Hotel*) was settled in 1640, and was a frontier post of the old Pemaquid Patent. It was often assailed by the Indians, and twice or thrice was abandoned. It was named for Damarine, Sachem of Sagadahoc (called Robin Hood by the English), and now is generally spoken of, in the country-side, as "Scottie." It has 1,334 inhabitants, and shipbuilding is the chief industry. The Damariscotta River separates it from Newcastle.

Stages run to Alna, Pittston, and Gardiner; to Jefferson and Augusta; to Bristol and Pemaquid. *Bristol* is a territorially large town, embracing nearly all the peninsula between the Damariscotta River and Muscongus Bay. It has about 3,000 inhabitants, and at the village of Round Pond are extensive oil-works.

Pemaquid.

On and near a rocky promontory in the extreme S. of Bristol is the site of the ancient colony of Pemaquid, than which no locality in New England has more of historic charm. The Maine Historical Society has explored these deserted shores, and the site and ruins of Fort Frederick have been secured for a monument to be erected in honor of the pioneers.

Capt. Weymouth visited Pemaquid in 1605, and kidnapped several Indians. 10 years later a furious war broke out between the Tarratine Indians and the Bashaba or Chief of the Western Maine tribes. The Bashaba and his family and council-

lors were put to death by a daring inroad of the Tarratines, but the tribes had become greatly reduced by the war and an ensuing pestilence. The Wawenocks (fear-naughts) occupied the peninsulas about Pemaquid, but were so reduced in strength as to be unable to prevent colonization. In 1630 it is said that a fort was erected here, and in 1631 the Pemaquid Patent was granted to two merchants of Bristol. In 1632 the pirate Dixey Bull entered the harbor, plundered the village, and carried away the vessels. Massachusetts sent an armed ship against him, but he was taken by a royal cruiser, and executed (probably) at London in 1635. In 1648 all this region was formed into a "Ducal State," and made an appanage of James, Duke of York (afterwards King James II.). No religious service but the Anglican was allowed. In 1635, the 16-gun brig "Angel Gabriel" was wrecked here, and in 1674 Sir Edmund Andros built Fort Charles, brought in many Dutch immigrants, and named the place Jamestown. It had then three long, paved streets, with several cross-streets, and was called "the metropolis of New England." The Indians remained tranquil during King Philip's War, until they had suffered grave affronts from the colonists, when they swept down on Pemaquid and utterly destroyed it. Many of the people escaped in boats to Monhegan, an island far out in the sea. In 1678 the place was reoccupied, and in 1689 it was again destroyed by the Tarratines, the 3 captains of the garrison having been killed. The point was reoccupied by 850 Mass. troops, and in 1692 Sir William Phips erected a stone fort here, mounting 18 guns, and called the strongest on the continent. This was named Fort William Henry, and soon repulsed an attack by 2 French 36-gun frigates. In 1693 13 Tarratine and Penobscot chiefs submitted at the settlement, and the village grew rapidly. In 1696 Iberville (having defeated an English fleet on the coast) attacked the place with a fleet bearing several hundred French regulars, some Mic-Mac Indians, and 200 Tarratines under Baron de Castine. After bombarding Fort William Henry from batteries on the opposite point and from the fleet, a breach was made and the fort was taken. The settlement was plundered and ruined, and the surviving inhabitants were led into captivity. It was soon settled again, and when Mass. took possession of Maine its people begged that Pemaquid might "remain the metropolitan of these parts, because it ever have been so before Boston was settled." In 1724 the ruined fort was somewhat repaired to defend the people in Lovewell's War, and in 1730 it was rebuilt under the name of Fort Frederick, by Col. Dunbar, surveyor of the King's woods in America. This officer had a fine mansion here, and laid out a new city, but was soon relieved on account of his arbitrary acts, and was made Gov. of St. Helena. Fort Frederick was attacked in 1745, and in 1747 it was assaulted by a French force, which was repulsed with heavy loss. The fort was destroyed by the people in the Revolutionary War, lest it should become a British post. In 1813 a sharp naval battle occurred off Pemaquid Point, when the American brig "Enterprise" was attacked by the British brig "Boxer." After a conflict of 43 minutes the "Boxer" surrendered, having suffered severe losses. In 1814 the place was attacked by 275 men in boats from the frigate "Maidstone," who were repulsed with such severe loss that the captain of the frigate was discharged from the British navy.

Ancient fortifications, streets, cellars, wharves, and cemeteries are found all over the Point, and many remarkable antiquities may be shown by the farmers near the now deserted point.

"The restless sea resounds along the shore,
The light land-breeze flows outward with a sigh,
And each to each seems chanting evermore
A mournful memory of the days gone by.
Here, where they lived, all holy thoughts revive,
Of patient striving and of faith held fast;
Here, where they died, their buried records live,
Silent they speak from out the shadowy past."

Pemaquid: a ballad.

After leaving Damariscotta the line passes through *Nobleborough* (3 stations) to *Waldoboro* (Medomack House), which was settled by 1,500 Germans in 1753-4. Their descendants still remain in the town, which has over 4,000 inhabitants. Station, *Warren*, a shipbuilding town, which

was settled by Scotch-Irish in 1736. Station **Thomaston** (*Knox House ; Georges House*), situated on a deep narrow harbor, and containing the Maine State Prison. The prison was established in 1824, and up to 1872, 1,100 convicts had served their time out, 390 had been pardoned, 18 had escaped, and in that year 128 convicts remained within its walls.

In 1720 a fort was built here (near the present railway-station), and garrisoned and armed with cannon by Mass. It was furiously attacked by the Tarratine Indians in 1722, and, an assault led by French monks having been disastrously repulsed, a mine was dug. This work was so unscientifically done that it fell in on the besiegers, who retired in confusion. In midwinter of 1723 it was again beleaguered vainly for 30 days, and in 1724 it was attacked by a fleet of 22 vessels (captured fishermen). A sharp naval skirmish was fought with colonial relief-ships, which were forced to retire, greatly damaged by the Indian artillery. But the fort still held out and repulsed every attack, and stood until the Revolution, when it was demolished by the British. Gen. Waldo (who died in 1759) obtained possession of the Muscongus Patent, embracing a tract of 30 M. wide on each side of the Penobscot, and settled the peninsula with Germans and Scotch-Irish. This tract came into possession of Gen. Knox through his wife, who was the heiress of part of it, and about 1793 he built here the finest mansion in Maine, and lived in baronial state, entertaining numerous guests with splendid hospitality.

Henry Knox was born in Boston in 1750, and became a skilful military engineer and artillerist. He was commander of the artillery of the Continental Army, engaged in most of the important battles and sieges of the Revolution, and was Secretary of War from 1785 to 1795. He originated the first and only order of American chivalry, the Society of the Cincinnati, was strongly aristocratic in his tastes, and demanded the observance of the etiquette of a palace at his manor in Thomaston. The Knox mansion stood close to the present railway-station (which was one of the offices of the estate), and was demolished in 1872.

Stages run from Thomaston to the ancient peninsular towns of Cushing and Friendship, on Muscongus Bay ; also to St. George, a historic old town, which projects into the sea, and is near the islands which Weymouth named St. George's (in 1604). Weymouth set up a cross (Anglican) on these shores, and wrote, "I doubt not . . . it will prove a very flourishing place [Maine] and be replenished with many faire townes and cities, it being a province both fruitful and pleasant." In 1724, 16 soldiers from the Thomaston Fort, led by Capt. Winslow, were ambushed and destroyed among St. George's Islands, and in 1753 a strong stone fort was built on this peninsula.

Beyond Thomaston the train soon reaches **Rockland** (*Thorndike Hotel*), a city of 7,000 inhabitants, with 1 national and 3 state banks, 2 weekly papers, and 8 churches. The city is pleasantly situated on Owl's Head Bay, S. of the Camden Mts., and looks out on Penobscot Bay. Ship-building is carried on here, but the chief industry is lime-burning, the city having 80 kilns, employing 1,000 men, and making 1,200,000 barrels yearly. The kilns should be seen by night.

Stages run to S. Thomaston and the bold cliffs of Owl's Head ; to St. George ; to Augusta, and to Camden and Belfast.

Steamers for Bangor, Portland, Mt. Desert, and Machias touch at this port.

Dix Island is a few miles from Rockland, and is a vast mass of granite. 600 men worked here in 1872, cutting stone for the New York Post Office, the stones being carved and numbered, all ready to swing into position. The immense monolithic columns of the U. S. Treasury building at Washington were cut here, and the vessels load directly from the sides of the ledges. It is thought that this granite is unrivalled for beauty, compactness, and uniformity.

Nearly half of the valiant Penobscot regiment (4th Maine) was raised at Rockland in 1861. It received a stand of colors from the ladies of New York, and lost

111 men at the Bull Run battles, 100 at the Fredericksburg battles, 138 at Gettysburg, and 184 on the first day of the Wilderness campaign. 316 of its members died in the service. Its colonel, H. G. Berry, became a major-general, and was killed at the head of his division (2d, of the 3d Corps) at the battle of Chancellorsville.

45. Portland to Mount Desert.

In stormy weather it is best to go from Portland to Rockland by rail (Route 44), and there take the steamer. Mt. Desert is 110 M. N. E. of Portland, and the fare to Bar Harbor is \$5.00.

Passengers leaving Boston by Route 37 (Eastern R. R.) at 6 P. M. Tuesday or Friday, will reach Portland in time for the steamer, which leaves at 10 P. M., or on the arrival of the train. The pier is near the station. Fares from Boston to Bar Harbor, or Machiasport, \$6.00; to Castine, \$4.00. See also Route 48.

The teamer "*Lewiston*" leaves Portland at 10 P. M. and passes over ordinarily quiet waters, outside the famous peninsular towns of Sagadahoc and Lincoln Counties, to Rockland, which is reached at 5 A. M. The tourist should arise as early as possible, to enjoy the scenery of Penobscot Bay. Leaving Rockland, with Owl's Head on the r. and the picturesque Camden Hills on the l., the steamer crosses the broad Penobscot Bay, between the insular towns of Islesborough and Vinalhaven, and at about 7 A. M. reaches **Castine** (two inns). This is a pretty village on a narrow peninsula projecting into the bay, and its history is of great interest.

Castine.

This peninsula was called Pentagoet, and was taken by the Plymouth Company for a trading-post. There was a Puritan fort here in 1626, and at a later day the place was taken by the fleet of D'Aulney, who had been sent out by Cardinal Richelieu and Razilla, to recover Acadia. D'Aulney built strong fortifications here, and withstood a long bombardment from two Mass. ships under Capt. Girling. The next few years are made romantic by the wars of the rival feudal lords, D'Aulney and La Tour, the one Catholic and the other Huguenot, in which Pentagoet and St. John suffered repeated sieges and attacks. In 1674 a Dutch fleet took Pentagoet after suffering some losses. In 1667 Vincent, Baron de St. Castin, formerly colonel of the Royal Carignan Regiment, and the lord of Oleron, in the French Pyrenees, came to Pentagoet, married the daughter of Madockawando, the Sachem of the Tarratines, and became the apostle of Catholicism among the tribes, who revered him more than his creed. In 1688 Sir Edmund Andros, with the "*Rose*" frigate, plundered the settlement, and St. Castin was ever after a bold enemy of Mass. In 1696 he led his Indians in Iberville's fleet against Pemaquid, which he destroyed. After living here for 30 years, he fought in the Nova Scotia campaigns of 1706-7, and then returned to France. His son by the Tarratine princess became chief of the Penobscot tribes, and was a peaceful, brave, and magnanimous gentleman, who ruled his wild subjects successfully until 1721, when he was led prisoner to Boston. He usually wore the Indian costume, but sometimes appeared in a superb French uniform. In 1722 he went to France, and took possession of his father's property, honors, and seigniorial rights, and lived until his death on his Pyrenean estates. Lineal descendants of the St. Castins have governed the Tarratines until the present (at least until 1860). The New-Englanders settled at Castine in 1760, and in 1779 it was fortified by 650 British soldiers. Mass. sent a powerful force against this point, consisting of 2,000 soldiers, in 24 transports, convoyed by 19 war-vessels, carrying 344 cannon. The Americans were twice repulsed from the peninsula, but after losing 100 men in a third attempt they landed and opened batteries. After several days of cannonading, 7 British frigates (204 guns) entered the bay, and bore down on the crescent line of American ships. After one broadside the American line was

broken, and a disgraceful *debandade* ensued. After a hot pursuit among the islands and up the river, every vessel of the great fleet was taken or destroyed, without resistance. The army straggled in broken squads to the Kennebec settlements, and Commodore Saltonstall was cashiered for the most shameful defeat which America ever suffered on the sea. Castine was held by the British from 1779 to 1783, and was again taken and held by 4,000 of their troops in the War of 1812. The history of Castine has more romantic interest than that of any New England town, and its soil abounds with the relics of 5 national occupations, while 5 naval battles have been fought in its harbor.

Castine is a wealthy town, with neat wide streets and fine residences. It is the seat of the Eastern Normal School, and has 3 churches. The chief business of the people is connected with the sea, in shipbuilding, coasting, or the deep-sea fisheries. Faint traces of St. Castin's fort are seen, and on the hill behind the village the English Fort George is well preserved. The remains of various American batteries and field-works are found on the peninsula, while the harbor is commanded by a neat little fort recently erected by the United States. Castine is a favorite summer-resort, by reason of its seclusion, its heroic memories, its fine boating and fishing facilities, and the salubrity of its sea-breezes.

From Castine the steamer turns S., and rounding Cape Rosier, passes through a narrow sound, and stops at *Deer Isle*, an insular town of 3,400 inhabitants, devoted to the deep-sea fisheries. The sound is then crossed to *Sedgwick*, a rugged and thinly inhabited town, beyond which the course is S. E. around Naskeag Point, and across the island-strewn Bay, with Mt. Desert looming in front, and the lofty Blue Hill (950 ft. high) on the N. Passing around the lower point of Tremont, **S. W. Harbor** is entered, and the steamer stops at a pier near a great lobster-canning factory. Leaving this point, the island shores are rounded, with their remarkable rock-bound cliffs and overhanging mountains, and **Bar Harbor** is soon reached (at about noon).

Mount Desert.

Hotels. At *S. W. Harbor*, Island House ; Ocean ; Freeman. At *Somesville*, Somes' Tavern. At *Bar Harbor*, Agamont House ; Bay View ; Hamor ; Rodick ; Rockaway ; Eden ; Atlantic ; St. Sauveur ; Ocean ; Newport ; Deering ; Kebo ; Wayside ; Green Mt. House. These hotels are more properly large boarding-houses, at which board may be obtained for about \$10.00 a week. There is always a sufficiency of food, but owing to the remoteness from market, there is not so much variety as might be desired.

Mount Desert is an island covering 100 square miles, and is distinguished for its wild and romantic scenery of mountain, lake, and shore, and for its curious and poetic history. Politically, it is divided into 3 towns, with an aggregate of about 4,000 inhabitants, on 60,000 acres of land. It is said that there is no point (except Rio Janeiro) on the Atlantic coast of the Americas, where such magnificent scenery is found, — the sublimity of the mountains challenging the eternal grandeur of the sea. There are 13 distinct mountain-peaks here, with numerous lakes, while a deep, narrow arm of the sea runs to the N. nearly through the island.

The sea-shore by Bar Harbor. The view from the village is very pretty, extending across the Porcupine Islands in Frenchman's Bay to the rolling hills of Gouldsbrough. There are beaches near the village, and on a high, rocky islet near by is the summer residence of Gen. Fremont. The beach rambles may be done by the water-side at low tide, but the chief points of interest are more easily and safely reached by the roads which follow the shore. *Cromwell's Cove* is nearly $1\frac{1}{2}$ M. S. of the village, and has bold cliff-shores, on one of which is seen the rock-figure called the Assyrian. The Indian's Foot (a foot-print in the rock) and the Pulpit are in this vicinity. 4 M. S. of Bar Harbor (by a road leading under Newport Mt. on the r., and with the Bay and the round-backed and bristling Porcupine Islands on the l.) is **Schooner Head**, a high, wave-washed cliff, with a white formation on its seaward side, which resembles a schooner under sail. It is said to have been cannonaded by a British frigate in 1812. The Spouting Horn is a passage worn through the cliff, through which the billows sweep in stormy weather, and form an intermittent fountain above the cliff. The Mermaid's Cave is S. of the Head, and $1\frac{1}{2}$ M. beyond is ***Great Head** (gained by a field-path to the l.), "the highest headland between Cape Cod and New Brunswick," with wonderful cliffs and chasms, and a broad sea-view. Newport Beach stretches beyond Great Head to Thunder Cave (entered only by boat), which is in the lofty Otter Creek Cliffs.

6-7 M. N. W. of Bar Harbor are the *Ovens*, a range of caves in the porphyritic cliffs on Salisbury Cove, where the sea has produced some fine effects of beach and worn rocks and bright and dripping ledges. The *Via Mala* is a long passage in the neighboring cliffs. At Hull's Cove (*Hull's Cove House*, \$7-10.00 a week), 2 M. N. of Bar Harbor, is a neat crescent beach, near which the Gregoires dwelt. Madame Marie Therese de Gregoire was the granddaughter of the Gascon noble, Condillac, to whom the King of France granted Mt. Desert in 1688. In 1785 she claimed and received the island, and lived here with M. Gregoire until her death (about 1810). From Point Levi, N. of the Cove, a fine view is given of Frenchman's Bay, which is 10-12 M. long and about 8 M. wide, with Newport and Schoodic Mts. on r. and l.; at its entrance, — "the Pillars of Hercules at Mt. Desert."

***Jordan's Pond** is 9 M. S. W. of Bar Harbor, by a road passing through Echo Notch. About 8 M. beyond the village a side road to the r. is taken, which leads to the lake, situated between the noble cliffs of Sargent's Mt. on the W. and Mt. Pemetic on the E., with the Bubble Mts. on the N. The banks of this lake furnish the most beautiful prospects on the island, with rare combinations of the charms of mountain-waters and mountain-cliffs. The lake is 2 M. long, and $\frac{1}{2}$ M. wide, and affords good trout-fishing.

Eagle Lake (so named by F. E. Church, the artist) is $2\frac{1}{2}$ M. W. of Bar Harbor, and is reached by a path leaving the road near Green Mt. It is 2 M. long, with Green Mt. on the E., Sargent and the Bubble Mts. on the S. and S. W., and the bold peak of Pemetic on the S. There are pretty sand-beaches on the shores, and the ascent of *Mt. Pemetic* may be made from the S. end. There are many trout in these calm and transparent waters.

* **Green Mt.** is near Bar Harbor, from which a road leads to the summit in 4 M. There is a small hotel on the summit, where accommodations for the night may be obtained. "The view from Green Mt. is delightful. No other peak of the same height can be found on the Atlantic coast of the U. S., from Lubec to the Rio Grande, nor from any other point on the coast can so fine a view be obtained. The boundless ocean on the one side contrasting with high mts. on the other, and along the shore numerous islands, appearing like gems set in liquid pearl, form the most prominent features in the scene. White sails dotted over the water glide slowly along. We know not what view in nature can be finer than this, where the two grandest objects in nature, high mts. and a limitless ocean, occupy the horizon. The name of Eden is truly appropriate to this beautiful place." 20 M. out on the ocean is seen Mt. Desert Rock, with its lighthouse bearing a fixed white light. In the W. are the numerous mts. of the island, with bright lakes interspersed, while the Camden Mts. are in the distance. It is said that Katahdin is sometimes visible in the remote N. (100 M. away). Frenchman's Bay, with its many islands, and the Gouldsborough Mts. beyond, is outspread on the E. It is claimed that Mt. Washington has been seen from this point, 140 M. W. Whittier thus describes this view (in "Mogg Megone").

"The hermit priest, who lingers now
On the Bald Mountain's shrubless brow,
The gray and thunder-smitten pile
Which marks afar the Desert Isle,
While gazing on the scenes below,
May half forget the dreams of home.

Far eastward o'er the lovely bay,
Penobscot's clustered wigwams lay ;

Beneath the westward turning eye
A thousand wooded islands lie,—
Gems of the waters !—with each hue
Of brightness set in ocean's blue.

There sleep Placentia's group,—and there
Père Breteaux marks the hour of prayer,

And there, beneath the sea-worn cliff,
On which the Father's hut is seen.
The Indian stays his rocking skiff,
And peers the hemlock-boughs between,
Half trembling, as he seeks to look
Upon the Jesuit's Cross and Book.
There, gloomily against the sky
The Dark Isles rear their summits high ;
And Desert Rock, abrupt and bare,
Lifts its gray turrets in the air,
Seen from afar, like some stronghold
Built by the ocean-kings of old ;
And, faint as smoke-wreath white and thin
Swells in the north vast Katahdin ;
And wandering from its marshy feet
The broad Penobscot comes to meet
And mingle with his own bright bay."

Newport Mt. is near the water, and commands a noble view of "the very many shadowy mountains and the resounding sea." The ascent is made from the Schooner Head road. Most of the other mts. have been ascended and furnish fine views, while the summit of Kebo ($\frac{1}{2}$ hr. from Bar Harbor) affords a charming prospect at sunset.

S. W. Harbor and Somes' Sound.

Besides the hotels at the Harbor there are large lobster-packing works near the steamboat wharf. 3 M. S. W. is the celebrated *Sea Wall*, a ridge of large stones thrown up by the sea, 1 M. long, 15 ft. high, and of great width. 5 M. W. is *Seal Cove*, a small harbor near a lake which is 4 M. long and very narrow, under the spurs of Western Mt. *Long Lake* is $2\frac{1}{2}$ M. N. W. from S. W. Harbor, and extends for several miles between Beach and Western Mts. *Denning's Lake* lies about 3 M. from the Harbor, and is 4 M. long, with Dog Mt. on one shore and the imposing Storm Cliff on Beech Mt. on the other. These 3 large lakes are said to be well stocked with fish, and by the near approach of the mts. they afford fine scenic effects.

Beech Mt. is often ascended from S. W. Harbor (a mountain road runs nearly to the summit). The view embraces Denning's Lake, Somes' Sound, the eastern group of mts., and Frenchman's Bay, on the E., with Long Lake, Western Mt., Blue Hill, Penobscot Bay, and the Camden Hills, on the W. The ocean-view on the S. is of limitless extent. The bleak summit of Dog Mt. and the easily ascended Flying Mt. command extensive prospects over Somes' Sound on the E. Sargent's Mt. and Mt. Mansell are sometimes ascended from this point.

Somes' Sound is an arm of the sea which extends up between the mt. ranges, for 7 M., with a width at its entrance of 2 M. The scenery here has been likened to the Delaware Water Gap, to the Hudson River at the Highlands, and to Lake George. This deep fiord is a favorite sailing ground, although caution is necessary on account of the sudden gusts which sweep down from the mts. "Somes' Sound enables us to sail through the heart of the best scenery on the Island." The Sound is well seen from Clark's Point, at S. W. Harbor, and a road leads near its shores to Somesville, at the N. end. After passing the gateway between Dog Mt. on the l. and Mt. Mansell on the r., a broader expanse is entered, with Beech Mt. on the l., and Green Mt. and the eastern group on the r. *Fernald's Point* is on the W. shore, and is a pleasant spot, with grassy lawns and a cold, clear spring. This was the seat of the Jesuit settlement of St. Sauveur, and Father Biard's Spring is still shown. There are picturesque cliffs on the mts. in the vicinity, and Flying Mt. rises on the W. **Somesville** (*Somes' Tavern*) is a small village prettily situated at the head of the Sound. The central lakes and mts. are easily visited from this point, and the boating and fishing on the Sound are much prized. Somesville is 6 M. from S. W. Harbor, 8 M. from Bar Harbor, and 4 M. from Fernald's Point.

In 1603 Henri IV. of France granted to the Sieur de Monts all the American shores between the present sites of Philadelphia and Quebec, under the name of Acadia. While De Monts and Champlain were exploring their vast domain, they

saw the peaks of this island, which was called *Monts Deserts* by Champlain. The priests Biard and Massé assumed too much authority at the Port Royal colony, and were sternly rebuked by its chief, Potrinecourt, who said, "It is my part to rule you on earth, and yours only to guide me to heaven." They threatened to lay the colony under interdict, and Potrinecourt's son so resented this that they left Port Royal on a ship sent from France by Madame de Guercheville, with other Jesuits on board. The mission band sailed to the S. "We then discovered that we were near the shore of Mt. Desert, an island which the savages call Pemetic. . . . We returned thanks to God, elevating the Cross, and singing praises with the holy Sacrifice of the Mass. We named the place and harbor St. Sauveur." (FATHER BIARD.) Historians differ as to the duration of the settlement, but it was finally broken up by Samuel Argall, Governor of Virginia, who surprised the place in a time of profound peace. His 14-gun ship entered the Sound "as fleet as an arrow," and took the French vessel after some cannonading, Father Du Thet having been shot down at a gun. The English now plundered the village, broke down the Jesuits' crosses, and carried such of the colonists as they could find, captives to Virginia.¹ Although granted by Louis XIV. to Condillac in 1688, the island was not resettled until the arrival of Somes in 1761. In 1762 Mt. Desert was granted to Gov. Bernard, of Mass., from whom it was confiscated during the Revolution because he was a royalist. In 1785, $\frac{1}{2}$ of the island was granted by Mass. to Sir John Bernard (the Governor's son), and soon after the greater part of it was given to the Gregoires, heirs of Condillac.

Mt. Desert to Machiasport.

After leaving Bar Harbor the steamer crosses Frenchman's Bay and rounds the bold Schoodic Point. The deep fiords of Gouldsborough and Steuben are seen on the N., with the peninsulas which here run out from the mainland, and Little Menan Island is passed, with its lighthouse, 109 ft. high. The maritime village of *Millbridge* (Atlantic House) is reached about 3 hrs. after leaving Mt. Desert. The steamer then crosses Narraguagus Bay to *Jonesport* (Bay View House), a peninsular town devoted to fishing and the coasting trade. Englishman's Bay and Machias Bay are now crossed, and *Machiasport* (Deering House) is reached (by 5 o'clock, P. M.). This is a shipbuilding village, with a railroad 8 M. long running into the lumber district of Whitneyville.

Machias (*Eastern Hotel* ; *Clare's Hotel*) is a manufacturing town of 2,530 inhabitants, on the Machias River, N. of the port. It was fought for by the English and French in the 17th century, and finally settled in 1763. The British war-vessel, the "Margaretta," was captured here in 1775, and Sir Robert Collier's fleet was repulsed in 1777 by the militia and the Passamaquoddy Indians.

46. Portland to Lewiston and Bangor.

Trains leave the Maine Central station on arrival of the Eastern Railroad trains from Boston, some of the cars from Boston passing over on to the rails of the Bangor line. One train daily runs to Bangor, and three trains to Lewiston.

¹ L'Escarbot, De Monts' Huguenot chaplain, is the only historian who justifies Argall's attack. This gentleman was a leading member of *L'Ordre de Bon Temps*, devoted to hunting, fishing, and feasting. All visitors to Mt. Desert should join this order (in spirit), and a series of scrambles over the mts. will render feasting possible, even with the frugal fare of the island hotels.

The train runs through the farming towns of eastern Cumberland County for 1½ hours, passing the stations, *Cumberland*, *Walnut Hill*, *Gray*, and *New Gloucester*. At *Danville Junction* the Grand Trunk Railway is crossed.

Station, *Auburn* (Elm House; Maine Hotel), a prosperous little city just across the river from Lewiston. Auburn became a city in 1869, and has a population of 6,166, with many large shoe-factories and other works. The Androscoggin County buildings are located here.

Station, **Lewiston** (* *De Witt House*, fronting on the Park, \$3.00 a day; *Lewiston House*), a manufacturing city of recent growth, having 13,602 inhabitants, with 3 banks and a daily paper. The new * **City Hall** (finished in 1872) is one of the finest municipal buildings in New England, and has a lofty and graceful tower surmounted by a spire. It fronts on the Park, near the De Witt House. A large water-power is derived from the falls on the Androscoggin River, and is utilized mainly by cotton and woollen mills. Over \$6,000,000 are invested in these works, which turned out \$33,750,000 worth of goods between 1861 and 1867. Nearly 4,000 hands are employed in these mills, which run 208,000 spindles, and turn out yearly 275,000,000 yards of cotton cloths, 600,000 yards of woollen goods, and 2-3,000,000 bags. Many French Canadians are employed here, and the number of young people in the city is quite notable. The bridge leading to Auburn commands a fine view of the *Lewiston Falls*, where the river breaks over a ledge of blackened gneiss and mica schist rocks. The natural fall is over 40 ft., and has been increased to 50 ft. by a strong granite dam which is braced against the rocky islets above the ledge. The water led off by the factory canals seems scarcely to be missed in the broad masses which thunder over the ledges.

A terrible legend is attached to these falls, to the effect that early in the last century a white hermit lived on one of the islands above. The Indians feared and shunned him, and plotted his destruction. The hermit learned their plans, and set a light, on the evening appointed for the attack, at a point below the falls. 50 Indians (so many from their great fear of him) dropped down in their canoes by night, intending to land by the camp-fire on his island. But seeing the light below the falls (his own fire having been put out), they steered confidently toward it, and when it was too late, found their canoes in the wild current over the falls. The legend says that not one of them escaped with life from that fearful plunge.

Bates College is back of Lewiston, and has three commodious new buildings. It was organized in 1864, is under the care of the Free-Will Baptist Church, and has a Theological School attached. There are 12 instructors and 103 students, with about 7,000 volumes in the library.

After leaving Lewiston the train passes through the farming towns of *Greene*, *Leeds* (where the Androscoggin Division crosses the present route), *Monmouth*, and *Winthrop* (Winthrop House). This is a pleasant village, near the Cobossee Contee Pond, which is 9 M. long and 1 M. wide, and

is dotted with picturesque islands. W. of the village is Mt. Pisgah, from which the White Mts. are seen. Close to Winthrop, on either side, are the North and South Ponds, while the blue hills of Dixmont may be seen in the N. E.

Station, *Readfield* (Craig House), the seat of the Maine Wesleyan Seminary and Female College, which was incorporated in 1823, and has 5-600 students (both sexes). Stages run to Augusta, Farmington, Fayette, and Chesterville. Station, *Belgrade* (Railroad House), in a town whose surface is largely composed of lakes. Besides the long Snow's Pond, which lies near the track (on the r.), there are several others, one of which is between Belgrade, Rome, and Vienna, and covers 25 square miles. This lake is quite picturesque, with irregular and broken shores, and several islands. Stations, *N. Belgrade*, *W. Waterville*, and **Waterville**, where the Augusta Division of the M. C. Railway unites with the present route (Lewiston Division).

Waterville to Bangor, see Route 47.

47. Portland to Augusta and Bangor.

Portland to Bangor, 138 M. Two through trains daily, and 4 trains daily to Augusta (63 M.). This is the favorite route from Portland to the East, passing through the valley of the Kennebec, and by Brunswick, Gardiner, Hallowell, and Augusta. The trains on the Eastern R. R. (Route 37) from Boston make close connections at Portland with this line, and some of the cars pass over on to its rails. Time is given at the Portland station for dinner.

After leaving Portland, the train passes over the suburban plains, and stops at *Woodford's* and *Westbrook*. The latter is a populous town, with 6,630 inhabitants (in 3 villages), and has large paper manufactories and works for canning corn, lobsters, &c. Crossing now the farming town of Cumberland, the line intersects the Grand Trunk Railway at *Yarmouth* (restaurant at the station), and then passes on to *Freeport*, a village at the head of Casco Bay, devoted to shipbuilding. The rural station of *Oak Hill* is next passed, and then the train enters **Brunswick** (*Bowdoin House* ; *Tontine Hotel* ; restaurant in the station).

Pejepscot was settled in 1628, under a patent from Plymouth, and was soon assigned to Mass., under whose protection a flourishing colony settled here. It was destroyed by the Indians in 1676, and afterwards the territory was bought of certain local chiefs. The conflicting claims between the Plymouth patent and this later purchase gave rise to the most long and vexatious lawsuit in the annals of Maine. The proprietors built Fort George at Pejepscot, and in consideration of £400 from the province and exemption from taxes for 4 years, they maintained at the colony a clergyman, a schoolmaster, and a sergeant with 15 soldiers. The fort was on the W. side of the Androscoggin River, at the Lower Falls, and was called the key of Western Maine, since it guarded the favorite pass of the Anasagunticook Indians. It was erected in 1715, after the town had been destroyed a second time (in 1690). In 1722 Fort George was flanked, and the town was once more ruined by the revengeful Indians. The Anasagunticooks migrated to St. Francis later in the century, and the district was soon reoccupied by the English, and in 1737 received the name of Brunswick.

Brunswick is a prosperous town at the falls and the head of tide-water on the Androscoggin River, and is built on two broad, parallel streets. It has 4,727 inhabitants, with 4 banks, several churches, a weekly paper, and numerous lumber-mills. The river here falls 41 ft. in 3 pitches, affording a large water-power, part of which is used by the Cabot cotton-mills.

Bowdoin College is located on an elevated plain near the railway-station. This institution was incorporated in 1794, and opened in 1802, with an endowment from the State of 5 townships and \$19,000 a year for 5 years. It has at present 29 instructors and 164 students, exclusive of 70 students in the medical department, with a library of about 34,000 volumes. There are good collections of shells, minerals, and other objects. The conspicuous building with two spires, which stands near the centre of the line, contains the handsomely frescoed chapel, the museum of the Maine Historical Society, and the gallery of paintings. Nearer the station is a large and attractive Memorial Hall built of stone, and the Medical School is across the road, and near the Congregational Church. The pine-groves in the rear of the college are widely known for their sombre beauty, and afford favorite walks for the students.

The Bowdoin Gallery of Paintings. Pierre Baudouin was a Huguenot gentleman from La Rochelle, who landed at Portland in 1687. His grandson, James Bowdoin, was a friend of Franklin, an ardent patriot, and Gov. of Mass., 1785-6. James Bowdoin the son of the last-named, was a scholar and diplomatist, and at his death he left to this college 6,000 acres of land, \$6,000 in money, and his extensive library, philosophical apparatus, and picture-gallery. Some of the paintings have been restored with questionable effect.

2, Venus equipping Cupid, *after Titian*; 3, Continnence of Scipio, *N. Poussin* (perhaps only a fine copy); 5, 6, Studio scenes; 10, Sacking a town, *Flemish School*; 11, Italian scene, *Vambrome*; 12, Surgeon and patient, *attributed to Brouwer*; 13, Sleeping Cupid, *Pupil of Guido Reni*; 15, Italian landscape, *N. Berghem*; 14, 16, Landscapes; 17, Infant John the Baptist, *Stella*; 18, Dutch Dairy Women, *Flemish School*; *19, Interior of a church, *Flemish School*; 21, Poultry, *Hondekoeter*; 22, Seven Ages of Man, *Hogarth*; 23, Old Tower, *Hogarth*; 24, Ruins, *Hogarth*; 25, The Women at the Sepulchre, *Simon Vouet* (painted on copper); 28, View on the Campagna; 30, James Madison, *Gilbert C. Stuart*; 32, Artillery, *Wouvermans*; **The Governor of Gibraltar, *Van Dyke* (one of his best portraits; the college has refused \$30,000 for it); 35, The Head of John the Baptist in a charger, *after Guido Reni*; 36, The Saviour, *copied from a picture in the Roman Catacombs*; 37, Mirabeau; 38, Adoration of the Magi, *after Rubens*; 39, Descent from the Cross; 40, John in the Wilderness; 44, *Holy Family, *either by Raphael, or a fine copy*; 45, Translation of Elijah; 46, Simon and the child Jesus in the Temple, *possibly by Rubens*; 50, A Scene in the Inquisition, *Flemish School*; 51, Venus and Adonis, *after Titian*; 53, Cleopatra; 56, *The Angel delivering Peter from prison; 57, Diana and Endymion; 58, Venus receiving gifts from Ceres, *attributed to Rubens*; 59, Fox and Pheasant; 60, Combat of Hyena and Dogs; 62, Adoration of the Magi, *Domenico Franco*; 63, Esther and Ahasuerus, *Franco*; 64, Marine view, *Flemish*; 65, Discovery of Achilles, *Teniers*; 66, Landscape, *Dutch*; 67, Turkish sea-fight, *Mauglab*; 68, Morning on the coast, *Laroix*; 70, Cattle, *after Paul Potter*; 70-89, Portraits of the Bowdoin, who claimed descent from Baudoin, the Count of Flanders and Crusader; 92, Storm at sea; 93, Landscape; 97, President Harrison; 98, 99, Italian scenes; 100, View of Messina; 102, Henry Clay; 104, The Duke of Cumberland, victor at Culloden; 105, Pilgrim; 106, The Walk to Emmaus; 107, Peter repentant; 110, 111, Venetian views; 112, Christ bearing the Cross; 116, 117, French scenes; 119, Italian landscape; 120, A

View on the Rhine ; 122, 123, Landscapes ; 126, Bishop McIlvaine ; 127, 128, Affection and Love ; 131, President Pierce ; 133, Portrait, *Copley*.

Franklin Pierce, 14th President of the United States, was in the Bowdoin class of 1824, and in that of 1825 Henry W. Longfellow and Nathaniel Hawthorne were classmates. In the adjacent village, J. S. C. Abbott, the historian, and G. P. Putnam, the veteran publisher, were born. The Presidency of the College is now held by J. L. Chamberlain, a successful general during the Secession War, and Gov. of Maine, 1867 - 71.

Railroads run from Brunswick to Lewiston, Farmington, and Bath.

Beyond Brunswick the main line turns N., crosses the Androscoggin, and follows the r. bank of the Kennebec River (seats on the r. preferable) through the farming towns of Topsham and Bowdoinham, which have lost 1,100 inhabitants since 1850. Stations, *Richmond*, a busy shipbuilding village near the site of Fort Richmond (erected in 1719), *S. Gardiner*, and **Gardiner** (*Johnson House ; Evans House*). This is a city of 3,403 inhabitants, with 4 banks, 2 weekly papers, 7 churches, and several small factories. The chief industries of Gardiner are in sawing lumber in summer and ice in winter, and immense ice-houses may be seen on the banks of the Kennebec. The Common contains 5 acres, and is situated on Church Hill (125 ft. above the river), which commands a pleasant view. The slopes of this hill are lined with residences, while the stores are on the riverward plain, and the factories are along the water-power given by the Cobboosee Contee River. This place was settled in 1760, and was named in honor of the family which owned its territory.

Station, **Hallowell** (*Hallowell House*, near the station), a quiet little city on the banks of the Kennebec, with 3,008 inhabitants, 4 banks, a weekly paper, and 6 churches. It has a few small factories, but is chiefly noted for the extensive quarries of white and light gray granite, back of the city, in which 250 men are employed. 900,000 yards of floor oil-cloth, and 2,500,000 yards of cotton cloths are made yearly here. Hallowell was first permanently settled about 1754, and was named in honor of its chief proprietor.

Augusta (*Cony House*, near the station; *Mansion House ; Augusta Hotel ; Central House*), the capital of the State of Maine, is 2 M. N. of Hallowell, and at the head of sloop navigation. The city is built on both sides of the Kennebec, and contains 7,815 inhabitants, with 5 banks, a daily and 5 weekly papers, 9 churches, and 3 Masonic lodges. The situation of Augusta is beautiful, being on and around the high hills which border the river. About $\frac{1}{2}$ M. above the town is the great Kennebec Dam, 584 ft. long, and 15 ft. above high-water mark. Besides improving the navigation of the river above, this dam forms an immense water-power, estimated at 3,700 net horse-power. It was built in 1836-7, at an expense of \$300,000, and has been purchased by A. & W. Sprague, the R. I. manufacturers, who have erected large works in the vicinity, and have still others in prospect. The commercial part of Augusta lies

along the r. bank of the river, on Water St., while the heights above are occupied by mansions and public buildings. The handsome Congregational Church, of granite, is on the verge of the ridge, and not far from the High School building. Farther S., on State St. (which runs along the heights), are the fine granite buildings of Kennebec County, and beyond these is the * **State House**. This elegant structure is built of white granite, mostly derived from ledges of the same material on which it is founded. It is situated on a high hill, which commands a beautiful view, and is surrounded by well-ornamented grounds. It was built in 1828-31, with a solidity which is rarely encountered in American public works, and its principal external features consist of a rustic basement, supporting a colonnade of 10 monolithic columns of the Doric order, while above all is a graceful dome. The Rotunda is first entered, — a neat hall supported by 8 columns, and draped with 80 storm-worn and battle-torn flags which were borne by the Maine regiments in the War for the Union. It is said that not a flag was lost by the Maine troops in the war. The 32 pennons of the cavalry and artillery are arranged on the side-walls, while in the adjacent lobbies are 10 rebel flags which were taken in action by the troops of Maine. Under the chandelier in the centre of the hall is a neat little fountain, whose basin is stocked with trout. On the walls are portraits of Governor Pownal, Sir William Pepperell, Senator Rufus King, Gen. Knox, and Presidents Washington and Lincoln. On one side of the hall is a fine bust of Gov. Chamberlain, by Jackson. From the second story access may be gained to the halls of the Senate and House of Representatives, and on the S. side of the third story is the State Library, consisting of 23,000 volumes. Still higher up is the dome, from whose summit (easily accessible) a fine view is enjoyed. On the S. is seen Hallowell, over broad reaches of the silvery Kennebec; on the W. are high, wooded hills; on the N. is the white city of Augusta divided by the river; and on the E. is the Kennebec, with the U. S. Arsenal on the meadows beyond, and the Insane Asylum on the heights.

The *State Insane Asylum* is a noble granite building on the heights E. of the river, and situated in extensive ornamental grounds. It cost \$300,000, and accommodates 300 patients, many of whom lighten the hours of their seclusion from the world by working on a large farm which pertains to the Asylum. The building is 262 ft. long, and was erected in 1850-52, after the destruction by fire of the old Asylum, in which 27 patients and a keeper were burnt. Near this point is the *Kennebec Arsenal*, where the United States keeps several thousand stand of arms, with many cannon and other munitions of war. There are several neat buildings here, and the grounds are by the river-side and are well arranged. The Asylum and Arsenal being in the E. wards of the city, are reached by crossing the long bridge near the foot of Water St., from which are afforded views of the slender and graceful iron railway-bridge.

Togus Springs are about 4 M. to the S. E., and were formerly a summer-resort of considerable local fame. In 1866 a National Asylum for disabled volunteer soldiers was established at this beautiful place, at an expense of \$300,000. A farm of 600 acres is attached to the Asylum, and 500 men can be accommodated here, although but 200 are now present.

Augusta occupies part of the ancient domain of the Cushnoc clan of the Canibas tribe of the Abenaki nation of Indians. It was in the Kennebec Patent granted to the Plymouth Colony in 1629, and was settled before 1654, but abandoned and laid waste in 1676 (King Philip's War). In 1716 a stone fort was built here, and abandoned in 1724 (Lovewell's War), and in 1754 Fort Western was built on the E. bank of the Kennebec River. This was a strong fort, surrounded by palisaded outworks garnished with towers, and in the autumn of 1775 it was occupied by Benedict Arnold, who crossed the wilderness to Quebec with 1,100 men (New-Englanders and Virginians). His command rested here for some time, and made batteaux in which the Kennebec was ascended to a point above Moscow. A long portage then took the forces to the Dead River, which was ascended, amid fearful hardships by hunger, cold, and exposure, to its head-waters. Another portage carried them to Lake Megantic (in Canada), whence the Chaudiere River was descended, and Arnold's little army of gaunt and ragged heroes arose like an apparition from the savage southern wilderness before the walls of Quebec.

Augusta prospered in the arts of peace until the outbreak of the Secession War, in 1861, after which it became a central *rendezvous* for the troops of the State. Among the regiments which formed and encamped here was the 8th Maine, which fought in South Carolina and Florida, lost 95 men at Drury's Bluff, 33 at Wier's Bottom, and 100 at Cold Harbor, bearing meanwhile the colors presented to them by the Governor of Maryland, at Annapolis. Also the 9th Maine, which fought in S. Carolina, stormed the Morris Island batteries at dawn, and took the colors of the 21st S. C., lost 100 men in the repulse from Fort Wagner, and was decimated at Cold Harbor. Also the famous 1st Maine Cavalry, which fought at Brandy Station, Aldie, Luray, Middleburgh, and in numerous raids and outpost attacks, losing many hundred men.

Augusta is 98 M. from Kittery; 142 M. from Eastport; 207 M. from Fort Kent; 59 M. from Bangor; 52 M. from Portland; and 182 M. from Presque Isle. The State, of which it is the capital, has an area greater than that of the other five New England States combined, but is slowly decreasing in population, having suffered an actual loss of 7,872 inhabitants between 1860 and 1870.

Steamers run between Augusta, Portland, and Boston, semi-weekly, stopping at the river-landings.

Stages run from Augusta to W. Gardiner, Litchfield, Webster, and Lisbon Falls; to Winthrop and Wayne; to Manchester, Readfield, Mt. Vernon, Fayette, Vienna, Chesterville, and Farmington; to Belgrade, Rome, and New Sharon; to S. Vassalboro, China, Albion, Unity, Troy, Dixmont, Newburg, and Bangor; to Windsor, Palermo, Liberty, Montville, N. Searsmont, Belmont, and Belfast (42 M., fare \$3.00); also across Lincoln County to Rockland and Damariscotta.

At Augusta the line crosses the Kennebec on a light and graceful iron bridge, and follows the beautiful river for over 20 M. (seat on the l. side preferable). Station, *Vassalboro* (small inn), a manufacturing village in a large and prosperous town, which is pleasantly diversified by hills and ponds, and has on the E. *China Lake*, which is about 10 M. long and affords good fishing. The lake is almost cut in two by projecting points at the Narrows, and empties by the Sebasticook River. S. China is a pretty village at the S. end of the lake, with a tavern, a church, and 3 stores.

Beyond Vassalboro, the train passes through Winslow, and crosses the Kennebec near its confluence with the Sebasticook. The ruins of Fort Halifax are seen on the bluff point just S. of the union of the rivers. This fort was one of a chain erected by Mass. to defend the Maine coast from French raids. It was built by Gov. Shirley in 1754, and garrisoned by 130 men, until its abandonment, after the Peace of Paris (1763). Large Indian settlements formerly occupied the intervalles in this vicinity, and as early as 1676 envoys of Massachusetts came here to detach the tribe from King Philip's Confederation, — an unsuccessful attempt.

Station, **Waterville** (two inns), a place of nearly 5,000 inhabitants, near the Ticonic Falls on the Kennebec River. The village is built along rambling streets on a broad plain above the river, and has some handsome residences. Near the station are the buildings of **Colby University** (founded in 1820), which has 6 instructors and 52 students, with a library of 6 - 8,000 volumes. This institution is under the care of the Baptist Church, and besides the usual barrack-like dormitories of American colleges it has two handsome new stone buildings. On one side is the new granite Scientific Department, while the other wing of the line is occupied by a fine stone building with a tower. The lower part of this edifice is occupied by the library, while the upper part is consecrated as a Memorial Hall. On one side of this hall is a fine monument by Milmore, representing a colossal dead lion, transfixed by a spear, with an agonized face, and with his paw resting on the shield of the Union (an adaptation of Thorwaldsen's Lion at Lucerne). Below this large and beautiful work is a tablet (also of marble) containing the names of 20 former students who fell in the War for the Union, with the inscription,

"Fratribus etiam in cineribus caris quorum nomina intra incisa sunt, quique in bello civili pro reipublicæ integritate ceciderunt, hanc Tabulam posuerunt alumni." The Memorial Hall is to be decorated with pictures.

A branch railroad runs from Waterville to Skowhegan (see Route 42), and at this point the Lewiston Division of the Maine Central Railway (Route 46) unites with the present route (the Augusta Division.) Stages run hence to many rural villages.

In running from Waterville to Bangor the train passes Kendall's Mills, or *Fairfield*, Station, and soon after the track of the Skowhegan Division turns off to the l., and the present route (Bangor Division) crosses the Kennebec on a high bridge. Stations, *Clinton* and *Burnham*.

From Burnham the Belfast Division of the Maine Central Railway runs S. E. to the city of *Belfast* (see Route 48), in 35 M. passing through the farming towns of Waldo County, Unity, Thorndike, Brooks, and Waldo.

Beyond Burnham the line follows the Sebasticook River to the station, *Pittsfield* (Lancey House; daily stage to Palmyra, Hartland, St. Albans, Harmony, Ripley, and Cambridge in 20 M., fare \$1.50.) Stations, *Detroit*, and **Newport** (*Shaw House*), a prosperous village on the shores of East Pond, which is 15 M. around and affords good fishing. The Dexter Division of the Maine Central Railway runs N. to Dexter (see Route 43).

To the S. are the high hills of Dixmont, and the train passes on by *E. Newport, Etna, Carmel, and Hermon Pond* to

Bangor.

Hotels.—* Bangor House, on the heights, \$2.50–3.00; Penobscot Exchange; Franklin House; and many others.

Steamers leave tri-weekly (during the season of navigation) for Portland and Boston, stopping at the river-ports.

Railroads.—The Maine Central, to Portland and Boston, 246 M. (by Eastern R. R.), in 11 hrs. The European and North American R. R. to St. John, 205½ M., in 10½–16 hrs. (the train leaving Bangor early in the morning arrives at St. John about 6 P. M.). The Bangor and Piscataquis R. R., to Guilford, 61 M., in 3½–5 hrs.

Stages run to Hampden, Frankfort, Prospect, Stockton, Searsport, and Belfast (30 M., fare \$2.50; leaves early in the morning); to Monroe; to Newburg, Dixmont, Troy, Unity, Albion, and China; to Exeter; to Kenduskeag, Corinth, and Charleston; to Glenburn, Brownville, and Katahdin Iron Works; to Brewer, Eddington, Clifton, Amherst, and Aurora; to Orrington, Bucksport, Orland, Penobscot, and Castine; to Ellsworth, Cherryfield, Machias, and Eastport (125 M., fare \$10, leaves every evening).

Bangor, the second city in Maine, and the second lumber-mart in the world, is a handsome city situated on commanding hills at the head of navigation on the Penobscot River. It is about 60 M. from the sea, and is divided into two parts by the deep ravine in which flows the Kenduskeag Stream. The business part of the city is situated on the level land adjoining this stream on both sides, and has many massive and substantial commercial buildings, since Bangor is the trade-centre for a larger area of country than is fed by any other New England city. It contains 18,289 inhabitants (in 1800 it had 277), with 11 banks, a daily and 2 weekly papers, 5 insurance companies, 5 Masonic lodges, 43 schools, and 14 churches. The heights on either side of the Kenduskeag are lined with well-shaded streets, and have many handsome residences, while there are several well-built churches in the same localities. The Custom House and Post Office, on the Kenduskeag Bridge, is a neat granite structure. There are 240 men engaged in iron-works here, and 150 in the shoe-manufacturing trade, besides which the city has several small factories and ship-yards, with a lucrative coasting and foreign trade. The products of the rich alluvial basin of the Penobscot are handled here, although, on account of the severity of the climate in this high latitude, but a small portion of the valley is under cultivation. The tributaries of the Penobscot penetrate the great Maine Forest in every direction, and bear downward to Bangor immense quantities of lumber, in the sawing and shipment of which the city finds its chief industry. The booms in which the descending logs are caught extend for miles along the river, and a great number of saw-mills are in operation along the shores. Up to 1855, 2,999,847,201 ft. of lumber had been surveyed at Bangor; between 1859 and 1869, 1,869,965,454 ft. of long lumber were shipped hence; in 1868 alone, 274,000,000 ft. of short lumber (clapboards, laths, and shingles) were

shipped; and in 1872, 246,500,000 ft. of long lumber were surveyed here. The lumber crop of 1872, in Maine, was about 700,000,000 ft., of which 225,000,000 floated down the Penobscot, and 100,000,000 passed down the Kennebec. To transport this immense amount of lumber to its destined markets, fleets of hundreds of vessels come up to the city, where there is a broad expanse of deep water with tides rising over 16 ft.

The *Theological Seminary* was chartered by the State of Mass. in 1814, and is under the care of the Congregational Church, though its teaching is non-sectarian orthodoxy. It occupies buildings fronting on a broad campus, in the highest part of the city, and has 5 professors, 40-50 students, and about 600 alumni, with a library of 13,000 volumes. *No-rumbega Hall* is on the Kenduskeag Bridge, and pertains to the city; its lower portion being used as a market, while in the upper hall 2,000 persons can be seated.

It is said that Champlain ascended the Penobscot as far as the site of Bangor, in 1608. The settlement was made between 1769 and 1775, and in 1791 Rev. Seth Noble, its representative, was ordered by the people to have it incorporated under the name of Sunbury. Mr. Noble, however, was very fond of the old tune of "Bangor," and (perhaps inadvertently) had that name given to the new town. In 1814 the town was taken by a British squadron, after the destruction of the "John Adams"; in 1833 it became a city; and in 1848 it was declared a port of entry. The 2d Maine regiment was raised in 1861 around Bangor, and received superb colors from the ladies of New York, Baltimore, and San Francisco. The latter flag was the finest in the army, and was the centre of a terrific fight at Bull Run, in which the color-guards were all killed, and the opposing regiment (the 7th Georgia) was "nearly annihilated." The flag was not lost, and the regiment was the last on the field. At Gaines' Mill this command took the 5th Alabama flags, and at Fredericksburg it lost $\frac{1}{3}$ of its rank and file.

Glenburn (*Perch House*) is 10 M. N. of Bangor, on Pushaw Pond, which has considerable local fame for its fine fishing.

48. Boston to Bangor. The Penobscot River.

By Sanford's Independent Line of steamers, leaving Boston, Monday, Tuesday, Thursday, and Friday, at 5 P. M. (time-table of 1872). Boston to Rockland \$2.00; to Bangor, \$3.00.

By Route 37 or 38 to Portland, and thence by steamer to Bangor (Portland to Bangor, \$2.50); or by Routes 37 (or 38) and 44 to Rockland, and thence up the river by steamer.

In calm weather the outside route is very pleasant. The steamer passes down Boston Harbor (see page 20) and out on the open sea, approaching Cape Ann and Thacher's Island (Route 36) at late twilight. The early riser next morning will see the bold shores of Monhegan Island, far out in the ocean. This island was settled in 1618, and had a stirring history for more than a century, but now has only a few score of inhabitants, mostly engaged in the deep-sea fisheries, or wringing scanty crops from the rugged thousand acres on the bluffs. The steamer now passes in by the historic peninsulas of Knox County, leaves Vinalhaven on the E., and rounding Owl's Head, reaches **Rockland**, 175 M. from Boston (see Route 44). The Tuesday and Friday steamers here connect closely

with the steamer for Mt. Desert. After leaving Rockland, and passing Rockport on the l., the steamer approaches a chain of lofty hills, and enters the harbor of **Camden** (* *Bay View House*, 100 guests, \$2.00 a day; *West Mt. Home*). This is a pretty town, with 5 villages, 4,500 inhabitants, and 9 churches. It was visited by De Monts in 1604, and by Weymouth in 1605, was named in honor of Lord Camden, America's friend in Parliament, and was fortified in 1812 to check the British at Castine. Pring coasted by this place in 1603, and reported it "a high country, full of great woods," and such it still is. The two Megunticook peaks rise back of the town to the height, respectively, of 1,335 and 1,457 ft., while Mts. Pleasant, Batty, Hosmer, and others complete the group. The * view from Megunticook is one of the noblest of marine prospects, embracing the blue Penobscot Bay with its archipelago, Mt. Desert far in the E. and a vast sweep of the ocean on the S. E.

The steamer runs N. for 18 M. between the shores of Lincolnville and Northport, and the insular town of Islesborough, and stops at **Belfast** (*American House*; *New England House*). This is a handsome little city (5,278 inhabitants) built on a declivity which slopes to the water, with wide, shady streets, and several commercial blocks built of brick. It has 2 banks, 2 weekly papers, 6 churches, several shipyards, and the Waldo County buildings.

This port was discovered by Weymouth in 1605, who set up a cross (Anglican) here, and wrote that "many who had been travellers in sundry countries and in most famous rivers, affirmed them not comparable to this, — the most beautiful, rich, large, secure, harboring river that the world affordeth." Belfast was settled and named in 1770 by Scotch-Irish Presbyterians from Londonderry (N. H.), and was abandoned in 1779, after attacks by the British at Castine. It was resettled in 1786, and invested by the British in 1814. In 1865, a destructive fire swept over its business quarter, and between 1860 and 1870 its population decreased by 250.

Castine is seen far across the bay to the E. as the steamer runs up 7 M. to *Searsport* (small hotel), a maritime town with nearly 3,000 inhabitants, under the lee of Brigadier Island.

Passing out into the bay, with the historic peninsula of Pentagoet (Castine) on the E., the bold shore of *Fort Point* is soon reached. Here, in 1758–9, Gov. Pownall erected a powerful fort for the defence of the Penobscot. It was the best fort in Maine, and its construction was paid for by Parliament. The British frigate "Canseau" partly demolished it in 1775, and in 1779 Capt. Cargill, of the American army, finished its destruction. Some remains of the fort are still visible, and near it is a fine new summer hotel, which commands broad views down Penobscot Bay. The steamer stops here, with the tall lighthouse (87 ft. high) in view, and a white village of Stockton in the cove to the W.

Now steaming N., Wetmore Island is passed on the r. (a barren tract with about 400 inhabitants who live by fishing and hunting), and the

river seems to end, so rapidly does it contract. As the swift tides of Bucksport Narrows are entered, a sudden turn reveals the bright village of **Bucksport** (*Robinson House ; Riverside House*), a shipbuilding and fishing place with 3,433 inhabitants. This town was settled by Col. Buck, of Haverhill, in 1764, and now has two banks, a custom house, several churches, and a lucrative county trade. On the hill above the village is the E. Maine Conference Seminary, a Methodist School with 3-400 students, from whose lawn beautiful river-views are afforded. On the bluff opposite Bucksport is **Fort Knox**, an immense and costly fortification lately built by the U. S., which completely commands the river with its heavy batteries.

Stages run from Bucksport to Mt. Desert (see Route 45), in about 30 M., passing through **Ellsworth** (*American House*), a city of 5,260 inhabitants, the capital of Hancock County.

The river now grows more narrow and picturesquely sinuous, while vessels are frequently passed. *Winterport* (Commercial House) is reached 5 M. above Bucksport, after passing Mt. Waldo and the granite-producing shores of Frankfort on the W. 7 M. beyond, the steamer stops at *Hampden* (Penobscot House), where the U. S. corvette "John Adams," 24, was attacked (while refitting) in 1814 by a small British fleet. Capt. Morris, of the "Adams," had armed shore-batteries with his ship's guns, but the badly officered rural militia were speedily routed by a bayonet-charge of the British regulars. Morris then spiked his guns, blew up his ship, and retreated with the sailors to Bangor. The British plundered and overran Hampden for 3 days. Soon after leaving Hampden, the steamer reaches (about noon) the city of Bangor (see Route 47).

49. Bangor to St. John.

By the European and North American Railway, 205½ M. Passengers on the through train from Boston (by Routes 37 and 47) make their first and only change of cars here.

Seats on the r. side of the car afford views of the river. After leaving Bangor, the train passes *Veazie* and other stations, with the river covered with booms and immense rafts of timber, and lined with saw-mills. Stations, *Orono* (the seat of the State Agricultural College), and **Oldtown** (two inns), a place of about 4,000 inhabitants, mostly engaged in the lumber business. The immense and costly booms and mills should be noticed here. Oldtown has the largest lumber-mill in the world, where 100 saws are at work turning the rude logs which come in at one side into planks, which are rafted away to Bangor. On an island near the village (ferry-boat on the shore) is the home of the Tarratine Indians, one of the three tribes of the Etchemin nation. Though the most powerful and warlike of the northern tribes, the Tarratines rarely attacked the colonists.

After a series of wrongs and insults from the whites, they attacked the settlements in 1678, and inflicted such terrible damage and loss of life that Maine became tributary to them by the Peace of Casco. After destroying Pemaquid to avenge an insult to their chief St. Castin, they remained quiet for many years. The treaty of 1726 contains the substance of their present relations with the State. They own the islands in the Penobscot, and have a revenue of \$6-7,000 from the State, which the men eke out by working on the lumber rafts, by hunting and fishing, while the women make baskets and other trifles for sale. The declension of the tribe was marked for two centuries; but it is now slowly increasing. The island-village is without streets, and consists of many small houses built around a Catholic church. There are over 400 persons there, most of whom are half-breeds.

At Oldtown the line crosses the Penobscot on a high bridge, and enters *Milford*, a lumbering village. The l. bank of the Penobscot River is now followed for 45 M. to *Mattawamkeag*, through a succession of thinly populated towns, Greenbush, Passadumkeag, Enfield, Lincoln, and Winn, whose inhabitants are mostly engaged in lumbering. *Mattawamkeag* (two inns) is a small village at the confluence of two rivers.

Stages run 38 M. N. through the wilderness to *Patten* (small inn), the outpost of civilization nearest to Mt. Katahdin, a lone peak which rises out of the wilderness to a height of 5,335 ft.

Stages also run N. E. through the forest, crossing 8 townships, to Houlton. Stages run from Lincoln to Springfield, Carroll, Topshfield, and Calais.

The railway now follows the *Mattawamkeag* River, and runs through the forest (almost unbroken) for 58 M. to **Vanceboro** (*Chiputneticook House*; restaurant in the station). Weston is a post-town on the Calais and Houlton mail-stage line, with 400 inhabitants and a hotel. This point, which may be reached from Bancroft or Danforth, is near the shore of the Grand Schoodic Lake, where fine fishing is afforded. Vanceboro has good troutling on the St. Croix River, and soon after leaving this village the train crosses the St. Croix and enters the Province of New Brunswick. At *McAdam Junction* the New Brunswick and Canada Railroad is crossed, and the train passes on through a monotonous wilderness to Douglas Mt., in Welsford, beyond which the St. John Valley is entered, and the river is followed down to St. John, 91 M. from Vanceboro.

By changing cars at *Fredericton Junction*, travellers pass in 1 hr. to **Fredericton** (*Queen's Hotel*; *Barker's*). Fredericton is a small city of 8,000 inhabitants, beautifully situated on the St. John River, and distinguished as the political capital of the Province. The Government House is a plain and dignified stone building in extensive grounds just N. of the city, and the Parliament House is an inferior structure near the deserted barracks. The *University of New Brunswick* has fine buildings on a commanding hill near the city, and the Exhibition Building (near the railway

station) is worthy of notice. * **Christ Church Cathedral** (Episcopal) is one of the finest on the continent, though small. It is of gray stone, in English Gothic architecture, and has a stone spire, 178 ft. high, rising from the junction of the nave and transepts. The interior is beautiful, and the chancel has a superb window of Newcastle stained glass, presented by the Episcopal church in the United States. In the centre is Christ crucified, with SS. John, James, and Peter on the l., and SS. Thomas, Philip, and Andrew on the r. In the church tower is a chime of 8 bells, each inscribed,

"Ave, Pater, Rex, Creator,
Ave, Fili, Lux, Salvator,
Ave Spiritus Consolator,
Ave Beata Unitas.

Ave, Simplex, Ave, Trine,
Ave, Regnans in Sublime,
Ave Resonet sine fine,
Ave Sancta Trinitas."

The St. John River.

When there is water enough in the river, steamers ascend the St. John River to Woodstock, 62 M. N. W., and near Houlton. Steamers leave Fredericton for St. John at 8 A. M., arriving there at 3 P. M. Distance, about 90 M.; fare, \$1.50. The steamers run only on Tuesday, Thursday, and Saturday (in 1872), leaving St. John the alternate days, at 8 A. M.

As the steamer passes into the stream, a beautiful view of the capital city, with its Cathedral and University, is obtained. On the opposite shore is the mouth of the Nashwaak River, where stood a fort which was a centre of siege 250 years ago. 11 M. below, the village at the mouth of the Oromocto River is passed, and the lofty spire of Burton church is soon after seen on the r. The boat stops at *Sheffield*, with its large academy, and passes Manguerville, which was settled by Bostonians in 1766. Gagetown is next seen, on a bluff opposite the mouth of the Jemseg River, and in a rich farming country. Numerous islands are passed, and broad intervals stretch back from the shores. The steamer soon enters the Long Reach, which is followed for 20 M., passing the mouth of the Nerepis River, with its fortified point, abandoned for two centuries. At Grand Bay the scenery grows nobler, and the broad estuary of the Kennebecasis River opens to the E. with fine effect. A narrow channel between picturesque palisades is now entered, and followed on swift waters, until a glimpse of the Suspension Bridge is gained on the r. as the steamer rounds to her pier at Indiantown, a suburb of

St. John.

Hotels.—*Victoria Hotel, 300 guests, \$3.00 (Canadian) a day; Rothesay House; Barnes House; Waverly House; American House.

Carriages.—20c. a course in the city; 25c. each half-hour. *Horse-Cars* to Indiantown, fare 5c.

Railways.—To Fredericton, Bangor, and Boston; to Woodstock, Houlton, and St. Andrews; to Shediac, Halifax, and Windsor.

Steamers.—To Eastport, Portland, and Boston; to Digby and Annapolis; to Yarmouth and Shelburne; to Halifax; to Fredericton and Woodstock.

St. John, the metropolis of New Brunswick, is a city of 29,000 inhabitants, situated on a rocky promontory between the St. John River and Courtnay Bay. Its situation on high hills renders it very picturesque, either from within or as seen from the harbor. The streets are broad and straight, and King's and Queen's Squares and other open grounds diversify the surface of the hills. The city has some manufactures and a large coast and country trade, and its water-front is worthy of a visit. There are 8 Episcopal Churches, 3 Catholic, 9 Baptist, 6 Methodist, 7 Presbyterian, and 1 Congregational. The Custom House, the Y. M. C. A. building, the Orphan Asylum, the Rink, and the City Hospital are good buildings. The Catholic Cathedral of the Immaculate Conception (Pl. 8) is a large stone structure with a lofty spire, and with stained glass windows in chancel, transept, and aisles. The ornaments of the choir in colored marble are worthy of notice. Near the Cathedral is the Bishop's Palace, and some convent-schools. From this vicinity Reed's Castle is seen, whence a fine view of the city and harbor is obtained. Lily Lake is near the castle.

The favorite drives are out over Marsh Bridge to Red Head; to the Cemetery and Loch Lomond; and over the **Suspension Bridge** to the heights of Carleton. The * Bridge is 640 ft. long and 100 ft. above low water, and affords a fine view of the St. John Falls, where the river dashes down at low tide through a narrow gorge. At high tide is presented the remarkable sight of a river falling up stream, when the tides of the Bay of Fundy rush upward through the gorge far above the river level. From the Lunatic Asylum, or from the Martello Tower on Carleton Heights, a panoramic view of the city, the bay, and the remote purple line of the Nova Scotia shore, is given. The Mahogany road is a pleasant drive near the Bay.

Champlain discovered and named the St. John River on St. John's Day, 1604. In 1635 Charles St. Estienne, Lord of La Tour, built a fort here, which was vainly attacked by D'Aulney in 1643, the siege being raised by Massachusetts ships attacking D'Aulney. During the absence of La Tour in 1645, the fort (under command of Madame La Tour) repulsed a naval attack, but was forced, later in the year, to surrender. Madame La Tour was made to stand with a rope around her neck, while the whole garrison was massacred.¹ She died within a few days, and D'Aulney soon followed her. La Tour married Madame D'Aulney in 1653, and thus rewon his fort. It was soon captured by the English, and left desolate for a century. In 1758 a British garrison was established here, and in 1776 the men of Machias destroyed the fort and cannonaded the neighboring village. In 1783 a fleet-full of loyalists from the United States landed and settled here, and since then the city has grown rapidly.

50. The New-Brunswick Border, Eastport to Madawaska.

Eastport may be reached by the International steamers, which leave Boston at 8 A. M., Monday, Wednesday, and Friday (in July, Aug., and Sept.), and Portland at 6 P. M. on the same days. Boston to St. John, \$5.00; Portland to Eastport, \$4.00 (180 M.).

¹ See Whittier's poem of "St. John."

Stages leave Bangor every evening for Eastport, which is 125 M. distant, via Ellsworth and Machias. Fare, \$ 10.00.

Eastport (* *Passamaquoddy House*) is the coast border-town, and has 3,738 inhabitants. It is pleasantly situated on a hilly island in Passamaquoddy Bay, and is commanded by Fort Sullivan, a garrisoned post of the U. S. The bay abounds in picturesque islands, the chief of which is Campo Bello, opposite Eastport and within the Canadian borders. This island is often visited in summer, and has much fine ocean scenery. To the S. is Quoddy Head and the Canadian island of Grand Menan (1,800 inhabitants), 22 M. long and 3-6 M. wide, with its western shore lined by frowning cliffs 3-400 ft. high.

Eastport was settled in 1780, and was captured and fortified by a British fleet in 1814. It was the birthplace of Henry Prince, C. H. Smith, and N. J. T. Dana, able national generals during the Secession War. The 6th Maine Infantry gathered here in 1861, and then moved away to Virginia, where it was engaged in 10 pitched battles, and lost over 300 men by death.

Stages and steamers run 30 M. N. W. from Eastport to Calais. The steamer moves out across the broad and island-studded bay, passing on the l. *Pleasant Point* (in Perry), the home of the 400 remaining members of the Openango tribe of the Etchemin nation of Indians. The first stopping-place is **St. Andrew** (with a large new hotel accommodating 300 guests), a decadent maritime provincial town (3,000 inhabitants), pleasantly situated on a long promontory, and having fine facilities for bathing, boating, and fishing. St. Andrew is the shire-town of Charlotte County, N. B., and is the terminus of the N. B. and Canada Railway. Beyond this port the bay narrows rapidly, and *Neutral Island* (with its lighthouse) is passed, opposite Robbinston. Henri IV. of France granted Acadia (an indefinite district, embracing Nova Scotia, New Brunswick, and as much more as he could get) to the Sieur de Monts in 1602. In 1604 the grantee brought over a colony (mostly of Huguenots) and settled on this island, which he fortified strongly. During the mournful winter of 1604-5, 36 out of 70 of the colonists died, either from scurvy, or from drinking water poisoned by the Indians. Remains of De Monts' fort may be seen on the island (which belongs to the U. S.). *Robbinston* village is now touched at, and then the steamer passes up by Oak Point and Devil's Head to **Calais** (*International Hotel ; St. Croix Exchange*). This is a city of about 6,000 inhabitants, with 2 banks, 2 weekly papers, and 6 churches. It was founded in 1789, and has a large shipbuilding and lumber business.

A railway runs 20 M. N. W. from Calais to Lewey's Island (in Princeton; two inns), whence the picturesque Schoodic Lakes may be entered. The steamer "Gipsy" runs (irregularly, for lumbering work) on Lewey's, Big, and Long Lakes. There is a large village of Passamaquoddy Indians on one of these lakes, and hunting and fishing parties from the coast cities often pass the summer here, roughing it in canoes and in the forest.

Mail-stages run from Calais to Eastport; also (daily) through the vast and desolate forest to Bangor, 95 M. W.; fare, \$7.50; also (from Princeton) to Houlton.

A covered bridge leads from Calais to **St. Stephen** (*Walker House*), a bright and active town of over 5,000 inhabitants. The citizens of Calais and of St. Stephen have ever lived in perfect fraternity, and formed and kept an agreement by which they refrained from mutual hostility during the War of 1812.

From this point the N. B. and Canada Railway runs W. through the forest (crossing Route 49 at McAdam Junction) to *Debec*, 74 M. distant, whence a branch road runs (in 11 M.) to **Woodstock**, the shire-town of Carleton County, N. B. This town has 4,000 inhabitants, and is pleasantly situated on the St. John River, 150 M. from its mouth. Stages run through Tobique to **Grand Falls**, where the river is contracted into a narrow gorge between lofty cliffs, and plunges over a succession of rocky steps, the first leap being 40 ft. perpendicular. Tri-weekly stages run from this point through the French settlements at Madawaska, to Riviere du Loup, on the St. Lawrence River (see Route 56).

From Debec a branch railroad runs N. W. 8 M. to **Houlton** (*Snell House*; *Buzzell House*), the shire-town of Aroostook County, Maine, with a population of 2,851, 2 weekly papers, and 5 churches. Houlton is 456 M. (by railway) from Boston, and has stage-routes running to all parts of N. E. Maine.

Stages run S. through Hodgdon, Amity, Orient, Weston (30 M.), and Topsfield, to Calais; through Linneus, Macwahoc, and Molunkus, to Mattawamkeag; to Smyrna, Rockabema, and Patten (W.); by Littleton, Monticello, Bridgewater (dinner at Half-Way House), Mars Hill (1,700 ft. high), and Easton, to Presque Isle.

Presque Isle (small hotel) is a forest village, with nearly 1,000 inhabitants, a weekly paper (the "*Presque Isle Sunrise*"), 4 churches, and an academy. This is one of the centres of the rich farming lands of Aroostook County, which cover over 500,000 acres, and are being taken up rapidly by settlers, induced by their variety, fertility, and cheapness. Two fine national roads cross this district, — the Aroostook, from Mattawamkeag to Fort Kent, and the Military Road through Houlton to Van Buren. Many Swedes are settling here, while Madawaska is a populous French district.

Stages run from Presque Isle to Houlton, Washburn, and Dalton; the latter road passing W. by the Allagash Mts. to the Lake of Seven Isles, a little above the head of tow-boat navigation on the St. John River and over 80 M. from Dalton. This road passes through the heart of the great forest. "The primeval woods of Maine still cover an extent seven times that of the famous Black Forest of Germany at its largest expanse in modern times. The States of R. I., Conn., and Delaware could be lost together in our northern forests, and still have about each a margin of wilderness sufficiently wide to make the exploration without a compass a work of desperate adventure."

Fort Fairfield (small hotel) is on the frontier, on the road running E. from Presque Isle to Tobique (N. B.) on the St. John River. It has nearly 2,000 inhabitants, with 5 churches.

Stages run on the Military Road, to *Fort Kent*, 84 M. N. W. of Presque

Isle. This route crosses and follows the Aroostook River to Caribou, and then runs for 20 M. through the forest to *Van Buren* (two inns), a semi-French settlement (1,000 inhabitants) on the St. John, and near the Grand Falls. The road now turns N. W. and follows the St. John 15 M. to *Grant Isle*, a French village, 10 M. beyond which is **Madawaska** (Fournier's inn), a village belonging to a large district which has long been inhabited by Acadian French, who were expelled from Nova Scotia (*Acadie*) in 1755. There are several thousand of these Catholic and "pious Acadian peasants," divided into 4 parishes, and here the tourist may perhaps find an "Evangeline." (The poem has been translated into Canadian French, and is popular.) Madawaska and the Eagle Lakes lie S. of this village, which is 100 M. N. of Houlton. 26 M. beyond (the stage following the St. John River, and passing through Dionne), **Fort Kent**, with its two inns and ruined block-house, is reached. The population is still French, and 20 M. W. is *St. Francis*, another Acadian village. (Stages run occasionally.)

Fort Kent is 194 M. from Bangor, and 440 M. from Boston.

NEW YORK CITY TO THE SAGUENAY RIVER.

Having described New England and her eastern frontier in the 50 preceding routes, it has been thought advisable to add thereto a brief survey of those most interesting regions which lie on the west and north of her borders. The tourist might easily arrange a profitable and pleasant summer-trip, by taking either of the Routes, 3, 8, 19, or 21, to New York, thence ascending the Hudson to Albany, and passing to Montreal by way of Saratoga and Lakes George and Champlain, whence Quebec and the Saguenay are easily reached; and the return to Boston could be effected by either of the Routes, 24 (and 25) or 40 (and 37 or 38.)

ROUTE 51. NEW YORK CITY AND ITS ENVIRONS.

52. NEW YORK TO ALBANY. THE HUDSON RIVER.

53. ALBANY TO MONTREAL. SARATOGA AND LAKE GEORGE.

54. MONTREAL AND ITS ENVIRONS.

55. MONTREAL TO QUEBEC. THE ST. LAWRENCE RIVER.

56. QUEBEC. THE SAGUENAY RIVER.

51. New York City.

Arrival. — The railway-station (Boston line) is on 4th Ave., corner of 42d St. Horse-cars run thence down 4th Ave. to Union Square, and through the Bowery to the City Hall Park and Astor House. The piers of the three steam-boat lines are on the Hudson River.

Hotels. — The * Fifth Avenue, on Madison Square (8–900 guests), a vast and superb marble building; the * St. Nicholas, on Broadway, corner of Spring St., a marble building in the Corinthian order, six stories high, cost \$1,000,000, and cares for 1,000 guests; the * Metropolitan, on Broadway, corner of Prince, is of brown-stone, six stories high, and cost nearly \$1,000,000; the * Grand Central, on Broadway between Amity and Bleecker Sts., eight stories high, of marble, and accommodating 1,500 guests; Hoffman House, on Madison Square, an aristocratic house, caring for 350 guests; Gramercy Park House, on Gramercy Park, an immense family hotel, with room for 6–800 guests; Grand Hotel, corner Broadway and 31st St., an elegant first-class house. These immense hotels are amply supplied with all the luxuries of modern American civilization. Their charges are from \$4.00 to \$5.00 a day, with considerable reductions in case of a long sojourn. There are several first-class hotels on Union Square: the Everett (European plan); the Clarendon, patronized by English tourists; the Union Square; the Spingler; the Union Place, &c. The New York Hotel, 721 Broadway, is a resort for Southern visitors; the Prescott House, 531 Broadway, accommodates 300 guests and is much frequented by foreign tourists; so is also the palatial St. Denis Hotel, on Broadway opposite Grace Church. The St. Cloud (corner of Broadway and 42d St.) is the best up-town hotel; the Gilsey House (Broadway and 29th St.) and the St. James (Broadway and 26th St.) are also fine hotels above Madison Square. The Merchants', National, and Western are on Cortlandt St., in the lower part of the city, and are patronized by business men. The * Astor House (on Broadway, opposite the Post Office) is kept on the European plan, as are also the Brandreth (corner of Broadway and Canal St.), the Westminster (corner Irving Place and 16th St.), the Belvidere (Irving Place and 15th St.), the Irving (Broadway and 12th St.), the Brevoort (5th Ave. and 8th St.), the Albemarle, &c. French's, Leggett's, Sweeny's, and the Cosmopolitan are near the City Hall Park. Rooms may be obtained at the European plan hotels for from \$1 to \$3 a day, with meals *à la carte* within the house or elsewhere. For a tourist who is to make but a short visit to New York these houses will be found more commodious and less expensive than those on the American plan. There are about 140 other hotels in the city, several of which are first-class. The Stevens House is on Broadway near the Battery; and the Grand Union, opposite the Grand Central depot (42d St.) is conveniently situated for passengers arriving by late trains from New England or the North.

Restaurants. — * Delmonico's, corner 5th Ave. and 14th St., the best in America (with branch establishments down town, at the corner of Broadway and Chambers St., and on Broad St. near Wall); Parker's, on Broadway near 34th St., is frequented by ladies; also Bigot's, on 14th St., near Broadway; Geyer's, 734 and 736 Broadway, is a large and favorite restaurant; Solari, corner of University Place and 11th St., prepares elaborate late dinners. Jauch (864 Broadway) and Bergman (1,121 Broadway) keep ladies' restaurants, which are much frequented; Arnaud (815 Broadway) is famous for fine French candies; and Pursell's (919 Broadway) is a favorite lunch-saloon for the up-town ladies. At 39 Park Row, and at Leggett's Hotel are large eating-houses for down-town merchants.

The cafés and restaurants attached to the large hotels on the European plan are generally well kept, and are much visited by ladies. The Astor House has one of the best of these. Oysters may be found in every variety in the small saloons in Fulton Market. Maillard's (621 Broadway) is famous for fine confectionery and chocolate. New England dishes are served at Pearson's, on Cortlandt near Greenwich St.

Consuls. — English, 17 Broadway; German, 117 Broadway; French, 4 Bowling Green; Italian, 7 Broadway; Austrian, 33 Broadway; Russian, 52 Exchange Place; Swedish, 18 Exchange Place; Spanish, 20 Broadway; Swiss, 23 John St.

Reading Rooms. — In all the chief hotels (for guests); Y. M. C. Association, corner 23d St. and 4th Ave., also at 285 Hudson St., 473 Grand St., and 285

Bleecker St. Astor Library, Lafayette Place, open 9½-5; City Library, City Hall, open free to all, 10-4; *Cooper Union, corner 7th St. and 4th Ave., open from 8 A. M. to 10 P. M.; Woman's Library, open 9-4 (\$1.50 a year); N. Y. Historical Society, corner 11th St. and 2d. Ave.

Post Office, corner of Cedar and Nassau Sts., open continuously except Sundays, when it is only open between 9 and 11 A. M.; eight deliveries of letters daily; the Eastern mails close at 5 A. M., 1.30 P. M., and 6 P. M.

Carriages. — For one passenger for a distance of 1 M. or less, 50 c.; two passengers, 75 c.; for one passenger for more than 1 and less than 2 M., 75 c.; and for each additional passenger, 37½ c.; "use of a hackney coach or carriage by the day, with 1 or more passengers, \$5.00"; by the hour, stopping as often as required, \$1.00. No extra charge is allowed for one trunk or box; children between 2 and 14 years of age pay half-price. A tariff of fares is (or should be) hung in each carriage, but the drivers frequently attempt to extort undue sums from their passengers. In such cases, since the hackmen of New York are the most ruffianly of their class in the world, an instant appeal should be made to the first policeman who may be seen.

Omnibuses (called "stages") run (1) from Fulton Ferry, by Broadway, University Place, 13th, and 5th Ave., to 42d St., returning over the same route; (2) from South Ferry, by Broadway, 23d, and 9th Ave., to 30th St., returning the same way; (3) from South Ferry, by Broadway and 4th Ave., to 32d St.; (4) from South Ferry, by Broadway and 14th St. to Avenue A.; (5) from South Ferry, by Broadway, to the Erie R. R. ferry on 23d St.; (6) from Wall St. Ferry, by Wall, Broadway, 23d, and Madison Ave., to 40th St.; (7) from Jersey City Ferry (Cortlandt St.) by Broadway, Bleecker St., Bowery, and 2d. St. to Houston St. Ferry. The fare on these lines is 10 c.

Horse-Cars. — The fare on most of the lines is 5 c. (1) Park Place to Central Park, by Church and Greene Sts. and 7th Ave.; (2) Astor House (Vesey St.) to Central Park, by West Broadway, Varick St., and 6th Ave.; (3) Astor House to Central Park, by Canal, Hudson, and 8th Ave.; (4) Astor House to Grand Central Depot and Harlem, by Park Row, Chatham St., Bowery, and 3d Ave.; (5) Astor House to Hunter's Point Ferry, by Park Row, Centre, Grand, Bowery, 4th Ave., 32d and 34th Sts.; (6) Astor House to 34th St. Ferry, by Chatham St., East Broadway, Avenues B. and A., and 1st. Ave.; (7) Astor House to 86th St., by Centre, Bowery, 4th and Madison Aves.; (8) corner Broadway and Canal St. to 43d St., by Varick St. and 6th Ave.; (9) corner Broadway and Canal St. to Central Park, by Canal, Hudson, and 8th Ave.; (10) corner Broadway and Ann St. through Chatham, East Broadway, Avenues B. and A.; (11) corner Broadway and Broome to Central Park, by 7th Ave.; (12) corner Broadway and Fulton to 54th St., by Greenwich St. and 9th Ave.; (13) Peck Slip to Harlem (128th St.), by Oliver St., Bowery, and 2d Ave.; (14) South Ferry to Central Park, by West St. and 10th Ave.; (15) South Ferry to Central Park, by the East River Ferries, 1st Ave., and 59th St.; (16) Fulton Ferry through Centre and Bleecker Sts. to 10th Ave.; (17) Grand St. Ferry to Desbrosses St. Ferry, by Grand and Vestry Sts.; (18) Grand St. Ferry to Cortlandt St. Ferry; (19) Grand St. Ferry to 42d St. (Weehawken) Ferry; (20) corner Chambers and West Sts. to 42d St. Depot. The *Elevated Railway* runs from Morris St., on Greenwich St. and 9th Ave. to 30th St. The track is supported by iron pillars; the cars are drawn by small locomotives; and the stations are at Morris, Dey, Canal, and 12th Sts.

Ferries. — To Astoria, from 92d St., and from Peck Slip; to Blackwell's Island, from 26th St.; to Brooklyn, from Whitehall, Wall, Fulton, Roosevelt, Catharine, Grand, Jackson, Houston, and James Sts.; to Governor's and Bedloe's Islands, from Pier 43, N. R.; to Greenpoint, from 10th and from 23d Sts.; to Hunter's Point, from James Slip and from 26th St.; to Randall's Island, from 20th and from 122d Sts.; to Wards Island, from 110th St.; to Jersey City, from Cortlandt, Desbrosses, Chambers, and 23d Sts.; to Hoboken, from Barclay and Christopher Sts.; to Weehawken, from 42d St.; to Staten Island, from Whitehall St., and from Pier 19, N. R.

Theatres. — The Grand Opera House (corner of 8th Ave. and 23d St.) is an elegant marble building, which is chiefly used for dramatic representations; the *Academy of Music (99 E. 14th St.) is the favorite home of the opera; Théâtre Français (107 W. 14th St.), often used also for English opera, and for dress balls, in winter; *Booth's Theatre (corner of 6th Ave. and 23d St.), devoted to Shakes-

peare's plays and others of high grade; Niblo's Garden (Broadway, near Prince St.) accommodates 2,000 persons; Wallack's (Broadway, corner of 13th St.) is a favorite resort for lovers of legitimate comedy; Fifth Avenue (728 and 730 Broadway) and the Union Square (4th Ave. and 14th St.) are small but elegant and fashionable theatres; the Olympic (624 Broadway), the Comique (514 Broadway), and others, are devoted to varieties and comic scenes. Wood's Museum (corner of Broadway and 30th St.) gives dramatic performances; and sensational tragedies and spectacles are played in the Bowery Theatre (Bowery, near Canal St.). The Stadt Theatre (37 Bowery) is devoted to German plays and operas; and Tony Pastor's Opera House (201 Bowery) gives popular varieties and spectacles. Bryant's Minstrels (115 W. 23d St.) give negro melodies, dances, &c. There are numerous well-arranged German beer-gardens in the city, where music and dancing are given. The Central Park Garden affords the best of orchestral music, and is a favorite summer evening resort of the up-town families. The Atlantic Garden (next to the Bowery Theatre) has fine music, but is chiefly visited by Germans. The cellar concert-saloons on Broadway and elsewhere should be avoided, for they are (for the most part) both disreputable and dangerous. Lectures and concerts are frequently given in Association, Cooper Institute, Apollo, and Irving Halls. Classic music, oratorios, and concerts are generally given in Steinway Hall (14th St., near Broadway).

Railroads. — Across Staten Island to Tottenville, Pier 1, E. R.; to Philadelphia, by Trenton (90 M.) from foot of Cortlandt St.; by S. Amboy (92 M.); to Easton, Pa., from foot of Liberty St.; to Greenport, Long Island (foot of James St.); to Flushing; to Hackettstown; to Long Branch; to Albany (144 M.), station corner of 30th St. and 10th Ave.; to Albany (by the Harlem R. R.), from the 42d St. station; to New Haven and Boston, from the corner of 4th Ave. and 42d St. The Erie Railway (ferry) stations are at the foot of Chambers and of 23d St.

Steamers. — *Transatlantic lines* — for Liverpool, the White Star and Cunard Lines, Piers at Jersey City; Inman Line, Pier 45, N. R.; U. S. Mail Line, Pier 46; National Line, Piers 44 and 47, N. R.; for Liverpool and Glasgow, Anchor Line, Pier 20, N. R.; for London, Piers 44 and 47, and 3, N. R.; for Havre, Pier 50, N. R.; for Hamburg and Bremen, Piers at Hoboken; for Antwerp; for the Mediterranean ports. *West Indian lines* — for Havana, Atlantic Mail Line, Pier 44, N. R.; for Havana and Vera Cruz, Pier 17, E. R.; for Hayti, Nassau, and the Bermudas. For St. Thomas and Brazil (monthly), Pier 43, N. R.; for St. Domingo and Samana Bay. For Panama and San Francisco (semi-monthly), Pier 42, N. R. *The American coast* — for Key West and Galveston (tri-monthly), Pier 20, E. R.; for New Orleans (3 weekly steamers), Piers 9 and 12, N. R., and 20, E. R.; for Fernandina, Pier 29, N. R.; for Savannah (two weekly steamers), Piers 13 and 36, N. R.; for Charleston (thrice weekly), Piers 5 and 8, N. R.; for Newbern (tri-monthly), Pier 16, E. R.; for Norfolk and Richmond (tri-weekly), Pier 37, N. R.; for Washington and Alexandria (semi-weekly), Pier 29, E. R.; for Philadelphia (tri-weekly), Piers 33 and 34, E. R.; for New Bedford (semi-weekly), Pier 13, E. R.; for Boston (outside), Pier 11, N. R.; for Portland (semi-weekly), Pier 38, E. R.

Coastwise and river lines — to Yonkers, Tarrytown, West Point, Newburg, Poughkeepsie, Hudson, Albany, and Troy, from Pier 39, N. R. (morning boat), and from Pier 41, N. R. (evening boat); other river-steamers are at Piers 49, 35, 34, 51, and 43; to Elizabethport and Kill Von Kull, from Pier 14, N. R. (thrice daily); to Staten Island (North Shore) hourly, from Pier 19, N. R. — (South Shore), from Whitehall; to Elizabethport and Perth Amboy, from Pier 26; to Long Branch, from Pier 35; to Sandy Hook, from Pier 28; to Newark, from Pier 26; to S. Amboy, from Pier 1, N. R.; to Astoria and Harlem, 12 times daily, from Pier 24, E. R. (Peck Slip); to Bay Ridge, from Pier 15, E. R., 6 times daily; to Great Neck, Glen Cove, Roslyn, and Whitestone, from Pier 24, E. R.; to College Point and Flushing, from Pier 22, E. R.; to Huntington and Oyster Bay, from Pier 37, E. R.; to Greenport and Orient, from Pier 4, N. R.; to High Bridge and Kingsbridge, from Harlem Bridge; to Morrisania, from Pier 22, E. R.; to Sag Harbor, from Pier 4, N. R. Steamers leave for Greenwich and Stamford from Pier 37, E. R.; for Norwalk, from Pier 37, E. R.; for Bridgeport, from Pier 35, E. R.; for Stratford and Milford, from Pier 37, E. R.; for New Haven, from Pier 25, E. R. (afternoon and evening); for Hartford and the Conn. River ports, from Pier 24, E. R.; for New London (and Boston), from Pier 40, N. R.; for Stonington (and Boston), from Pier 33, N. R.; for Newport, Fall River (and Boston), from Pier 28, N. R.; for Providence, from Pier 27, N. R.

New York City, the commercial metropolis of the United States and the chief city of the Western Hemisphere, is situated on Manhattan Island, at the mouth of the Hudson River, in latitude $40^{\circ} 42' 43''$ N., and longitude $3^{\circ} 1' 13''$ E. from Washington. The population of the city in 1870 was 926,341. The island is $13\frac{1}{2}$ M. long, and 1-2 M. wide (containing 22 square M.), and is bounded on the W. by the Hudson River, on the E. by the East River, on the N. by Harlem River and Spuyten Duyvil Creek, while its S. end looks out on the Bay of New York. The lower part of the island consists of alluvial deposits, but low, rocky ridges are found in the central part, which ascend to the cliffs of Washington Heights on the N. The city extends for 5-6 M. N. from the Battery, and the district above the densely settled streets is studded with villas, public and charitable buildings, and market-gardens. The grand avenue called Broadway runs from the lower end of the island to the Central Park, beyond which the broad and costly Boulevard conducts to the N. end. The city is laid out somewhat irregularly from the Battery to 14th St. ($2\frac{1}{2}$ M.), but beyond that line a succession of straight, parallel streets extend from river to river, and are crossed at right angles by broad avenues running lengthwise of the island. The Bay of New York is one of the most picturesque in the world, and affords a safe anchorage for the largest commercial fleets and the great vessels of the European steamship-lines. The inner harbor is entered through a deep strait called the Narrows, which is defended by the most powerful and imposing fortifications and armaments in the Western world.

The site of New York was discovered by the Florentine mariner, Verrazzani, in the year 1524. The harbor was again visited by Hendrick Hudson, commanding a vessel of the Dutch East India Company (Sept. 3, 1609), and from the scene of wassail and merriment which followed the meeting of the sailors and the natives, the Indians named the island Manhattan ("the place where they all got drunk"). Hudson then ascended the river since named in his honor to the site of Albany, and claimed the land, by right of discovery, as an appanage of Holland, under the name of the New Netherlands. In 1614 a Dutch colony came over, and built 4 houses and a fort (near the present Bowling Green), naming the place New Amsterdam, in honor of that city which had taken the foremost part in the enterprise. In 1664, Peter Stuyvesant being Captain-General and the place having about 1,800 inhabitants, King Charles II. of England granted all the land from the Connecticut to the Delaware River to his brother, the Duke of York, and an English fleet under Capt. Nichols captured New Amsterdam and named it New York. A Dutch fleet retook the place in 1673 (the population being about 2,500), but it was soon restored to England by treaty. Gov. Sir Edmund Andros was ousted by the people (a few years later), and Jacob Leisler took his place, and ruled amid the trials and terrors of bitter political struggles and sanguinary invasions from Canada. In 1700 the city had about 6,000 inhabitants; in 1702 the first free grammar school was opened; in 1711 a slave-market was opened in Wall St.; in 1725 the *New York Gazette* was established; and in 1732 a classical academy was founded. The commerce of the city increased rapidly, and its merchants took a bold and decided stand against the unjust aggressions of Parliament. The American army under Washington occupied the city in 1776, but the British troops who had abandoned Boston landed on Long Island, and after a severe battle near Brooklyn, Washington was forced to retreat. Other actions at White Plains and King's Bridge resulted in great damage to the Americans, and New York was left in the hands of the British, who occupied it for seven years. Part of the city was

burnt, part of it was turned into barracks, hospitals, and prisons, and thousands of Americans were confined on floating hulks in the East River. Nov. 25, 1783, the British left, and Washington and the Governor of the State entered in triumph. The first Federal Congress met here, and here, in 1789, Washington was inaugurated President (the city then having 33,000 inhabitants; in 1800 it had 60,489). The first steamer was put on the Hudson in 1807, and the Erie Canal was completed in 1825, amid splendid celebrations in the city and State. Gas was introduced in 1825; in 1832 the Asiatic cholera carried off 4,360 persons; in 1835 a great fire destroyed \$20,000,000 worth of property; and in 1837 the great financial crisis ruined thousands. The Croton Aqueduct was completed in 1842, and a fire in 1845 caused a loss of \$7,000,000. The city has grown rapidly since the introduction of the railway system, and the most remote parts of the States are reached by its immense lines of track. Scores of ocean-steamers and fleets of packet-ships bring in the products of all other continents, and bear away full cargoes of Western grain, or the manufactures of the Middle and Eastern States. In 1820 New York had 123,706 inhabitants; in 1840, 312,710; in 1860, 813,669; and in 1870, 926,341. There are but two larger cities (London and Paris) in Christendom, and if the population of the close-lying suburbs of Brooklyn, Williamsburg, and Jersey City were added to that of New York, it would be the sixth city in the world.

The Battery is a park at the S. end of Manhattan Island, containing $10\frac{1}{2}$ acres, and adorned with large trees and verdant lawns. The waterfront is secured by a sea-wall of massive masonry, above which is a broad promenade which affords admirable * views of the Bay. The populous heights of Brooklyn are in the E., with Governor's Island nearer at hand, on which the high walls of Castle William are seen, with the embankments of the less imposing but more powerful Fort Columbus, a star-fort mounting 120 heavy cannon. Ellis and Bedloe's Islands are seen farther down the harbor, with the long hill-ranges of Staten Island beyond, and Jersey City on the W. The curious round structure on the Battery was built for a fort ("Castle Clinton") in 1807, was ceded to the city in 1823, and was the scene of the civic receptions of the Marquis Lafayette, Gen. Jackson, President Tyler, and others. It then became an opera-house, where Jenny Lind, Sontag, Parodi, Jullien, Mario, &c., made their appearance. The building is now used as a depot for immigrants, who are here received from their ships, and from which they are sent to their destinations. From **Whitehall**, on the E. of the Battery, the Staten-Island, South, and Hamilton (Brooklyn) ferry-boats start, besides several horse-car and stage lines. Boatmen may be engaged here for trips in the harbor. From this point South St. follows the East River shore for over 2 M., passing the ferries to the Long Island cities, and the piers at which lie hundreds of stately packet and clipper ships, and humbler coasting-craft. **Bowling Green**, the cradle of New York, is just N. of the Battery. Near by, Fort Amsterdam was built in 1635, and in 1770 an equestrian statue of King George III. (of gilded lead) was set up on the Green. In 1776 the statue was overthrown by the people, and taken to Litchfield, Conn., where it was melted into (42,000) bullets. West St. runs N. along the Hudson River shore for over 2 M. from the Battery, passing the piers of hundreds of steamers and the ferries to the New Jersey shore. The house

No. 1 Broadway was built in 1760, and has served as the head quarters of Lord Howe, Gen. Clinton, Lord Cornwallis, and Gen. Washington. Talleyrand once lived in this house, and Fulton died alongside it. Benedict Arnold lived at No. 5 Broadway, and Gen. Gage had his head quarters at No. 11. A short distance above the Green is * **Trinity Church**, a noble Gothic building of brown-stone, with a spire 284 ft. high. The interior is 192 ft. long and 60 ft. high, with a deep chancel lighted by a superb window, and with massive columns separating the nave from the aisles. The church is open all the week, and the ascent of the spire (308 steps; small fee to the sexton) should be made for the sake of the * view from the top. To the S. is the noble harbor with its fleets and fortified islands and the fair villages of Staten Island in the distance; to the W., across the Hudson, are Jersey City, Newark, Bergen, and Elizabeth; and up-river from Jersey City are Hoboken and Weehawken, with the Palisades and the distant blue Highlands in the N. The thronged and brilliant Broadway runs N. E. for 2 M. to Grace Church, and the great mass of the city is seen on either hand; while the course of East River may be followed from above Blackwell's Island by Flushing, Astoria, and Greenpoint, to Brooklyn and Greenwood. Directly below is the crowded Wall St., along whose line ran the walls of New Amsterdam. There is a large and venerable graveyard about the church, in which are buried Alexander Hamilton, Capt. Lawrence (of the Chesapeake), and other noted men, while in one corner is a stately Gothic monument to the patriots who died in the British prison-ships. Trinity Society is the oldest in New York, and the first edifice on the present site was built in 1696. In 1705 Queen Anne gave it a fine communion service (still preserved), and also a large tract of land on Manhattan Island, which has since so increased in value that this church is the richest in America (said to be worth over \$10,000, 000), and spends immense sums annually in benefactions among the poor of New York, besides supporting a considerable body of clergy and a choir which is unsurpassed in the country. There are morning and evening prayers daily in the church (9 A. M. and 3 P. M.), with imposing choral services on Sunday. The chime of bells in the steeple is the finest in America.

Wall St. runs E. from Trinity Church, and is the resort of bankers and brokers, and the financial centre of the republic. At No. 13 the visitors, gallery of the *Stock Exchange* may be entered, and at about noon affords an exciting view of the busy whirl below. The stately **U. S. Sub-Treasury** is on the corner of Wall and Nassau, on the site of the hall in which Washington was inaugurated first President of the U. S. (1789). It is built in partial imitation of the Parthenon at Athens, with Doric colonnades and classic pediment, and a lofty interior rotunda, supported by 16 elegant Corinthian columns. It is of Massachusetts marble (with

granite roof), and took 8 years in building, costing \$ 2,000,000. (Visitors admitted, 10 - 3 o'clock.) Broad St., the home of speculators and brokers, leads off to the S. from the Treasury, while running N. is the busy Nassau St., on which (two squares distant) is a quaint old edifice, which was built, 1723 - 6, for the Middle Dutch Church, and was used during the Revolution as a prison for Americans, and a riding-school for British cavalymen. It was used as a church again from 1784 until 1844, when it was bought, and has since been used for a post-office. Near the Treasury are the great banking-houses of Henry Clews & Co., Fisk & Hatch, Jay Cooke & Co., Duncan & Sherman, &c., while opposite the Treasury is the superb Drexel building (built in the Renaissance style at a cost of \$ 700,000). Still farther down Wall St. is the **U. S. Custom House**, a massive building of granite, marble, and iron, originally built for a Merchants' Exchange, at a cost of \$ 1,800,000. It is 200 ft. long, and has a portico of 18 Ionic columns, while a dome 124 ft. high overarches a rotunda surrounded by 8 rich Corinthian columns of Italian marble, and capable of containing 3,000 persons. The elegant Bank of New York is opposite the Custom House, and just below is Pearl St., the scene of a heavy wholesale trade in cotton and other staples. A ferry runs from the foot of Wall St. to Montague St., Brooklyn. Returning to Broadway, the immense buildings of the Bank of the Republic, the Metropolitan Bank, the Equitable Life Ins. Co. (137 ft. high), and others are passed. Fulton St. turns off to the r. at the busiest part of Broadway, and leads to **Fulton Ferry**, passing the old North Dutch Church, and the Fulton Market. *St. Paul's Church* (Epis.), on the l. of Broadway, was built in 1766, and has a statue of St. Paul on its pediment, with a mural tablet in the front wall over the remains of Gen. Montgomery. Opposite the church is the floridly ornamented Park Bank and the extensive and elegant *Herald Building*, standing on the site of Barnum's Museum (which was burnt in 1865). The long and simple granite front of the *Astor House* comes next, on Broadway (on the l.), with Vesey St. diverging to the l. and leading to the great *Washington Market*, with its rude and unsightly sheds filled with a rare display of the fruits and vegetables, meats and fish, of the adjacent districts. Park Row stretches off obliquely to the r. from the Astor House to Printing House Square, with its bronze statue of Franklin. This vicinity is one of the great intellectual centres of America, and here are seen the offices of the *Herald*, *Times*, *Tribune*, *World*, *Sun*, *Telegram*, *News*, *Express*, *Day Book*, *Evening Mail*, *Journal*, *Staats Zeitung* (all daily papers, besides a shoal of weeklies.) The *Christian Union*, *Independent*, *Nation*, and other able papers, are published in Park Place. By turning from Printing House Square down Frankfort St., Franklin Square is reached, with the vast and imposing publishing house of the Harpers. Chatham St., the prolongation of Park Row, is the home of Jew trades-

men, mock auctions, and old-clothes shops. At the S. end of the City Hall Park, and opposite the Astor House, is the new * **U. S. Post-Office**, a stately and immense granite building, with lofty Louvre domes and a frontage (on Broadway) of 340 ft. The architecture is Doric and Renaissance, the granite columns and blocks being cut and carved ready for their places (by 600 men) at Dix Island, on the coast of Maine, and the building is absolutely incombustible. The basement and first floor will be reserved for the Post-Office, the second and third floor for the U. S. Courts, and 12 elevators will keep up communications. The **City Hall** is N. of the Post-Office, and is a fine building of Massachusetts marble, 216 ft. long and 105 ft. broad, with Ionic, Corinthian, and composite pilasters lining its front. It is surmounted by a fine clock-tower, which is illuminated at night. The City Hall was nine years in building, and cost \$700,000. N. of this edifice is the new **Court House**, a massive and magnificent marble building, in Corinthian architecture, 250 ft. long, and completely fire-proof. It was commenced in 1861, the expense being estimated at \$800,000, but the infamous Tammany Ring having gained control in the city, \$5-6,000,000 was (nominally) spent on the Court House. The elegant Corinthian portico on Chambers St., the lofty and graceful dome, and other details of the plan, have not yet been completed. Opposite the Court House is the great marble building devoted to A. T. Stewart's wholesale trade (shawls, silks, and dry goods), standing on the site of a British fort of 1776-83. Passing up Broadway, with immense and costly buildings on either side, and similarly lined streets running off to r. and l., the brilliant windows, the throngs on the sidewalks, and the roar of the street cause constant surprise. On the r. is the "Bloody Sixth" Ward (bounded by Broadway, Canal, Bowery, and Chatham Sts.), with its dense and dangerous population, its filth, poverty, and crime. By turning down Leonard St. (to the r.) the city prison, called the **Tombs**, is reached. It is built massively in the gloomiest and heaviest form of Egyptian architecture, and is usually well filled, while in the interior of the quadrangle is the place of executions. A short distance beyond, at the intersection of Baxter, Park, and Worth Sts., is the *Five Points*, formerly the most terrible locality in the city and republic, but now somewhat improved by the aggressions of religious missions. In this vicinity are the crowded and reeking tenements, the narrow and filthy alleys, the unspeakable corruption and utter depravity of the slums of the Empire City. It is well to be accompanied by a policeman during a visit to this district, both to insure personal safety and to learn minute details.

Advancing up Broadway, Walker St. is seen on the l., leading to the Hudson River R. R. Depot, whose Hudson St. front is surmounted by the largest bronze groups in the world (emblematic of Vanderbilt's career). The ancient Chapel of St. John fronts the depot, which was built on St.

John's Park. Passing now the superb white marble N. Y. Life Ins. Building (Ionic architecture) and the Brandreth House, the wide Canal St. is crossed. Lord and Taylor's vast wholesale store, the St. Nicholas Hotel, Appleton's bookstore, and Ball, Black & Co's. jewelry store are passed on the l., with the Prescott and Metropolitan Hotels on the r. A little way beyond the Grand Central Hotel (on the l.), a side street leads W. to Washington Square, laid out on the old Potter's Field, where over 100,000 bodies are buried in trenches. On one side of the Square is the **New York University** (founded in 1831), a fine marble building 200 ft. long, in English collegiate architecture, with a large Gothic window lighting the chapel. Above the Grand Central Hotel, Astor Place leads off obliquely to the r. to the *Mercantile Library* (95-100,000 volumes) in the old Astor Place Opera House. Close by, on the S., in Lafayette Place, is the **Astor Library** (open 9-5 daily), in two lofty halls in a large Romanesque building. The library was endowed with \$400,000 by John Jacob Astor, and has over 100,000 volumes, besides rare old books and considerable departments in the European languages. The *Bible House* (at the end of Astor Place) is an immense structure, six stories high, covering $\frac{3}{4}$ of an acre, with 700 ft. frontage, and containing 600 operatives. It cost \$300,000, and is the property of the American Bible Society, and besides the vast numbers of Bibles issued from its presses, there are 13 religious and philanthropic papers published in the building. Since 1817 this society has put in circulation 9,000,000 Bibles and Testaments, in 24 languages. Opposite the Bible House is the **Cooper Institute**, a brown-stone building occupying an entire square, which was founded and endowed by Peter Cooper, of New York. It has a great library and reading-room, with courses of lectures and special studies, nearly all of which are free to the people. Stuyvesant Place leads N. E. from the Institute, passing *St. Mark's Church* (Epis.), which has the tombs of the Dutch Captain-General Stuyvesant (died 1682), the British Governor Sloughter, and the American Governor Tompkins. At the end of the Place is the elegant yellow sandstone building of the N. Y. Historical Society, with a rich historical library of 20,000 volumes, collections of antiquities, a picture gallery, and museums of Nineveh marbles and Egyptian curiosities. Cole's "Course of Empire" paintings are in this art gallery.

On Broadway, corner of 10th St., is Stewart's vast dry-goods store, with 15 acres of flooring, said to be the largest store in the world. **Grace Church** and Rectory are now seen on the r., costly and elegant buildings of marble, in the most florid Gothic architecture. The lofty and graceful spire is much admired, and the interior of the church, with 40 stained windows, light columns and arches and carvings, has a theatrical splendor. At this point Broadway bends to the l., and soon reaches **Union Square**, a pleasant oval park, with green lawns and shrubbery, and a large popu-

lation of English sparrows. On the E. is a colossal equestrian statue of Washington, which is much admired, and on the W. is a bronze statue of Lincoln. The Square is lined with fine hotels and stores, although it was formerly the most aristocratic part of the city. University Place runs S. from Union Square, passing the N. Y. Society Library (near 12th St. founded 1700 ; 38,000 volumes) and the Union Theological Seminary (near 8th St. ; with 6 professors and 100 students), to the N. Y. University. 14th St. runs E. by the elegant Steinway Hall, the Academy of Music, Grace Church Chapel, and Tammany Hall.

4th Avenue runs N. from Union Square. To the r., down 16th St., is Stuyvesant Square and **St. George's Church** (Epis.), a large and elegant edifice of brown-stone, in Romanesque architecture, with a richly frescoed ceiling 100 ft. above the floor, a spacious chancel, twin spires (245 ft. high), and a fine rectory (the home of S. H. Tyng, D. D.). Farther up 4th Ave. (corner of 20th St.) is the **Church of All Souls** (Dr. Bellows ; Unitarian), a curious structure in Italian architecture, with alternate courses of brick and light-colored stone. On the next corner is the *Calvary Church* (Epis.), a Gothic building of brown-stone, and near by is **St. Paul's Church** (Meth.), of white marble, in Romanesque architecture. On the corner of 4th Ave. and 23d St. is the *Young Men's Christian Association* building, a large and costly structure of brown and Ohio stone, in the Renaissance architecture, and including a fine library, reading-rooms, parlors, a gymnasium, and a public hall. Strangers will meet a kindly welcome here. Opposite the Y. M. C. A. is the elegant * **National Academy of Design**, built of gray and white marbles and blue-stone, in the purer Gothic forms of the 12th century, with certain features copied from the best Venetian architecture. It has an imposing entrance and stairway, with extensive galleries, in which every spring and summer are held exhibitions of hundreds of the recent works of the best of living American artists (admission 25c.). On the lower floor is the Suydam collection (on permanent deposit), which includes 92 pictures by eminent French and American artists, with a few works of the old Italian masters. E. of the Academy (on 23d St.) are the N. Y. College of Physicians and Surgeons, the Demilt Dispensary, the Ophthalmic Hospital, and the College of the City of New York (corner of Lexington Ave.). Passing W. along 23d St., **Madison Square** is soon reached (3 M. from the Battery), a bright and fashion-favored park of six acres, surrounded by palatial hotels (5th Ave., Hoffman, St. James, &c.), and adorned by a monument to Gen. Worth. 23d St. runs thence W. to the Hudson River, passing *Booth's Theatre* (corner of 6th Ave.), with the new and imposing Masonic Hall on the opposite corner, and the great marble *Opera House* on the corner of 8th Ave. Turning to the l. from 23d St. down 9th Ave. to 20th St., the stone buildings of the richly endowed and flourishing *General*

Theological Seminary (Epis.) may be seen. Broadway runs N. from Madison Square for nearly 2 M. to the Central Park, crossing the numbered streets obliquely, and passing the sumptuous Stevens House (*hotel garni*, corner of 6th Ave.), Wood's Museum (near 30th St.), the Congregational Tabernacle (corner of 34th St.), the Armory of the 37th Regiment (corner of 6th Ave.), and long lines of fine buildings and stores. Fifth Avenue begins on the S. at Washington Square, and passes the College of St. Francis Xavier (Jesuit ; corner of 15th St. and opposite the Manhattan and the New York Club Houses), Belmont's palace (corner of 18th St.), Dr. Hall's Church (Pres. ; corner of 19th St.), the Church of the Holy Communion (Epis. ; cruciform Gothic, of brown-stone, with free seats ; corner of 20th St. and 6th Ave.), and the Union Club House (built of brown-stone at a cost of \$ 300,000 ; corner of 22d St.). The avenue now passes the line of superb hotels on the W. side of Madison Square, and crosses Broadway diagonally. The route from Madison Square to the Central Park by this avenue leads through the most aristocratic and splendid street in America, — forming a scene of unexampled brilliancy and beauty, especially on pleasant Sundays after morning service and late in the afternoon. Just off the avenue on 25th St. is *Trinity Chapel*, an elegant edifice lined with Caen stone, frescoed, with richly stained windows, and famous for its choral services. *St. Stephen's Church* (Cath.), which has the most elegant altar in America, may be seen down 28th St., which leads off to the E. to *Bellevue Hospital* and the Morgue. On 29th St., near the avenue, is the quaint and irregular Church of the Transfiguration, much affected for fashionable weddings and familiarly known as "the little church around the corner." On the corner of 33d St. is W. B. Astor's mansion, while on the corner of 34th St. is the superb marble palace of A. T. Stewart, which cost \$ 2,000,000, and has a famous picture-gallery.

34th St. leads W. to the Hudson, passing the turreted and embattled buildings of the N. Y. Institution for the Blind. On the E. it conducts to Park Ave., on high ground, which is underlaid by the 4th Ave. R. R. passing through a tunnel over which are well-arranged parks. The Unitarian Church of the Messiah fronts on Park Avenue, and is adjoined by the spacious Church of the Covenant (Pres.), built of gray-stone in Lombardo-Gothic architecture. In this vicinity (corner of 4th Ave. and 32d St.) is a vast and elegant iron building, erected by A. T. Stewart for a home for working-women.

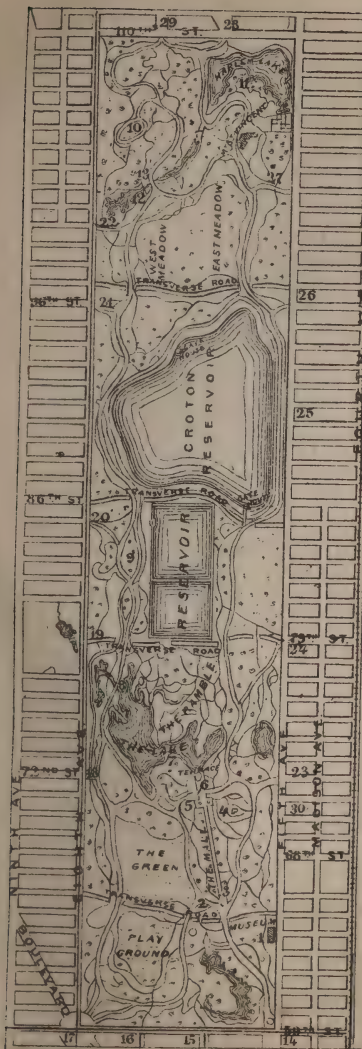

On the corner of 5th Ave. and 35th St. is the costly and ultra-ritualistic Christ Church (Epis.), with its renowned artistic music and its elaborate frescoes, while the plainer Brick Church (Pres.) is on the 37th St. corner. On 5th Ave., from 40th to 42d Sts., is the **Distributing Reservoir** of the Croton Aqueduct, massively built of granite in Egyptian architecture, 44

ft. high, 420 ft. square, with an area of 4 acres and a capacity of 23,000,000 gallons. The broad promenade on top is open to the public, and commands extensive and pleasing views. Reservoir Square is a pretty park on the W., while the (French Catholic) College of St. Louis is farther down on 42d St. Opposite the Reservoir (on 5th Ave.) is the feudal-looking building of Rutgers Female College. Two squares to the E. on 42d St. is the **Grand Central Depot**, the converging point of several railways. It is an enormous structure of brick and stone, covering 3 acres, and 700 ft. long, built in Renaissance architecture, with several lofty Louvre domes. On the corner of 5th Ave. and 43d St. is the Jewish *Temple Emanuel*, the chief of the 27 synagogues of the city, and the finest piece of Saracenic architecture in America. It has some features copied from the ancient Alhambra, and its interior is a dazzling picture of Oriental magnificence. On the corner of 45th St. is the 4th Universalist Church (Dr. Chapin's), near which is the curious front of the Episcopal Church of the Heavenly Rest. On 49th St., near the avenue, are the buildings of *Columbia College*, a venerable and wealthy institution, which was chartered (as King's College) by George II. of England in 1754. At the corner of 50th St. is the **Cathedral of St. Patrick** (Cath.), which is to be the grandest church in America. It was commenced in 1858, and is now nearly half done; the building occupying the highest point on 5th Ave. and being firmly founded on solid ledges of rock. The material is white marble, and the architecture is the decorated Gothic of the 13th century. The front is to be guarded by two marble spires, each 328 ft. high, and adorned with statuary and rich carvings, while the interior columns are of marble, supporting a high and ornate clere-story. The lofty and elegant front entrance (now completed) is worthy of close inspection. N. of the cathedral is the Catholic Orphan Asylum. The spacious Church of St. Thomas (Epis.) is just above (on the l.), near which is St. Luke's Hospital. At 59th St. is the Scholars' Gate to the

Central Park.

In 1856 the present site of the Park was a dreary and desolate region of swamps and ledges, dotted here and there with heaps of rubbish and the shanties of a rude and degraded people. In that year the work began which has since given New York the most beautiful, and one of the largest of the parks of the world, — a work which up to the close of 1864 alone had cost \$9,200,000. The park is a parallelogram, $2\frac{1}{2}$ M. long and $\frac{1}{2}$ M. wide, being 5 M. N. of the Battery, and nearly 1 M. from the rivers on either side. It includes 863 acres, of which 185 are of water, 15 M. of carriage-roads, 8 M. of bridle-paths, and 25 M. of walks, while communication across the island is confined to four sunken roads which pass from E. to W. across the park and under its drive-ways. Park carriages are in waiting at the lower gates, and carry visitors all through the grounds, for a small sum. There are brilliant skating-carnivals on the frozen ponds during winter, and on summer afternoons (especially Sundays) the promenades and driveways are thronged. The park may be reached by either of several horse-car lines from the Astor House and the lower part of the city.

Near the Scholar's Gate (5th Ave.) is the old State Arsenal, a massive

CENTRAL PARK.

castellated building now used for the officers of the park and for an Art Gallery, in which are 87 casts from the statuary works of Crawford, together with other curiosities. A considerable number of rare wild animals and beautiful birds are kept in cages near the building, and form the nucleus of a Zoölogical Garden. Near the Scholar's Gate is a large bronze bust of Humboldt, beyond which is the *Pond* ($4\frac{1}{2}$ acres), an irregular sheet of water much favored by skaters in winter. From this gate, winding paths and drives conduct, by graceful curves and passing picturesque knolls and groves, bridges and arbors, to **The Mall**, the chief promenade and ornament of the park. At the entrance of this noble esplanade are fine bronze statues of William Shakespeare and Sir Walter Scott, and other groups and statues are seen at various points. The Mall is 1212 ft. long and 208 ft. wide, and is bordered by double lines of tall trees. At the *Music Pavilion*, near the upper end, fine band-concerts are given on pleasant Wednesday and Saturday afternoons, and at such times the vicinity is filled with a gay and varied crowd. The Mall is terminated by **The *Terrace**, a sumptuous pile of architecture, with frescoed arcades and corridors, broad promenades, costly and elaborate balustrades, and high pedestals which are to be graced with symbolic statuary. Broad stone stairways lead down to the esplanade by the lake-side, on which is erected the most elegant fountain on the continent, with bronzes and rare marbles representing the Angel of Bethesda. A large flotilla of pleasure-boats is kept on the *Central Lake* (20 acres), and pleasant excursions may be made with little expense (tariffs regulated by the commissioners). On the W. of the Mall is the *Green*, a broad lawn covering 15 acres, and destined for a parade-ground. Near the head of the Mall (on the r.) is the *Casino*, a neat refectory on a high knoll. Crossing Central Lake by the graceful Bow Bridge, **The Ramble** is entered, -- 36 acres of copse and thicket and craggy hill, bounded by the lake and threaded by a labyrinth of romantic foot-paths. The Vine-covered and Evergreen Walks, the Stone Arch, the Grotto, and other pretty objects are found in the Ramble. On Vista Hill (to the N.) is the *Croton Reservoir*, which covers 31 acres, is 105 ft. above tide-water, and contains 150,000,000 gallons of water. There are broad and far-viewing promenades on its walls of massive masonry. Just to the N. is the *New Reservoir*, covering 106 acres and having a capacity of 1,000,000,000 gallons. The graceful curves of its shore-line are bounded by lofty stone walls of immense thickness, and ornamental gate-houses stand at its N. and S. ends. Just S. W. of the rectangular (smaller) reservoir is the **Belvidere**, situated on high ground overlooking the park. Above the New Reservoir is the Upper Park, less visited and with less artificial embellishment than the Lower Park, but with more marked natural beauties. Passing the East and West Meadows the buildings of *Mount St. Vincent* are seen on the E., where a pleasant

refectory has been installed in the place formerly occupied by a Catholic Seminary. To the E. is the Arboretum, while close by, on the N., is *Harlem Lake* (covering 16 acres), with its bold S. shore lined with the remains of ancient fortifications. A pretty falling stream, spanned by five bridges, runs W. from the lake to a picturesque pond S. of the fall viewing *Great Hill*, which looks down into the ravine known in the Revolutionary era as McGown's Pass. *The Bluff* is a bold cliff which terminates the park on the N., and bears the remains of old forts and fieldworks.

Fronting on the park near the Children's Gate (72d St. and 5th Ave.), is the **Lenox Library**, a stately marble building, costing \$500,000, and designed for the reception of a museum, art-gallery, library, and lecture-hall. Close by is the *Lenox Hospital* (Presbyterian), a quaint and ornate brick and stone structure, with tall and slender spires. A few rods distant (on the old Hamilton Square; and built at a cost of \$300,000) is the spacious and imposing new building of the **Normal College**, in the secular Gothic style, with a lofty and massive Victoria tower. The Foundling Hospital is still farther E., and in plain sight is the *Mount Sinai Hospital*, a cluster of stately buildings in Elizabethan architecture, erected at a cost of \$340,000. The vast German park and beer-garden called *Jones's Wood*, is still farther E. at the river-side, and looks across on Blackwell's Island.

From the point where Broadway reaches the park (corner of 8th Ave. and 59th St.) a grand avenue called the **Boulevard**, with a parked centre and graceful curves, runs N. to Manhattanville and Kings Bridge. This road passes (at 73d St.) the extensive stone building (Gothic) of the *N. Y. Orphan Asylum*, which looks down on the Hudson. The Leake and Watts Orphan House fronts on 110th St., and can accommodate 250 children. Close by (on the E.) is the Morningside Park. At 115th St. is the *Bloomington Asylum for the Insane*, with spacious buildings in pleasant grounds. The Boulevard now leads by market-gardens and rural villas, to the village of *Manhattanville* (130th St.), with the imposing buildings of the Convent of the Sacred Heart and of Manhattan College on the hill beyond.

Environs of New York.

The **High Bridge** is a structure worthy of the Roman Empire. It is 1,450 ft. long, 114 ft. high, is supported on 14 piers, and is used to carry the Croton Aqueduct across Harlem River. It is built of granite, and cost \$900,000. Near this point (11 M. from the City Hall) are the buildings of the Juvenile Asylum, while the elegant structure of the Institution for the Deaf and Dumb is to the S. W. (near 165th St.). Just across Manhattan Island (which is narrow at this point) is *Fort Washing-*

ton, looking down on the Hudson in a succession of fine views. The High Bridge may be reached by the lines of horse-cars which traverse 2d and 3d Aves., but the steamers which leave Peck Slip (12-15 times daily) for Harlem afford a more pleasant route. These boats pass up the East River, by the immense municipal charitable and correctional buildings on *Blackwell's Island*. The entire E. water-front of the city is passed, Astoria is visited, and, leaving the tumultuous Hell Gate passage on the r., the boat enters a narrower channel with *Ward's Island* on the r. On this island are seen the imposing and extensive buildings of the Inebriate Asylum, together with the Lunatic Asylum and the Emigrant Hospitals. *Randall's Island* comes next (on the r.), with the House of Refuge and other civic charities. The steamer stops at Harlem Bridge, whence the High Bridge may be reached by smaller boats or by road.

Brooklyn, the third city of the Union (396,300 inhabitants), is joined to New York by several ferries across East River. The bridge which has been in process of construction for years, and which will connect the two cities, will be the most stupendous work of the kind in the world. The *City Hall* is 1 M. from the Fulton Ferry (corner of Court and Fulton Sts.) and is an elegant classic building of white marble, near which is the *Kings County Court House*, built of marble in Corinthian architecture, at a cost of \$540,000. There are many other fine public buildings in the city, while the private mansions (on Clinton Avenue, Brooklyn Heights, &c.) are worthy of notice. The *U. S. Navy Yard* is of the first class, and covers 40 acres, with large depots of *materiel* of war, ship-houses, barracks, &c., while the Dry Dock (which cost \$1,000,000) is one of the best. Some fine vessels may be seen here, including the old line-of-battle ship "North Carolina." The *Marine Hospital* (500 patients) is a fine granite building on the Wallabout Bay, where the British prison-ships were anchored during the Revolution, and where 11,500 patriot prisoners died. The *Atlantic Dock* fronts toward Governor's Island, and its long granite piers and immense warehouses merit a visit. The principal churches of the city are the Catholic Cathedral, a superb structure (now building) on the corner of Lafayette and Vanderbilt Aves.; the Plymouth Church (Henry Ward Beecher) on Orange, near Hicks St.; the Church of the Pilgrims (Rev. R. S. Storrs, Jr.), corner of Henry and Remsen Sts.; and the Church of the Holy Trinity, corner of Clinton and Montague Sts. From the fact of its having 233 churches, Brooklyn has won and wears the name of "The City of Churches."

Prospect Park (reached by horse-cars on Fulton St. and Flatbush Ave.) is a noble rival of Central Park, covering 510 acres, and costing, since its commencement (in 1866), \$9,000,000. The Plaza is a large, paved, circular space at the entrance, with a statue of Lincoln, fountains, and flowers. There are broad and verdant meadows, large and umbrageous groves,

hills commanding superb views of the Bay of New York, Staten Island, and the Highlands of the Hudson and the Neversink. There is a picturesque lake of 61 acres, and the romantic variety of the natural scenery of this park, together with its height and its fine distant views, render it the pride of Long Island. There are 8 M. of drives, 4 M. of rides, and a great number of rambles.

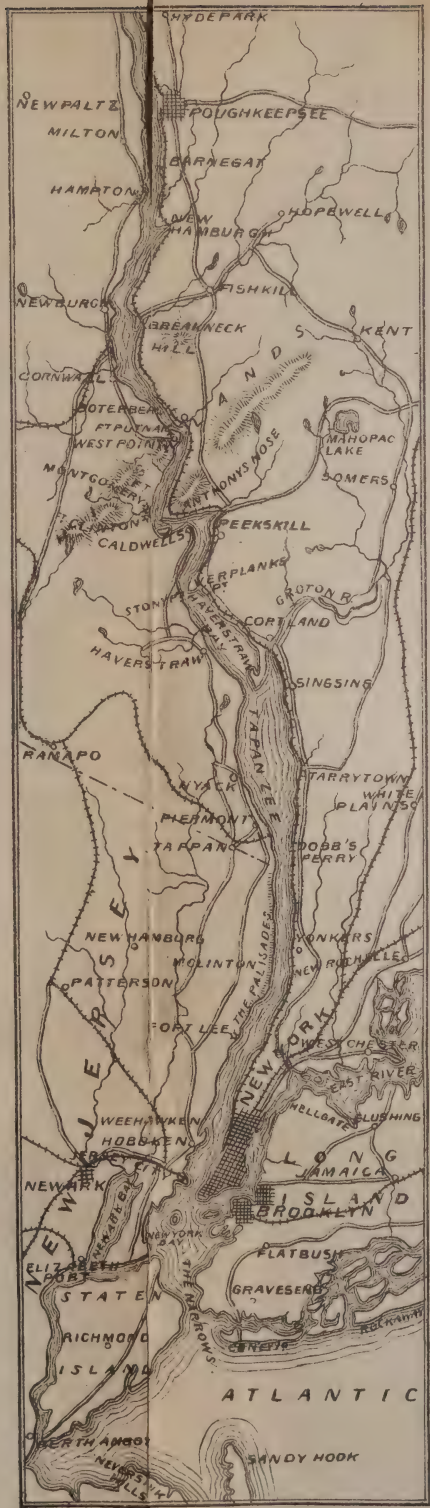

Greenwood Cemetery is 3 M. from Fulton Ferry (horse-cars every 15 minutes; strangers not admitted on Sunday), and is the most beautiful cemetery in the world. It contains 242 acres of land, traversed by 20 M. of winding paths and driveways, and embellished with forests and lakes. Ocean Hill commands a view over the limitless sea, while Battle Hill overlooks New York and its Bay, Brooklyn, Jersey City, and the Hudson. Many of the monuments are of much artistic merit, and the revenues of the cemetery are devoted to its adornment.

To the E. of Brooklyn are the large cemeteries of "The Evergreens" and "Cypress Hills," beyond which are the quaint and pleasant old Long Island towns of Flushing and Jamaica. Still farther E. is *Roslyn* (steamer from Peck Slip), a sweet village on Hempstead Bay, near which is Cedarmere, the home of Bryant. **Long Branch** is 34 M. from New York (by steamer from Pier 28, N. R., to Sandy Hook, and thence by rail), and is the favorite seaside resort of the "upper ten." It has a cluster of the most elegant and expensive summer-hotels on the coast, and has fine bathing and driving facilities. *Coney Island* is a favorite resort for the great mass of the citizens, and is quickly reached by boat from Pier 1, N. R., or by cars from Brooklyn. Excursions to the beautiful hills and vast fortifications on Staten Island; to the cities of Jersey City, Elizabeth, and Newark; and through Hell Gate to the island towns, will be found both pleasant and profitable.

52. New York to Albany.—The Hudson River.

The palatial steamers of the day line to Albany leave Pier 39, N. R. (foot of Vestry St.) at 8.30 A. M. The night boats leave Pier 41 (foot of Canal St.) at 6 P. M. The Hudson River Railroad station is on 30th St., near 9th Ave. (trains to Albany, 144 M., in 5-5½ hrs.); the Harlem Railroad station is on 42d St. (Grand Central Depot; distance to Albany, 151 M.). The day steamers will be preferred by the tourist, on account of the panoramic views of the river-scenery thereby obtained, together with the immunity from the dust and heat of the cars.

The Hudson River was named in honor of the Dutch mariner who first explored it,—ascending in the yacht "Half-Moon" as far as the Mohawk River. It has its rise in the Adirondack Mts., 4,000 ft. above the sea, and after the confluence of several branches at Fort Edward, takes a southerly course to the Bay of New York. Large steamers ascend to Troy, 150 M., and ships can go as far as Hudson, 117 M. Vast quantities of lumber are floated down the stream, while squadrons of canal-boats are frequently passed, bearing coal from Pennsylvania (by the Delaware and Hudson Canal to Rondout) and grain from the West (by the Erie Canal to Albany).

As the great steamer passes out into the stream, a fine view is afforded of the harbor in the distance, the populous shores of Jersey City and Hoboken on the W., and the dense lines of piers and warehouses on the New York shore. Above Hoboken are the Elysian Fields and Castle Hill, crowned by the Stevens mansion; and still beyond is *Weehawken*, where Aaron Burr, the political adventurer, shot (in a duel) Alexander Hamilton, a distinguished statesman and jurist, and for 6 years Secretary of the U. S. Treasury (1804). At and above Weehawken **The Palisades** begin to assume a bold aspect. This is a vast trap-dyke, 3-500 ft. high, which runs along the r. bank from Hoboken to Haverstraw, with a lofty, columnar front, and masses of fragments at its base. It is less than 1 M. thick, and hides the Hackensack Valley from the Hudson. *Bull's Ferry* (W.) is a summer-resort opposite 90th St. *Manhattanville* (E.) is a village of New York City, near which are the Lunatic Asylum and the Convent of the Sacred Heart, just above which is *Carmanville*, and a large pile of fine buildings surmounted by a dome (the N. Y. Institution for the Deaf and Dumb). On the same shore, and farther N., is *Fort Washington*, on a bold cliff near 185th St. This was the citadel of the American fortified lines in 1776, but was captured in November of that year, with its garrison of 2,600 men. On the W. shore is *Fort Lee*, whose garrison, retreating after that event, was attacked and cut to pieces by a large Hessian force. Near this point, where the cliffs loom up grandly, the immense Palisades Hotel is seen. On Jeffrey's Hook (E.) are the remains of a powerful redoubt which was built to defend the obstructions with which the river was filled, and near King's Bridge (by 217th St.) were 3 forts, about which there was desperate fighting early in 1777. A short distance above (E.), the mouth of Spuyten Duyvil Creek is passed.

This stream is named after a legendary Dutch trumpeter who swore he would swim the creek on his mission to the mainland, "in spite of the devil" (*en spuyt den duyvil*). He struggled violently when at mid-stream, gave one long trumpet-blast, and sank. At the mouth of this creek the Indians attempted to board Hudson's vessel (in 1609), but after a severe conflict they were repulsed and driven to the shore. Throughout the Revolutionary War, Spuyten Duyvil was the southern border of the "neutral ground,"—a belt of about 30 M., which was incessantly swept by raids and guerilla bands.

From the high promontory of the Palisades on the W. a road leads to the pretty New Jersey village of *Englewood*, in the fertile valley of the Hackensack. Above Spuyten Duyvil is the village of Riverdale, near which (E.) is *Mount St. Vincent*, a convent of the Sisters of the Sacred Heart. The castellated and towered stone building was the Font Hill mansion of Edwin Forrest, and the large brick building was erected by the sisterhood after their acquisition of the estate. **Yonkers** (E.) is 17 M. from New York, and is a large and flourishing town at the mouth of the Neperah River, where many New York merchants live. Hudson made his second anchorage here (1609), and traded with many Indians who

came aboard his vessel. A naval battle was fought off Yonkers in 1777 between the British frigates "Rose" and "Phoenix" and a flotilla of American gunboats. This district constituted the ancient Philipse estate, the manor-house of which is still standing, and with its broad halls, lofty rooms, wainscoting, and Dutch tiles, has a truly antique air. Part of the manor was built in 1682, and the remainder dates from 1745, all the walls being of stone. Mary Philipse, the beautiful heiress of this estate, was the first love of George Washington, and although he could not win her, he always remembered her fondly.

A little above Yonkers (on the W.) is the highest point of the Palisades, and soon *Hastings* is seen on the E., a prosperous village whence much Westchester marble is shipped. Here Lord Cornwallis's British army crossed the Hudson, just before Washington's retreat through the Jerseys. 1 M. above (E.) is *Dobbs' Ferry*, an ancient village at the mouth of Wisquaqua Creek, with ruins of old fortifications and a quaint old church. It was named for one Dobbs, a Swede, who kept a ferry here, and some years since a sharp controversy was raised by a well-supported but unsuccessful attempt to change the name to *Paulding*. Opposite this place is *Piermont*, where a pier 1 M. long (on the line between New York and New Jersey) projects from the W. shore to the deep-water channel. A branch of the Erie Railway runs thence to Suffern, 18 M. W. 3 M. from Piermont is the old village of Tappan, where Major André was tried and executed (1780), and the stone house which was Washington's head-quarters and André's prison is still standing. At Dobbs' Ferry begins a lake-like widening of the river called **Tappan Zee** (10 M. long, and 2-5 M. wide). Near *Irvington*, above the Ferry, are several fine mansions, among which is "Sunnyside," the ancient and unique home of Washington Irving. It was built in the 17th century by Wolfert Acker, who inscribed over the door "Lust in Rust" (pleasure in quiet), whence the English settlers called it "Wolfert's Roost." The eastern front is covered with ivy, from a slip which Sir Walter Scott gave Irving at Abbotsford. Above "Sunnyside" is the Paulding Manor, a costly building of marble, in Elizabethan architecture, and still farther N. is **Tarrytown**, an ancient village beautifully situated on a far-viewing hillside. Near this village (the *Terwe Dorp* of the 17th century) is a quiet valley known of old as *Slaeperigh Haven* ("Sleepy Hollow"), which has been immortalized by Irving. Carl's Mill, the Philipse Castle, and the bridge over the Pocantico, are still standing, and so is the old Dutch Church, built in the 17th century with bricks brought from Holland.

A monument marks the place where André was captured. Benedict Arnold, a brave American general, had been court-martialed and reprimanded for certain derelictions in his command of Philadelphia, and his proud spirit felt the sting of disgrace so keenly that he resolved to be revenged on his country. He opened a secret correspondence with the British, and offered to surrender West Point (to

which he had been transferred). Major André, Adjutant-General of the British army, went up the Tappan Zee on the sloop-of-war "Vulture," and landed by night at Stony Point, where he arranged with Arnold for the surrender. But the "Vulture" was forced to retire, and André, attempting to pass by land to New York, was halted in the neutral ground by a squad of irregular militia. He was searched, and the papers and plans of the surrender were found. Arnold escaped to the "Vulture," and became a Brigadier-General in the British army, receiving also \$30,000, but André, being proven a spy, was executed amid the sorrow of both armies. He has a monument in Westminster Abbey.

Nyack is opposite Tarrytown, while to the N. is *Sing Sing*, on a pleasant hillside, and near the end of the Croton Aqueduct, which has a fine stone arch here. Near the river are the extensive marble buildings of the State Prison, which were erected by the convicts, and stand in grounds covering 130 acres. The place is usually overflowing with prisoners, who are guarded by sentinels and patrols. Opposite Sing Sing (meaning "Stony Place") is Verdrigte Hook or Point-no-Point, on whose upper slope is Rockland Lake, from which New York gets 200,000 tons of ice yearly. Teller's (or Croton) Point, with its rich vineyards, is now approached, and the mouth of *Croton River* is seen. 6 M. up this river is a dam 240 ft. long, 40 ft. high, and 70 ft. thick at the bottom, which forms a lake of 400 acres with 40 ft. of water (500,000,000 gallons). From this point a closed aqueduct of stone and brick carries the water parallel with the Hudson for nearly 40 M. to the great reservoirs in the Central Park, New York. The aqueduct discharges 60,000,000 gallons daily, with a down grade of $13\frac{1}{4}$ inches to a mile, and the whole work cost \$14,000,000.

The Highlands loom up boldly in front as the steamer crosses the beautiful Haverstraw Bay to the village of *Haverstraw* (W.), with the old stone mansion on Treason Hill, where Arnold and André met. Above is a line of limestone cliffs which have produced 1,000,000 bushels of lime yearly. 3 M. above (W.) is the bold and picturesque promontory of *Stony Point*, with Verplanck's Point opposite.

Both these places were fortified early in the Revolution, and were captured by the British army in June, 1779, inflicting a severe blow on the Americans from the loss of such a strategic position. Stony Point was fortified by earthworks and *abatis*, and well garrisoned, yet Gen. Wayne begged permission to attack it, saying to Washington, "General, I'll storm hell, if you'll only plan it." With two small columns of picked men (of the 5th Penn. Infantry), on the night of July 15th, Mad Anthony Wayne carried the fort at the point of the bayonet, under a heavy fire of musketry and grape-shot. Wayne was shot in the head, but, being borne into the captured works, soon recovered, and after cannonading Fort Fayette, on Verplanck's Point, he dismantled and abandoned the fort. The lighthouse stands on the site of the old magazine.

3 M. from Stony Point (W.) is Caldwell's Landing, at the foot of the abrupt and imposing **Dunderberg** (Thunder Mt.), which was anciently believed to be the home of malicious imps who hurled fierce tempests out on the river. Opposite Dunderberg is *Peekskill*, at the mouth of a creek which was ascended long ago by Jan Peek, a Dutch mariner, who was so pleased

with its fertile shores that he named it Peek's Kill, and settled there. Fort Independence crowned the hill above the village during the Revolution, and here Gen. Putnam had his headquarters, and "tried as a spy, condemned as a spy, and executed as a spy," the Englishman, Edmund Palmer (1777). An ancient church (built in 1767) and the venerable Van Cortlandt mansion are worthy of visiting.

Bending to the W. at Peekskill, the Hudson enters that part of its course called the Race, and passes through the beautiful Highlands, which were compared by Chateaubriand to "a large bouquet tied at its base with azure ribbon." From Peekskill to Newburg the steamer passes through a panorama of river-scenery unexcelled in the world. Dunderberg on the l. confronts on the r. *Anthony's Nose*.

This bold hill (1,128 ft. high) is named after Anthony Van Corlear, Gov. Stuyvesant's trumpeter. "Just at this moment the illustrious sun, breaking in all his splendor from behind one of the high cliffs of the Highlands, did dart one of his most potent beams full upon the effulgent nose of the sounder of brass. The reflection of which shot straightway down, hissing hot, into the water, and killed a mighty sturgeon that was sporting beside the vessel. When this astonishing miracle came to be made known to Peter Stuyvesant (the governor), he, as may well be supposed, marvelled exceedingly; and as a monument thereof, gave the name of Anthony's Nose to a stout promontory in the neighborhood."

Above Anthony's Nose is the romantic Brocken Kill, while opposite is the grape-abounding *Iona Island*. Nearly opposite is the old Poplopen Kill, with some remnants of *Forts Montgomery* (N.) and *Clinton* (S.), on the promontories at its mouth. These works, together with a massive chain and boom across the river, defended by a fleet of gunboats, were intended to close the Hudson against the British. But Sir Henry Clinton advanced in Oct., 1777, marching over the Dunderberg, and after a sharp skirmish at Lake Sinnipink (still called Bloody Pond) his forces invested the forts. After a long struggle in the fog, during which the British fleet moved up the river, the overpowered garrisons gave way and fled to the hills, having lost 300 men. The American gunboats were then destroyed by their crews, and the British broke away the chains and obstructions in the river (which had cost Congress \$250,000).

The Hudson now turns to the N., and Buttermilk Falls are soon seen on the l., near which is the fashionable and favorite *Cozzens' Hotel*. 1 M. above is the U. S. Military Academy at **West Point**. This place was fortified by Parsons's Conn. brigade in 1778, and was then called "the Gibraltar of America." Washington recommended the location of a national school here, and in 1812 the school was established, since which the officers of the regular army have been educated here. There are barracks for the 250 Cadets, with riding-school, chapel, hospital, &c. The academy building is an extensive stone structure, in Gothic architecture. There are various trophies (of artillery, &c.) about the grounds, and a library of 15,000 volumes in the main building. Kosciusko's Garden is a

beautiful hanging garden approached from the plain by Flirtation Walk, and containing a marble monument to the heroic Polish chieftain, who was wont to read and meditate here. Near the head of Flirtation Walk is a monument to the troops who were massacred in the Everglades of Florida, in 1835. *Fort Putnam* is on the summit of Mount Independence, and commands fine views from its ancient and ruinous bastions. The *Siege Battery* is a practical work near the river. The Cadets are chosen by the national Congressmen and, after remaining here four years, enter the U. S. Army as second-lieutenants. The discipline is very strict, and during July and August of each year the corps goes into camp.

Opposite West Point is Sugar Loaf Mt., under whose shadow is the Robinson House, Arnold's head-quarters, and the Beverly Dock, whence he escaped to the "Vulture." Passing Constitution Island, on the E. is seen *Cold Spring*, a pretty village near which is "Undercliff," the former home of the poet Morris. *Mt. Taurus* looms up on the r., and is named from a certain wild bull who was once the terror of the countryside, until he was hunted out and broke his neck on the next hill (N.), since called Breakneck Hill (1,187 ft. high). On the W. bank, just above West Point, is *Cro'-Nest* (1,418 ft. high), which is separated from **Boterberg** by the picturesque Vale of Tempe, where some part of the scene of "The Culprit Fay" is laid. Boterberg (otherwise called Butter Hill and Storm King) is a bold and imposing mountain 1,529 ft. high, at whose northern slope is the pretty village of Cornwall. "*Idlewild*," the home of N. P. Willis, is near Cornwall, beyond which the decadent village of New Windsor is seen.

Newburg (*Orange Hotel*) is a busy city of over 15,000 inhabitants, built on the steep slope of a high hill, and showing finely from the river. There are many pretty villas on the heights, and a few very neat churches, while the water-front is lined with warehouses. The city has some manufactories, and a considerable country trade, while immense quantities of coal are brought here from Pennsylvania (by a branch of the Erie Railway running up the Quassaic Valley to Greycourt, 19 M. distant), and shipped to all parts of the Hudson Valley.

S. of Newburg is the old Hasbrouck Mansion, an antique stone house which was Washington's head-quarters in 1783, while the Continental army was encamped here to watch the British at New York. Certain high officers of the army, doubting the feasibility of a republic, circulated an address to that effect, and (indirectly) offered to make Washington King of America. The noble Virginian spurned the proposal, and after he had delivered an earnest address to a council of officers they resolved unanimously, "That the officers of the American army view with abhorrence, and reject with disdain, the infamous proposition contained in a late anonymous address to the officers of the army."

A steam-ferry crosses the river from Newburg to Fishkill-on-the-Hudson, on a fertile plain N. of the S. Beacon Hill (from which noble views are afforded). The manufacturing village of Matteawan is about 1½ M.

distant, and the ancient Dutch town of Fishkill is 5 M. to the E. 2 M. N. E. of the river village (the Landing) is the Verplanck House, once the head-quarters of Baron Steuben, and the place where the Society of the Cincinnati was formed (in 1783). As the steamer passes N., there are fine retrospects of Boterberg, Breakneck Hill, and the Matteawan and Shawangunk Mts. On the W. bank, opposite the village of Low Point, is a rocky platform which was named "the Devil's Dance-Chamber" by Hendrick Hudson, after seeing there a midnight pow-wow of painted Indians.

But Knickerbocker, describing Gov. Stuyvesant's voyage, says, "Even now I have it on the point of my pen to relate, how his crew was most horribly frightened, on going on shore above the Highlands, by a gang of merry, roystering devils, frisking and curveting on a huge flat rock which projected into the river, and which is called the *Duyvell's Dans Kamer* to this very day."

New Hamburg, and Barnegat (on the E. shore), Hampton, Marlborough, and Milton (on the W. shore), are small river-villages, which are passed during the next 15 M. **Poughkeepsie** (*Morgan House*) is a city of 17,000 inhabitants, situated on the E. bank, 75 M. from New York. It was settled by the Dutch in 1698, and its name is derived from the Indian Apokeepsing ("safe harbor"). It is situated on a plateau above the river, and has some good public buildings and famous schools, with a large and lucrative country trade from the rich farm-lands of Dutchess County. About 2 M. from the city (horse-cars run all the way) is **Vassar College**, the largest and most renowned female college in the world. It occupies a range of imposing buildings secluded amid extensive grounds, and has about 400 students, who pursue the higher classical and scientific studies, and receive degrees in due form. Among the distinguished residents of Poughkeepsie are Benson J. Lossing, the historian; A. J. Davis, the head of the Spiritualist sect (sometimes called "The Poughkeepsie Seer"); and Prof. S. F. B. Morse (died in 1872), one of the originators of the electric telegraph.

New Paltz is opposite Poughkeepsie, and 5 M. above (E.) is the handsome village of *Hyde Park*, named after Sir Edmund Hyde, a near relative of Queen Anne, who was an early Governor of New York. This land was bought and named by his private secretary. The village is near a sharp bend in the river, called by Dutch "Krom Elleboge" (crooked elbow), and now known as Crom Elbow. 1 M. above is "Placentia," the former home of James K. Paulding, the essayist and satirist, and Secretary of the U. S. Navy (1839-41). The river-banks are now low and unpicturesque, but an air of rich rural peace pervades the country-side, and handsome villas are seen on the banks. Astor's mansion (W.), Esopus Island, and Staatsburg (E.) are passed, with the majestic blue peaks of the Catskills drawing nearer on the N. *Port Ewen* and *Rondout*, on the W., are busy towns, with large foreign populations engaged in the manufacture of cement and the transfer of coal, which is brought here in im-

mense quantities over the Delaware and Hudson Canal. 2 M. inland, on Esopus Creek, is *Kingston*, which was settled by the Huguenots in 1665, and was sacked and burned by Gen. Vaughan, with 3,000 British troops, in 1777. The first constitution of New York was formed in a legislative session at Kingston (1777), and here Vanderlyn, the artist, was born (1776). Opposite Rondout is Rhinebeck-on-the-Hudson, 2 M. from the old village which was founded by William Beekman in 1647. He came from the Rhineland, and named his settlement for himself and his old home river. S. of the Landing is "Wildercliff," the former estate of the eminent Methodist, Freeborn Garretson. Above this place is "Ellerslie," the home of the Hon. Wm. Kelly (the estate fronts for $1\frac{1}{2}$ M. on the river), while near the Landing is the old fortress-mansion of the Beekmans (built of stone, in the 17th century). Above Rhinebeck is "Rokeby," W. B. Astor's residence, which was built by Gen. Armstrong, Secretary of War, 1813-14; and "Montgomery Place," the Livingstons' mansion, built by Gen. Montgomery's widow (a Livingston). Above Barrytown is the estate of "Annandale," and in the groves of Cruger's Island (near the W. shore), is a picturesque and truly ancient ruin, which was imported from Italy some years since. Near Annandale is an elegant little chapel, and *St. Stephen's College* (Episcopal), endowed by Mr. Bard, the owner of the estate. *Barrytown* and *Tivoli* are the landings for the antiquated inland towns of Lower and Upper Red Hook. Opposite Tivoli (which has the old De Peyster Mansion) is the flourishing factory-village of *Saugerties*, at the mouth of Esopus Creek, and 2 M. above is *Malden*. Opposite Malden is **Clermont**, the home of the patrician family of Livingston (descended from the Earls of Linlithgow), which has had such great influence in New York State. The old manor was above German-town, and Chancellor Livingston built a new one on the site of Clermont, but Vaughan's British raiders destroyed both houses (in 1777). New ones were soon erected, and the Chancellor, being appointed Ambassador to France, met Robert Fulton in Paris, and became deeply interested in the new theories of steam navigation. In 1787 John Fitch built and worked a steamboat at Philadelphia, and in 1789 one had been operated on the Clyde (near Glasgow), but both inventors had given up the idea of the feasibility of steam navigation. In 1807 Livingston and Fulton built a steamboat in New York, called the "Clermont" (but popularly termed "Fulton's Folly"), which ascended the Hudson to Albany in 32 hours, to the great amazement of all the people.

The Catskill Mts. are now seen in the W., with the famous Mountain House far up on one of their peaks, white as a snow-drift. From the village of *Catskill* (with its superb Prospect Park Hotel overlooking the river) frequent stages run to the **Mountain House** (in 3-4 hrs.; fare, \$2.00), passing through Sleepy Hollow, where Rip Van Winkle is said to have taken his 20 years' nap. The Mountain House is near the edge of a cliff, 2,212 ft. above the river, and commands a * * view extending over 10,000 square miles, embracing parts of four

States, 60 M. of the Hudson Valley, the distant cities of Albany and Troy, and the surrounding peaks of the Catskills. The South and North Mts., the Two Lakes and the High Falls, and the Stony, Cauterskill, and Plauterkill Cloves (notches) should be visited. There are other hotels among the mts., and fine fishing is found on the remote streams. The small village of *Palenville* has several boarding-houses, much visited by artists. Amid this scenery lived and labored Thomas Cole, the painter of the three series of impressive allegorical pictures representing "The Course of Empire," "The Voyage of Life," and "The Cross and the World" (the latter was left incomplete at his death).

4 M. above Catskill, on the E. bank, is **Hudson** (*Worth House*), a handsome city on a high promontory, with a fine river-side avenue called the Promenade, leading to the top of Prospect Hill (200 ft. high) which looks over on the Catskills. The city was founded by 30 Quakers from Providence, in 1784, and now contains 13,000 inhabitants. It is at the head of ship navigation, and is the terminus of the Hudson and Boston Railroad (to Chatham). The marble Court-House of Columbia County is located here, and there are several very neat churches in the city. 5 M. N. are the *Columbia Sulphur Springs*, with a large hotel and a picturesque lake, while New Lebanon (see page 146) is often visited from this point. A steam-ferry leads from Hudson to the small village of *Athens*, whence a branch of the N. Y. Central Railroad diverges to Schenectady. 4 M. N. is Four Mile Point, with its lighthouse, opposite Kinderhook Landing, 5 M. from Kinderhook, where Martin Van Buren, 8th President of the U. S., was born, and where he died, on his estate of "Lindenwald." *Coxsackie* is a rambling village on the W. shore, and New Baltimore and Schodac are soon passed. Above New Baltimore and near the W. shore is Beeren Island, on whose rocky summit once stood the castle of Rensselaerstein, pertaining to Killian Van Rensselaer, the Patroon of Albany. The Helderberg Mts. are seen in the W. as the steamer passes Coeyman's; Castleton is then passed, on the E.; the immense and costly national dikes are seen stretching along the shore; and the populous hills of Albany are rapidly approached.

Albany (* *Delavan House*; *Stanwix Hall*), the capital of the State of New York, is a prosperous commercial city at the confluence of the Erie and Champlain Canals and the Hudson River, 144 M. from New York City. It has over 70,000 inhabitants, and is famed for its extensive breweries and cattle-yards, while the workshops of the N. Y. Central Railroad employ over 1,000 men. Vast quantities of Western produce pass to and through Albany by means of the Erie Canal, which has here a great terminal basin shielded by a breakwater 80 ft. wide and 4,300 ft. long. The Susquehanna R. R. (from Binghamton; 142 M.), the N. Y. Central R. R. (from Buffalo — 297 M. — and the West), and the Rensselaer and Saratoga R. R. (from Saratoga, Rutland, and Lake Champlain) converge here from the W. and N., and are united by a double-tracked bridge of stone and iron ($\frac{3}{4}$ M. long; costing \$1,150,000) to the great railway lines running S. and E. beyond the Hudson. The city receives its water-supply

from Rensselaer Lake (5 M. W.), by a fine system of works which cost over \$1,000,000. State St. runs from the business district near the river to the vicinity of the pleasant square on the hill, which is surrounded by public buildings. On the W. is the *Capitol*, a plain and rather dingy old building, alongside of which is the large hotel called Congress Hall. On the E. of the square are the fine marble buildings of the **State House** and the **City Hall**. The *State Library* (60,000 volumes) adjoins the Capitol, and just beyond are seen the slowly rising marble walls of the new State Capitol, which is to be a vast and imposing structure in Renaissance architecture, crowning one of the highest hills of Albany, and visible for leagues up and down the river. The Catholic Cathedral of the Immaculate Conception is a well-finished and costly building, on Eagle St., with far-famed stained-glass windows; and the spacious Gothic Church of St. Joseph, on Ten Broeck St., is worthy of inspection. The *State Arsenal* is a strong castellated building on Eagle St., near some handsome churches. $1\frac{1}{2}$ M. S. W. of the city are the buildings of the Almshouse, Insane Asylum, Fever Hospital, and Industrial School, all on one large farm. There are several other charitable institutions about Albany, and there are numerous public and private schools of a high grade. The Medical College and the renowned Law School of the University of Albany are on Eagle St., and the collections in natural history and geology (on State St.) should be seen. On a hill in the N. part of the city, is the *Dudley Observatory*, richly endowed by Mrs. Dudley, and furnished with a costly collection of astronomical instruments and books. In the same part is the Van Rensselaer Manor House and its park, an interesting old building on the site first occupied by Kilian Van Rensselaer, Patroon of Beverwyk. This gentleman received from the Dutch king, in 1637, a patent, covering about 1,150 square miles, embracing most of the present counties of Albany, Rensselaer, and Columbia, and here he ruled in feudal state. The family has ever since remained powerful and wealthy. The Schuyler House is another ancient mansion above the city, which was built by Col. Peter Schuyler, a distinguished colonial leader in the 17th century.

Albany was founded by the Dutch in 1614, and in 1623 a fort was built and named Fort Orange. The settlement was called Beverwyk, or Williamstadt, and in 1664, when the British took the place, it was named Albany in honor of the British crown-prince, James, Duke of York and Albany. It was then surrounded by timber-walls, with six gates, parts of which were standing in 1812. In 1686 the city was chartered, and in 1798 it became the capital of the State. A provincial congress, which met here in 1754, formed such a plan of union for the colonies that concerted action was possible when later events required it. Since the construction of the Erie and Champlain Canals and the great systems of railroads which converge here, Albany has continued to increase in wealth and prosperity. The new State Capitol (now building) will be the finest Renaissance structure in America, and will cost \$7-10,000,000.

53. Albany to Montreal.

By the Rensselaer and Saratoga Railroad, running N. from Albany to Saratoga Springs, Whitehall, and Rutland.

Soon after leaving the city, the Rural Cemetery is passed, and the train reaches *W. Troy*, the seat of the National Arsenal of Watervliet with its 30 buildings and 100 acres of grounds. On the E. is seen **Troy** (*American House ; Mansion House*), a flourishing city of nearly 50,000 inhabitants, situated on an alluvial plain 6 M. N. of Albany. It is an important railroad-centre, and has many large manufactories (iron foundries, cotton and woollen goods, cars, Bessemer steel, &c.) fronting on the Hudson. The Troy Hospital, Marshall Infirmary, Orphan Asylums, and Warren Free Institute are the principal charitable foundations ; while the Rensselaer Polytechnic Institute and other fine academies attest the intelligence of the citizens. The streets are wide and well paved, and the marble Court House and the fine churches (notably those of St. Paul and St. John) are worthy of attention. The city is built near the mouth of the Poestenkill, and is overlooked by Mounts Ida and Olympus. St. Peter's College is seen upon the heights, and is a Catholic institution of high grade and wide reputation. Troy was founded by men of New England, and became a city in 1816. In 1862 full forty acres of its settled portion was burnt over, causing a loss of \$ 3,000,000.

Beyond W. Troy the train passes *Cohoes*, a large manufacturing town at the Falls of the Mohawk River, 3 M. above which the Erie Canal crosses the river in a stone aqueduct 1,137 ft. long, resting on 26 piers. The train now crosses the Mohawk, and follows the r. bank of the Hudson to Mechanicsville, where it turns to the N. W. Stations, *Round Lake* (near the celebrated Methodist camp-ground) and *Ballston*, whose mineral waters were formerly much visited. There are several fine springs, the most valuable of which is known as the Lithia Spring. 7 M. beyond Ballston the train reaches the village of

Saratoga Springs.

Hotels. — The * * Grand Union Hotel is the largest in the world, and has a frontage (on Broadway) of 1,364 ft., with 1 M. of piazzas, 2 M. of halls, 13 acres of carpets and marble flooring, 824 rooms, 1,474 doors, 1,891 windows, and accommodations for over 1,200 guests. * Congress Hall is opposite the Grand Union, and has 1,016 ft. of frontage (on three streets), with broad piazzas, roof-promenades, and superb parlors. This house was built in 1868, and is of an imposing form of architecture. The * Grand Central Hotel is on Broadway, opposite Congress Hall, and is a superb house, with over 700 ft. frontage, and 650 rooms. The * Clarendon is an aristocratic resort amid stately elm-groves opposite Congress Park. It accommodates 500 guests. The American (on Broadway) accommodates 350 guests ; the Marvin House (corner Broadway and Division Streets), 250 ; the Continental, 200 ; the Columbian, 200. Besides those above-named, there are 42 hotels in and near the village, together with several great water-cure establishments under the care of experienced doctors, and many quiet and inexpensive

boarding-houses. The charges at the principal hotels are \$4.50-6.00 a day, or \$25.-35.00 a week, while every variety of price and accommodation may be found among the smaller hotels. Pleasant quarters may be found in the boarding-houses for from \$10 to \$20 a week.

Carriages.—50 c. each passenger for a course within the bounds of the village (baggage extra). A coachman and span may be hired for \$75.00 a month.

Amusements.—The Opera House, attached to the Grand Union House, seats 1,500 persons. There are nightly hops in the elegant ball-rooms attached to the three chief hotels, and grand balls once a week at each of these houses. Guests pay \$1 for admission to the balls, which are the most brilliant on the continent. The Races come off in July and August (second week), on one of the best of the American race-courses (1 M. from Congress Spring). The swiftest horses are entered at these famous contests, and some of the most remarkable races of the past decade have taken place here. Music is discoursed by bands connected with the hotels, several times daily, and promenades take place in the parks, parlors, and piazzas.

Churches.—The Methodist and the Episcopal Societies have fine buildings on Washington St., near the Grand Union. The Baptist Church is on the same street, and the Presbyterian Church is on upper Broadway. The Catholics meet at their church on S. Broadway (near the Clarendon), and the Congregationalists meet on Phila St. (over the Post-Office). The Y. M. C. A. reading-room and hall is on Phila St.

Omnibuses run frequently to the springs beyond the village limits, and to Saratoga Lake. A small steamer plies on the lake.

Railroads. From Boston to Saratoga by Routes 22 and 53; by Route 25; by Routes 26 and 28 (the favorite route, through trains in 9 hrs.). From New York by through express (without change) on the Hudson River Railroad, in 5½ hrs. (186 M.); or by Route 52 to Albany, and thence by Route 53. Saratoga is 38 M. from Albany; 274 M. from Philadelphia; 412 M. from Washington; 841 M. from Chicago; 392 M. from Quebec; 311 M. from Niagara; 45 M. from Lake Champlain; and 2,292 M. from New Orleans. The Adirondack Railroad (station on Washington St.) runs N. from Saratoga to North Creek (57 M.).

Saratoga Springs, one of the foremost of the summer-resorts of America and of the world, is situated in Eastern New York, about midway between Albany and Lake George. Like Newport by the sea, it is often called “the Queen of American watering-places,” and this dual sovereignty is generally acknowledged. The village is situated on a plateau a few M. W. of the Hudson River, and has a resident population of about 9,000. The hotel system of Saratoga is unrivalled elsewhere in the world, and although equal to the accommodation of 16-18,000 guests, it is taxed to its utmost capacity during the month of August (the season opens early in June). Broadway is the main street, and extends for several miles, with the chief hotels near its centre and a succession of costly villas beyond. Circular St. and Lake Ave. are also famed for their elegant summer-residences, while large medical establishments and boarding-houses are found on the quieter side-streets. The village is at its brightest in August, when it is thronged by visitors from all parts of the republic and from Europe, while over 3,000 private carriages, together with the cavalcaades from the public livery-stables, join in the parade of fashion on Broadway and the Boulevard. Although the greater part of the visitors come from the central Atlantic States, the number from beyond that district is still so great as to give a continental or even a cosmopolitan flavor to the summer society. The merry music of the bands, the regular pro-

cessions of elegant carriages on the favorite drives, the crowds gathering about the springs at the fashionable hours for drinking, the brilliant hops and the world-renowned balls at the grand hotels, and the surging of the multitude toward the railroad station at the time of the incoming trains, furnish endless resources for observation and amusement.

Congress Park is a pleasant ground for a ramble, and consists of a low ridge sweeping around the Congress and Columbian Springs. It is opposite the chief hotels, and is well laid out in paths, and adorned with many of the great elms which are the only natural beauties to be found in Saratoga. N. of the Park is the *Indian Camp*, where a band of French half-breeds and Indians encamp during the summer, carrying on a lucrative trade in bead-work, baskets, moccasins, and other small-wares. The Circular Railway is near the camp, and is supposed to afford visitors a beneficial exercise. A little way beyond the camp (on the r. side of Circular St.) is the popular Temple Grove Seminary, whose fine building is used during the summer as a boarding-house for families. On the same street, and just beyond the Seminary, is the Drs. Strong's Institute (100 guests) for the practice of the water, vacuum, and movement cures. About 1 M. N. of the Park (on Broadway) is the race-course and hotel at *Glen Mitchell*, with finely arranged grounds and shady groves.

The mineral springs rise in a stratum of Potsdam sandstone near a great break or fissure in the strata underlying the Saratoga Valley, and reach the surface by passing through a bed of blue clay. Most of the springs are owned by stock companies, one of which has a capital of \$1,000,000, and controls the Congress, Columbian, and Empire Springs. The process of boring artesian wells has been introduced with much profit, and some of the most valuable of the new sources have been discovered in that way. Immense quantities of the waters are sent away to all parts of the United States, for the treatment of invalids at home, though the process of bottling and packing is difficult and costly. In the year 1866, 360,000 bottles were sent away from the Empire Spring alone. The principal ingredients of the waters are carbonic-acid and salt, with bi-carbonates of lime, magnesia, soda, iron, and lithia, of which the varying proportions cause the peculiar characteristics of the different springs. The visitor may freely drink at any of the sources, the water being dipped up by boys (to whom a small gratuity is sometimes given). The cathartic waters should be taken before breakfast, three glasses being a fair quantity; the alterative waters should be taken in small quantities throughout the day; the tonic (iron) waters must be drunk after midday; and the diuretic waters should be taken before each meal.

The **Columbian Spring** is in Congress Park, under a neat dome. It was discovered in 1806, and is the favorite among the residents of the village. This water contains a perceptible amount of iron, with considerable carbonic-acid gas, and acts as a decided tonic and diuretic.

The **Congress Spring** is under a Doric colonnade in Congress Park, and close to Congress Hall. It was found by a party of hunters in 1792, and was so named because there was a Congressman among their number. It was soon after choked by unskilful tubing, and was found again in 1804. The exportation of the water began in 1823, and now it has a continental fame, and is also sold in Europe. It contains in each gallon 400

grains of chloride of sodium, 143 grains of bi-carbonate of lime, and 122 grains of bi-carbonate of magnesia, with 36 grains of other elements. This water is cathartic and alterative, and is beneficial in diseases of the liver and kidneys. More of it is drank than of the water of any other American spring, and its vicinity is thronged every bright summer morning with health-seekers from the hotels.

The **Washington Spring** is in the Recreative Garden of the Clarendon Hotel (across Broadway from the Columbian). It was opened in 1806, and while being renovated and shafted in 1858 a great flood of water and gas burst forth into the subterranean tunnel, and forced the workmen to flee for their lives. This is the most pleasant water in the valley, and has a taste of iron, with strong tonic properties. It is sometimes called "the Champagne Spring," and is situated among stately pine-groves.

The **Crystal Spring**, under the Grand Central Hotel, was discovered in 1870. It is tainted with sulphuretted hydrogen, and is alterative in its effects. The *Hathorn Spring* is opposite Congress Hall, on Spring St. It was discovered in 1868, and is a very powerful cathartic. Each gallon contains 510 grains of chloride of sodium, 171 grains of bi-carbonate of lime, and 176 grains of bi-carbonate of magnesia, besides an extraordinary amount of lithia. The *Hamilton Spring* is near the Hathorn, and back of Congress Hall (corner Spring and Putnam Sts.). It is diuretic and cathartic in its operation, and is mainly used for diseases of the kidneys. The *Putnam Spring* is on Phila St., near the Post-Office, and is tonic in its effects.

The **Pavilion Spring** is in a pretty park on Lake Ave., very near Broadway. It was tubed in 1839, and has a wide reputation for its cathartic properties and its efficacy in dyspepsia and bilious complaints. Of late years it has improved in quality and in popularity. The **United States Spring** is under the same beautiful colonnade, and is tonic in its properties, while from its sparkling character it is used for giving life and flavor to still wines.

The sources previously mentioned are near each other, in the centre of the village. The Seltzer, High Rock, Star, Empire, Red, Excelsior, and Eureka are in a long line in the N. part of the village. The **Seltzer Spring** is on the old Willow Walk, not far N. of the Pavilion. This is the least saline of the Saratoga waters and closely resembles the Nassau Spring of Germany. It bubbles up through a high glass-tube, agitated now and then by the passage of carbonic-acid gas. It is a pleasant and invigorating beverage.

The **High Rock Spring** is about 150 ft. from the Seltzer, and is the oldest known of the springs. In 1767 a party of Indians brought Sir Wm. Johnson thither on a litter, and after spending some weeks here drinking the medicinal waters, he was cured. The water rises in a cylindrical

opening in a rock of conical shape, $3\frac{1}{2}$ ft. high and 24 ft. around, — a natural curb of tufa which has been formed by the mineral deposits from the spring. The water is decidedly saline to the taste.

The **Star Spring** (formerly called the Iodine) is near the High Rock. This is the favorite mineral water in New England, and vast quantities of it are shipped in kegs and bottles. It is cathartic in effect, and acid in taste, and is beneficial for rheumatism and cutaneous diseases.

The **Empire Spring** is N. of the Star (at the head of Circular St.). It very much resembles the Congress water in its constituents and effects (cathartic). The *Red Spring* is just beyond the Empire (on Spring Ave.) This water is chiefly (and extensively) used as a wash, and is especially efficacious in diseases of the skin and the blood. Dyspepsia is benefited, and salt rheum is cured by this agency. The "*A*" *Spring* (on Spring Ave., beyond the Red) is becoming popular as a cathartic agent, having, moreover, a pleasant taste.

The **Excelsior Spring** is nearly 2 M. N. E. of Congress Park, and is reached by Spring Ave., or by a forest-path turning off from Lake Ave., and leading through beautiful woodland scenery. The Excelsior water is pleasant to the taste, and mildly cathartic in its operations. Near this place are the Minnehaha, Union, and other sources, forming a group called the Ten Springs. The **Eureka Spring** is reached by following the park-like valley for a few rods beyond the Excelsior. It is situated amid charming forest scenery, and is gaining popularity as a cathartic agent, beneficial for cases of dyspepsia, and liver and stomach diseases. Near this place is the Eureka White Sulphur Spring, with a copious flow of water charged with sulphuretted hydrogen. This is one of the best hepatic springs in the State, and is efficient in many affections of the glands, skin, stomach, &c. It is taken internally and externally, — the latter at the bath-houses (50 c. a bath) in the vicinity. Hourly stages run from the great hotels to the Eureka Springs.

The **Glacier Spouting Spring** is 1 M. S. of the village, near the Ballston road. It was discovered in 1871 by sinking an artesian well, 300 ft. deep, to the Trenton limestone stratum. The proportion of mineral constituents in this water is very large, and it is a powerful cathartic, beneficial also in diseases of the kidneys and liver.

The **Geyser Spouting Spring** is not far from the Glacier, near the Ballston road and the railroad. It was discovered in 1870 by boring a well 140 ft. deep, and the water jets up for over 25 ft., being impelled by carbonic-acid gas. This is the coldest of the waters of Saratoga, and has a larger amount of mineral matter than any other. It is strongly cathartic, and is lively and pleasant to the taste. Between the Glacier and the Geyser is the *Ellis Spring* (chalybeate).

Saratoga Lake is about 4 M. from the village, and is reached by the

favorite drive called the Boulevard (entered by following the street which lies between Congress Hall and the Park). This road passes near the race-course and the trout-ponds. *Moon's Lake House* is the favorite of the lake hotels, and furnishes rare dinners of fish and game, at high prices. The fried potatoes of this house are considered a great delicacy. Saratoga Lake is 9 M. long and 3-5 M. wide, and furnishes good fishing and boating. The scenery is tame, although the views from Chapman's Hill (1 M. from the Lake House) and Wagman's Hill are pleasing. *Lake Lovely* is a sequestered pond among the hills near the Boulevard. It is a favorite place for picnics, and has some fine woodland scenery.

Lake Luzerne is 22 M. N. of Saratoga (by the Adirondack Railroad), and is a picturesque sheet of water with two good hotels (Rockwell's and the Wayside). The railroad exhibits some remarkable engineering and steadily rising grades, while the lake affords good fishing and boating. Stages run from Luzerne to Caldwell (10 M.).

The battle of Stillwater was fought on Bemis Heights, about 15 M. S. E. of the Springs, and 2 M. from the Hudson River. Gen. Burgoyne marched south from Canada in June, 1777, with a well-appointed British army, strengthened by German, Canadian, and Indian auxiliaries. This force was to meet another British army advancing from New York, somewhere on the line of the Hudson, and thus cut the rebellious colonies in two, to be subdued in detail. Burgoyne took Fort Ticonderoga, July 6, and lost a large detachment of his best German troops, who were cut off by the Vermonters at Bennington, Aug. 16. On Sept. 14 the British crossed the Hudson and encamped at Saratoga, near the American army. Burgoyne made an attack the next day on the lines at Bemis' Heights, which had been fortified by Kosciuszko, but after a long and indecisive battle, was forced to suspend his southward march. He fortified his camp, and waited for Sir Henry Clinton's army to achieve its northward march and rescue him. His supplies and outposts were cut off daily, and, on October 7, he advanced for another battle. Morgan's Virginians attacked his right, the 8th, 9th, and 10th Mass. under Gen. Poor, were led against his left, while other troops fell on his front. The British retreated, leaving their artillery, and the Americans stormed the fortified camp after desperate fighting. Burgoyne fell back on his old camp by Fish Creek, but Gen. Fellows, with a New England brigade and batteries, prevented his crossing the river, while Gates with 12,000 Continental troops and New York militia faced him on the S. His provisions gave out, the camp was incessantly cannonaded by the American batteries, and Clinton's army had failed to connect, so, on Oct. 16, the British army, consisting of 5,791 men, with 42 cannon, and all their stores, surrendered to Gen. Gates. They were held as captives until the close of the war (over 5 years), first at Cambridge, Mass., and afterward at Charlottesville, Va.

The Rensselaer and Saratoga Railroad runs N. E. from Saratoga, by *Gansevoort* and *Moreau* to *Fort Edward*, on the Hudson (two hotels). This place was fortified in 1709, and in 1755 Fort Edward was built at the confluence of a broad creek with the river. The ramparts were 16 ft. high and 22 ft. thick, and were provided with 4 bastions and bordered by a broad wet ditch. It was a very important station on the old military road to the N., and in 1777 was held by 5,500 Americans, who retired before the advance of Burgoyne. About this time the beautiful Jane McRea was

murdered by Indians, near the village, under circumstances which have caused her story to become one of the saddest in the New World history.

Passengers who wish to go to Lake Champlain direct, continue on the train for 20 M. farther, passing up the valley of Wood Creek to Whitehall. In going toward Whitehall the Fort Ann Mts. are seen on the l., and the course of the Champlain Canal is followed. Fort Ann Village is on the site of an old colonial fort, near which Putnam and 500 Rangers were defeated by the French partisan Molang, with a large French and Indian force. The Rangers suffered fearfully, and Putnam was captured. In 1777 the Americans attacked the 9th line regiment of the British army, in a ravine now traversed by the railroad ($\frac{3}{4}$ M. N. of the station), but after an obstinate engagement the assailants were forced to withdraw. **Whitehall** (*Hall's Hotel*) is a prosperous lumbering village, situated in a rugged ravine under Skene's Mt. It was settled by Col. Philip Skene in 1765, and a large stone mansion and military works were erected. It was captured by Herick and the Green Mt. Boys in 1775, and in 1779 was confiscated by the State of New York, on account of Skene's adhesion to the king. The British fleet here engaged the Americans flying from Ticonderoga, July 7, 1777, destroyed several galleys, and took 128 cannon and a vast amount of supplies. The name of "Whitehall" was adopted in place of Skenesborough, and in 1812 the place was well fortified. In 1814 Macdonough's fleet, with the British squadron which it had taken in the naval battle at Plattsburg, came to this point, and here the "Saratoga," "Confiance," and other vessels sank at their moorings. Whitehall is 24 M. from Fort Ticonderoga (by the lake). Whitehall to Rutland, see Route 28.

Passengers for Lake George change cars at Fort Edward, and take a train which passes over a branch railroad to *Glens Falls* (6 M.), a flourishing factory-village with about 5,000 inhabitants, which has but lately recovered from a fire which utterly destroyed it (in 1863). The Hudson here falls 50-60 ft. over a long and rugged ledge, while the State has built a great dam above, which feeds the Champlain Canal. The island below the falls is associated with Cooper's "Last of the Mohicans." "Here, amid the roaring of this very cataract, if romance may be believed, the voice of Uncas, the last of the Mohicans, was heard and heeded; here Hawk-Eye kept his vigils; here David breathed his nasal melody," &c.

Stages run from Glens Falls to Caldwell, 9 M. N. About 5 M. beyond the village the road passes near Williams's Rock, a large boulder which marks the scene of "The Bloody Morning-Scout." On Sept. 7, 1755, when the French army of Dieskau was marching down from Crown Point against the Anglo-colonial army under Gen. Johnson, Col. Ephraim Williams was sent out with 1,200 men to engage the French van-guard. 200 of his men were Mohawk Indians, under the command of their noble, white-haired chief, Hendrick. The detachment advanced into the very centre of the invading army (which was marching in a great, half-moon curve), and was speedily enveloped and crushed by the enemy. A terrible massacre ensued (in a ravine still called the Bloody Defile), and Williams (the founder of Williams College) and Hendrick fell, with most of their men. The bodies of the slain were thrown into Bloody Pond, a quiet pool in a glen near Williams's Rock. Dieskau then advanced rapidly to attack the colonial camp at Lake George. Johnson had fortified his position, and the Indian and Canadian auxiliaries in the attacking force were soon put to flight by the fire of the batteries, while the French regulars suffered heavily, and were finally repulsed with the loss of 700 killed and wounded. Dieskau was wounded and made prisoner, while Johnson, though wounded, was made a baronet of Great Britain, and received the thanks of Parliament. Fort William Henry was soon afterwards erected, armed with 42 cannon, stored with vast supplies, and garrisoned by 2,500 men. In August, 1757, this fort was beleaguered by 10,000 Frenchmen and Canadians, under the Marquis de Montcalm. After a siege of several days' duration, having received no aid from the colonial army at Fort Edward, the fort was surrendered. As soon as

the disarmed garrison marched out, the Indian allies of Montcalm fell furiously upon them, and a fearful massacre ensued. Hundreds of the defenceless colonials were put to death under the walls of the fort before the slaughter could be stayed. Although Montcalm retired to Fort Carillon (Ticonderoga) with his trophies and captured batteries, the site of Fort William Henry was never re-occupied, a new work called Fort George, with a central citadel of stone, having been built 1 M. S. E. of the old fort.

Caldwell is a dull village at the S. end of Lake George, which enjoys a slight local distinction from the fact of its being the shire-town of Warren County. There are two small inns here, and the Lake House (accommodating 175 guests, at \$3-3.50 a day). The * *Fort William Henry Hotel* is a vast and sumptuous house, on the site of the old fort, and amid finely arranged grounds. It accommodates 1,200 guests, and charges \$5.00 a day for transient visitors. The splendid frontage of the hotel looks out over the lake, which is close at hand. Some remnants of the old fort may be found here, and Fort George (1 M. distant) is a picturesque ruin. Rattlesnake Cobble is an easily ascended hill near Caldwell, which commands a broad view down the lake. Prospect and French Mts. are also ascended from the village, and give varying views of the lake and its shores.

Stages run from Caldwell to Lake Luzerne; also to Warrensburg, Chester, Schroon Lake, and the southern Adirondacks.

Lake George

was first visited by Father Jogues, a French Jesuit missionary, whose canoe entered its quiet waters on the eve of the festival of Corpus Christi, 1646. In honor of that sacred anniversary he named these bright waters "Le Lac du St. Sacrement" (The Lake of the Holy Sacrament), and then passed on to a heroic martyrdom at the hands of the Mohawks, fulfilling the prophecy which he had made when leaving Montreal, "Ibo, nec redibo." For a century the lake was known in the border chronicles as the path of hostile incursions or of religious devotees passing to the land of the fierce Mohawks. Courcelles, Tracy, Schuyler, Menteth, — French, Dutch, Indians, English, diversified the record. In 1746 Sir William Johnson concluded a league with the northern Indians, on the shores of St. Sacrement, and in 1755 he led an army to the lake, and named it Lake George, "not only in honor of his Majesty, but to ascertain his undoubted dominion." (This name is growing more and more out of favor year by year, and most people would prefer either the French "St. Sacrement," or the Indian "Horicon," — meaning "Silvery Waters," — suggested by Cooper.) Johnson's force was soon menaced by 2,000 Frenchmen and Indians under the Baron Dieskau, but "the Bloody Morning Scout" was followed by a total defeat of the invading force, in which the French regulars were nearly annihilated. Fort William Henry was built soon after, and Rogers and Putnam, with their hardy Rangers, scouted over the lake toward the French fortress at Ticonderoga. In March, 1757, Rigaud destroyed 300 English batteaux and several sloops near Fort William Henry, and in August the Marquis de Montcalm passed down the lake with 6,000 men in boats and 3,000 men marching on the W. shore. After picketing the southern roads, Montcalm opened a cannonade on the fort from batteries near the present site of the Lake House, and soon compelled its surrender. After the ensuing massacre of the disarmed garrison, the fort was destroyed. But the most imposing spectacles which this, or any other American lake, has seen, occurred in 1758 and 1759. In the former year, Gen. Abercrombie advanced up the lake with 16,000 men, in 900 batteaux and 190 whale-boats, convoyed by gunboats, all brilliant with rich uniforms and waving banners, while the music of numerous regimental bands echoed

among the hills. (This pageant is finely described by Cooper, in "Satanstoe," Chapters XXII. – XXV.) A few days later the shattered and defeated army passed up the lake to Fort William Henry, having left over 2,000 of their number dead and dying under the walls of Fort Carillon (Ticonderoga). In 1758 Gen. Amherst led 11,000 men in another grand martial procession down the lake, and this march ended in the Conquest of Canada. In 1775 the abandoned Forts George and Gage (at Caldwell) were occupied by New York militia, and afterwards by a detachment from Hinman's Conn. Reg., and by Col. Van Schaick's N. Y. Reg. In the summer of 1777 Fort George was chosen as the army hospital, on account of its salubrity, and 3,000 sick men were sent here. Hundreds died of the small-pox and typhus-fever, and among them was the Baron de Woedtke, a Prussian noble who had just accepted a general's commission. In 1777, after the fall of Ticonderoga, Fort George and the lake were abandoned by the Americans, but were re-occupied after Burgoyne's surrender. In October, 1780, the garrison of Fort George was defeated and cut to pieces, near Bloody Pond, and the fort and the fleet on the lake were taken by the British. Since that day, peace has dwelt on these tranquil waters.

Lake George, "the Como of America," is situated in Northeastern New York, near the Adirondack Mts., and is about 300 ft. above the sea. It is 36 M. long, and 1 – 4 M. wide, and its shores are generally sterile and fringed with lofty and abrupt hills. There are but three petty villages on the lake, and a highway passes through them on the W. shore, connecting Caldwell with Bolton, Hague, and Ticonderoga. The vicinity of frowning mts., the great number of islands, the transparency of the waters, and the bracing purity of the air of the highlands, unite to increase the claims of Lake George as a summer-resort, while its scenery has been likened not only to that of Como, but also to Lake Windermere and Loch Katrine.

The steamer "Minnehaha" leaves Caldwell every morning, and runs to the N. end of the lake, returning in the afternoon. The steamer "Gagnouskie" makes daily trips between Caldwell, Bolton, and 14-Mile Island.

The steamer leaves its pier (at the great hotel) and crosses to *Crosbyside*, on the E. shore, with a large hotel situated in pleasant groves by the shore, and looking across to Caldwell. French Mt. towers to the E., and is covered with forests. *Tea Island* (so named from a tea-house, or arbor, erected in 1828) is next passed, 1 M. from Caldwell, and then *Diamond Island* is approached, 1½ M. beyond. The name is derived from the beautiful quartz crystals which are found here, and the place was inhabited in the early part of this century, — the mistress of the family being generally known as "the Lady of the Lake." Diamond Island was fortified by Burgoyne in 1777, and was garrisoned by part of the 47th line regiment under Capt. Aubrey. It was attacked by Col. John Brown, with the New England militia who had swept the outworks of Ticonderoga, but Aubrey repulsed the Americans with artillery, and then drove them away ("with great loss") by an attack with his gunboats. Brown lost all his vessels and cannon, and many men. Dunham's Bay and *Montcalm's Bay* are passed on the E., the latter being beyond Long Island, which is passed on the E. (with the Three Sisters islets on the W.). The

Trout Pavilion is a sequestered hotel above Montcalm's Bay, near the best fishing-grounds, and frequented by fishermen. The Fort Ann Mts. loom up darkly on the E. as the steamer crosses the lake, with the Three Brothers on the W., and Dome and Recluse Islands on the N. This is the broadest part of the lake, and affords views of rare beauty, with the graceful *Dome Island* (which resembles Ellen's Isle, in Loch Katrine) prominently seen. *Recluse Island* is a beautiful spot just W. of the Dome, with a cheerful summer-villa embowered among trees. This island has the remains of fortifications which were built by Abercrombie's army in 1758, while the views from its N. and E. shores are exquisitely beautiful. The steamer now rounds in at **Bolton**, a small village with a noble outlook over the broadest expanse of the lake. There are two large and comfortable family hotels here, and in the environs of the village is the quaint old stone Church of St. Sacrament. The terms at the Mohican House (directly on the shore) are low, and the accommodations are good. *Prospect Mt.* is back of the village, and commands a broad and delightful view, embracing the widest part of the lake, Montcalm's and Ganasouke (or Northwest) Bays, Recluse, Dome, and Green Ids. and the Narrows, and Tongue and Black Mts. in the N. and N. E. Ganasouke Bay extends for 6 M. to the N. above Bolton, being separated from the lake by the lofty promontory of *Tongue Mt.*, where deer abound in the late fall and winter. As the boat leaves Bolton, Parodi (or Sloop) Island is passed on the l. (so named because the singer, Signora Parodi, erected a cross here in 1851). On the N. are Green and Hog Islands, closing the entrance to Ganasouke Bay, while Tongue Mt. is on the W. and *Black Mt.* on the E., as the steamer crosses toward the lofty palisades called Shelving Rock, with the innumerable islands of the Narrows on the l. *14-Mile Island* is just W. of Shelving Rock, and has a fine hotel, which is much visited by city gentlemen for the sake of the fishing in the vicinity. The Shelving Rock Fall is about 1 M. S. of the hotel (on the mainland), and is a small and graceful cascade. The island is 14 M. from Caldwell, and Derrom's Hotel, charges \$ 2-2.50 a day for board (\$ 10-14.00 a week). The steamer now enters the Narrows, where the lake is contracted between high mts., and a fleet of small islands is anchored in the channel. These islets were the scene of numerous combats in the colonial days, but are now deserted, save for the visits of sportsmen, who find large trout in their cool shadows. Steaming down between Tongue Mt. and Black Mt. (2,878 ft. high ; sometimes ascended with guides, for the sake of its view) the "Minnehaha" passes the Hen and Chickens, Hatchet, Half-Way, and Floating Battery Islands, with the N. peaks of Black Mt., called variously, Elephant's Ridge or Sugar Loaf. Just N. of the Floating Battery group is Vicar's Island, with the palisades of Buck Mt. on the W., and the hamlet of Dresden seen down Bosom Bay, on the E. *Sabbath Day Point*

is soon approached (on the W.), — a long, low promontory running out from rich meadows and still retaining the air of peace and restfulness which won it the name it bears.

In 1757 a sharp skirmish occurred at Harbor Island, off this Point, and in July of that year the 1st New Jersey regiment was sent on a scout down the lake. De Carbiere and 400 Frenchmen and Indians ambushed the Jersey Blues in the archipelago off the Point, and defeated them with great slaughter. 131 of the Americans were killed, 12 escaped, and 180 were made prisoners, many of whom were put to death with horrible tortures. On the evening of July 5, 1758, the vanguard and centre of Abercrombie's grand army (light infantry and regulars) rested on Sabbath Day Point from sunset until near midnight, waiting for the three brigades of Provincials and the artillery to come up. In 1777 a sharp conflict took place here between American militia and Tories, and during the present century peace has settled along these shores, although the commonplace farm-houses on the Point have marred the natural beauty of the place.

The vast bulk of Black Mt. is prominent in the S. E., as the "Minnehaha" runs N. to the village of *Hague*, situated on a widening of the lake, where it is 4 M. across. Garfield's is a favorite hotel at Hague, and from this point parties go to the lakes (abounding in fish), of Pharaoh (12 M. N. W.), Brant, and Schroon. As the steamer gains the middle of the lake again, the prospect of the pass between Rogers' Slide and Anthony's Nose, and the retrospect of the Narrows and its island-flotilla afford delightful views. Friends' Point and Islands are passed on the W., and then *Anthony's Nose* (on the N. E.) pushes out its rocky ledges over the deepest water in the lake (400 ft.). *Rogers' Slide* is on the W. shore, and is a long precipice which runs down into the water.

There is a legend to the effect that Major Robert Rogers (the chief of the Rangers, and afterwards a dangerous Tory officer) was chased to the verge of this cliff by Indians (in the winter of 1758). Suddenly reversing his snow-shoes, and throwing his haversack down on the ice-bound lake, he retraced his tracks, and got away down an adjacent ravine before his pursuers arrived. The Indians followed the tracks leading to the precipice, and saw none leading away, whence they concluded that he had cast himself over; and when, a few minutes later, they saw him skimming away over the ice toward Fort William Henry, they attributed his escape to the protection of the Great Spirit.

Passing now by Prisoners' Island (where the French kept their captives), with Lord Howe's Point on the l., the "Minnehaha" soon reaches the end of the lake. Large four-horse stages are in waiting at the wharf, and are soon filled and *en route* for Lake Champlain. The road is a disgrace to the State, and in wet weather is almost impassable; but it is only 4 M. long (fare by stage, 75 c.). The stream, which is the outlet of Lake George, falls about 240 ft. in its way to Lake Champlain (3-4 M. distant), and near the chief falls is the small but increasing manufacturing village of *Ticonderoga* (2 inns). 2 M. beyond, with beautiful lake-views in front, the stage passes the ruins of the old fortress, and stops at the hotel and pier of the Champlain steamers.

Lake Champlain

was called by the Iroquois Indians *Caniaderi Guaranti* ("The Gate of the Country"), while the Abenakis called it *Petoubouque* ("The Waters that lie between"; i. e. between their land and that of the Iroquois); and other Indians called it *Saranac*. For nearly half a century it was called *Corlear's Lake* by the English and Dutch, in memory of a Dutch gentleman who was drowned there. In the summer of 1609 a small exploring party set out from Quebec under Samuel de Champlain,¹ the Governor of Canada, and ascended the St. Lawrence and Richelieu Rivers to the Chambly Rapids, where they met a war-party of Hurons. All the Frenchmen save Champlain and two others were sent back to Quebec, and those three joined the war-party. July 4, 1609, they entered the lake, and on the following day they defeated 200 Iroquois at Crown Point, Champlain having shot their chief with his arquebus. The Hurons returned in triumph, with 60 scalps, and the valiant Frenchman, having found the road to the lake, was left to make several subsequent explorations and campaigns thereon. A series of war-parties traversed this route for nearly two centuries, and the lake became the scene of long campaigns and desperate battles. In 1690, 200 French regulars and a swarm of Indians passed up in canoes, and marched to Schenectady, which they destroyed with 60 of its people, returning with 27 prisoners, and 40 horses laden with plunder. Shortly afterward Col. Schuyler and 200 Mohawks passed the lake and the Richelieu River, and destroyed the Canadian town of Sorel. In 1695 the chivalrous Count de Frontenac (a relative of Madame de Maintenon) launched a fleet of small craft, and passed down to Whitehall with 700 Frenchmen and Algonquins. After a daring foray through the Mohawk Valley and nearly to the forts at Albany, he retired safely by Whitehall, pursued by Schuyler and the Hudson Valley people. The lake was held by the French and commanded by their fortifications until 1759, when Lord Amherst built a flotilla in South Bay, with a flag ship mounting 18 guns, in which Capt. Loring swept and won this inland sea. The military and naval operations around the lake will be considered in connection with the points of action.

Lake Champlain is a large and picturesque sheet of water, running nearly N. and S. for 126 M., with a breadth of from 1 furlong to 15 M. Its waters are clear, and abound in bass, pickerel, salmon-trout, and other fish, while the depth varies from 9 to 47 fathoms. There are many islands in the lake, the largest of which covers an area of 18,600 acres, and has a population of 1,300. Besides numerous pleasant villages and towns, there is one city on the lake, and the fleets used in commerce here number many thousands of tons. There is a large trade done between the rivers, the Hudson being joined to the lake by a canal 64 M. long (to Watervliet), while the Richelieu River affords an outlet to the St. Lawrence. The scenery of the Vermont shore is that of a quiet pastoral region, with the Green Mts. rising in the distant E. The New York shore presents a continual succession of barren and mountainous scenery, with occasional foot-hills of the Adirondacks pushed out in promontories, and the parent peaks looming blue in the distance.

There are four elegant steamers plying up and down the lake. On the arrival of the 3.15 P. M. and of the 6 A. M. trains from Montreal, steamers leave Rouse's

¹ Champlain was born of a good family of the province of Saintonge, in 1570. He became a naval officer, and afterward was attached to the person of King Henri IV. In 1603 he explored the St. Lawrence River up to the St. Louis Rapids, and afterward (until his death in 1635) he explored the country from Nantucket to the head-waters of the Ottawa. He was a brave, merciful, and zealous chief, and held that "the salvation of one soul is of more importance than the founding of a new empire." He established strong missions among the Hurons, fought the Iroquois, and founded Quebec.

Point at 6 P. M. and at 8.15 A. M., arriving at Whitehall respectively at 5.45 A. M. and 4.45 P. M. Steamers leave Whitehall for the north at 8.20 P. M. and 10.45 A. M., reaching Rouse's Point respectively at 7 A. M. and 8.30 P. M. The boats leaving Whitehall at 10.45 and Rouse's Point at 8.15, connect at Ticonderoga with stages for Lake George (4 M.), where passengers take the steamer to Caldwell, arriving there at 7 P. M. (Time-tables of 1872.) State-rooms are desirable on the night-boats, while a fine dinner (\$1.00) is given on the day-boats.

From Whitehall to Fort Ticonderoga (24 M.), and even to Crown Point, the lake is very narrow, and seems more like a fine river. During the first part of the journey the hills of Dresden are seen boldly looming on the W. and Black Mt. is seen beyond, while the "Drowned Lands" lie along the shore. The unimportant landings in Benson and Orwell (both in Vermont) are stopped at, and then the steamer reaches

Fort Ticonderoga

(Fort Ticonderoga Hotel, \$3.00 a day, an old mansion house near the lake and landing). There is a railway-station about 1 M. N. of the fort, pertaining to a branch of the Vermont Central Railroad, which diverges from the main line at Leicester Junction. The new route from New York to Montreal (W. of L. Champlain) most of which is now in working order, passes near the fort on the W. Steamers going each way stop here twice daily, and the Lake George stages leave early each afternoon. The ruins of the fort crown the high hill near the steamboat pier, and are quite picturesque, and command extensive lake-views. The sally-port where the Green Mt. Boys entered, the old well, the crumbling walls of the barracks surrounding the parade, and the well-defined dry ditches beyond the ramparts may easily be recognized. In one of the E. bastions is a deep and cavernous vault which it is surmised was the garrison bakery. On the high point S. E. of the fort is the well-preserved Grenadiers' Battery, erected to command the landing-place and to defend the long bridge to Mt. Independence. There is another small battery surrounded by a wet ditch, on the plain to the N., while the forests to the S. and W. are furrowed with intrenchments and lines of parallels, redoubts, and rifle-pits. From the ramparts of the fort Mt. Independence is seen to the S. E., across the lake, and Mt. Defiance to the S. W., across the widenings of the outlet of Lake George. The latter summit is 800 ft. above the lake, and commands a noble view over its placid waters. It is best ascended by following the nearly obliterated military road of Burgoyne from Ticonderoga village (3 M. from the fort to the summit). Others, who are fond of the fine rowing which is obtained here, cross the bay in a boat, and scramble up through the forest to the summit. A road runs W. from Ticonderoga to Paradox and Schroon Lakes.

Ticonderoga is a modification of Cheonderogo, the old Iroquois name for this locality. It meant "sounding waters," and applied especially to the falls on the

outlet of Lake George. Capt. Glen is spoken of as holding this point with a picket of 33 men, in 1690, and in 1691 it was fortified by Col. Schuyler, who was then leading a force against La Prairie. In 1755 the Marquis de Montcalm occupied the place with a strong French army, and built extensive works, which he named Fort Carillon¹ ("chime of bells"), in allusion to the musical cascades in the vicinity. Gen. Abercrombie, having descended Lake George with 7,000 British regulars and 9,000 provincial troops, attempted to storm the fort, July 8, 1758. The scouts told Abercrombie that the fort was weak, and he knew that reinforcements were hurrying to the garrison, so an assault was ordered. In advancing through the forest a detachment of 450 Frenchmen boldly engaged and checked the van-guard. Israel Putnam and Lord Howe hastened up to the scene of the skirmish, and Howe was almost instantly killed. "His manners and his virtues made him the idol of the army," and "in him the soul of the army seemed to expire." Massachusetts erected a monument to this gallant nobleman in Westminster Abbey. The French detachment was exterminated, but the Anglo-American troops became entangled in the forest and began to fire on each other, until they were withdrawn. 6,000 picked men were led out to storm the French works, which consisted of a breastwork (8 ft. high) and *abatis*, defended by 4,000 men with artillery. Four hours of fearless charging and bloody repulses ensued, and the few men who gained the parapet died there on the verge of victory. At 7 in the evening, after three heroic assaults had failed, and several boats had been sunk on the lake with all on board by the artillery of the fort, the army retreated, leaving nearly 2,000 men dead and wounded on the field. Lord John Murray's Highland regiment (so distinguished at Fontenoy, 13 years before) lost $\frac{1}{2}$ of its men and 25 officers. In March, 1758, Rogers' Rangers were disastrously repulsed from the outworks of Carillon. In the summer of 1759 Lord Amherst advanced from the S. with 11,000 men, and the French garrison, weakened by the necessity of meeting Wolfe before Quebec, evacuated the place after burning the barracks and exploding the magazine.

At dawn, May 10, 1775, the fort was surprised and taken by 85 New England men, who had crossed the lake on the previous evening. They were commanded by Ethan Allen and Benedict Arnold, who led them through the gate and out on the parade, where (it is said) Allen aroused Capt. de la Place, the commandant, and demanded the surrender of the fort "in the name of the Great Jehovah and the Continental Congress." 43 soldiers were surrendered with the fort, together with 176 cannon and vast supplies of ammunition. When Burgoyne advanced, in the summer of 1777, and Arnold's fleet had been defeated on the lake, the defence of Fort Ticonderoga was intrusted to Gen. St. Clair, with 2,600 Continental troops, 900 militia, and 47 fortress-cannon. He destroyed the works toward Lake George, and strongly fortified Mt. Independence (remnants of the star-fort, and graves of hundreds who died of camp-distemper are now found in the young forest on the mt.). The bridge to Mt. Independence was a powerful floating structure, supported by 22 sunken piers and many floats. Burgoyne's fleet was cannonaded and forced to keep out of gun-shot, but the British succeeded in getting cannon up on Mt. Defiance, with which a plunging fire was opened on the fort. On the night of July 6, St. Clair evacuated the position, and would have escaped but that Gen. de Fermoy set fire to his quarters on Mt. Independence. The aroused enemy made rapid pursuit, defeated St. Clair's rear-guard at Hubbardton, and took his artillery and stores at Whitehall, with 200 galleys and the remnant of Arnold's fleet. Ten weeks later, Col. Brown, of Mass., with 1,000 men of New England, captured the outworks of Ticonderoga, with 200 batteaux, 293 prisoners, 5 cannon, and a war-vessel, and delivered 100 American prisoners and a Continental flag. The fort was dismantled a few weeks later, and in 1780 was re-occupied by Gen. Haldimand with troops from Montreal. Since the Revolution, Ticonderoga has not been occupied, and for many years it suffered a gradual demolition, — its well-cut stone and brick being carried away by vessel-loads to the rising villages on the lake. It is now sealed from such invasions, and is becoming known as one of the classic and heroic grounds of America. July 18, 1872, the Vermont Historical Society had a field-day here, and there were 10,000 people present. The fort is on a peninsula rising 100 ft. from the lake, with water on three sides and swampy land on the fourth. The peninsula covers over 500 acres.

¹ "La Drapeau de Carillon" is an old Canadian song, which may still be heard in Lower Quebec.

The steamer passes through the railway-bridge soon after leaving Fort Ticonderoga. Beautiful views are occasionally gained of Camel's Hump and Mt. Mansfield on the E., and the majestic Adirondacks on the N. W. The boat stops at Larrabee's Point in the Vermont town of Shoreham, and then at *Crown Point* (Gunnison's Hotel), 3 M. E. of Crown Point village, whence a road runs W. to Paradox and Schroon Lakes and the Adirondacks. A short distance beyond this landing, the steamer passes through the narrows between Chimney Point (on the E.) and

Crown Point.

The ruins of the fortress of Crown Point occupy the high promontory between the lake and the broad Bulwagga Bay. The point is reached either by boat from Port Henry, or by carriage around the bottom of the bay (6-7 M.). There is a lighthouse on the point, but otherwise it is abandoned to its ancient remains of strength and pride. The immense ramparts and ditches of the fort, its broad parade, and the thick stone walls of the barracks are richly worthy of attention, while from the walls of the northern bastions are obtained superb views of the Green Mts. in the E. and the rugged foot-hills of the Adirondacks in the W., with the lake stretching away for many leagues in the N. The peninsula is about 1 M. wide, and has only a thin robe of earth over limestone ledges, whose cutting away cost enormously during the erection of the fortress. 200 yards N. E. of the great fort, and near the water, are the ruins of the old French work, Fort Frederick. In the N. E. bastion is a well cut in the rock, 8 ft. in diameter and 90 ft. in depth, which was cleared out by a stock company in 1824, in the hope of finding treasure. There have been many excavations here with this object, but only old iron and lead has yet been found. The ramparts are brilliant with blood-red thorn-apples (in their season) on great thickets of bushes. These peculiar trees are found nowhere else in the State, and are said to have been brought from France.

In July, 1609, Champlain, 2 Frenchmen, and 60 Hurons came up to this Point in 24 bark canoes, and here they landed and defeated the Iroquois, after passing the night in martial rites and singing the war-song. This was 2 months before Hendrick Hudson had discovered the noble river which has been named in his honor. In 1631 the French occupied Point à la Chevelure (opposite this place), built a stone fort and armed it with 5 cannon, and established a farming community. In 1666 De Courcelles ascended by boats (with 600 men) to Crown Point, whence he marched into the Mohawk country, and on the retreat, some time after, the force halted here several days for their stragglers to come up. The destroyers of Schenectady were pursued to Crown Point (in the winter of 1690), but here they put on skates and escaped. In 1731 Fort Frederick was built here by the French, and named in honor of Frederick Maurepas, Premier of the kingdom. The shores were then more thickly settled than now, for many miles N. and S. In 1759, after the fall of Ticonderoga, the fort was abandoned, and, the Point being occupied by Lord Amherst, vast fortifications were erected here, which cost the British government \$10,000,000. In 1773 the barracks took fire and the powder-magazine blew up, partly demolishing the works, and in 1775 Warner's Green Mt. Boys captured the fort. 7,000 Americans retreated here from Canada in 1776, and

hundreds died from small-pox. In 1777 Burgoyne made the fort his main depot of supplies in the advance on Albany. The fort built by Lord Amherst was $\frac{1}{2}$ M. around, and its ramparts were 25 ft. high and 25 ft. thick. It is still in good preservation.

Just beyond Crown Point the steamer stops at *Port Henry* (two inns), a picturesquely situated village, with iron works and mines. Bulwagga Bay is seen opening to the S. After leaving Port Henry, a fine view is obtained of the Adirondacks in the W., Bald and Dix Peaks and the Giant of the Valley being foremost in the group. The steamer next touches at *Westport* (two inns), on the W. shore, with a road running W. into the Adirondacks, by Elizabethtown to White Face Mt. On the E. shore are seen the spires of the city of Vergennes, and the ruins of Fort Cassin, where Lieut. Cassin, of the U. S. Navy, repelled an attack on Macdonough's fleet, which was being fitted out at Vergennes. Split Rock Mt. frowns along the W. shore, and is mirrored in waters of unknown depth. Rounding the lighthouse at the head of the promontory, the steamer touches at Essex (*Royce's Hotel*), whence another road leads into the Adirondacks. The course from Essex is N. E., passing the Four Brothers and Juniper Isles, and approaching and stopping at

Burlington

(* American House; Van Ness House), "the Queen City of Vermont," beautifully situated on a long, sloping hill on the E. shore of Burlington Bay. It is the largest city in the State, having a population of about 15,000, with 15 churches, 2 banks, 1 daily and 2 weekly newspapers. In 1798 Burlington had 815 inhabitants, and between 1860 and 1870 it gained 105 per cent in population. It became a city in 1865, and is now the third lumber-mart in America. Most of the lumber is brought from the Canadian forests, and sorted and planed here, after which it is sent by rail to Boston and other Eastern cities. Immense quantities are loaded directly from the cars to the vessels (in Boston) which convey them to distant ports. 40-50,000,000 ft. of lumber are yearly sent out from Burlington. The wharves and grounds about the freight station are usually covered with immense piles of plank and boards. Several of the churches are fine buildings, especially the Cathedral of St. Mary, a large and picturesquely irregular structure. St. Paul's Episcopal Church is an old Gothic building of blue limestone, with stained windows. This is the church of the Bishop, whose diocese (the State of Vt.) has 27 priests and 2,655 communicants. There are also handsome Congregational and Methodist churches, built of Burlington stone. Near the square in the centre of the city is a fine U. S. building (Post Office and Custom House), and the elegant Court House of Chittenden County.

The *University of Vermont* occupies an eligible situation on the summit of Burlington Hill, 1 M. from the Bay and 367 ft. above it. This in-

stitution was incorporated in 1791, and began operations in 1800, the President being the only instructor for the first 6 years, when about 30 students were entered here. Its connection with the State is but nominal, and has brought it no emolument since its foundation, when Vermont endowed it with a grant of 29,000 acres of land. In 1813 the building was taken by the United States, and retained throughout the war for an arsenal and barracks. In 1824 the buildings were burnt, and rebuilt in 1825, the corner-stone being laid by Gen. Lafayette. The three buildings have been united in one, and surmounted by a bright, tin-covered dome. In 1871 the University had 16 instructors, 114 students, and 15,000 volumes in its library. There are about 900 alumni. The medical department had, in 1871, 5 instructors and 25 students, and in 1865 the State Agricultural College was united with the University. There are 50,000 specimens in the natural history cabinets. From the dome of the University a superb * view is enjoyed.

On the W., Lake Champlain is seen from below Crown Point on the S. to Plattsburg on the N., with numerous islands surrounded by the bright waters which have become classic in American history. Beyond the lake the Adirondacks fill the horizon, over 60 peaks being visible on a clear day; prominent among which are McIntyre, Whiteface, and Marcy, the latter being the highest peak between the White and the Alleghany Mts. Lake Champlain is 10 M. wide here, and near the middle are seen the islets called the Four Brothers. The plains of Chittenden Co. are seen in the N. E. over the little village of Winooski, and in the E. are the stately Green Mts., the *Verts Monts* for which the State was named. Mt. Mansfield, Camel's Hump, and other well-known peaks are plainly visible, with a vast expanse of farm-land filling the foreground. Burlington City is overlooked on the W., stretching down to the shores of its bay. The * sunset over the lake and the Adirondacks when seen from this point, or from the little park N. W. of the central square, is full of beauty. "Splendor of landscape is the peculiar boast of Burlington," said Pres. Dwight in 1798; and Fredrika Bremer speaks of the distant "mountain forms picturesquely combined with a certain degree of grandeur and boldness." The view looking W. towards a peak which she calls "*le lion couchant*," she pronounced superior to any lake view which she had ever seen, excepting only one on Lake Geneva.

Near the University is the Green Mt. Cemetery, in which Ethan Allen is buried, under a Tuscan column 42 ft. high, and a short distance beyond is the village of Winooski, at the lower falls on the Winooski River. Near this village is a romantic cañon on the river, at the *High Bridge*, where the impetuous stream has cut a gorge through the solid rock 90 ft. deep and 70 ft. wide.

Burlington is an academic city, having besides the University several fine schools, among which is the Female Seminary (established 1835), which has nearly 900 alumnæ. The Seminary has handsome buildings on a hillside near the lake. The *Vermont Episcopal Institute* is on Rock Point, 2-3 M. from the city, and near the lake. It has a fine marble building in the collegiate Gothic architecture, with a small but elegant chapel, a massive tower, and a library which is rich in patristic literature. The theological department has 5 professors and 56 students, with 231

alumni, and is called the most expensive divinity-school in the Union. About 2 M. S. of the city is the U. S. Marine Hospital, fronting on the lake.

Burlington was settled about 1775, and named in honor of the Burling family (of New York), who were among the grantees. It lay on the route by the Winoski Valley, which had been so often traversed by the northern Indians in their attacks on Mass. It was fortified and garrisoned by 4,000 troops in the War of 1812, and in the War of 1861-5 sent many soldiers to the national armies.

Stages leave Burlington daily for the rural towns of St. George and Hinesburg. Two trains daily leave Burlington for Montreal. From Burlington to Essex Junction it is 8 M. Essex to Montreal, see page 204. Distance, 103 M., in $5\frac{1}{2}$ - 6 hours.

Leaving Burlington, the steamer runs N. W. across the lake to *Port Kent* (2 hotels), a small village under Mt. Trembleau, and important for its exportation of iron. The old Watson Mansion is seen on a hill over the village. Stages run from Port Kent to the **Ausable Chasm**, with its grand succession of cascades and gorges. The Adirondack and Ausable Houses are at *Keeseville*, near the Chasm. Stages also run to Baker's Saranac Lake House (46 M. W.), while a road diverging to the S. W. at the Ausable Forks enters the mts. through Wilmington Notch and by White Face and Lake Placid. 6-8 M. N. of Port Kent the steamer passes between *Valcour Island* and the mainland. In this channel Arnold's fleet, consisting of 15 vessels with 70 cannon, was attacked by a British squadron of 31 vessels. After a hot day's battle, in which 2 of Arnold's and 3 British vessels were sunk, the Americans tried to retreat by night, but were closely pursued. The flagship "Congress" was surrounded by hostile ships, but fought desperately for 4 hours, until the van and centre of the fleet had escaped. Then Arnold ran her and the attendant galleys ashore below Port Kent, and blew them up (Oct. 11, 1776). Grand Isle, or South Hero, is now passed on the E., and the village of **Plattsburg** (*Fouquet's Hotel* ; *Cumberland House*) is reached. It is a flourishing place at the mouth of the Saranac River, and is the shire-town of Clinton County (N. Y.), and a garrisoned post of the U. S. Army. There is a railway from Plattsburg to Montreal ($63\frac{1}{2}$ M. ; trains in $4\frac{1}{2}$ - 5 hrs.) ; also to the Ausable River (20 M. ; trains in $1\frac{1}{2}$ - 2 hrs.). The latter road, with the stages which connect at the Ausable River, forms the best route to the Saranac and St. Regis Lakes, and the lofty central group of the Adirondack Mts. The Long, Raquette, Fulton, and Tupper Lakes are most easily reached by the Adirondack Railroad (from Saratoga).

Sept. 7, 1814, Plattsburg was menaced by a British army of 14,000 men under Sir George Prevost, supported by a fleet of 16 vessels, with 95 guns and 1,000 men. The defence was conducted by Gen. Macomb, with 3,000 men in the village, and Commodore Macdonough, with a fleet of 14 vessels, 86 guns, and 880 men. When the British fleet rounded Cumberland Head for the attack, Macdonough was kneeling on his deck praying. A rooster, who had got loose in the hurry of preparation, flew upon one of the "Saratoga's" guns and crowed lustily, upon which the men gave three cheers and went to work with a will. As the fleets met, the two flagships engaged each other, and the American "Saratoga" was sadly cut up by

the more powerful British vessel, the "Confiance." By a skilful manœuvre Macdonough swung his ship around, and presented the uninjured side and battery to the enemy, who was unable to imitate this action, and was speedily forced to yield. After 2½ hours of incessant cannonade, the battle was decided against the British, who lost all their vessels save a few row-galleys. In the mean time, Prevost was repulsed by the soldiers at Plattsburg, and lost heavily, besides being forced to abandon much of his artillery and stores.

The steamer passes down the bay and rounds Cumberland Head, with *Grand Isle* on the E. The shores now become more level, and the mts. are only seen in retrospective views. The islands of North Hero and Isle La Motte, and the peninsula of Alburgh are passed on the E., and (25 M. N. of Plattsburg) the steamer stops at **Rouse's Point** (see page 207). Two trains daily run from this place to Montreal (50 M.) in 2½ hrs., following the Richelieu River to St. Johns (see page 208), and thence crossing the parishes of La Prairie and Longueuil to Montreal.

54. Montreal.

Hotels. — St. Lawrence Hall, on Great St. James St.; Ottawa House, Great Saint James St.; Donnegana House, Notre Dame St.; Albion Hotel, \$1.50 a day, McGill St.

Carriages. One-horse carriage, for 1–2 persons, 25c. a course (within the city), 50c. an hour; for 3–4 persons, 40c. a course, 70c. an hour. Two-horse carriages, for 1–2 persons, 40c. a course, 75c. an hour; for 3–4 persons, 50c. a course, \$1.00 an hour.

Shops. The most attractive are on Great Saint James and Notre Dame Sts. American money is usually received at the reigning rates of exchange, but it is advisable to purchase sufficient Canadian money for the tour at some reputable bank.

Horse-cars run across the city on Craig, Bleury, and St. Catharine Sts.; also on St. Mary, Notre Dame, and St. Joseph Sts.; also out St. Lawrence Main St.

Railways. To Boston, by St. Albans, Concord, and Lowell (Route 29), 334 M. (or by way of Fitchburg, 344 M.); to New York, by Rutland and Albany, 365 M. (by Lake Champlain, 405 M.); to Quebec, 172 M. (in 7 hrs.); to Plattsburg, 63 M.; to Rouse's Point, 50 M.; to Toronto, 333 M. (14–15 hrs.); to Detroit (861 M.) and Chicago (1,145 M.); to Ottawa, 164 M. Steamers run to all the St. Lawrence and Lake ports.

In the year 1535 Jacques Cartier visited the triple-walled Indian village of Hochelaga, and ascended the lofty hill behind it, which, from the beauty of its view, he named Mount Royal. The place was visited by Champlain in 1603, and was settled by a small colony of Frenchmen. A tax-gatherer of Anjou and a priest of Paris heard celestial voices, bidding them to found a hospital (*Hôtel Dieu*) and a college of priests at Mount Royal, and the voices were followed by apparitions of the Virgin and the Saviour. Filled with sacred zeal, and brought together by a singular accident, these men won several nobles of France to aid their cause, then bought the Isle of Mount Royal, and formed the Society of Notre Dame de Montreal. With the Lord of Maisonneuve and 45 associates, in a solemn service held in the Cathedral of Notre Dame de Paris, they consecrated the island to the Holy Family under the name of "Ville Marie de Montreal" (Feb., 1641). May 18, 1642, Maisonneuve and his people landed at Montreal and raised an altar, before which, when high mass was concluded, the priest said, "You are a grain of mustard-seed that shall arise and grow until its branches overshadow the land. You are few, but your work is the work of God. His smile is on you, and your children shall fill the land." The *Hôtel Dieu* was founded in 1647, and in 1657 the Sulpicians of Paris established a seminary here. In 1689, 1,400 Iroquois Indians stormed

the western suburbs, and killed 200 of the inhabitants, and a short time after Col. Schuyler destroyed Montreal with troops from New York, leaving only the citadel, which his utmost efforts could not reduce. In 1760 Lord Amherst and 17,000 men captured the city, which then had 4,000 inhabitants, and was surrounded by a wall with 11 redoubts and a citadel. In 1775 Ethan Allen attacked Montreal with a handful of Vermonters, and was defeated and captured, with 100 of his men. Gen. Prescott sent them to England as "banditti," and Allen was imprisoned in Pendennis Castle. In the fall of 1775 the city was taken by the American army under Gen. Montgomery. With the close of the War of 1815, a brisk commerce set in, and the city grew rapidly, having, in 1821, 18,767 inhabitants. The completion of the Grand Trunk Railway greatly benefited this place, and its increase has for many years been steady, substantial, and rapid.

Montreal (125,000 inhabitants), the metropolis of the Dominion of Canada, and "the Queen of the St. Lawrence," is one of the most beautiful cities on the continent. It is situated on an island (at the confluence of the Ottawa and St. Lawrence Rivers) containing 197 square miles, and which, from its fertility, has been called the garden of Canada. The St. Lawrence is $1\frac{1}{2}$ M. wide opposite the city, and the whole river-front is lined with lofty and massive walls, quays, and terraces of gray limestone, unequalled elsewhere in the world, except at Liverpool, Paris, and St. Petersburg. The commercial buildings in the city are generally of stone in plain and substantial architecture, while the number of fine public buildings is very large. $\frac{3}{4}$ of the population are Catholics, most of whom are French, while the bright suburban villages are almost entirely inhabited by Frenchmen. Although Montreal is 800 M. from the sea, it is the port which receives the greater part of the importations to Canada, while its manufacturing interests are of great extent and importance.

The **Victoria Square** is a public ground at the intersection of McGill and St. James Sts., in which a statue of the Queen is to be placed. The Cathedral Buildings, St. James Hotel, Y. M. C. A. Building, and *St. Patrick's* Hall front on this square. The latter is an elegant and very extensive building belonging to the Irish population. Going eastward on Great St. James St., some fine banks, insurance and commercial buildings are passed, and opposite the beautiful Corinthian colonnade of the Bank of Montreal (beyond St. François Xavier St., the Wall St. of Montreal) the *Place d'Armes* is seen. Here is the lofty front of the **Church of Notre Dame**, the largest church on the continent, with seats for 8,000 persons on the floor, and 2,000 in the galleries. It is $255\frac{1}{2}$ ft. long and $144\frac{1}{2}$ ft. wide, and has a chancel window of stained glass, 64 x 32 ft. in size. The interior is not striking, and the pictures are poor. There are two towers on the front, each 220 ft. high, and, like the church, in the simplest form of mediæval Gothic architecture. One tower has a chime of bells, and in the other hangs "Gros Bourdon," the largest bell in America, weighing nearly 15 tons. The tower is generally open (small fee to the door-keeper), and affords from its summit a noble * view of the city and its environs (especially of the river, the bridge, and islands).

Alongside the church is the ancient Seminary of St. Sulpice, on the site of the Seminary of 1657, as the church is near the site of the Notre Dame of 1671. The present church was built 1824-9, and was consecrated by the Bishop of Telmesse *in partibus*. Fronting on the Place d'Armes is the elegant Ontario Bank and the hall of the Grand Lodge of Masons of Canada. A short distance to the E., on Notre Dame St., an archway on the r. admits one to the extensive and secluded Convent of the Black Nuns. Farther on, the **Court House** is seen on the l.,—a stately stone building in the Ionic architecture (300 x 125 ft.), back of which is the *Champ de Mars*, or Parade Ground, an open space covering 50,000 square yards, and fronted by the great building of the Dominion Military School. Just beyond the Court House, the Jacques Cartier Square opens off Notre Dame St., and is encumbered with a dilapidated monument to Nelson. The Jacques Cartier Normal School (in the ancient French Government building) and the Institut Canadien (with a fine library) front on the Government Garden, at the head of this square. By the next side-street (St. Claude) to the r., the **Bonsecours Market** may be visited. This market is unrivalled in America, and is built of stone, at a cost of \$300,000. It is 3 stories high, has a dome, and presents an imposing front to the river. The curious French costumes and language of the country people who congregate here on market-days, as well as some peculiarities of the wares offered for sale, render a visit very interesting. Alongside of the market is the Bonsecours Church (accommodating 2,000) which was built in 1658. A short distance beyond is the extensive Quebec Gate Barrack, on Dalhousie Square, while the Victoria Pier makes out into the stream towards *St. Helen's Isle* (a fortified depot of ammunition and war materiel). To the N., on Craig St., is the attractive Viger Garden, with a small conservatory and several fountains, fronting on which is *Trinity Church* (Episcopal), built of Montreal stone in Early English Gothic architecture, and accommodating 4,000 persons. N. of Trinity, and also on St. Denis St., is St. James Church (Catholic), in the pointed Gothic style, with rich stained glass. Some distance E. of Dalhousie Square, on St. Mary St., is Molson's College (abandoned) and St. Thomas Church (Episcopal), with the great buildings of Molson's brewery and the Papineau Market and Square.

McGill St. is an important thoroughfare leading S. from Victoria Square to the river. Considerable wholesale trade is done here and in the intersecting St. Paul St. The Dominion and Albert buildings are rich and massive, while just beyond is the extensive St. Ann's Market, on the site of the old Parliament House. In 1849 the Earl of Elgin signed the unpopular Rebellion Bill, upon which he was attacked by a mob, who also drove the Assembly from the Parliament House, and burnt that building. Commissioners' St. leads E. by St. Ann's Market and the elegant *Custom*

House to the broad promenades on the river-walls. Ottawa St. leads to the W. to the great masonry of the Lachine Canal Basins and the vicinity of the Victoria Bridge.

Radegonde St. and Beaver Hall Hill lead N. from Victoria Square, passing Zion Church, where the Gavazzi riots took place in 1853. The armed congregation repulsed the assailants twice, and then the troops restored peace, 40 men being killed or seriously wounded. Just above is the Baptist Church, overlooked by the tall Church of the Messiah (Unitarian), with St. Andrew's Presbyterian Church on the r. A few steps to the r., Lagauchetière St. leads to *St. Patrick's Church*, a stately Gothic building, 240 ft. long by 90 ft. wide, accommodating 5,000 persons, and adorned with a spire 225 ft. high. The nave is very lofty, and the narrow lancet windows are filled with stained glass. A short distance farther, on Bleury St., are the massive stone buildings of St. Mary's College (Jesuit), near the front of the **Church of the Gesù**. The nave of this church (75 ft. high) is bounded by rich composite columns, and the transepts are 144 ft. long, while the walls are covered with fine frescos.

Over the High Altar is the Crucifixion, and the Adoration of the Spotless Lamb, above which is the Nativity. Against the columns at the crossing of the nave and transepts are statues of St. Mark with a lion, St. Matthew with an ox, St. Luke with a child, and St. John with an eagle. On the ceiling of the nave are frescos of St. Thomas Repentant, the Bleeding Lamb, and the Virgin and Child amid angelic choirs. Medallions along the nave contain portraits of 8 saints of the Order of Jesus. Over the Altar of the Virgin, in the l. transept, is a fresco of the Trinity, near which is a painting of St. Aloysius Gonzaga receiving his first communion from St. Charles Borromeo, Cardinal Archbishop of Milan. To the r. is a fresco of St. Ignatius Loyola in the grotto of Manresa, and on the l. is Christ's Appearance to him near Rome, while above is Christ Blessing Little Children. Over St. Joseph's Altar, in the r. transept, is a painting of the Eternal Father, on the r. of which is another picture, St. Stanislaus Kostka Receiving Communion from Angels. On the l. is a fresco of the Martyrdom of the Jesuits at Nagasaki (Japan); on the r. is the Martyrdom of St. Andrew Bobola, in Poland; and above is the Raising of Lazarus. On the ceiling is the Holy Family at Work.

Turning now to the W. on St. Catharine St., one soon reaches **Christ Church Cathedral**, the best representative of English Gothic architecture in America. It is built of Caen and Montreal stone, is cruciform, and a stone spire 224 ft. high springs from the centre of the cross. The choir has a fine window and some carved stalls, and is laid with encaustic tiles, while the pointed roof of the nave (67 ft. high) is sustained by columns whose capitals are carved to represent Canadian plants. Near the Cathedral is a quaint octagonal chapter-house, used also for the diocesan library, and the house of the Lord Bishop (and Metropolitan of Canada) is in the same vicinity. A short distance N. is **McGill College**, or University, which was endowed in 1814 and opened in 1828. It is below the reservoir on Mount Royal, from which a charming view of the city and river may be gained. Some distance W. of the college, and fronting on the same street (Sherbrooke), is the vast and imposing *Seminary of St. Sulpice*, for the education of Roman Catholic priests. On St. Catharine,

near St. George St., is the Asylum for the Blind, with a chapel richly and elegantly decorated and frescoed, and built in a light and delicate form of Romanesque architecture. W. of the Cathedral is the Erskine Church (Presbyterian), and also the Church of St. James the Apostle, a graceful Gothic building with an admirable tower and spire. Near the cemetery on Dorchester St. are the following churches, — the Wesleyan Methodist, a graceful building in the English Gothic style; the American Presbyterian, an exact copy of the Park Church in Brooklyn, N. Y.; and the Church of St. George (Episcopal), an elegant edifice in decorated Gothic architecture, with deep transepts, costly stained windows, a timber roof, and fine school-buildings attached. On the E. side of this square is the *Bishop's Palace*, near which are the slowly rising walls of the immense new Catholic Cathedral, which is to be built on the model of St. Peter's at Rome, though smaller. Farther to the W. on Dorchester St., on the r., is seen the vast, cruciform building of the *Gray Nunnery* (founded 1692), with a Foundling Hospital and a Refuge for the infirm. *Mont Ste. Marie* is the large building opposite (across Dorchester St.), which was erected for a Baptist College, but has become a ladies' boarding-school under the Congregational Nuns (of the Black Nunnery, who have, in the city, 57 schools and 12,000 pupils. The order was founded by Marguerite Bourgeoys in 1659). Farther E. on Dorchester St. are the fine buildings of St. Paul's and the Knox Presbyterian Churches. There are many other fine churches and public buildings in the city, and the streets toward Mount Royal are lined with attractive villas.

There are pleasant excursions from Montreal to Monklands and the Isle Jesus; to Hochelaga, the vast Convent of the Holy Name of Mary, and Longue Pointe; to the Tanneries, Cote St. Paul, and Lachine, by carriage; but the two favorite trips are to the mountain and to the rapids. "*Around the Mountain*," it is 9 M., by going out St. Lawrence Main St., by the immense Hôtel Dieu, and up the long slopes to the pretty village of Cote des Neiges. Ascending the mountain thence, a glorious view is soon revealed, embracing the city, a great expanse of the river, with the bridge, St. Helen's Isle, and Longueuil, and the blue peaks of Vermont far away in the S. On the slope of Mount Royal is the Cemetery, which is entered by stately portals, and shows some very creditable monuments, — especially those of the Molson family.

The **Lachine Rapids** are visited by taking the 7 A. M. train (at the Bonaventure Station,) to Lachine, where a steamer is in waiting, by which the tourist returns through the rapids to Montreal (arriving about 9 A. M.). After taking a pilot from the Indian village of Caughnawaga, the steamer passes out.

"Suddenly a scene of wild grandeur bursts upon the eye; waves are lashed into spray and into breakers of a thousand forms by the submerged rocks which they are dashed against in the headlong impetuosity of the river. Whirlpools, a storm-lashed sea, the chasm below Niagara, all mingle their sublimity in a single rapid. Now passing with lightning speed within a few yards of rocks, which, did your vessel but touch them, would reduce her to an utter wreck before the

crash could sound upon the ear; did she even diverge in the least from her course, — if her head were not kept straight with the course of the rapid, she would be instantly submerged and rolled over and over. Before us is an absolute precipice of waters; on every side of it breakers, like dense avalanches, are thrown high into the air. Ere we can take a glance at the scene, the boat descends the wall of waves and foam like a bird, and in a second afterwards you are floating on the calm, unruffled bosom of 'below the rapids.'"

The steamer, just before reaching the city, passes under the * **Victoria Bridge**, the longest and costliest bridge in the world. It consists of 23 spans of 242 ft. each (the centre one being 330 ft. long) resting on 24 piers built of heavy blue limestone masonry, cemented and iron-riveted, with sharp wedge-faces to the down current. The tubes containing the track are 19 ft. high by 16 ft. wide, and the bridge is approached by abutments 2,600 ft. long and 90 ft. wide, which, with the 6,594 ft. of iron tubing, makes a total length of 9,194 ft. from grade to grade, and over $1\frac{1}{2}$ M. from shore to shore. The bridge was begun in 1854, and finished in 1859; it used up 250,000 tons of stone and 8,000 tons of iron, and cost \$6,300,000. The view of Montreal from the bridge is one of the most beautiful imaginable.

55. Montreal to Quebec.—The St. Lawrence River.

The large and elegant royal mail steamers of the Richelieu Company leave the Richelieu Pier (foot of Jacques Cartier Square) at 7 P. M. daily, and arrive at Quebec early the next morning. During the summer of 1872 a steamer of the same line ran twice or thrice weekly between the two cities, leaving at early morning. It was thought that this day-line would be continued, and if it is, it should be preferred to the evening boats, as enabling the tourist to see the river and its villages. Fares to Quebec, first class (with meals and state-room), \$3.00; second class, \$1.00. The Grand Trunk Railway runs trains to Quebec in 8–9 hrs., by way of St. Hyacinthe, Richmond, and Arthabaska.

As the steamer passes out into the stream, the fortified island of St. Helen is seen in front, and fine views of the Victoria Bridge, Mount Royal, and the city are gained. Just below St. Helen's Isle, on the r. bank, is *Longueuil*, where there are many villas pertaining to wealthy city people. A short distance below, on the l. bank, is Longue Pointe, with the Convent des Sœurs de la Providence, and at 9 M. from Montreal *Pointe aux Trembles* is passed, with its ancient village, which dates from 1674. The steamer then enters the channels between the low, marshy islands of *Boucherville*, famous for duck-shooting, and for the ice-dams which form here at the close of winter. Passing *Varennes* on the r., with the bold *Belœil* Mt. in the S., the mouth of the *Rivière des Prairies* is seen on the l., with the village of *L'Assomption* beyond. There are valuable mineral springs near *Varennes*, from which a steamer runs to Montreal four times a week. The river now passes between the parishes of Cap Michael, Vercheres, Contrecoeur, and St. Ours, on the r. bank, and St. Sulpice, La Valtrie, La Noraye, and Dautraye on the l. bank. The spires of *Berthier* are seen on the l., as another cluster of islands is threaded, and the town of **Sorel** is reached. This place occupies an important position at the confluence of the Richelieu and St. Lawrence Rivers, and was fortified in 1665 by Gov. De Tracey. For many years it was the summer residence of the Governors, and on being visited by Prince William Henry of England (af-

terwards William IV.) an abortive attempt was made to change its name to William Henry. The place has about 3,000 inhabitants, and is built around a large square, near which are fine Roman and Anglican churches. The hunting and fishing in this vicinity are of provincial fame. The steamer now passes another archipelago, and at 5 M. below Sorel enters *Lake St. Peter*, a broadening of the river 25 M. long and 9 M. wide. The lake is shallow, but has a deep and narrow channel (partly artificial), which is marked out by buoys and poles, and is used by large vessels. Immense lumber-rafts are often seen here, drifting downward like floating islands, and bearing streamers, sails, and the rude huts of the lumbermen. In stormy weather on the lake these rafts sometimes come to pieces. Soon after entering this broad expanse, the mouth of the St. Francis River is seen on the r., with the village of *St. Francis*. Below the shores of Lussaudière and St. Antoine, the mouth of the Nicolet River appears on the r., and farther down (on the l.) is the village of Fond du Lac. **Three Rivers** is now approached, and the steamer stops midway between Montreal and Quebec. This city was founded (as *Trois Rivières*) in 1618, and has at present 6,000 inhabitants, with a large trade in lumber, which is brought down the St. Maurice River. The Catholic Cathedral, the Ursuline Convent, and other fine buildings adorn the city.

The *St. Maurice River* waters a district of immense (and unknown) extent, abounding in lakes and in forests. Portions of this great northern wilderness have been visited by the lumbermen, who conduct rafts to Three Rivers, where the lumber is sawed. About 30 M. above the city are the noble *Falls of the Shawanegan*, where the great river plunges over a perpendicular descent of 150 ft., between the lofty rocks called *La Grand-Mère* and *Le Bonhomme*. A few miles above are the Falls of the Grand-Mère. These falls are visited by engaging canoes and guides at Three Rivers, while hunting-parties conducted by Canadian *voyageurs* or Algonquin Indians sometimes pass thence into the remote northern forests in pursuit of the larger varieties of game. Three Rivers is widely known for its foundries, where bog-iron ore is converted into car-wheels and stoves.

Opposite Three Rivers is Doucet's Landing, at *Becancour*, the terminus of a branch of the Grand Trunk Railway (see Route 40), and to the N. E., across the St. Maurice, is the thriving village of Cap de la Magdelaine. The steamer passes Gentilly (on the r.) and stops at *Batiscan*, 17 M. below Three Rivers, then passes Ste. Marie and Ste. Anne, on the l., and St. Pierre, on the r. Lotbinière, on the r., is seen, and then the village of St. Croix, standing on Pointe Platon. Point aux Trembles marks the transition from the low shores toward Lake St. Peter to the lofty summits of the Laurentian Mts. St. Augustin (l.) and St. Antoine (r.) are next passed, and then the mouth of the Chaudière, Cap Rouge, and the village of St. Jean Chrysostome. The heights of *Point Levi* now appear on the r., and on the l. are the walls and spires of **Quebec**. Travellers by the night-boat should make arrangements to be awakened an hour before reaching the end of the route, as the view of Quebec from the river at early morning is a thing which can never be forgotten.

56. Quebec.

Arrival. If the traveller has much baggage, it is best to take the hotel carriage to the Upper Town. The *calèche* is not adapted to carrying luggage.

Hotels. The St. Louis Hotel (near the Durham Terrace) is a large, old house, accommodating 4-500 guests, at \$3-4.00 a day. The Stadacona House (on Palace St.) is less pretentious and expensive. Henchey's Hotel, opposite the Anglican Cathedral, is quiet and moderate (for gentlemen travelling *en garçon*). In the Lower Town is Blanchard's Hotel, and several others, two of which are French.

Carriages in every variety may be procured at the stables, but the usual mode of riding is by the *calèche*, a singular and usually very shabby-looking vehicle, perched on two high wheels, with the driver sitting on a narrow ledge in front. These vehicles are drawn by homely but hardy little horses, and are usually driven by French Canadians. 1-2 persons may engage a *calèche* to go to the Montmorenci Falls, Lorette, or Cap Rouge, for \$2.00. Horse-cars traverse the riverward streets in the Lower Town.

Reading-rooms. The Y. M. C. Association, just off Fabrique St., near the Jesuit buildings, and the elegant library of the Quebec Historical Society (in Morrin College) are open to the visits of strangers.

Language. More than half of the citizens of Quebec, and nearly all of the inhabitants of the surrounding villages, speak French as their mother-tongue. Very many of them have a knowledge, more or less perfect, of the English language, while many of the British citizens speak French also. The language in its written forms (as seen in the numerous French books, magazines, and newspapers published in Quebec) is correct and intelligible, but the speech of the lower classes and of the rustics is difficult and often impossible to understand. It is not Parisian or even Rouennaise French, but a strong provincial dialect, brought from the rural districts of Normandy in the 17th century, and enriched by the addition of later local idioms. (The sharp, dissyllabic cry with which the *calèche*-drivers urge their horses forward, is "Marche-donc.")

The *Post-Office* is on St. Anne St. The most attractive shops are on Fabrique and St. John Sts., and about the French Cathedral.

Railways. The Grand Trunk Railway has its terminal station at Point Levi, 317 M. from Portland, 425 M. from Boston, 586 M. from New York, and 2,684 M. from New Orleans. There is also a railroad of most primitive construction, with its terminus in the Banlieue, which runs slow and infrequent trains up the valley of the St. Charles for 20-25 M. To Boston, see Routes 24 and 29, or Routes 40 and 37.

Steamers. Ferry-boats run to Point Levi every 15 minutes; also thrice daily to the Isle of Orleans; and at varying intervals to the French river-towns. Semi-weekly steamers run to the Saguenay River; fare to Cacouna and return, \$3 00; to Tadousac, \$4.00; to Ha Ha Bay and return, \$7.00. Large steamers leave weekly for the Gulf ports; fares to Father Point (with meals and state-room), \$4.00 (175 M.) or 2d class, \$2.00; to Gaspé (443 M.), 1st class, \$10.00; 2d class, \$4.00; by Percé and Paspebiac to Dalhousie, Chatham, and Newcastle, \$14.00; to Shediac, \$15.00; and to Pictou, 1,021 M. from Quebec, \$16.00. The large river-steamers of the Richelieu line leave for Montreal daily. The Allan line of transatlantic steamers despatches one ship weekly during the summer and early fall.

Quebec, "the Gibraltar of America," and the second city in the Dominion of Canada, is situated at the confluence of the St. Charles and St. Lawrence Rivers, 400 M. from the Gulf of St. Lawrence, and 180 M. from Montreal. It has over 60,000 inhabitants, and its chief business is in the handling and exportation of lumber, of which \$5-7,000,000 worth is sent away annually. There are miles of coves along the St. Lawrence shore, arranged for the reception and protection of the vast rafts which come down from the northern forests. A very considerable export trade

in grain is also done here, and the city derives much benefit from being the terminus of transatlantic lines of shipping, which makes it a depot of immigration. Quebec is built nearly in the form of a triangle, bounded by the two rivers and the Plains of Abraham, and is divided into the Upper and Lower Towns, the former being enwalled and strongly fortified and standing on a bluff 350 ft. high, while the latter is built on the contracted strips between the cliffs and the rivers. The streets are narrow, crooked, and often very steep, while the houses are generally built of cut stone, in a style of severe simplicity.

Jacques Cartier set sail from St. Malo, in the spring of 1535, with three well-armed vessels, and steering boldly to the westward, he entered the Gulf of St. Lawrence and gave it its present name, in honor of the saint on whose festival-day he had made the discovery. He ascended to Stadacona, an Indian village on the site of Quebec (whose present name is derived from "Quel bec!" the Norman sailors' shout on seeing the lofty precipice, or else from "Quebeio," an Algonquin word meaning strait.) After ascending to Montreal, Cartier returned to Quebec and wintered there, and in 1640 a fort was erected near Charlesbourg. The place was then deserted until 1608, when Champlain founded Quebec, and built a fort on its present site. Franciscan monks came to the new colony in 1615, and in 1644 a party of Jesuits arrived. In 1628 Sir David Kirk (or Kertk) attacked the place, and in 1629, after a long blockade, the English fleet took Quebec. It was restored to France in 1632, and in 1635 Governor Champlain died here and was buried in the Lower Town. In 1665 a large cargo of ladies arrived from France, and were all disposed of in marriage within a fortnight. In 1672 the Count de Frontenac was sent here as Governor, and in 1690 he bravely repulsed an attack by Sir Wm. Phipps's fleet (from Boston), inflicting severe damage by a cannonade from the fort. Besides many men, the assailants lost their admiral's standard and eight vessels. In 1711 Sir Hovenden Walker sailed from Boston against Quebec, but he lost in one day eight vessels and 884 men by shipwreck on the terrible cliffs of Cape Désespoir. Strong fortifications were built soon after; and in 1759 Gen. Wolfe came up the river with 8,000 British soldiers. The Marquis de Montcalm was then Governor, and he moved the French army into fortified lines on Beauport Plains, where he defeated the British in a sanguinary action. On the night of Sept. 12, Wolfe's army drifted up stream on the rising tide, and succeeded in scaling the steep cliffs beyond the city. They were fired upon by the French outposts; but before Montcalm could bring his forces across the St. Charles the British lines were formed upon the Plains of Abraham; and in the short but desperate battle which ensued both the generals were mortally wounded. The English lost 664 men, and the French lost 1,500. The French army, which was largely composed of provincial levies (with the regiments of La Guienne, Royal Roussillon, Bearn, La Sarre, and Languedoc) gave way, and retreated across the St. Charles, and a few days later the city surrendered.

In April, 1760, the Chevalier de Levis (of that Levis family — Dukes of Ventadour — which claimed to possess records of their lineal descent from the patriarch Levi) led the reorganized French army to St. Foye, near Quebec. Gen. Murray, hoping to surprise Levis, advanced (with 3,000 men) from his fine position on the Plains of Abraham; but the French were vigilant, and Murray was defeated and hurled back within the city gates, having lost 1,000 men and 20 cannon. Levis now laid close siege to the city, and battered the walls (and especially St. John's Gate) from three heavy field-works. Quebec answered with an almost incessant cannonade from 132 guns, until Commodore Swanton came up the river with a fleet from England. The British supremacy in Canada was soon afterwards assured by the Treaty of Paris, and Voltaire congratulated Louis XV. on being rid of "1,500 leagues of frozen country." In the winter of 1775–6 the Americans besieged the city, then commanded by Gen. Guy Carleton (afterwards made Lord Dorchester). The provisions of the besiegers began to fail, their regiments were being depleted by sickness, and their light guns made but little impression on the massive city-walls; so an assault was ordered and conducted before dawn on Dec. 31, 1775. In the midst of a heavy snow-storm Arnold advanced through the Lower Town

from his quarters near the St. Charles River, and led his 800 New-Englanders and Virginians over two or three barricades. The Montreal Bank and several other massive stone houses were filled with British regulars, who guarded the approaches with such a deadly fire that Arnold's men were forced to take refuge in the adjoining houses, while Arnold himself was badly wounded and carried to the rear. Meanwhile Montgomery was leading his New-Yorkers and Continentals N. along Champlain St. by the river-side. The intention was for the two attacking columns, after driving the enemy from the Lower Town, to unite before the Prescott Gate and carry it by storm. A strong barricade was stretched across Champlain St. from the cliff to the river; but when its guards saw the great masses of the attacking column advancing through the twilight, they fled. In all probability Montgomery would have crossed the barricade, delivered Arnold's men by attacking the enemy in the rear, and then, with 1,500 men flushed with victory, would have escalated the Prescott Gate and won Quebec and Canada, — but that one of the fleeing Canadians, impelled by a strange caprice, turned quickly back, and fired the cannon which stood loaded on the barricade. Montgomery and many of his officers and men were stricken down by the shot, and the column broke up in panic, and fled. The British forces were now concentrated on Arnold's men, who were hemmed in by a sortie from the Palace Gate, and 426 officers and men were made prisoners. A painted board has been hung high up on the cliff over the place in Champlain St. where Montgomery fell. Montgomery was an officer in Wolfe's army when Quebec was taken from the French 15 years before, and knew the ground. His mistake was in heading the forlorn hope. Quebec was the capital of Canada from 1760 to 1791, and after that it served as a semi-capital, until the founding of Ottawa City. In 1845 2,900 houses were burnt and the place was nearly destroyed, but soon revived with the aid of the great lumber-trade which is still its specialty.

"There is no city in America more famous in the annals of history than Quebec, and few on the continent of Europe more picturesquely situated. Whilst the surrounding scenery reminds one of the unrivalled views of the Bosphorus, the airy site of the citadel and town calls to mind Innspruck and Edinburgh. Quebec may be best described by supposing that an ancient Norman fortress of two centuries ago had been encased in amber, transported by magic to Canada, and placed on the summit of Cape Diamond."

"Quebec, at least for an American city, is certainly a very peculiar place. A military town, containing about 20,000 inhabitants; most compactly and permanently built, — stone its sole material; environed, as to its most important parts, by walls and gates, and defended by numerous heavy cannon: . . . founded upon a rock, and in its highest parts overlooking a great extent of country; 3-400 miles from the ocean, in the midst of a great continent, and yet displaying fleets of foreign merchantmen in its fine, capacious bay, and showing all the bustle of a crowded seaport; its streets narrow, populous, and winding up and down almost mountainous declivities; situated in the latitude of the finest parts of Europe, exhibiting in its environs the beauty of an European capital, and yet in winter smarting with the cold of Siberia; governed by a people of different language and habits from the mass of the population, opposed in religion, and yet leaving that population without taxes, and in the enjoyment of every privilege, civil and religious: such are the prominent features which strike a stranger in the city of Quebec." (PROF. SILLIMAN.)

"Few cities offer so many striking contrasts as Quebec. A fortress and a commercial city together, built upon the summit of a rock like the nest of an eagle, while her vessels are everywhere wrinkling the face of the ocean; an American city inhabited by French colonists, governed by England, and garrisoned by Scotch regiments; a city of the Middle Ages by most of its ancient institutions, while it is subject to all the combinations of modern constitutional government; an European city by its civilization and its habits of refinement, and still close by the remnants of the Indian tribes and the barren mts. of the North; a city with about the same latitude as Paris, while successively combining the torrid climate of southern regions with the severities of an hyperborean winter; a city at the same time Catholic and Protestant, where the labors of our (French) missions are still uninterrupted alongside of the undertakings of the Bible Society, and where the Jesuits, driven out of our own country, find refuge under the ægis of British Puritanism." (X. MARMIER'S "*Lettres sur l'Amérique*," 1860.)

"Leaving the citadel, we are once more in the European Middle Ages. Gates and posterns, cranky steps that lead up to lofty, gabled houses, with sharp French roofs of burnished tin, like those of Liege ; processions of the Host ; altars decked with flowers ; statues of the Virgin ; sabots ; blouses ; and the scarlet of the British linesman, — all these are seen in narrow streets and markets that are graced with many a Cotentin lace cap, and all within 40 miles of the down-east, Yankee State of Maine. It is not far from New England to Old France. . . . There has been no dying out of the race among the French Canadians. They number twenty times the thousands that they did 100 years ago. The American soil has left their physical type, religion, language, and laws absolutely untouched. They herded together in their rambling villages, dance to the fiddle after mass on Sundays, — as gayly as once did their Norman sires, — and keep up the *fleur-de-lys* and the memory of Montcalm. More French than the French are the Lower Canada *habitans*. The pulse-beat of the continent finds no echo here." (SIR CHARLES DILKE.)

The **Durham Terrace** is on the riverward edge of the Upper Town, and stands on the buttresses and platform formerly occupied by the Château of St. Louis, which was built by Champlain in 1620. The old château was a massive stone structure, 200 ft. long, used for a fortress, prison, and governor's palace, and it stood until 1834, when it was ruined by fire. The terrace is 200 ft. above the river, and commands a * view of surpassing beauty. Immediately below are the sinuous streets of the Lower Town, with its wharves projecting into the stream. On one side are the lofty, fortified bluffs of Point Levi, and on the other the St. Charles River winds away up its peaceful valley. The white houses of Beauport stretch off to the vicinity of the Montmorenci Falls, while beyond are seen the farms of L' Ange Gardien, extending towards the heights of St. Fereol. Vessels of all classes and sizes are anchored in the broad basin and the river, and the rich and verdant Isle of Orleans is in mid-stream below. Beyond and over all are the bold peaks of the Laurentian Range, with Cap Tourmente towering over the river far in the distance. The Terrace is the favorite promenade of the citizens, and presents a pleasant scene in the late afternoon or on pleasant Sundays. At the upper end of the Terrace is a plain stone structure called the Old Château, which was built about 1780 for the British governors.

"There is not in the world a nobler outlook than that from the terrace at Quebec. You stand upon a rock overhanging city and river, and look down upon the guard-ships' masts. Acre upon acre of timber comes floating down the stream above the city, the Canadian boat-songs just reaching you upon the heights ; and beneath you are fleets of great ships, English, German, French, and Dutch, embarking the timber from the floating docks. The Stars and Stripes are nowhere to be seen." (SIR CHARLES DILKE.)

The *Place d'Armes* is a pretty little park between the Terrace and the **Anglican Cathedral**, a large, plain building of stone, which has a superb communion-set (presented by George III.), and within which is the tomb of Charles, Duke of Richmond, Lennox, and Daubigny, who died while Governor-General of Canada (1819). The monument of Jacob Mountain, D. D., first Anglican Bishop, is in the chancel. Dr. Mountain was in the presence of King George, when he expressed a doubt as to whom he should

appoint as bishop of the new See of Quebec. Said the doctor, "If your Majesty had faith, there would be no difficulty." "How so?" said the king. Mountain answered, "If you had faith, you would say to this Mountain, Be thou removed into that See, and it would be done." It was. The Cathedral, rectory, and Chapel of All Saints, stand on ground formerly occupied by the Franciscan (Recollet) monks, and on the same tract the *Court House* is built, fronting on St. Louis St. Beyond the Court House is the Masonic Hall, opposite which are the old buildings of the Commissariat and Crown Lands Departments, and the St. Louis Hotel.

Around the Ramparts.

The Street des Carrières runs S. from the Place d'Armes to the *Governor's Garden*, a pleasant summer-evening resort, with a monument 65 ft. high, erected in 1827 to the memory of Wolfe* and Montcalm, and bearing the elegant and classic inscription :

MORTEM. VIRTUS. COMMUNEM.

FAMAM. HISTORIA.

MONUMENTUM. POSTERITAS.

DEDIT.

In the lower garden is a battery which commands the harbor. Des Carrières St. leads to the inner *glacis* of the Citadel, and by turning to the r. on St. Denis St., its northern outworks and approaches may be seen. Passing a cluster of barracks on the r., and the Chalmers (Pres.) Church on the l., and turning to the l. on St. Louis St., the **St. Louis Gate** is soon reached. A road turning to the l. just inside the Gate leads through deep, entrenched passages commanded by powerful batteries, and by the Chain Gate to the Dalhousie Gate of **The Citadel**. This immense fortification covers 40 acres of ground, and is situated on the summit of Cape Diamond (so called from the glittering crystals found in the vicinity), which is said to be "the coldest place in the British Empire." Since the evacuation of Canada by the Imperial troops, the Citadel has been garrisoned by provincial volunteers, and visitors are usually permitted to pass around the walls under the escort of a soldier. The * view from the most northerly bastion (which contains an immense Armstrong gun) surpasses that from the Durham Terrace, and is one of the most magnificent in the world. The *Esplanade* extends to the r. from the St. Louis Gate, and the tourist is recommended to walk along the ramparts to St. John's Gate, viewing the deep fosse, the massive outworks, and the ancient ordnance at the embrasures. On the r. are the Stadacona Club House, the Congregational (Catholic) Church, and the National School; while the suburban ward of Montcalm is on the l. **St. John's Gate** is a modern structure, and is both strong and graceful. While rallying his soldiers

just outside of this Gate, the Marquis de Montcalm was mortally wounded (in 1759), and Col. Brown (of Mass.) attacked the Gate while Arnold and Montgomery were fighting in the Lower Town. The ramparts must be left here, and D'Auteuil and St. Hélène Sts. follow their course by the Artillery Barracks (built by the French in 1750) to the **Palace Gate**, close to which is the *Hôtel Dieu Convent*. This institution was founded by the Duchesse d'Aguillon (niece of Cardinal Richelieu) in 1639. In 1654 one of the present buildings was erected, and most of it was built during the 17th century, while Talon, Baron des Islets, completed it in 1762. There are 30 - 40 nuns of the order of the *Hopitalières*, and the hospital is open freely to the sick and infirm poor of whatever sect, with attendance by the best doctors of the city. Among the pictures here are, Virgin and Child, by *Coypel*; Nativity, *Stella*; St. Bruno, by *LeSueur*, "the Raphael of France." From Palace Gate to Hope Gate (900 ft.) the ramparts may be followed, with fine views over the two rivers, the Isle of Orleans, and the Laurentian Mts. The walls are built on a lofty cliff, and are very thin, but have lines of loopholes and are guarded by bastions. **Hope Gate** was built in 1784, and has well-fortified approaches. The ramparts may be followed from this point to the Parliament House, passing the stately *Laval University* and the *Grand Battery*, where 22 32-pounders command the river, and whence a pleasing view may be obtained. The **Parliament House** is on the site of Champlain's fort and the ancient Episcopal palace, and is an extensive but plain building, whose glory has departed since the decapitalization of Quebec. A short distance beyond is the **Prescott Gate**, the main avenue of communication between the Upper and Lower Towns, and Durham Terrace is just S. of the Gate.

The **Market Square** is nearly in the centre of the Upper Town, and presents a curious and interesting appearance on market-mornings, when the French peasantry bring in their farm products. On the E. is the Roman *Cathedral of the Immaculate Conception*, which was built in 1666, destroyed by cannonading from Wolfe's batteries in 1759, and rebuilt soon after. Its exterior is quaint, irregular, and homely, but the interior is more pleasing, and accommodates 4,000 persons. The High Altar is well adorned, and the choir of boys from the Seminary is much esteemed. The most notable pictures are, ** The Crucifixion ("the Christ of the Cathedral," the finest painting in Canada), by *Van Dyck* (on the first pillar l. of the altar); the Ecstasy of St. Paul, *Carlo Maratti*; the Annunciation, *Restout*; the Baptism of Christ, *Hallé*; the Pentecost, *Vignon*; Miracles of Ste. Anne, *Plamondon*; Angels Waiting on Christ, *Restout* (in the choir); the Nativity, copy from *Annibale Caracci*; Holy Family, *Blanchard*. The remains of Champlain, the heroic explorer and founder and first Governor of Quebec, are in the Cathedral. Alongside of the Cathedral are the ancient, rambling, and extensive buildings of the **Semi-**

nary, which was founded in 1663 by François de Montmorenci Laval, Bishop of Quebec from 1658 to 1688. This institution is divided into *Le Grand Séminaire* and *Le Petit Séminaire*; the first being a school of theology, and the second being devoted to literature and science (for boys). There are about 400 students, who may be distinguished in the streets by their uniform.

The **Seminary Chapel** has some fine paintings (beginning at the r. of the entrance): The Saviour and the Samaritan Woman, *La Grenée*; The Virgin Attended by Angels, *Dieu*; The Crucifixion, *Monet*; The Hermits of the Thebaid, *Guillot*; The Vision of St. Jerome, *D'Hullin*; *The Ascension, *Phillipe de Champagne*; The Burial of Christ, *Hutin*; (over the altar) The Flight into Egypt, *Vanloo*; above which is a picture of angels, *Lebrun*; The Trance of St. Anthony, *Parrocel d'Avignon*; The Day of Pentecost, *P. de Champagne*; St. Peter Freed from Prison, *De la Fosse*; The Baptism of Christ, *Hallé*; St. Jerome Writing, *J. B. Champagne*; Adoration of the Magi, *Bonnien*. "The Chapel on the r. of the chief altar contains the relics of St. Clement; that on the l. the relics of St. Modestus."

Adjoining the Seminary is its goodly child, the **Laval University**, whose main building is of cut stone, 305 ft. long and 5 stories high, and cost \$240,000. The museum of Huron antiquities, the collection of Canadian birds, the library of nearly 50,000 volumes, the fine scientific instruments, the great hall of convocation, and the far-viewing, enrailed promenade on the roof are all worthy of a visit. The extensive dormitories and the medical college occupy substantial stone buildings in the vicinity.

On the W. side of the Market Square is the great pile of buildings which were partly erected in 1646, for the Jésuits' College. The college was suspended in 1759 by Gen. Murray, who quartered his troops here, and in 1809 the property reverted to the Crown, on the death of the last of the Jesuit Fathers. The buildings have since been used for barracks, when used at all. Passing St. Anne's Market and the Anglican Cathedral, Garden St. runs S. to the **Ursuline Convent**, which was founded by Madame de la Peltrie in 1639. Part of the present buildings were built in 1686, and with the gardens and offices they cover 7 acres. There are 40 nuns, who are devoted to teaching girls, and also to working in embroidery, painting, &c. The parlor and chapel are open to visitors, and in the latter are some good paintings: *Mater Dolorosa, *Van Dyck*; 'The Saviour, *Champagne*; Christ in Simon's House, *Champagne*; and a small picture by *Restout*. Within a grave made by a shell which burst in this chapel, during Wolfe's bombardment, is buried "the High and Mighty Lord, Louis Joseph, Marquis of Montcalm," and over his remains is the inscription, "Honneur à Montcalm! Le destin en lui dérobant la victoire l'a récompensé par une mort glorieuse!" *Morrin College* (on St. Anne St.) is a neat stone building, in one of whose halls is the extensive and valuable library of the Quebec Historical Society (open to the public). There are several other churches and public buildings among the

narrow streets of the Upper Town. *St. Patrick's*, on St. Helen St., has a neat Ionic interior, and the church, manse, and school of St. Andrew (Presbyterian) occupy stone buildings on St. Anne St. At the corner of St. John and Palace Sts. (second story) is a statue of Wolfe, which is nearly a century old, and bears such a relation to Quebec as does the Mannikin to Brussels. It was once stolen by night by some roystering naval officers, and carried off to Barbadoes, whence it was returned many months after, enclosed in a coffin. In the front of the Post-Office, on Buade St., is a figure of a dog, carved in the stone and gilded, under which is the inscription :—

“ Je suis un chien qui ronge l'os ;
En le rongeant je prend mon repos.
Un temps viendra qui n'est pas venu
Que je mordrais qui m'aura mordu.”

(“ I am a dog gnawing a bone.
While I gnaw I take my repose.
The time will come, though not yet,
When I will bite him who now bites me.”)

This lampoon was aimed at the Intendant Bigot by M. Philibert, who had suffered wrong from him ; but soon after the carved stone had been put into the front of Philibert's house, that gentleman was assassinated by an officer of the garrison. The murderer exchanged into the East Indian army, but was pursued by Philibert's brother, and after a severe conflict was killed at Pondicherry. Near the Post-Office is the large and elegant building of the *Bishop's Palace*. Mountain St. descends through the Prescott Gate to the Lower Town, with the steep, crowded, and picturesque *Champlain Steps* on the r., near whose foot the remains of Champlain were recently found, in the vault of an ancient chapel.

The Montcalm and St. John Wards extend W. from the city walls to the line of the Martello Towers. In the latter ward is the large Church of St. John (Catholic), and also the *Gray Nunnery* (70 sisters), with a lofty and elegant chapel. Above the Nunnery and fronting on the *glacis* is the Convent of the Christian Brothers. The steep street called Côté d'Abraham descends thence to the Jacques Cartier Ward of the Lower Town, beyond which, on the banks of the St. Charles, is the **Marine Hospital**, a large and imposing modern building in Ionic architecture (with 6 acres of grounds) ; and the **General Hospital**, an extensive pile of buildings, founded by De Vallier, second bishop of Quebec (in 1693), and conducted by 40–50 nuns of St. Augustine. The churches of *St. Sauveur* (in the Banlieu) and *St. Roch* are large structures, with many inferior pictures, and the *Black Nunnery* is near the latter. St. Roch's Ward is mostly devoted to manufactories and to shipbuilding (on the St. Charles shore). St. Paul St. runs E. between the fortified cliffs and the river, to St. Peter St., which turns S., and near which are the chief banks, wholesale houses, and harbor offices. At the neighboring wharves are the ships and ocean-steamers, with many small and dirty steamboats which ply to the neighboring river-towns. The *Custom House* (near Pointe à Garcy) and the *Champlain Market* are in this quarter, and are fine stone

buildings. The Church of Notre Dame des Victoires is a plain old structure near the market, which dates from before 1690. It was so named, and was decorated with trophies, in gratitude for the defeat of Sir Wm. Phipps' attack in 1690, and the terrible disaster to Admiral Walker's expedition at Cape Désespoir. The Queen's Fuel Yard is below the Palace Gate, and occupies the site of an immense range of buildings erected by Bigot, 13th and last Royal (French) Intendant. Here he lived in all the feudal splendor of the old French *noblesse*, on the revenues which he extorted from the oppressed province. In 1775 the palace was captured by Arnold's Virginia riflemen, who so greatly annoyed the garrison that the buildings were set on fire and consumed by shells from the batteries of the Upper Town. Under the plea of "municipal improvements," it is stated that considerable portions of the old city walls are now (1873) being removed.

Environs of Quebec.

Point Levi is across the river from Quebec, and is a rapidly growing place, where the Grand Trunk Railway terminates. Upon the steep bluffs are two neat churches, and a short distance to the E. is a series of powerful earthworks, intended to prevent the establishment of hostile batteries within shelling distance of Quebec. 18 M. from Point Levi are the * *Falls of the Chaudière*, where that river dashes, in a sheet 350 ft. wide, down a precipice 150 ft. high. The Chaudière descends from Lake Megantic, near the Maine frontier, passing through the Canadian gold-fields. Arnold's hungry and heroic army followed the course of this river from its source to its mouth. (See page 313).

Cap Rouge is 9 M. from Quebec, and may be reached by the Grande Allée, passing out of the St. Louis Gate. The road leads by the Canada Military Asylum, St. Bridget's Asylum, and the jail, and near the toll-gate (on the l.) is seen a monument inscribed, "Here died Wolfe, Victorious." The scene of the Battle of the Plains is on either hand, and the Plains of Abraham stretch away to the S. There are four Martello Towers on the neighboring fields, each built in a circular form and of heavy masonry, while the massive stone jail, being provided with long lines of loopholes, is an efficient outwork. About 2 M. out, the *Mount Hermon Cemetery* is passed, with the elegant Chapel of St. Michael, and the whole distance between the city and Cap Rouge is lined with fine old villas of the *noblesse* and gentry of Lower Canada. Redclyffe Mansion is on the cape, near where Roberval wintered in 1641, and in the same vicinity batteries were erected by Montcalm and Murray. In returning to the city, it is best to turn to the l. at St. Albans, and gain the Ste. Foy road. The broad and smiling valley of the St. Charles is overlooked from this road, and Lorette may be seen in the distance. As the city is nearly

approached, on the l. is seen a monumental column surmounted by a statue of Bellona (presented by Prince Napoleon), which marks the site of the fiercest part of the Second Battle of the Plains, when De Levis defeated Murray (1759). The monument was dedicated with great pomp in 1854, and stands over the grave of many hundreds who fell in the fight. Passing now the handsome Finlay Asylum and several villas, the suburb of St. John is entered.

Indian Lorette is 9 M. from Quebec, by the Little River Road. It is an ancient village of the Hurons ("Catholics and allies of France"), and the present inhabitants are a quiet and religious people in whom the Indian blood predominates, though it is never unmixed. The men hunt and fish, the women make bead-work and moccasins, and the boys earn pennies by dexterous archery. The Lorette Falls, near the village, are very pretty, and a few miles farther inland are the Lakes of Beauport and St. Charles. The latter is 4 M. long, and is famed for its red trout and for its remarkable echoes.

Charlesbourg, 4 M. from Quebec, is an ancient village, with two Catholic churches, situated on a pleasant and picturesque road. In the vicinity is the *Hermitage*, or Château Bigot, a gray and romantic ruin at the foot of Mt. des Ormes, where Bigot, the last intendant of Canada, kept and visited a lovely Algonquin girl, until his wife discovered the secret, and soon thereafter the Indian maiden was cruelly murdered.

The ** **Falls of Montmorenci** are about 8 M. from the city, by a road which crosses the St. Charles River, passes several fine old mansions, and traverses the long, straggling village of *Beauport*, with its stately church and roadside crosses. The falls are 250 ft. high and 50 ft. wide, — a solid and compact mass of water incessantly plunging over a precipice of black rock, with clouds of mist and a deafening roar. The Montmorenci flows into the St. Lawrence a short distance below. Near the falls is Haldimand House, formerly occupied by the Duke of Kent, Queen Victoria's father; and on the cliffs by the river are seen the towers of a suspension bridge which fell soon after its erection, hurling three persons into the fatal abyss below. A small fee is charged for entering the fields to view the falls, and the tourist must be careful, not only to visit the pavilion near the falls (which commands also a charming view of Quebec), but to insist on being conducted to a position low down on the shore, from which the stupendous plunge of the Montmorenci may best be seen. About 1½ M. above the falls are the *Natural Steps*, where the river has cut the ledges into a similitude to steps, meanwhile contracting its channel. The views on the road back to Quebec are very beautiful. At the foot of these falls an immense ice-cone (sometimes 200 ft. high) is formed every winter, and here the favorite sport of tobogginning is carried on.

Ste. Anne is 24 M. below Quebec (tri-weekly steamers), and has a small

inn. 2-3 M. from the inn are the beautiful *Falls of Ste. Anne*, below which the river of the same name dashes down through a dark and sombre ravine. The *Falls of St. Fereol*, the Seven Falls, and other remarkable objects, are in this vicinity, while just W. of the village is Mt. Ste. Anne, a picturesque summit 2,687 ft. high. Lake St. Joachin is a few miles distant, and abounds in trout, while 6-8 M. below is the bold mountain-promontory called *Cap Tourmente*. Within the village is the beautiful little pilgrimage-church of Ste. Anne, where it is said that many surprising miracles have been wrought by relics of La Bonne Ste. Anne (which are kept in a crystal globe). Crutches and other helpers of the sick and deformed are hung upon the walls of the sacristy, their owners having been made whole, while numerous rude votive pictures adorn the chapels. *Château Richer* is S. of Ste. Anne, and has the ruins of a Franciscan monastery on a bold point over the river. This monastery was built in 1695, and was so sturdily defended against Gen. Wolfe (even the monks fought) that he was obliged to destroy it by cannonading. From the parish-church, near the ruins, beautiful views are gained of L'Ange Gardien, Cape Diamond, and the *Isle of Orleans*, "the Garden of Lower Canada." This isle is 20 M. long and 5-6 M. wide, and is famed for its rich soil. Cartier, in 1535, named it the Isle of Bacchus, and in 1676 it was made into the Earldom of St. Laurent.

The **Saguenay River** (Ha Ha Bay) is 132 M. from Quebec, and steamers run semi-weekly. Below the St. Marguerite Islands (of which Goose and Crane are the largest), the St. Lawrence attains and keeps a width of about 20 M. with 18 ft. tides, and with seals, porpoises, and whales playing in the clear salt water. The Isle of Orleans is passed on the N., and the quarantine stations on *Grosse Isle* are seen, near the vast promontory of Cap Tourmente. The *Isle aux Coudres* has a population more purely Norman in its blood and habits than any other in Canada. Ste. Anne, on the S. E. shore, has a Catholic College (French), and *Malbaie* (Murray Bay), 80 M. from Quebec, is a favorite summer-resort for the better classes of the French Canadians. The steamer crosses to *Rivière du Loup*, the terminus of the Grand Trunk Railway on the E.; 6 M. from which is **Cacouna** (St. Lawrence Hall, &c.), the Newport of Canada, where thousands of visitors enjoy sea-bathing during the heats of summer. Tri-weekly stages run from *Rivière du Loup* to the *Grand Falls* of the St. John River, whence stages connect with route 49 (see page 323). The steamer now crosses the wide river to *Tadousac* (large summer-hotel), a post of the Hudson's Bay Company at the mouth of the Saguenay River. Tadousac was early fortified by the French; it was the residence of Père Marquette, who explored the Mississippi Valley; and it now has a venerable Catholic church, which is said to be more than 2½ centuries old. The vast cañon through which the Saguenay rolls its black

waters is now entered, and lofty peaks and palisades tower on either side. After passing La Boule and the Profiles, 34 M. above Tadousac, the majestic * **Cape Trinity** and **Cape Eternity** rise on the S. to the height of 2,000 ft. each, guarding the entrance to Trinity Bay. The water at the base of these peaks is over 600 fathoms deep.

“Suddenly the boat rounded the corner of the three steps, each 500 ft. high, in which Cape Eternity climbs from the river, and crept in under the naked side of the awful cliff. It is sheer rock, springing from the black water, and stretching upward with a weary, effort-like aspect, in long impulses of stone marked by deep seams from space to space, till, 1,500 ft. in air, its vast brow beetles forward, and frowns with a scattering fringe of pines. . . . The rock fully justifies its attributive height to the eye, which follows the upward rush of the mighty acclivity, steep after steep, till it wins the cloud-capt summit, when the measureless mass seems to swing and sway overhead, and the nerves tremble with the same terror that besets him who looks downward from the verge of a lofty precipice. It is wholly grim and stern; no touch of beauty relieves the austere majesty of that presence. At the foot of Cape Eternity the water is of unknown depth, and it spreads, a black expanse, in the rounding hollow of shores of unimaginable wildness and desolation, and issues again in its river's course around the base of Cape Trinity. This is yet loftier than the sister cliff, but it slopes gently backward from the stream, and from foot to crest it is heavily clothed with a forest of pines. The woods that hitherto have shagged the hills with a stunted and meagre growth, showing long stretches scarred by fire, now assume a stately size, and assemble themselves compactly upon the side of the mountain, setting their serried stems one rank above another, till the summit is crowned with the mass of their dark green plumes, dense and soft and beautiful; so that the spirit, perturbed by the spectacle of the other cliff, is calmed and assuaged by the serene grandeur of this.”
— From W. D. HOWELLS'S *A Chance Acquaintance*.

Statue Point and Les Tableaux are next passed, and then *Ha Ha Bay* is reached, with its two small villages, 10–12 M. above which is *Chicoutimi*, at the head of ship navigation. 80 M. farther N., in the bosom of a vast and desolate wilderness, is the reservoir of the Saguenay, the great Lake of St. John.

From Quebec to Springfield, Hartford, New Haven, and New York, see Route 24. From Quebec to Boston, by Lake Memphremagog, White River Junction, and Concord, see Routes 24 and 29; to Boston, by way of Gorham, Portland, and the sea-shore, see Routes 40 and 37; or by way of Gorham, Portland, and Lawrence, see Routes 40 and 38.

The Date Due Card in the pocket indicates the date on or before which this book should be returned to the Library.

Please do not remove cards from this pocket.

BOSTON PUBLIC LIBRARY

South Boston Branch.

Shelf No.

206388

Two books allowed at a time, to be kept 14 days (or 7 days in the case of certain recent publications). Not to be renewed.

Borrowers finding this book mutilated are expected to report it.

EXTRACT FROM RULES.

ARTICLE VI.

SECTION 1. Any person who detains a volume beyond the time for which it is lent shall pay a fine of two cents for each and every day of such detention, and three cents for each notice of such detention sent by post. For every two weeks a book is so detained beyond the time limit, such person shall pay an additional fine of twenty-five cents.

SECTION 2. A book so detained for more than four weeks shall be considered lost, and the person detaining it shall, in addition to accrued fines, pay the full cost of replacing such book. No books shall be delivered to any person, or upon his Library Card, until all fines and charges due from him are paid.

Keep Your Card in this Pocket.
